Impact of Application of IND AS-115

- ≈ MCA (Ministry of Corporate Affairs, Government of India) notified IND-AS 115 (Revenue from Contracts with Customers) on 28th March 2018, applicable for the sector beginning on or after 1st April 2018
- ≈ In the erstwhile accounting standards coupled with the guidance note of ICAI (Institute of Chartered Accounts of India), revenue used to be recognized based on Percentage of completion method (POCM)
- ≈ As per AS-115, Revenue shall be recognised when the entity transfers the control of goods or services to the customer. In other words, entity shall “satisfy its performance obligation” to the customer to recognise the revenue. “Satisfying the performance obligation” in the context of real estate industry means, completion of all obligations by a developer and intimating the customers our readiness for handing over the unit
- ≈ The Group has applied the modified retrospective approach to contracts that were not completed as of April 1, 2018. The transitional adjustment of Rs. 217 crore [net of deferred tax] has been adjusted against opening balance of retained earnings in accordance with the requirements of IND AS 115 based on performance obligation satisfied at a point in time.
- ≈ There is no impact on agreements with our customers and the consequent cash flows which continue to be robust

Commenting on the performance for Q4 FY2019, Mr. Gopal Sarda, Group CEO, Kolte-Patil Developers Limited said:

"FY19 marked significant milestones in our corporate journey, during the year we recorded 28% higher sales at 2.7 million square feet on the back of successful project launches, we also improved collections from customers, focused on timely deliveries and invested in buying out our partners' stakes in some of our key projects, thereby creating a strong framework for sustainable long term growth.

Our sales trajectory expanded with significant contributions from MIG and Affordable Housing projects. Life Republic has been a significant driver of our performance where volumes have more than doubled over the previous year. Ivy Estate and Stargaze were other key contributors. Sales acceleration has been backed by continued focus on project execution, while collections in some projects are based on deferred payment plans resulting in back-ended cash inflows. However, on an overall basis, collections during the year remained strong at Rs. 1,179 crore, the highest in our history. We now expect strong cash flows in the current year as payments linked to construction-based milestones are received from customers. Also, we delivered 2,108 apartment units aggregating to 2.2 million square feet in FY19 after obtaining occupation certificates.

As we look to scale the business to the next level of growth, we have entered into a share purchase agreement to buy-out the 50% stake held by ICICI Ventures in KPDL's flagship township project, Life Republic. Following the buy-out of our partners' shares in Life Republic and Downtown, payout for minority interest is slated to reduce and our economic interest across all our projects now increases from ~60% to ~90%, which will result in significant value creation for all stakeholders. We are focusing on customer collections and bank loans to support our financing requirements. In this respect, CRISIL's revision of outlook from Stable to Positive on its A+ rating of our long term debt supports our objective of reducing finance cost significantly.

In FY20, we expect to deliver further acceleration in our sales volume based on growing visibility from Pune and increasing contribution from Mumbai and Bengaluru. Faster execution of running projects will be supported by new project acquisitions - we are evaluating potential acquisition of land parcels through outright purchases and structured deals with land owners. We also have several development management agreements in the pipeline that will allow us to leverage the strong customer proposition of the Kolte Patil brand to create capital-light business opportunities. We see our focus on 360 degree operational excellence driving sales, revenue and profitability on a diversified operating base to create long term growth opportunities.

We are also enthused about the formation of a strong government with a majority mandate at the centre, which we believe will create a robust growth and governance framework that expands longer-term macro growth opportunities for the country. Acceleration of reforms and decision-making processes should result in rising consumer confidence, including in key sectors like real estate, where buyers are already getting more comfort from the strong regulatory and execution structures implemented over the last five years."
