## Item No. 8

The existing Articles of Association (AoA) of the Company are based on the Companies Act, 1956. Accordingly several regulations in the existing AoA either contain references to specific sections of the Companies Act, 1956 or are no longer in conformity with the Companies Act, 2013 (Act).

On 12th September, 2013, the Ministry of Corporate Affairs ("MCA") had notified 98 Sections for implementation. Subsequently, on 26th March, 2014, MCA notified most of the remaining Sections (barring those provisions which require sanction/confirmation of the National Company Law Tribunal ("Tribunal") such as variation of rights of holders of different classes of shares (Section 48), reduction of share capital (Section 66), compromises, arrangements and amalgamations (Chapter XV), prevention of oppression and mismanagement (Chapter XVI), revival and rehabilitation of sick companies (Chapter XIX), winding up (Chapter XX) and certain other provisions including, inter alia, relating to Investor Education and Protection Fund (Section 125) and valuation by registered valuers (Section 247). However, substantive sections of the Act which deal with the general working of companies stand notified. Therefore, the Companies Act, 2013 is now largely in force.

With the coming into force of the 2013 Act, several regulations of the existing AoA of the Company require either alteration or deletions as the case may be. Given this position, it is considered expedient to wholly replace the existing AoA by a new set of Articles so as to align it in accordance with the provisions of Companies Act, 2013.

The new AoA to be substituted in place of the existing AoA are based on Table 'F' of the Act which sets out the model articles of association for a Company limited by shares.

A copy of the draft Articles of Association of the Company is available for inspection by members at the Corporate Office of the Company on any working day during business hours till the date of Annual General Meeting. The proposed new draft AoA is also being uploaded on the Company's website [www.ankitmetal.com](http://www.ankitmetal.com) for perusal by the shareholders.

None of the Directors/Key Managerial Personnel of the Company/their relatives are, in any way, concerned or interested, financially or otherwise, in the Resolution set out at Item No. 8 of the Notice.

# Management Discussion and Analysis

## Economic Overview

The global economic condition continued to remain sub optimal even during the FY-2013-14. The global economic growth in calendar year 2013 slipped further down to 3.0% from 3.2% in 2012 and 4.0% in 2011. The growth was more robust in second half of 2013 but the pickup was uneven. The recovery was more broad based in advanced economies and was mixed in emerging markets.

The Indian economy registered a GDP growth of 4.7% in FY-14 against 4.5% in FY-13 on account of Agriculture growth of 4.6% in FY-14 against 1.4% in FY-13. The growth in non-agriculture sectors came down in FY-14. The Industry & Infrastructure growth declined further from already a very low level of 1.0% in FY-13 to 0.7% in FY-14. Whereas manufacturing contracted by (-)0.2% in FY-14 against 1.1% in FY-13 and Mining continued at negative 1.9% in FY-14 against negative 2.2% in FY-13.

With the political uncertainties appearing to be over and a more stable and decisive government placed at the Centre, the process of economic recovery is expected to begin and hopefully result in long awaited better business conditions and growth.

## Steel Industry

The Global steel demand grew by 3.6% to 1.48 billion tonnes due to improved performance in developed countries in the second half of the year but the growth in the emerging markets slowed down due to weak demand in developed countries. In CY-2013 China continued to dominate the global steel industry with 46% production and 102% of the incremental steel production. In FY-2013-2014 the Indian steel industry recorded abnormally low consumption growth of 0.6% to reach a total of 733.90 Mnt. The production was impacted by the inadequacy of iron ore with inconsistency in quality and supply.

Soaring demand from the sectors like infrastructure, real estate, automobiles, uses of specialized steel in automobiles and power sectors has put Indian steel industry on the world map. Over past few years, the rapid rise in the production of iron and steel output resulted the country in maintaining the 4th largest steel producing country.

## Opportunities & Threats

The low per capita steel consumption in India coupled with a large population base provides significant growth opportunities to the iron and steel industry. The steel demand in India is expected to remain robust in long term due to increasing demand from several sector including automotive, consumer durables, oil and gas, industrial machinery, real estate and infrastructure.

The steel industry is subject to cyclical swings arising from factors such as excess capacity, regional demand and supply imbalances and volatile swings in market demand and prices. One of major threats to the industry is depleting availability and volatile pricing of raw materials. Any firmness in steel prices gives iron ore producers an opportunity to increase the prices in the next contract, however the reverse may not be true as steel companies cannot always pass on the rise in iron ore prices to end consumers due to the fragmented market.

India possess the world's eighth largest iron ore reserve, it is the fourth largest iron ore producer in the world but yet fell short in supplying adequate quantity of iron ore to the iron and steel producer as a large chunk of the production exported. Coking coal, a primary ingredient in steel making is also in short supply. A majority of the coking coal requirement is met by importing from Australia. The Indian iron and steel producers are widening their sourcing bases to South Africa, Indonesia, US and Canada. Insufficient infrastructure and logistic, land availability and environmental issues are also a concern for the growth of domestic iron and steel industry. Many steel makers are also considering alternatives to manage raw material cost and supply by hedging long term contracts.

## Risks and Concerns

### Industry Risk

Demand is dependent on general economic conditions. A downturn can affect business and earnings. The low per capita steel consumption in India coupled with a large population base provides significant growth opportunities to the Iron and steel industry. The urgent need towards infrastructure creation and surging consumption growth are visible opportunities that will drive iron & steel demand.

# Management Discussion and Analysis

## **Raw Material Risk**

Non-availability and price volatility of key raw materials in manufacturing of steel namely iron ore and coal has increased significantly in past few years. The Company is procuring iron ore from established mining companies such as Essel Mining, Rungta Mines, etc. and are also working with major suppliers of key raw materials to achieve competitive prices on long term basis. The Company has linkages with Coal India Ltd. to feed coal requirements of the captive power plant as well as the sponge iron unit.

## **Cost Risk**

Managing costs is a key to protect profitability, especially across volatile market cycles. The Company has created well-integrated assets comprising WHRB and ABFC captive power plants, which ensure cost-effective availability of power. The Company has also setup a pelletisation plant (utilising the readily available iron ore fines for DRI operations) to optimize costs.

## **Health, Safety and Environment Risk**

The manufacture of steel involves steps that are potentially hazardous if not executed with due care. The Company maintains the highest safety standards within its operating units which minimises calamities during plant operations. The safety team conducts regular training programmes to install the concept of maintaining safe operations among the employees and to educate the team on the safety norms and procedures to be followed in an unfortunate situation.

## **Segment-wise Reporting**

The business activity of the Company primarily falls within a single business segment-Iron and Steel. The Company also generates power from captive power plant, which is entirely consumed in manufacturing of iron and steel without any sale to third parties.

## **Internal Control and System**

The Company has implemented proper and adequate system of internal control commensurate with the size and nature of its operations to provide reasonable assurance that all assets are safeguarded, transactions are authorised, recorded and reported properly, applicable statutes and corporate policies are duly complied with. Some significant features of internal control systems are :

- Adequate documentation of policies, guidelines, authorities and approval procedures covering all important functions.
- Deployment of an ERP system which covers most operations and is supported by a defined on-line authorisation protocol.
- Ensuring complete compliance with laws, regulations, standards, and internal procedures and systems.
- Ensuring the integrity of the accounting system; the properly authorised recording and reporting of all transactions.
- Ensuring a reliability of all financial and operational information.
- The Company has an Audit Committee with majority of Independent Directors as members. The committee periodically reviews significant audit findings, adequacy of internal control and compliance with Accounting Standards, amongst others. The Company also takes quarterly compliance certificate in respect of various applicable laws from the concerned departmental heads and place the same before the board.

## **Industrial Relations and Human Resources**

The Company recognise people as the primary source of its competitiveness and continue to focus on people development by leveraging technology and developing a continuously learning human resource base to unleash their potential and fulfill their aspirations. The Company recruits judiciously through industry contacts, newspaper advertisements and consultancies. The Company also recruits trainees from reputed ITIs, technical and professional institutes. The Company maintained harmonious relationship with all its workers and there were no strikes or lockouts during the year under review. As on the date of this report the Company has 558 employees on its payroll.

# Corporate Governance Report

We cannot guarantee that these forward-looking statements will be realised, although we believe we have been prudent in our assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialise, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected.
