Directors' Report

1.00 The Directors are pleased to present their Seventy-seventh Annual Report on the business and operations of the Company and financial results for the year ended September 30, 2010.

2.00 FINANCIAL RESULTS:

(Figures in Rs. Lacs)

2.01 The Financial Results for the year are given below:

| Profit before Depreciation | | 14605.88 |
|------------------------------------------------------------------------------------------------|-----------------|----------|
| Depreciation | | 3073.62 |
| Profit before Taxes | | 11532.26 |
| Less: Provision for Taxation (including deferred tax) | | 3328.99 |
| Profit after taxes and available for appropriations | | 8203.27 |
| Less: a) Dividend Interim Dividend @ Rs. 9/- per share (paid) Final Dividend @ Re.1/-per share | 663.25 73.70 | |
| b) Tax on Dividend | 12.24 | 749.19 |
| c) Transfer to General Reserve | | 820.33 |
| Balance carried to Profit & Loss Account | | 6633.75 |

- 2.02 In spite of the recession, which continued during the first quarter, your Company had an increase in turnover for the 8th year in succession. The turnover is Rs.1809.90 crores against Rs.1765.31 crores in the previous year. Profit before tax is also higher at Rs. 115.32 crores against Rs. 80.04 crores in the previous year.
- 2.03 The financial position of the Company has been excellent. The Company has invested Rs.168. 22 crores in Liquid Plus or Fixed Maturity Plans of Mutual Funds and Bank Deposits, which in our view have adequate security.
- 2.04 The subsidiary company, Saraswati Sugar Mills Limited, has however shown a marginal loss during the year. Higher cane prices had to be paid in view of shortage and consequent competition for cane. Sugar prices, which were expected to remain at a reasonable level, decreased due to large scale imports of sugar and Government's regulatory steps. The working of the sugar factory (recovery and total quantity of cane crushed) on the other hand, was better than last year. No silver lining is presently seen in the current year as the All India sugar production is expected to be higher than All India consumption.

3.00 **DIVIDEND**:

3.01 The Board has decided to recommend Final Dividend of Re.1/- per Equity Share of Rs.10/- each, in addition to the Interim Dividend (already paid) of Rs.9/- per Equity Share.

4.00 **OPERATIONS:**

- 4.01 The lower order booking as a result of recession in last year had an impact on the working during the first quarter of the year. The shops, though almost fully occupied, executed orders with low margins. The situation improved in the subsequent quarters.
- 4.02 Your Company had a record order booking this year both on the domestic and export fronts.
- 4.03 The market for Boilers and Sugar Machinery continued to be good and the Company booked a number of export orders. These include Atmospheric Fluidised Bed Boiler burning coffee ground waste for supply to China and two large capacity boilers to be supplied to Central America. The Company continued to book orders in South East Asia.

- 4.04 As for Sugar Machinery, your Company secured a high value order in Africa. This is the single largest value order booked in the history of the Company. The Company continued to consolidate its position in South East Asia and has booked further business.
- 4.05 The Process Equipment Division continued to book orders for large Pressure Vessels and Heat Exchangers including equipment to be exported to North America and Europe. On the domestic front, orders were booked for the supply of a Tertiary Separator for Fluidised Catalytic Converter Unit and Convection modules for fired heaters.
- 4.06 As regards the Machine Building Division, with the recovery of the Automotive sector, business improved and the Company has recently booked good orders for the supply of Presses. In fact, the Presses business is poised for further growth and the Company is envisaging the increase of manufacturing capacity to cater to the expected increase in order booking. In addition to Presses, the Division continues its business of booking jobbing orders from Steel and other Industries.
- 4.07 The factory set up at Bawal near Gurgaon to manufacture Standard Presses, commenced production during the year.
- 4.08 With regard to Steel Castings, the order booking is good and the Unit continues to supply castings to many of the prestigious manufacturers of Thermal Power Equipment and Hydro Power Equipment in the country. There has been negligible export due to recession in Europe, which resulted in lowering of prices by Foundries in Europe.
- 4.09 Your Company has entered into a License Agreement for Sub-Critical and Super-Critical Technologies with Foster Wheeler, USA, for Pulverised Coal (PC) Fired Boilers. This will enable the Company to engineer, design, manufacture, erect and sell Sub-Critical Pulverised Coal Fired Boilers (60 MW to 1000 MW) and Super-Critical Pulverised Coal Fired Boilers (550 MW to 1000 MW) primarily for the Indian territory.
- 4.10 As a step towards technology up-gradation, the Company has signed an agreement with Bosch Projects, South Africa, for the transfer of technology for manufacturing Chainless Cane Diffusers and other Sugar Machinery equipment with exclusive rights for Asia (excluding Thailand).
- 4.11 The Company has also signed a Technology Agreement with Belleli, Italy, for the manufacture of Vessels with complex chemistries for the Oil, Gas and Power sectors, primarily for India.
- 4.12 As the shareholders are aware, a Joint Venture was formed in the name of ISGEC HACO Metal Forming Machinery Private Limited along with HACO N.V. Belgium. As the prospects were not promising, the Board decided to exercise the option to exit from the Joint Venture in terms of the Memorandum of Understanding.
- 4.13 Industrial relations remained peaceful.

FORM -B

FORM FOR DISCLOSURE OF PARTICULARS IN RESPECT OF TECHNOLOGY ABSORPTION, 2009-2010 TECHNOLOGY ABSORPTION, ADAPTATION AND INNOVATION:

ISGEC John Thompson Unit (IJT)

As reported in the Directors' Report, a new Agreement with Foster Wheeler, USA, for transfer of technology for Pulverized Coal Fired Sub-Critical Boilers (60 MW to 1000 MW) and Super-Critical Boilers (550 MW to 1000 MW) was signed. The Agreement is valid upto 2030.

This is a new generation technology and it will take some time to assimilate the technology for which continued support of Foster Wheeler is available.

There are two earlier Agreements for technology transfer with Foster Wheeler, USA:-

- i) For Circulating Fluidized Bed Combustion (CFBC) Boilers upto 99.99 Mega Watt (electrical), valid upto 2022.
- ii) For Oil & Gas Shop Assembled Water Tube Packaged Boilers upto 260 Tonnes per hour, valid upto 2017.

Boilers have been supplied successfully, which are designed by Company's Engineers trained by the Collaborators. The Company is moving progressively to supply bigger sized Boilers. The complete absorption and adaptation will happen in due course.

ISGEC UNIT:

Process Equipment Division (PED)

Under the Agreement entered with M/s. Hitachi Zosen Corporation, Japan, for critical equipment for the Fertilizer and Oil & Gas Sectors, the Company has booked a few orders recently and is working jointly with our Collaborator to execute the orders. The execution will enable us to absorb and adapt the technology.

Directors' Responsibility Statement under Section 217 (2AA) of the Companies Act, 1956

Pursuant to the requirement of Section 217 (2AA) of the Companies Act, 1956 ('the Act') and based on the representations received from the operating management, your Directors hereby confirm that:

- (i) in the preparation of the Annual Accounts for 2009-10, the applicable Accounting Standards have been followed and there are no material departures,
- (ii) they have selected such accounting policies with the concurrence of the Statutory Auditors and applied them consistently and made judgements and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the Company at the end of the financial year and of the profit of the Company for the financial year,
- (iii) they have taken proper and sufficient care to the best of their knowledge and ability for the maintenance of adequate accounting records in accordance with the provisions of the Companies Act, 1956. They confirm that there are adequate systems and controls for safeguarding the assets of the Company and for preventing and detecting fraud and other irregularities,
- (iv) they have prepared the Annual Accounts on going concern basis.

Management Discussion & Analysis

- 1. Management Discussion and Analysis, as required under Clause 49 of the Listing Agreement, giving further Analysis, Review, Outlook and Threats is given below:
 - a) The Company anticipates growth in both, turnover and number of customers, during the current year.
 - b) Seeing Power as a thrust sector, the Company has entered into a collaboration with Foster Wheeler for the transfer of technology for Pulverised Coal Fired Sub-Critical Boilers (60 MW to 1000 MW) and Super-Critical Boilers (550 MW to 1000 MW). The entire technology absorption will take a number of years. The success of the business in these boilers will depend on the pace at which the Company is able to absorb technology, the cooperation extended by Foster Wheeler, the buying pattern of the customers (whether they buy boilers in isolation or they go for a power plant on EPC basis) and also the extent of imports that take place, primarily from China.
 - c) The Dahej plant is fully operational as of now. It's future will depend on how many orders it can secure for large and complex Process Equipment. This in turn depends not only on the requirement of the Oil and Gas Industries, but also the various approvals that the Plant needs to secure. There is also intense competition in this sector from the Koreans.
 - d) If the buoyant growth in the Automobile Sector continues, the Company is reasonably confident that the demand for Presses manufactured by the Company shall increase. The challenge here is to keep abreast of changing technologies.
 - e) The factory set up at Bawal near Gurgaon to manufacture Standard Presses, commenced production during the year.
 - f) The market for Sugar Machinery and Boilers for Sugar Plants on the domestic front will largely depend on the health of the Sugar Industry which is not likely to be very good in the coming year. The demand for other Boilers is likely to be buoyant.
 - g) In view of aforesaid factors and slow recovery world over, the prospects for exports are uncertain.
 - h) The foreign exchange market continues to suffer from wide fluctuations. Greater exposure of your Company to exports means that the risk from these fluctuations has increased.
 - i) Any abnormal increase in steel prices is likely to have an adverse impact on the Company.

Statement on Significant Accounting Policies

1 Basis of Accounting

The Financial Statements of the Company are prepared under the historical cost convention and in accordance with applicable Accounting Standards notified by Companies (Accounting Standards) Rules, 2006, (as amended) and the relevant provisions of the Companies Act, 1956. The Company follows mercantile system of accounting and recognises income & expenditure on accrual basis to the extent measurable and where there is certainty of ultimate realisation in respect of income. Accounting policies not specifically referred to otherwise, are consistent and in consonance with the generally accepted accounting principles.

2 Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities at the date of the financial statements and the results of operations during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Difference between the actual results and estimates are recognised in the period in which the results are known .

3 Inventories

Raw Materials, Stores & Spares are valued at lower of cost, calculated on a weighted average basis or net realisable value. However items held for use in the production are not written below cost if the finished goods in which these will be incorporated are expected to be sold at or above cost.

Work-in-Progress and Finished Goods are valued at lower of cost or net realisable value. Cost in case of finished goods and work-in-progress includes material cost and applicable manufacturing and administrative overheads. Value of finished stock is inclusive of excise duty.

Net realizable value is the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to make the sale.

Standing crops are valued at estimated cost of material & labour.

Profit included in closing inventory on account of inter-unit transfers is eliminated to the extent practicable.

4 Fixed Assets

a) Tangible Assets.

Fixed assets are stated at their cost less accumulated depreciation. The cost of an asset comprises its purchase price and any directly attributable cost of bringing the asset to working condition for its intended use. Costs incurred on up-gradation of the Computer Hardware are capitalised. Capital spares directly attributable to the fixed assets are capitalised with the related assets.

b) Intangible Assets

Intangible assets are recognised on the basis of recognition criteria specified in Accounting Standard AS-26.

Costs incurred on acquisition of specialised software & technical know how are capitalised.

The assets are amortised over a period not exceeding ten years on a straight line basis.

5 Depreciation

Depreciation is provided on fixed assets at the rates and in the manner prescribed in Schedule XIV of the Companies Act, 1956 as per the written down value method except in respect of certain Plant & Machinery which are depreciated as per the straight line method. Capital spares directly attributable to the specific fixed assets are depreciated with the cost of the assets.

Assets costing not more than Rs.5,000/- are fully depreciated in the year of their acquisition.

6 Revenue Recognition

Revenue is recognised in case of traded & manufactured products on despatch of goods from the factory / other locations when substantial risks & rewards of ownership are transferred to the buyer.

Revenue in case of erection & commissioning jobs carried out is recognised on stage of completion as per the terms of related agreements / job orders.

Sales are net of inter-unit transfers except where such elimination is not practicable.

Insurance Claims, export incentives, escalation, etc. are accounted for as and when the amounts recoverable can be reasonably determined as being acceptable to the concerned authorities / parties.

7 Investments

Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long-term investments. Current investments are carried at lower of cost and fair value determined for each category separately. Long-term investments are carried at cost on individual investment basis. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments in case of long term investments.

8 Foreign Currency Transactions

(i) Initial Recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency on the date of the transaction.

(ii) Conversion

Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

(iii) Exchange Differences

Exchange differences arising on a monetary item that, in substance, forms part of the company's net investment in a non-integral foreign operation is accumulated in a foreign currency translation reserve in the financial statements until the disposal of the net investment, at which time they are recognised as income or as expenses.

12 Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events of bonus issue, bonus element in a rights issue to existing shareholders, share split, and reverse share split (consolidation of shares).

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

b) Deferred Tax

In accordance with Accounting Standard AS-22 "Accounting for Taxes on Income" notified by Companies (Accounting Standards) Rules, 2006, (as amended), deferred taxes resulting from timing differences between book and tax profits are accounted for at tax rate to the extent the timing difference are expected to be crystallised. Deferred tax assets on account of unabsorbed losses & unabsorbed depreciation are recognised to the extent there is virtual certainty of realising such assets against future taxable income.

14 Impairment of Assets:

As at each Balance Sheet date, the carrying amount of assets is tested for impairment so as to determine

- a) the provision for impairment loss, if any, required or
- b) the reversal, if any, required of impairment loss recognised in previous periods.

Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined

- a) in the case of an individual asset, at the higher of the net selling price and the value in use.
- b) In the case of a cash generating unit (a group of assets that generates identified independent cash flows), at the higher of the cash generating unit's net selling price and the value in use.

Value in use is determined as the present value of estimated future cash flows from the continuing use of an asset/cash generating unit and from its disposal at the end of its useful life.

15 Provisions, Contingent Liabilities & Contingent Assets

Provision for future contingencies and liquidated damages is considered, where applicable. Provisions are recognised for liabilities that can be measured only by using a substantial degree of estimation, if

- a) the Company has a present obligation as a result of a past event,
- b) a probable outflow of resources is expected to settle the obligation and
- c) the amount of the obligation can be reliably estimated.

Contingent Liability is disclosed in the case of

- a) a present obligation arising from the past event, when it is not probable that an outflow of resources will be required to settle the obligation
- b) a possible obligation, unless the probability of outflow of resources is remote.

Contingent Assets are neither recognised, nor disclosed.

Provisions, Contingent Liabilities and Contingent Assets are reviewed at each Balance Sheet date.

16 Commodity Hedging

Risk associated with fluctuations in the prices of the raw material are minimised by hedging on futures market. The result of metal hedging contracts/transactions are recorded at their settlement and charged / credited to Profit and Loss Account.

17 Cash and Cash Equivalents

Cash and Cash Equivalents for the purposes of Cash Flow Statement comprise cash at bank and in hand and fixed deposits with banks, excluding investment in mutual fund.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The financial statements of ICL and IEL have been made and audited upto 31st March, 2010, significant group transactions between the date of these financial statements and that of company's financial statement have been given effect to. These financial statements have been audited by other auditors whose reports have been furnished to us, and our opinion, in so far as it relates to the amounts included in respect of these subsidiaries, is based solely on the report of the other auditors. The accounts for the year have been prepared without consolidating Joint Venture accounts for the facts stated in note 2(b) on Schedule X of these financial statements.

We report that the consolidated financial statements have been prepared by the company in accordance with the requirements of Accounting Standard (AS) -21, 'Consolidated Financial Statements' notified by Central Government under the Companies (Accounting Standards) Rules, 2006 and on the basis of the separate audited financial statements of the SISL Group included in the Consolidated Financial Statements

Based on our audit and on consideration of the reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, in our opinion and to the best of our information and according to the explanations given to us, the attached consolidated financial statements give a true and fair view in conformity with the accounting principles generally accepted in India:

DIRECTORS' REPORT

1.00 The Directors hereby present their Annual Report for the year ended September 30, 2010.

2.00 FINANCIAL RESULTS:

2.01 The financial results for the year are given below:

| | Ks. in Lacs |
|------------------------------------------------------------|-------------|
| Profit before Depreciation | 814.48 |
| Depreciation | 1093.77 |
| Loss for the year after Depreciation | 279.29 |

| Transfer to General Reserve Account | NIL |
| Proposed Dividend (including Dividend Tax) | NIL |
| Balance Loss Transferred to P & L Account | 218.12 |

D.

2.02 The financial results for the year were not good, in view of high cane prices paid due to competition for cane. The cost of production was consequently high. The sugar realization was high during the period when the cane was purchased and, therefore, neighbouring mills were willing to pay a higher price for cane. However, the sugar prices declined rapidly from March 2010. The overall sugar realisation was much lower than what was anticipated and as a result the sugar factory ended the year showing a loss. The financial results were also affected due to increase of levy-free ratio to 20:80 from the earlier 10:90 for this season.

No silver lining is seen in the current year as the All India sugar production is expected to be higher than consumption.

3.00 Dividend:

3.01 In view of the financial results, the Directors have not recommended any dividend.

4.00 Review of the Operations of the Company:

- 4.01 Your factory started crushing on 21st November 2009.
- 4.02 As stated earlier, your factory had to pay a very high cane price, much above the State Advised Price, to secure cane. As a result, the factory was able to crush 118 lac quintals of cane against 68.37 lac quintals of cane crushed in the last season.
- 4.03 The recovery was also higher than the preceding season.
- 4.04 The sugar prices, which were prevailing at higher level till March 2010 decreased due to:
 - i) Higher All India sugar production of 189 lac tonnes against 150 to 160 lac tonnes anticipated at the beginning of the season.
 - ii) Various regulatory measures taken by the Central Government and the State Governments with the aim of lowering sugar prices. These include lowering of sugar stock limits, both for bulk consumers as well as for dealers, and changing the quota for the sale of sugar from monthly basis to weekly basis.

4.05 The statistical position is given below:

| Particulars | Season | |
|---------------------------------------------|----------|---------|
| | 2009-10 | 2008-09 |
| All India Production of Sugar (Lac Tonnes) | 189 | 146 |
| All India Consumption of Sugar (Lac Tonnes) | 210 | 230 |
| Production of Sugar by SSM (Lac Tonnes) | 1.2226 * | 0.681 |
| Closing Stock SSM (Lac Tonnes) | 0.279 | 0.129 |
| Cane Crush by SSM (Lac Tonnes) | 11.82 | 6.84 |
| Recovery % | 10.12 | 9.97 |

^{*} including 0.0253 lac tonnes from raw sugar.

Current Season - 2010-11:

- 4.06 The Central Government has revised the levy-free ratio from 20:80 to 10:90 which was also prevailing prior to the season 2009-10.
- 4.07 The Central Government has announced Fair & Remunerative Price (FRP) of Rs.139.12 per quintal for season 2010-11 against Rs.129.84 per quintal for season 2009-10, linked to 9.5% recovery. The FRP for your factory for season 2010-11 is likely to be approximately Rs.149.34 per quintal against Rs.136.69 per quintal in 2009-10.
- 4.08 While the FRP is determined by the Central Government, the State Governments have also fixed State Advised Price (SAP). The Government of Haryana, has fixed the SAP as follows:
 - i) Early Variety: Rs. 220/- per quintal (increase of Rs. 35/- per quintal over the season 2009-10).
 - ii) Mid Variety : Rs. 215/- per quintal (increase of Rs. 35/- per quintal over the season 2009-10).
 - iii) Late Variety : Rs. 210/- per quintal (increase of Rs. 35/- per quintal over the season 2009-10).
- 4.09 The All India sugar production during the current season is likely to be much higher than the preceding season.
- 4.10 In view of the expected higher production, the Central Government, which had banned the export of sugar, including export under Advance Licensing Scheme obligations, had partially removed the ban.
- 4.11 The cane availability during the season is expected to be better than the previous season because of increase in the cane area. The cane availability would have been much better but for the impact of extensive floods in some of the cane area.
- 4.12 Though the levy-free ratio has been reduced from 20:80 to 10:90 and the availability of cane during the current season is likely to be better than the previous season, the lower sugar prices are likely to result in adverse financials for this season.
- 5.00 The company had filed Industrial Entrepreneurship Memoranda (IEMs) for setting up sugar mills at Kurali and Bhartoli villages near Yamunanagar. The Central Government has recognized these IEMs on 9th November 2010 and 29th October 2010 respectively.
- 6.00 ENERGY CONSERVATION, TECHNOLOGY ABSORPTION, FOREIGN EXCHANGE EARNINGS & OUTGO:
- 6.01 In compliance with the provisions of Section 217(1) (e) of the Companies Act, 1956, the statement giving the required information is annexed hereto.

138 Saraswati Sugar Mills Limited

7.00 PARTICULARS OF EMPLOYEES:
