A testament to our
Gold Standard in
Exceptional patient care.

- Country's **first pediatric hospital** to have 2 flagship hub hospitals, one each in Hyderabad and Bengaluru, **awarded with JCI Accreditation**
- Country's **first standalone fertility center** BirthRight Fertility, Kondapur, Hyderabad received **re-accreditation** from **JCI**

An insight into the Rainbow approach

Dr. Ramesh Kancharla

Pediatric Healthcare Visionary

Chairman & Managing Director

Dr. Ramesh comes from an agricultural background from a village in Andhra Pradesh, India where the accessibility to healthcare was very poor. This motivated Dr. Ramesh to pursue medical education

Garnered rich experience in pediatric gastroenterology and liver disease at best pediatric hospitals in the United Kingdom and got exposed to the nuances of pediatric healthcare model at these hospitals

Lack of quality pediatric healthcare in the country and his resolve that no child should suffer due to lack of dedicated medical facilities led to the foundation of Rainbow Children's Hospitals in 1999

Rainbow is currently the country's largest pediatric hospital chain with 24¹ hospitals spread across 9 cities

Bestowed with Healthcare leader of year award by the Financial Express, Healthcare award, 2024

¹Including HRBR Hospital, Bengaluru

25 years of Rainbow Journey

1999-2010

Established standalone pediatric specialty hospital concept

Integrated perinatal services within the children's hospital

Expansion within Hyderabad and a new city - Vijayawada

Nurtured perinatal services

Enhanced Pediatric multi specialty and tertiary care services

Investment by the CDC Group, UK

Foray into newer cities - Bengaluru and New Delhi

Hub and Spoke model nurtured in Hyderabad

2011-2020

Successful listing on the stock exchanges - NSE and BSE

Largest chain of comprehensive pediatric care with cutting-edge quaternary care services

Largest pediatric training program in private healthcare in the country

Venturing into newer territories: Chennai and Visakhapatnam

Pioneering the way: The first pediatric and fertility hospital to earn prestigious JCI accreditation in the country

2021-2024

Acquisition of:

Prashanthi Hospital, Warangal & Pratiksha Hospital, Guwahati

Commencement of spoke hospitals at Rajahmundry, Electronic City and HRBR, Bengaluru

2025 - 2026

Footprint of Rainbow Hospital

OUR NETWORK

24 Hospitals¹

5 Out-patient clinics

6,9 States, Cities

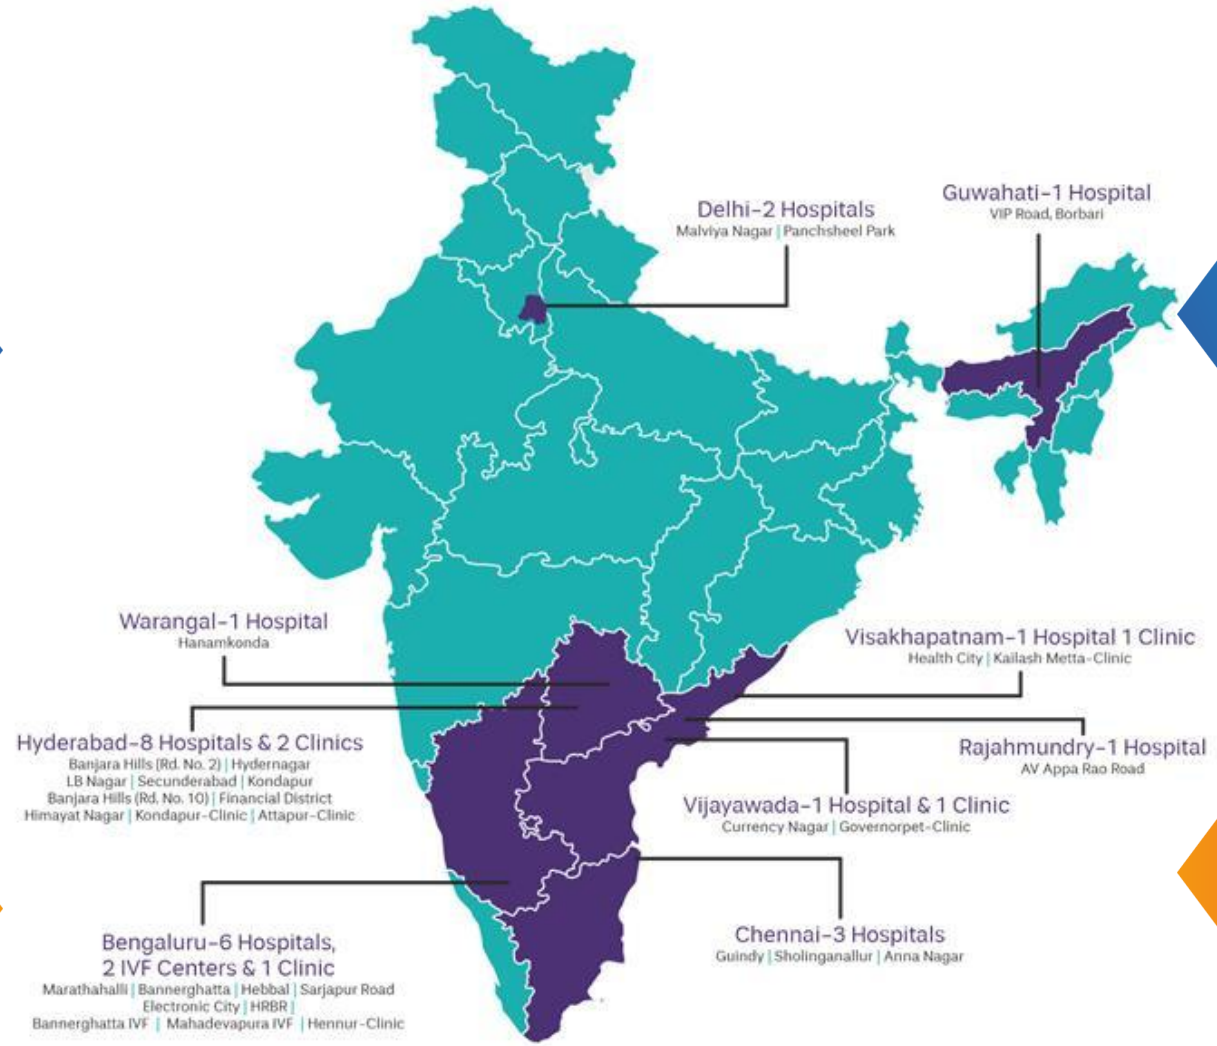

1,050+ Doctors³

Capacity beds¹ **2,435**

Out-patient visits² **1,598k+**

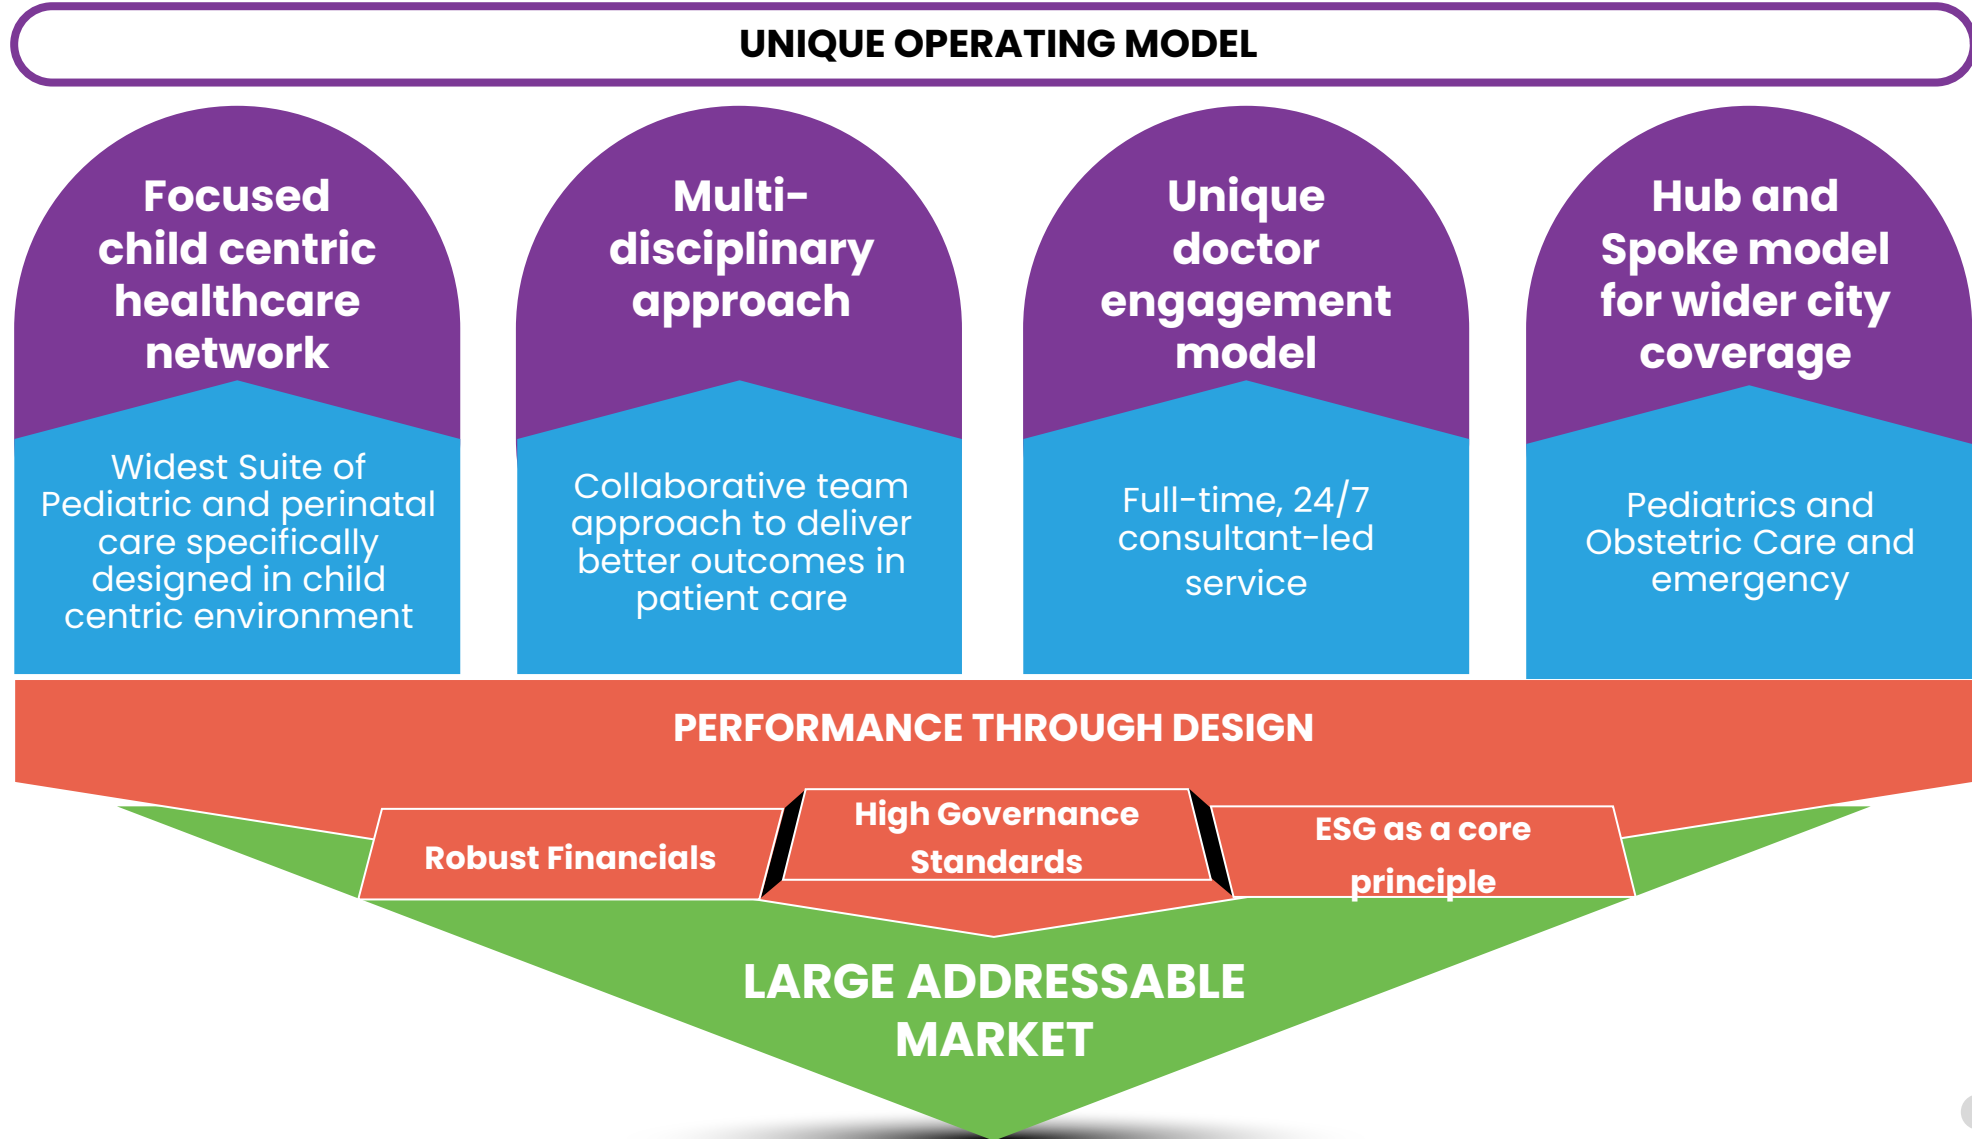

In-patient admissions² **104k+**

Deliveries² **19k+**

Note: ¹ Including HRBR Hospital, Bengaluru
²Numbers for FY26; ³ Including full time residents and DNB

A novel approach to pediatric healthcare delivery

Ability to conceptualize, create and operate specialized children's hospitals

Children Centric Hospitals

Children centric environment and soothing interiors help in children to recover faster

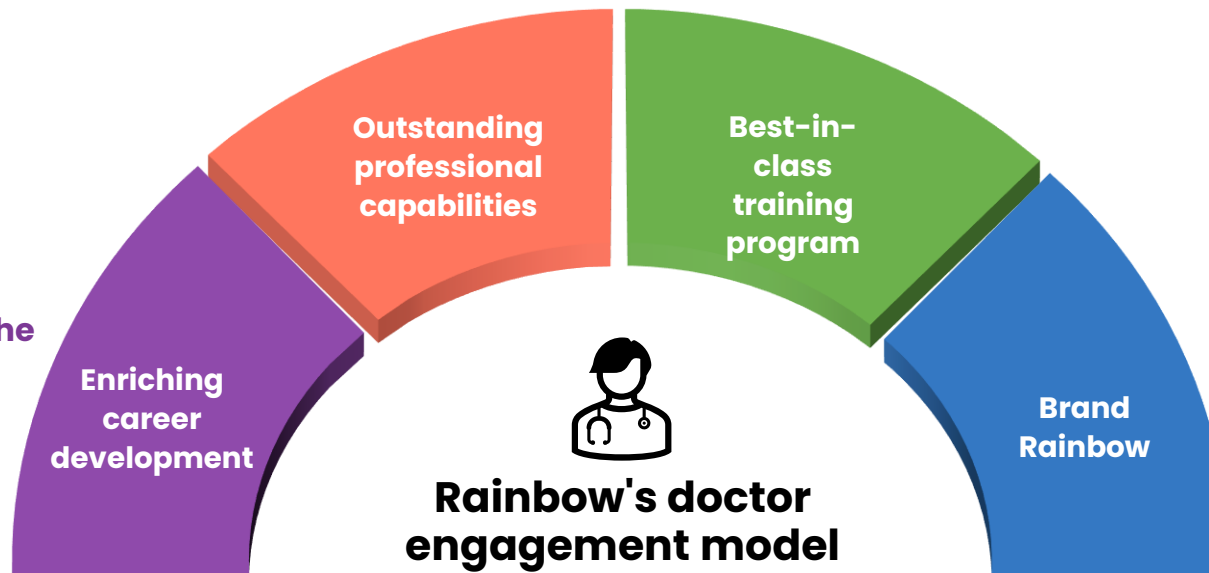

Allocation of significant portion of capex towards interiors of hospitals for creating congenial environment

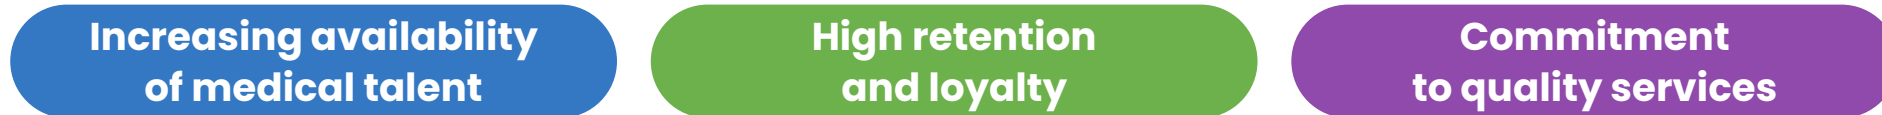

Doctor engagement model fostering loyalty and sustainability with an institution-first approach

- **1050+ full time doctors**
- **A number of doctors trained or possess qualifications from the UK, USA, Canada, Australia**
- **Modern infrastructure and clinical back-up to provide quality care**
- **Recognised as MRCPCH Examination Centre**
- **Recognised as training center¹ by National Board of Examinations**
- **Leading training program in India approved by National Board of Examinations**

- **Retainer/Support in beginning years**
- **Competitive compensation and rewards**
- **Opportunities to grow, absorb in the Rainbow network**
- **Multidisciplinary approach to create comprehensive clinical environment and better work life balance**

- **Two decades of pioneering work**
- **One of the advanced institutes offering all Pediatrics specialities under one roof including quaternary care**
- **One of the leading comprehensive perinatal centres**

Note: ¹ For offering training in Pediatrics, Neonatology, Pediatrics Intensive Care, Pediatric subspecialties, Obstetrics and Gynaecology

The specialist in **comprehensive children's care**

Full suite of Pediatric offerings

Pediatric Secondary Care

- Pediatric outpatients
- Immunizations
- Developmental Screening
- Acute and seasonal illness

Pediatric Tertiary Intensive Care

- Care of preterm babies with low/extremely low birth weight
- Newborn emergency transports
- Neonatal surgical Services
- Advanced ventilation including HFOV
- Pediatric neurocritical care services
- ECMO services

Pediatric Multi-specialty & Quaternary Care

- Pediatric Surgery, urology and minimally invasive surgery
- Pediatric Cardiology and cardiac surgery
- Pediatric Neurology and neuro-surgery
- Pediatric Haemato-oncology
- Pediatric Gastroenterology and liver diseases
- Pediatric Nephrology
- Pediatric Pulmonology and allergy
- Pediatric transplantation (liver, kidney, bone-marrow)
- CRRT, plasmapheresis, hemodialysis

**~1/3 of Beds Allocated
to Critical Care**

**3 Hospitals
Accredited by JCI#**

**13 Hospitals
Accredited by NABH**

Comprehensive perinatal care provider, with synergies between Pediatric and perinatal services

Comprehensive services for all pediatric care needs

Pediatrics

- 24*7 full spectrum of Pediatric multi specialty cover with level 4 NICU care

Coordinated handholding for both perinatal and pediatric services

Ease of seeing both pediatrician and obstetrician

- Comprehensive perinatal service
- 24/7 Obstetrics, anesthesia, blood bank
- Maternity ICU

Obstetrics, Fetal Medicine & Fertility

Fully integrated maternity care and fertility services

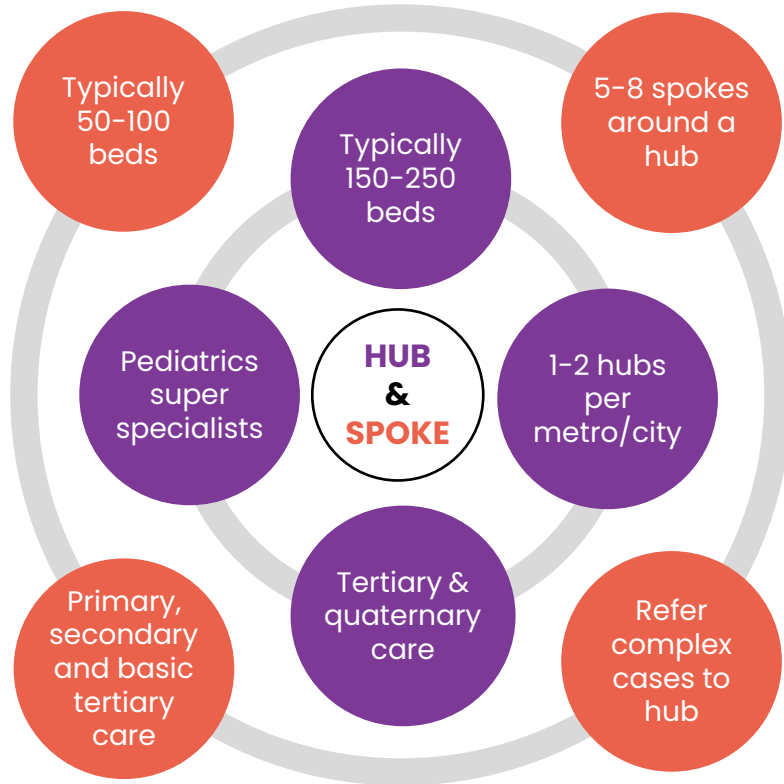

Accessibility/nativity/comfort/
knows the system/strong
recommendation from pediatrician

Full range of fetal service included
cardiac echo/neonatologist
consultation prior to delivery

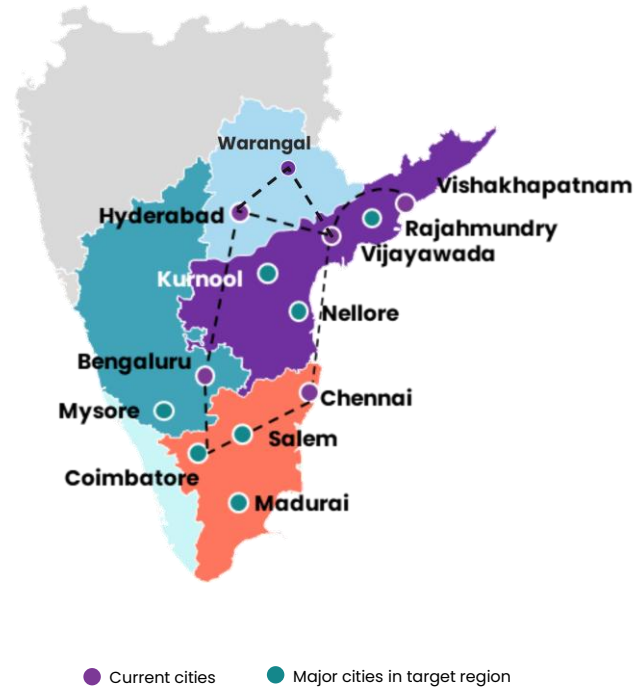

Hub and Spoke approach to **optimise delivery of patient care services** at scale

City level hub and spoke model

Accessibility of super-specialty at hubs, general pediatrics at spokes

Regional level "South Connect" model

Regional spokes at 200-250 kms from city hubs

Regional spokes to provide high quality Pediatric, obstetrics and gynaecology care at tier-II cities and act as connecting bridge to address a large market

- Robust transport network to save sick newborn and children from districts
- Establish Pediatric sub-specialty outreach clinic at districts
- Provide emergency service for maternal and Pediatric patients

Financially prudent expansion

Network effect and synergies enhance operational efficiencies

Hub & Spoke Model

Hyderabad

Bengaluru

Chennai

● Hub ● Spoke ● Upcoming Hospital

- Hub Hospital is centrally situated, providing accessibility from all parts of the city
- Spokes hospitals are situated at areas experiencing rapid growth and development, strategically located to ensure convenient access for nearby towns and cities

Robust governance framework

High Governance Standard

Key Developments

Commencement of new 60 beds hospital at HRBR and a dedicated IVF centre at Mahadevapura, Bengaluru

- **Comprehensive Women & Child Healthcare:** The 60 beds HRBR Hospital offers integrated obstetric, gynecology, neonatal, pediatric intensive care, emergency, and specialty pediatric services, supported by an experienced team of clinicians and 24/7 consultant-led care.
- **Advanced Fertility Care Expansion:** The ~10,000 sq. ft. Mahadevapura IVF Centre, is one of the most advanced fertility centres with comprehensive reproductive, diagnostic and assisted fertility services under the **BirthRight by Rainbow** brand.
- **Leveraging the Hub-and-Spoke Model:** Both centres operate as strategic spokes and complements services offered at Marathahalli hub, enabling strong referral linkages, operational efficiencies.
- **Largest pediatric and perinatal in Bengaluru:** Rainbow now operates a network of ~600 beds across six hospitals, one outpatient clinic, and two dedicated fertility centers strengthening its position as the largest pediatric and perinatal care network in Bengaluru

Appendix

A tough decision for a young couple

- A 33-year-old woman came with a heartbreaking history of repeated mid-trimester pregnancy losses. In her previous pregnancy, even a cervical stitch failed to prevent pregnancy loss. Determined to give the best possible chance to give a birth to a baby, she underwent a laparoscopic cervical cerclage procedure at Rainbow Hospitals in June 2024, a specialized surgery performed to strengthen the cervix in women at very high risk of miscarriage.
- Soon after, she conceived through IVF and was carrying twins — a deeply cherished pregnancy after years of emotional struggle. Her pregnancy had been progressing normally until around 19 and a half weeks, when she suddenly developed white vaginal discharge and came for evaluation.
- On examination, the situation was critical. The cervix had already started opening, and the water bag of one twin was bulging outside, indicating an imminent pregnancy loss. In such situations, there is an extremely high risk of infection, rupture of membranes and premature labor, which can lead to the loss of both babies.
- A multidisciplinary fetal medicine team urgently evaluated the case. The couple was counseled in detail regarding the grave risk to the entire pregnancy and the limited window available to act. The team explained that, while emotionally devastating, selective reduction of the more affected twin offered the only realistic possibility of prolonging the pregnancy and saving the other baby.
- After counseling and immense emotional courage from the parents, selective fetal reduction was performed successfully. This difficult but medically critical decision helped reduce the risk of infection and preterm labor, giving the remaining baby a significantly better chance of survival.
- Now she reached to 24 weeks of pregnancy and we expect pregnancy to sail very smoothly. However, our obstetric and neonatal team are in close follow-up to delivery excellent outcomes for baby and mother.

A Rare Immunological Disorder Cured by Bone Marrow Transplant

- 56-day-old infant, born to a consanguineous couple, was brought with severe diarrhea that worsened after every feed and poor weight gain starting from the second week of life.
- The baby also suffered repeated, life-threatening infections, including blood infection and meningitis, and developed severe anemia requiring multiple blood transfusions.
- As the illness progressed and new symptoms appeared, the medical team revisited and re-analyzed the genetic data in greater detail. This deeper analysis identified a rare mutation in the RIPK1 gene, leading to a condition called Immunodeficiency with Autoinflammation.
- This rare disorder behaves like severe inflammatory bowel disease in early infancy while also severely weakening the immune system, explaining both the persistent diarrhea and the recurrent serious infections. The baby required intensive care support, intravenous nutrition, repeated antibiotics, and blood transfusions to survive.
- Importantly, this condition cannot be permanently controlled with medicines alone. Bone marrow transplantation, also known as hematopoietic stem cell transplantation (HSCT), remains the only definitive and potentially curative treatment, as it can correct the underlying immune defect and reverse the intestinal disease.
- After detailed counselling regarding the seriousness of the disease and the need for urgent transplant, the parents agreed to proceed with bone marrow transplantation. The baby successfully underwent HSCT at Rainbow Children's Hospitals, Bengaluru and was discharged home in a healthy and stable condition, giving the child a new chance at life.

About Us

Rainbow network comprises of 24¹ hospitals and 5 clinics in 9 cities, with a total bed capacity of 2,435¹ beds. Our Pediatric services under “Rainbow Children’s Hospital” includes newborn and pediatric intensive care, pediatric multi-specialty services, pediatric quaternary care (including organ transplantation); whereas our women care services under “Birthright by Rainbow” offers perinatal care services which includes normal and complex obstetric care, multi-disciplinary fetal care, perinatal genetic and fertility care along with gynecology services.

Rainbow Children’s Hospital built on strong fundamentals of multidisciplinary approach with a full-time consultant led clinical service along with 24/7 commitment in a child centric environment. The company follows a hub-and-spoke operating model where the hub hospital provides comprehensive outpatient, inpatient care, with a focus on tertiary and quaternary services, while the spokes provide emergency care in pediatrics and obstetrics, large outpatient services and comprehensive obstetrics, pediatric and level 3 NICU services. This model is successfully operational at Hyderabad and is gaining traction in Bengaluru. The endeavor is to replicate this approach in Chennai and across the National Capital Region. Subsequently Rainbow intends to expand into tier-2 cities of Southern India.

Rainbow embraces a unique doctor engagement model, where doctors work exclusively on a full-time, retainer basis. The doctors work in teams and have 24/7 commitment, which is particularly important for children’s emergency, neonatal, pediatric intensive care services and to support pediatric retrieval services. The Company also operates the country’s largest pediatric DNB training programme in private healthcare, offering post graduate residential DNB and fellowship programme.
