Q2 & H1 FY26 Highlights

Key Developments & Outlook	03
Profit & Loss Highlights	04
Story in Charts	05

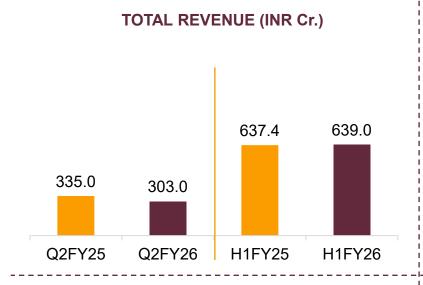

Key Developments & Outlook

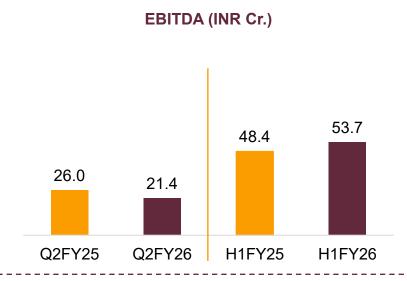

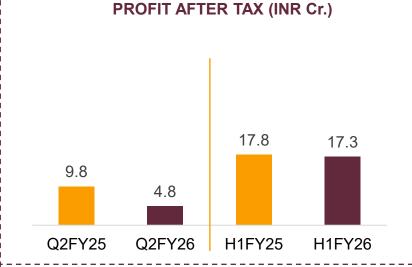

PARTICULARS	CURRENT (Q2 & H1 FY26)	OUTLOOK (FY26)
Overall Performance	H1FY26 witnessed a moderate performance due to U.S economy slowdown impacted by additional tariffs leading to temporary production pauses by customers. However, domestic demand remained steady supported by strong tractor and M&HCV sales.	FY26 will largely be a year of consolidation, with demand expected to strengthen toward the end of the year; driven by new product launches and a recovery in export markets.
Tractors	The tractor segment's share of revenue rose from 25% to 27% in H1 FY26, supported by favourable seasonal conditions, GST rate reductions, and strong rural demand.	In FY26, the tractor industry is expected to remain robust, supported by strong rural demand, a favourable monsoon, and increased government spending. Additionally, the rollout of TREM V norms is anticipated to further stimulate sector growth.
Medium & Heavy Commercial Vehicles (M&HCV)	Domestic demand for M&HCVs remained strong, with the segment contributing a steady 36% to overall revenue in H1FY26.	The commercial vehicle industry is expected to see a gradual recovery in FY26, supported by improving demand fundamentals.
Exports	In Q2FY26, export performance was impacted by overall slowdown in U.S. economy due to imposition of tariffs, which affected realizations and volumes	Export demand is expected to recover toward the end of FY26, supported by the introduction of newly developed products that are primarily focused on international markets.
EBITDA/kg	EBITDA per kg recorded a marginal increase, rising from Rs. 11.8 in H1 FY25 to Rs. 12.5 in H1 FY26.	EBITDA per kg is expected to improve, supported by the introduction of high-margin products and better capacity utilization.

Way Forward

Deliver on our Strategy

07

Delivering on our Strategy

Manufacture Value Add Products

- A decade ago, Nelcast shifted focus from highly competitive low complexity business to higher value-add products.
- Upgradation of manual moulding line process to fully automated state-of-art High Pressure Moulding Line.
- Increased product capability by installing a 2.1 x 1.2 m size line; becoming one of the very few casting companies in the world with such capabilities.

Expand the Export Business

- Continue to deliver quality at competitive prices compared to local manufacturers.
- Expand the long-standing relationships by increasing business share on existing products & launching new products.
- Build new relationships and expand diversity in our geography & sector split.
- Developing high value-added castings of up to 500 kgs for our key export markets

Improving Capacity Utilization Levels

- Eliminate operational inefficiencies and bottlenecks across plants.
- Continuous launch of new products.

Cost Optimization

- Better capacity utilization levels to help Nelcast achieve economies of scale, reduce the impact of costs and aid margins.
- Efforts ongoing in energy conservation & investments in renewable energy to control power costs.
- Installed 1 MW inhouse solar power plant at Pedapariaya Plant in Andhra Pradesh, which will aid toward sustainability and cost effectiveness while reducing carbon footprint.

Strategic Location

- Plants are in close proximity (37-140 KM) to Chennai, a major manufacturing hub for automotive companies forms both a key customer base for Nelcast and a reliable source of steel scrap, a crucial raw material
- All 3 plants are within 15-110KM of India's largest source of Silica Sand near Gudur
- Chennai's International airport with direct flights to Europe, Middle-East & Southeast/East Asia makes it convenient for customers to visit and see the world class facilities firsthand
- Close proximity to Krishnapatnam & Chennal seaports gives easy access to Nelcast to reach its customers around the world

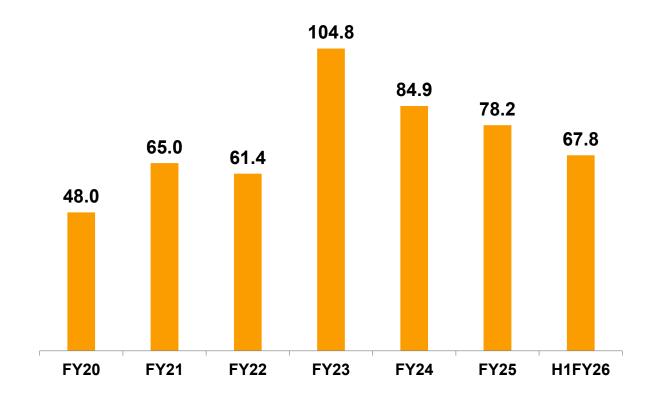

Strong Business Foundation

Cash & Cash equivalents (in Rs. Cr.)

- Received an investment grade rating for short term (A1) and long term (A) fund from ICRA on the back of adequate liquidity, strong relationship with major OEMs and a diversified clientele
- Installed Capacity has been created for 160,000 Metric Tons per Year. Can be further enhanced by 50,000 MT within the existing plants with minimal investment

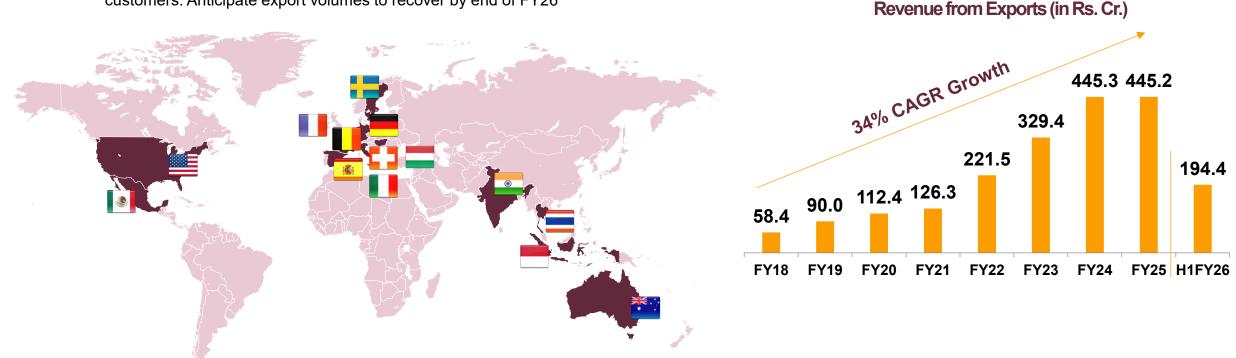

Strong Export Growth Potential

- India is being viewed as a key cog in the global automotive supply chain and sourcing machined castings from India is now becoming an attractive option for global customers.
- Nelcast is among only a few companies in the industry capable of meeting the requirements of top global OEMs & Tier 1s.
- Currently, Nelcast exports machined castings to reputable corporates in North America, Europe and Southeast Asia.
- In H1FY26, exports were impacted by slowdown in the U.S. economy, due to imposition of additional tariffs leading to temporary production pauses by customers. Anticipate export volumes to recover by end of FY26

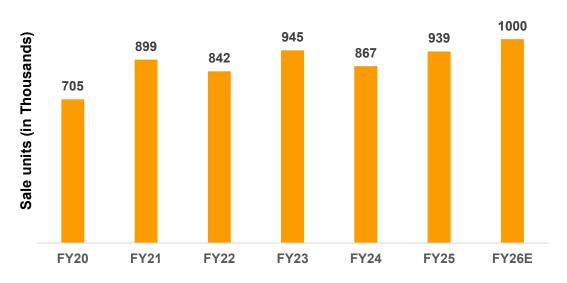

5

Large Market Opportunity

Indian Tractor Industry

Tractor Industry sales grew by 8% YoY in FY25; According to Crisil Ratings, domestic tractor sales are projected to reach an all-time high of ~975,000 units in 2025-26

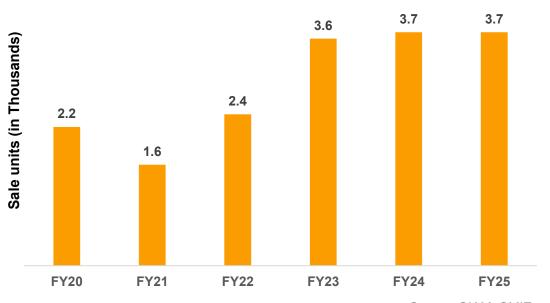

Source: Tractors and Mechanization Association

In FY25, the Tractor & Mechanisation Association (TMA) reported a rebound in the Indian tractor industry, with domestic sales reaching 939,713 units, marking an 8% increase from the 867,237 units sold in FY24. As per TMA, industry is projected to surpass 1 million sales by 2026, driven by strong rabi and kharif crop seasons, favorable terms of trade, and increased government spending.

Source: SIAM, Yes Securities Research Report

Indian M&HCV Industry

By 2030, the medium and heavy commercial vehicle market in India is projected to reach the 500,000 unit mark

Source: SIAM, CMIE

In FY25, M&HCV exports increased by 28% YoY to 23,251 units. However, after stagnation in FY25, the Indian CV industry is set for a modest recovery, with ICRA forecasting 3-5% growth in FY26. Additionally, the average fleet age of 10 years is expected to drive replacement demand, supporting industry expansion.
