## MANAGEMENT DISCUSSION AND ANALYSIS

### GLOBAL SCENARIO

In the financial year 2015-16, global economic activity continued to remain subdued. The growth in emerging markets and developing economies, which account for around 70% of the global growth, declined for the fifth consecutive year, while the advanced economies continued to recover slowly. There were few key influencing factors to the global economy. China's economy witnessed a faster than expected slowdown due to rebalancing economic activities moving away from investment and manufacturing towards consumption and service related activities.

Energy and various commodity prices witnessed a decline. Lower oil prices strain the fiscal positions of fuel exporters and weigh on their growth prospects, while supporting household demand and lowering business energy costs in importers. However, strain due to oil shock and its impact on investment climate and weak pick-up in oil-consuming economies due to limited pass-on of lower prices has resulted in global growth stalling.

The United States has been going through a gradual monetary policy tightening scenario where the U.S. Federal Reserve lifted the federal funds rate from the zero lower bound, while monetary easing continued in the euro area and Japan. Prospects of a gradual increase in policy interest rates in the United States as well as bouts of financial volatility amid concerns about emerging market growth prospects have contributed to tighter external financial conditions, declining capital flows, and further currency depreciations in many emerging market economies.

According to IMF, Growth in advanced economies is projected to rise by 0.2% points in 2016 to 2.1%, and hold steady in 2017. Growth in emerging market and developing economies is projected to increase from 4% in 2015—the lowest since the 2008–09 financial crisis—to 4.3 and 4.7% in 2016 and 2017, respectively.

### INDIAN ECONOMIC SCENARIO

India remained a relatively bright spot in the global economy with its growth story continuing to bloom. One of the contributors to the strong growth experienced by the Indian economy was the sharp decline in crude oil prices. According to Asian Development Bank estimates, the Indian economy grew at 7.6% in FY2015 (ending 31 March 2016). Despite a weak monsoon for a second consecutive year, agriculture grew by 1.1% in FY2015. While the industry and private consumption accelerated to a growth of 7.3% and 7.6% respectively, the services growth moderated to 9.2%.

India continued to remain at the top of Nielsen's global consumer confidence index for the sixth quarter in a row. The Foreign Direct Investment (FDI) inflows increased 40 per cent during April-December 2015 to reach USD 29.44 billion, compared to same period last year. Also, India's foreign exchange reserves remained comfortable at USD 356 billion in the week up to March 25, 2016.

The regulatory regime witnessed easing and the Reserve Bank of India (RBI) cut interest rates four times as inflation eased sharply. Rate cuts had been widely called for by the industry to reduce the cost of borrowing and help stimulate growth. The government's strong focus on reviving growth was evident from the Union budget, where the Finance Minister gave relief to small tax payers, nudged the affluent to shell out more while focusing on the rural economy with much higher fiscal outlays. The Finance minister also reaffirmed that the government would continue the reform agenda to usher in the long awaited GST by passing the Constitutional Amendment Bill in the Parliament.

On the government initiative front, the "Make in India scheme", "Smart cities plan", "Jan-Dhan Yojna", "Digital India plan", "Skill Development & Start-up India initiatives", "Power for All", "UDAY", "Housing for All", "Scheme to revitalise public sector banks", "Ease of Doing Business (EoDB) initiative" and other ambitious infrastructure programmes present significant opportunities for investors to be part of one of the largest development programmes in the world. These programmes are expected to transform not only the cities and the country as a whole, but also the way business is done in India.

As per the World Economic outlook released by the IMF, India will be the fastest growing major economy in 2016-17 growing at 7.5%, ahead of China, at a time when global growth is facing increasing downside risks. India's growth is expected to continue to be driven by private consumption, which has benefited from lower energy prices and higher real incomes. With the revival of sentiment and pickup in industrial activity, a recovery of private investment is expected to further strengthen growth.

**TIME TECHNOPLAST (TIMETECH) - BUSINESS OVERVIEW****A. Industrial Packaging**

The Industrial packaging segment continued to our core focused area. This segment contributed 74% of the total group revenue. The overseas business of industrial packaging continue to grow and contributed 30% group revenue. We are a leading producer of rigid industrial packaging products and offer a wide range of the rigid industrial packaging products i.e. HM-HDPE drums, Jerry-cans, Pails and Intermediate Bulk Containers (IBCs).

We supply a cross-section of industries, such as chemicals, paints and pigments, food and beverage, petroleum, industrial coatings, agricultural, pharmaceutical, mineral, packaging, automotive and building products, and must make spot deliveries on a day-to-day basis as our products are required by our customers.

At present we are operating in 9 countries namely India, Taiwan, Indonesia, Vietnam, Thailand, Sharjah, Bahrain, Egypt & Malaysia. We already have assumed position of the market leaders in these countries except Malaysia.

We have always focused on optimizing our business operations. So as part of strategic process, we went ahead with certain consolidation of foreign businesses. During the year 2015-16, we have realigned and consolidated our overseas operations as under;

- sale of business of 50% Joint Venture of Guangzhou Fanshun Elan Plastech Co. Ltd., South China
- discontinued manufacturing operation in South Korea and North China.
- acquired balance 50% equity in Joint Venture Company Nile Egypt Plastech Industries S.A.E., Egypt.

According to a market research, (Source: Smithers Pira) the global industrial packaging industry is estimated to reach US\$61 bn by 2020 from US\$48 bn in 2013, indicating an annual growth of 3.4%. It also expects demand from Asia to gain momentum and have a 34% share in the global market.

The global chemical industry has constantly evolved over the years and comprehensive macro factors continue to influence and provide tailwind for growth in this sector. Increased environmental awareness and sustainability, use for alternate energy resources and urbanization especially in the developing countries have opened various new avenues for chemical industry to innovate and grow rapidly. Biotechnology and agrochemicals are two bright spots in this sector, which will see newer technologies and products that can cater to a wide range of end customers.

In 2015, the global chemical industry was US\$3.26 trn and is expected to grow by 38% to US\$4.5 trn by 2017 (Source: IBEF). On back of new initiatives by the Govt. of India, the Indian chemical industry too is gearing up for a rapid growth. The Government has approved four Petroleum, Chemical & Petrochemical Investment Regions (PCPIR) (Andhra Pradesh, Gujarat, Odisha, Tamil Nadu) to promote investment and development in these sectors. Apart from these states, three new states, Kerala, Karnataka and Maharashtra have applied for PCPIRs. To give a boost to new investments in this sector, a 100% FDI also has been granted for this sector. The Indian chemical industry is expected to grow to US\$ 224bn from US\$ 144 bn in 2015.

**B. INFRASTRUCTURE**

In FY2016, the Infrastructure business contributed 14% of the total group revenue. Under this business, the Company manufactures high pressure pipes, prefabricated shelters, waste/ refuge bins and energy storage devices.

The Government of India has been putting extra efforts to improve the country's sewage treatment infrastructure. The Integrated Ganga Conservation Programme (Namami Gange) has been approved by the Cabinet, with an outlay of Rs 200 billion for the next five years. So far, 93 projects worth Rs 74 billion have been approved for creating a treatment capacity of 858 mld and a sewer network of 3,623 km.

New initiatives like the Swachh Bharat Mission, 100 Smart Cities and the Atal Mission for Rejuvenation and Urban Transformation (AMRUT) also intent to further expand the sewerage network and treatment capacity.

As new projects get sanctioned under upcoming centrally sponsored schemes, there will be more opportunities for all stakeholders including developers, contractors, technology and equipment providers etc.

We expected robust growth for PE pipes in India and being amongst the front runners we stand a strong chance of benefitting from this surge which is expected to continue at least for next 5 years. To capture huge demand in Telengana and Andhra Pradesh, we are expanding this product at existing unit at Hyderabad which qualifies us as a preferred supplier being local unit.

To keep pace with the demand of sewage pipes, we are planning to manufacture Double Walled Corrugated Pipes. Under the 'Swachh Bharat Abhiyan', sewage treatment plants are being set up at all A & B class towns and the demand for Corrugated Pipes is building up.

**Energy Storage Devices :** The renewable energy industry is registering an unprecedented, sharp growth in India. The total renewable energy installed capacity in India at the end of FY 2014-15 stood at 35.77 GW. The Indian government plans to increase this capacity to 175 GW by the end of 2022. Under the ambitious "Make in India" initiative, the government is offering easy financing and exemption from excise duty on various solar components, and state governments are drafting new net metering laws to encourage investments in the sector.

India is also planning for the first time to include energy storage as a requirement when a solar project is tendered. Push towards larger generation and use of Solar power has been going on the right track and the government has made policies easy and friendly to encourage and implement generation of solar energy.

### C. TECHNICAL PRODUCTS

Technical Products vertical contributed to 11% of the total FY 2016 revenues. During the year Company sold wholly owned subsidiary Novotech S.p z.o.o., Poland and its subsidiary Grass Tech SRL, Romania.

#### i. Automotive Components

The Company manufactures value added plastic auto components through innovation and technology conforming to international standards i.e. Anti-Spray Flaps, Plastic Fuel Tank (PFTs), De-aerating tanks (DAT) and Air Duct.

The Indian commercial vehicle market is expected to double to 1.6 million units in next five years thanks to the increase in infrastructure spend, rapid urbanisation and entry of major multinational players in the country. (Source: EY). The Indian CV industry is likely to be impacted by rapidly changing events right like operating environment, fleet operator/ manager preferences, competition, distribution channel and also supply chain.

The outlook on the domestic CV industry continues to remain stable in the near-term as series of measures to revive economic growth have started yielding results in some key sectors such as pick-up in execution activity in Road & Highway projects along with cement consumption and other allied sectors. The industry is also likely to see pre-buying following the complete roll-out of BS-IV emission norms by April 2017.

#### ii. Lifestyle

The Company is one of the leading players in the matting segment. The Company has been delivering value for many solutions across industries and customers, winning the trust of millions across the nation.

We are expecting good growth in this segment in coming years. India's demographic profile predominantly consists of young population which is increasingly turning urban. The Government of India has focussed on urban development in the country with specific programs such as smart cities and many more. A large and growing middle class, prominent in such urban centres, is not only increasingly consuming higher end goods and services but also redefining the luxury market.

Prime Minister Mr Narendra Modi had launched three government flagship schemes in June, 2015 aimed at changing the face of urban India—Smart Cities mission, Atal Mission for Rejuvenation and Urban Transformation (AMRUT) and Housing for All mission with an expected expenditure of around Rs 4 trillion (US\$ 59.3 billion) over the next few years. The government has completed stage one of the Smart Cities Mission worth Rs 1 trillion (US\$ 14.82 billion) by shortlisting 100 cities across India for the plan. The Government of India plans to spend Rs 50,000 crore (US\$ 7.41 billion) to develop 100 smart cities in the country, with each selected city to receive assistance of Rs 100 crore (US\$ 14.82 million) per year for five years.

### D. MATERIAL HANDLING PRODUCTS

Time Technoplast in collaboration with Schoeller Alibert are focused on the transport and storage of products using pallets, crates and other containers. Through this service, Company assists customers in reducing their supply chain costs through improved storage efficiency, handling savings and freight cost reduction. The Company has internationally acclaimed designs and manufacturing processes that are aptly suited to Indian customer requirements.

Steady economic growth, improved discretionary spending, especially among the middle class, penetration of organized retail, wider reach of telecommunication facilities are some of the positive developments that will help increase the movement of goods.

## **E. COMPOSITE CYLINDERS**

The Company is pioneer in the business and has introduced composite cylinders in India. Our state-of-the-art production facility deliver unique products with many advantages over traditional steel cylinder. An increased focus on safety, ease of use and high corrosion resistance is strengthening demand for composite LPG cylinders globally. Going forward, Indian government's supportive policy framework will be a big driving force to use composite cylinders over the use of traditional steel cylinders in India. During the year

In 2015-16, We have consolidated our capacity in India to manufacture 7 lacs Composite cylinders p.a. We approached several new geographical markets. We expect this to support our strategy of improved capacity utilization in the coming year. Currently, steel cylinders dominate markets because of price. Although they are cheaper, steel products are susceptible to corrosion, especially in areas with high levels of humidity, affecting the safety and useful life of the cylinders. Our products have the competitive advantage in these markets with superior safety and durability.

The Company has focused on several overseas markets, including the Middle East, Africa, Southeast Asia to secure growth and improve capacity utilization. Our efforts have generated various trails orders in these markets. Even though periodic in nature, these orders have enhanced our marketing and commercial expertise, and strengthened our competitive position in these markets. Increasing our presence in these regions is a priority going forward

The Company continues to strengthen its position as a global supplier of composite LPG cylinders. The Company will assign more dedicated resources toward business development, secure and expand existing market positions and identify opportunities for further expansion. The outlook for composite LPG cylinders is good. we expect demand to increase in the medium and long term. Increasing wealth in developing countries should generate demand for high-quality products, improving our competitive position over steel cylinders. In particular, increased emphasis on the health and environmental effect of traditional cooking fuels is expected to surge domestic demand for LPG.

## **KEY RISK**

### **Raw Material Fluctuations and Shortages may Adversely Impact Our Manufacturing Operations and Costs.**

The principal raw materials used in the manufacture of our products are PE granules, which we purchase in highly competitive, price sensitive markets. These raw materials have historically exhibited price and demand cyclicity. Some of these materials have been, and in the future may be, in short supply. For example, the availability of these raw materials and/or our ability to purchase and transport these raw materials may be unexpectedly disrupted by adverse weather conditions, natural disasters or a substantial economic downturn in the industries that provide any of those products.

However, we have not recently experienced any significant difficulty in obtaining our principal raw materials. A surge in new plastics chemical capacity coming from low-cost producers in North America, the Middle East and China is driving the global market for key plastics called polyethylene (PE) and polypropylene (PP) to oversupply, which will pressure margins for producers and change the global competitive landscape, that more than 24 million metric tons (MMT) of new PE capacity will be added globally during the 2015 to 2020 timeframe –more than one-third of that, approximately 8 MMT--will come from the U.S., which will significantly increase the U.S. net-export position for PE and PP and other chemicals, rebalancing the global chemical trade flows that have favored the Middle East for decades.

The scale-up of new plants in the Middle East, including the 1.43m tonne/year PE capacity of Borouge 3 at Ruwais, Abu Dhabi, and the 1.32m tonne/year plant recently launched by Sadara at Jubail, Saudi Arabia, will have a huge impact on global PE markets. Supply will also increase from North America, with the start-up of Braskem-Idesa's Ethylene XXI project in Coatzacoalcos, Mexico, adding 1.05m tonnes/year of PE capacity. Other projects scheduled to start-up this year include Nova Chemicals' 454,000 tonne/year linear low density (LLDPE) plant at Joffre, Canada, and in India, BPCL's 220,000 tonne/year HDPE/LLDPE unit in Assam and OPAI's second 360,000 tonne/year LLDPE line at Dahej.

The other significant factor affecting markets this year is the end of UN-imposed sanctions on Iran. Petrochemical suppliers in the country are already moving to re-establish business connections with Europe, so they can divert cargoes away from China if the country's demand prospects remain weak. The lifting of sanctions will speed-up polymer investments in Iran, where new PE capacity was already scheduled to go on-stream this year. Mahabad Petrochemical's 300,000 tonne/year HDPE/LLDPE swing capacity was close to completion by the end of 2015, and a 300,000 tonne/year LDPE project by Kordestan Petrochemical at Sanandaj could enter production during the second half of 2016.

We are subject to various other risks associated with operating in countries outside the U.S., such as the following:

- political, social, economic and labor instability which has commonly been associated with developing countries but presently is also impacting several industrialized countries;
- war, invasion, civil disturbance or acts of terrorism;
- changes in government policies and regulations;
- imposition of limitations on conversions of currencies into United States dollars or remittance of dividends and other payments by overseas subsidiaries;
- imposition or increase of withholding and other taxes on income remittances and other payments by international subsidiaries;
- hyperinflation, currency devaluation or defaults in certain countries;

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls Over Financial Reporting**

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that
  - (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
  - (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

**Inherent Limitations of Internal Financial Controls Over Financial Reporting**

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## **ANNEXURE TO INDEPENDENT AUDITORS' REPORT**

**Referred to in paragraph 9(f) of the Independent Auditors' Report of even date to the members of Time Technoplast Limited on the consolidated financial statements for the year ended March 31, 2016**

### **Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act**

1. In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2016, we have audited the internal financial controls over financial reporting of Time Technoplast Limited ("the Company"), and its subsidiary companies, and Joint venture companies, which are companies incorporated in India, as of that date.

#### **Management's Responsibility for Internal Financial Controls**

2. The respective Board of Directors of the company, its subsidiary companies and joint venture companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on "internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI)". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

#### **Auditor's Responsibility**

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the ICAI and the Standards on Auditing deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls Over Financial Reporting**

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that
  - (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
  - (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

**Inherent Limitations of Internal Financial Controls Over Financial Reporting**

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

8. In our opinion, the Company, its subsidiary companies, and joint venture companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

**Other Matters**

9. Our aforesaid reports under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to subsidiary companies, joint venture companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India. Our opinion is not qualified in respect of this matter..
