- j) In terms of the extant provisions of IEPF Rules, the Company has uploaded the information in respect of the Unclaimed Dividends in respect of the financial year 2013-14 and 2016-17, as on the date of the 57th Annual General Meeting (AGM) held on 31st July, 2018 on the website of the IEPF viz. www.iepf.gov.in and also in the Company's Website www.hckotharigroup.com/kscl under "Investors Section."
- k) Members holding shares in Dematerialized form are requested to intimate immediately all changes pertaining to their Bank details NACH / NECS / ECS, mandates, nominations, power of attorney, change of address / name etc., to their Depository Participant only and not to the Company's Registrar and Share Transfer Agents (RTA). Changes intimated to the Depository Participant will be automatically reflected in the Company's records which will help the Company and the RTA to provide efficient and better service to the Members. Members holding shares in physical form are requested to advice the above changes and Transmission of Shares to the Company's RTA viz. M/s. Cameo Corporate Services Limited.
- l) SEBI vide its Circular dated 20th April 2018, mandated the Company, RTA and the dividend processing Bank to ensure that the master file for processing the dividend shall inter alia include, the shareholders details such as, Bank name, Bank account number, Bank branch, MICR number, etc., before processing the dividend. If there is any change in bank account details of the shareholder, RTA shall obtain account details along with cancelled cheque to update the shareholder's data. The original cancelled cheque shall bear the name of the shareholder failing which shareholder to

submit copy of bank passbook/statement attested by the Bank. In cases where either the bank details such as MICR (Magnetic Ink Character Recognition), IFSC (Indian Financial System Code), etc. that are required for making electronic payment are not available or the electronic payment instructions have failed or have been rejected by the Bank, the Company / RTA may request the banker to make payment through physical instrument such as banker's cheque or demand draft to such shareholder incorporating his Bank account details. Hence Shareholders are requested to update their Bank account details with their Depository Participant if they are holding the shares in Demat and to RTA in case they are holding the shares in physical. In this connection, the Company has already issued three reminders to all shareholders, who have not updated their PAN and Bank account details of first and sole shareholders of the Company. Once again, the members are advised to update the details with RTA.

- m) Further, the Company draws your attention to the notification issued by SEBI dated June 08, 2018 and the press release dated 3rd December 2018 amending Regulation 40 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Pursuant to the amended provisions, any request for effecting transfer of shares in physical form shall not be processed except in case of transmission or transpositions of shares unless the shares are held in demat form. Hence, the Company / Registrar and Share Transfer Agent would not be in a position to accept / process the requests for transfer of shares held in physical form with effect from 01.04.2019. Therefore, the Company advises you to take immediate steps for dematerializing your shareholding in the Company. You may be aware holding shares in dematerialized form offers lots of benefits like enhanced security, ease of handling, faster transfers and eliminating bad deliveries. In view of the above, in order to ensure that you are able to deal in the shares hassle-free, kindly take steps for dematerializing the shares at the earliest.
- n) The Company has designated an exclusive e-mail id viz. secdept@hckgroup.com to enable investors to register their complaints / queries, if any.
- o) In terms of circulars issued by Securities and Exchange Board of India (SEBI), it is now mandatory to furnish a copy of PAN card to the RTA in the following cases viz. Transfer of Shares, Deletion of Name, Transmission of Shares and Transposition of Shares. Shareholders are requested to furnish copy of PAN card for all the abovementioned transactions.
- p) **The shareholders are expected to send their queries on financial statement / other reports of Annual Report to the Company in the email id secdept@hckgroup.com, atleast 3 days before the date of meeting, so that the requisite information/ explanations can be provided on time.**

- q) Pursuant to Section 72 of the Companies Act, 2013 and the Rules made there under the Members holding shares in single name may, at any time, nominate in form SH-13, any person as his/her nominee to whom the securities shall vest in the event of his/her death. Nomination would help the nominees to get the shares transmitted in their favour without any hassles. Members desirous of making any cancellation/ variation in the said nomination can do so in form SH-14. The nomination forms can be downloaded from the Company's website www.hckotharigroup.com/kscl.
- r) Disclosure pursuant to Regulation 36(3) of SEBI (LODR) Regulations, 2015 with respect to the Directors seeking re-appointment at the forthcoming Annual General Meeting is appended to this Notice.
- s) Electronic copy of the Notice and Annual Report of the 58th Annual General Meeting of the Company inter alia indicating the process and manner of e-voting along with Attendance Slip and Proxy Form is being sent to all the members whose email IDs are registered with the Depository Participant(s) for communication purposes unless any member has requested for a hard copy of the same. For members who have not registered their email address, physical copies of the Notice and Annual Report of the 58th Annual General Meeting of the Company inter alia indicating the process and manner of e-voting along with Attendance Slip and Proxy Form are sent in the permitted mode.
- t) Members may also note that the Notice of the 58th Annual General Meeting and the Annual Report for 2018-19 will also be available on the Company's website www.hckotharigroup.com/kscl for their download. The physical copies of the aforesaid documents will also be available at the Company's Registered Office for inspection during normal business hours on working days. Even after registering for e-communication, members are entitled to receive such communication in physical form, upon making a request for the same at free of cost. Sugar Industry Overview

The global sugar production in the sugar year 2018-19 is expected to be around 186 million MT against last year's production of 194 Million MT. The sugar consumption during 2018-19 sugar year is expected to be 185 million MT against the consumption of 175 million MT previous year. 2019-20 sugar year is also expected to follow the production and consumption pattern of 2018-19. Current sugar years' global sugar consumption growth is expected to be 1.1% against the long term level of 2%.

India's sugar production for the Sugar Year 2018-19 is expected to be 33 million MT against previous sugar year production of 32.5 million MT. Though the area under sugar cane cultivation has come down marginally compared to

previous year, the overall sugar production is likely to remain more or less at the same level due to better recovery in the central and northern India. 2019-2020 Sugar year will also be a surplus year for India as the preliminary estimates indicate production of around 33 million MT against the consumption of around 26 million MT.

Tamil Nadu's sugar production in the sugar year 2018-19 is expected to be around 0.85 million MT, against last year's production of 0.78 million MT. As the state is severely affected due to failure of monsoon consecutively for seven years, there is no significant improvement in sugarcane cultivation area.

The Company's cane area is also facing severe drought conditions which may affect cane availability besides adversely affecting sugar cane yield and recovery.

Performance of Business Segment

Sugar

Your company has crushed 6,61,729 tons of cane during financial year 2018-19 and produced 6,21,760 quintals of sugar as against cane crushing of 5,50,416 tons and sugar production of 5,09,860 quintals (excludes 48,580 quintals of sugar made from imported raw sugar processing) in the previous year. This increase of around 20% in cane crushing is mainly on account of marginal increase in cane area and sugarcane yield in the mills' command area and additional 50,000 / MT of cane allotted from other sugar mill area. The average Sugar recovery was 9.51% during financial year 2018 -19 as against 9.19% reported in the previous year.

Alcohol

The total Alcohol production during financial year 2018 - 2019 was 154.62 Lakh litres as against 129.25 Lakh litres produced in the previous year. The proactive steps taken by the management in procuring molasses from north India has helped to achieve this additional production. Your company got order from Oil Marketing Companies (OMC's) for the supply of 12 lakh litres of Ethanol which will be supplied from June'19 to August'19.

Co-generation of Power

The total power generation during financial year 2018-19 was 55.7 million units against 49.9 million units for the corresponding period of 2017-18. This increase of around 11% is because of increase in crushing operation.

Conservation of Energy / Technology Absorption / Foreign Exchange Earning and Outgo

(a) Conservation of Energy

Kattur unit

560 kilowatt D.C. drive of first & second mill was replaced with A.C. drive with VFD and commissioned on 22nd January 2019.

➤ Energy consumption of old DC drive including blower	:	2.80 kwh / ton of cane
➤ Energy consumption of new system	:	2.22 kwh / ton of cane
➤ Net reduction in energy consumption	:	0.58 kwh / ton of cane
➤ Total cane crushing for the sugar season (from 22/01/2019 to 06/05/2019)	:	2,34,106 MT
➤ Total energy saving (from 22/01/2019 to 06/05/2019)	:	1,35,781 kwh

Sathamangalam unit

(i) A variable frequency drive has been installed in the 75 KW sulphured juice pump and commissioned on 22nd December 2018.

➤ Energy consumption per month before installation of VFD	:	54,720 kwh
➤ Energy consumption per month after installation of VFD	:	48,240 kwh
➤ Energy saving per ton of cane	:	0.07 kwh / ton
➤ Total energy saving during 2018-19 crushing season	:	32,550 kw

(ii) An automatic on-off level control system has been installed in the de-aerator storage tank and feed water transfer pump. A 45 kw variable frequency drive has been installed in the boiler feed water transfer pump and commissioned on 20th December 2018.

➤ energy consumption per month before installation of VFD	:	21,600 kwh
➤ energy consumption per month after installation of VFD	:	9,300 kwh
➤ Energy saving per ton of cane	:	0.13 kwh / ton
➤ Cane crushing for the season 2018-19	:	4.65 lac MT
➤ Total energy saving during 2018-19 crushing season	:	60,450 kwh

(iii) The steam condensate from semi kestner has been directly fed in to the De-aerator avoiding earlier system of passing through the feed water storage tank. With this arrangement, steam consumption in de-aerator has been reduced by 10 MT per day.

(b) Technology absorption

Sugar colour at both Kattur and Sathamangalam plants has been improved to below 50 ICUMSA level as against the industry norm of below 100 ICUMSA. This has been achieved through in house R & D efforts. This is one of the best sugar colour achieved thorough double-sulphitation process in the sugar industry.

(c) Ongoing projects

(i) Ethanol storage tanks:

As per the recently amended PESO (Petroleum and Explosives Safety Organisation) norms, distilleries are required to provide storage facilities separately for storing the ethanol produced and have a license from PESO. In order to comply with these norms, your company is installing 2 storage tanks having capacity of 300 KL each.

(ii) Multi Effect Evaporator system:

In order to reduce the effluent (spent wash) quantity by 60%, your company is installing a multiple effect evaporator system. Concentrated spent wash from this evaporator system will be utilised for bio-compost manufacturing process. This system is expected to be commissioned by November 2019.

(iii) Bio - Digester:

To meet the steam requirement of the proposed multiple effect evaporator system, a new bio-digester is being installed in the distillery unit to generate additional bio-gas by using the spent wash coming out from distillation plant. This additional bio-gas will be used in the boiler to generate additional steam to meet the steam demand of multiple effect evaporator system. This system is expected to be commissioned by November 2019.

(iv) Poly house shed:

It is proposed to construct a poly house shed covering an area of 4 acres, to process the bio-compost during monsoon period. This will allow us to operate our distillery plant even during

rainy season subject to availability of molasses. The construction of this shed will be completed by October 2019.

(d) Foreign exchange earnings and Outgo

Management Discussion and Analysis

Industry Structure and Development

World Sugar

In the sugar year 2018-2019, the world sugar production is expected to be around 186 million MT against 194 million MT in the previous year. The consumption is also expected to be around 185 million MT in 2018-19 SY against 175 million MT in the previous year. This will be a more or less balanced production and consumption period. Similarly 2019-20 sugar year is also expected to be a balanced production and consumption year. This is mainly on account of decrease in production in Brazil and European Union than the initial estimates.

Changes in oil and energy prices will have significant impact on the sugar cane utilization for production of ethanol in major ethanol producing countries like Brazil, which will greatly influence the sugar market.

The world sugar market continues to experience considerable price volatility and the global stocks to use ratio is in the range of 35% to 40%.

Government policies that intervene in sugar markets, and production cycles in some major cane producing countries of Asia, will continue to influence world sugar production and price volatility over the longer term.

Indian Sugar

In the sugar year 2018-2019, India's sugar production is expected to be around 33 million MT against last sugar year production of 32.5 million MT and the sugar consumption is estimated as 26 million MT against last year consumption of 25.5 Million MT. This will be the highest production ever in the history of Indian sugar Industry. With this, India will reach the position of number one producer in the world surpassing Brazil.

The opening stock of sugar in the beginning of 2018-19 sugar year was 10.7 million MT against 4.5 million MT in the previous year. Expected closing stock at the end of 2018-19 will be around 14.7 million MT taking into account of opening balance, surplus production in the current year and expected export of 3 million MT.

Higher stocks coupled with surplus production in both domestic and world market, has resulted in steep fall in the sugar price which has reached to a level of ₹ 26/Kg in the month of May 2018. However, with timely intervention of the Govt. of India by introducing monthly release mechanism and fixing MSP for sugar at ₹ 29/Kg, the price has stabilised at around ₹ 30/Kg from June 2018 onwards. However this price was not adequate to cover the cost of production. Further the sugar cane procurement price (FRP) was hiked from Oct. 2018 onwards. After repeated representations by the industry, The central Government has increased the MSP to ₹ 31/Kg from Feb 2019 onwards.

World Sugar Production, Consumption and Stock

Raw Sugar price Trend

Though the Government has announced MIEQ (Minimum Indicative Export Quota) of 50 lakh tons for exports for the current marketing year (Oct.'18 to Sept.'19), due to depressed world sugar market, export is not viable even with various incentives announced by the Government of India (GOI). Export contracts were confirmed only for 27 lakh tons, so far.

Govt. of India has announced ₹ 2612.50/MT as Fair and Remunerative Price (FRP) linked to 9.5% recovery for sugar cane for 2018-19 crushing season. Considering lower sugar realization from domestic sales as well as depressed global sugar market, sugar mills are unable to generate sufficient funds for payment of cane price to the farmers on time.

Government Policies

Government of India has taken the following measures to stabilise the market:

- Monthly sugar release mechanism has been re-introduced from June'18 onwards. Under this mechanism, the GOI allots monthly quota of sugar to each sugar unit for sale in the open market.
- Minimum support price (MSP) for Sugar has been fixed at ₹ 29/kg in June'18 and subsequently raised to ₹ 31/kg in Feb.'19. Under this directive, sugar mills should not sell sugar below MSP.
- GOI has created a buffer stock of 30 lakh MT of sugar which will be stocked in the respective sugar mills. The holding cost will be borne by the Govt. for one year.
- Allocated 5 million tons of sugar for export under MIEQ (Minimum Indicative Export Quota). Transport subsidy of up to ₹ 2500 / ton of sugar has been approved for export of sugar from factory to the nearest port.

- (e) The central Govt has also announced a sugar cane subsidy of ₹ 138.80 / ton of cane provided the individual company has complied with all directives of the Government.
- (f) Procurement price has been fixed at ₹ 43.46/ltr for the Ethanol produced from C-molasses, ₹ 52.43/ltr. for the Ethanol produced from BH-molasses and ₹ 59.13/ltr. for the Ethanol produced from 100% sugarcane juice.
- (g) Soft loan with Interest subvention scheme for one year has been announced based on the last sugar year's sugar production and current year operation to clear the cane dues.
- (h) Also, soft loan with interest subvention scheme has been approved for enhancement of ethanol production capacity.

The Tamilnadu state government has taken the following steps during the 2018-2019 sugar year:

- (a) For the sugar year 2017-18, ₹ 200/ton has been directly paid to the registered cane growers against their supplies.
- (b) Revenue sharing formulae for sugar cane procurement price will be followed for the sugar year 2018-19 also.
- (c) State Government has allocated ₹ 150 crores in the 2019-20 budget towards payment of ₹ 137.50 /ton of cane (to bridge the gap between FRP and SAP) as transitional production incentive. This will be directly paid to the registered cane farmers who have supplied cane during the 2018-19 crushing season.

Opportunities and Threats

Though sugar production is going to be surplus during current year as well as during the year ahead, the Govt. policies like MSP and monthly sugar release mechanism will help in stabilisation of the sugar price. Further government push to produce more ethanol by diverting B-Heavy molasses, direct cane juice etc., will ease the surplus sugar production in the long run. Number of new distillery units are being set up in the country to enhance ethanol production capacity.

Vagaries in the monsoon pattern will have impact on the availability of sugar cane which is the major raw material. Any further increase in FRP for the sugarcane for the sugar season 2019-20 will have impact on the financials of the company, if the MSP is not proportionately raised with the cost of production of sugar.

Segment-wise or product-wise performance of the company

Sugar

The quantum of cane crushed during 2018-19 financial year was 6,61,729 tons against 5,50,416 tons reported for the corresponding period last year. This was mainly possible because of marginal increase in the cultivation area and yield in your command area compared with last year in spite of drought conditions and also the cane diversion from the nearby private sugar mills.

In 2018-2019 sugar season, the sugar cane cultivation area is expected to remain in the same level of 2017-18.

Your company has been allotted 1,08,180 Quintals of sugar for export during 2018-19 sugar year under MIEQ. The management is closely monitoring the international market and will take the decision at appropriate time based on the feasibility.

Power

Long term PPA with TANGEDCO continues. The tariff for the export of power was ₹ 3.67 / Kwh for Kattur unit and ₹ 4.229 / Kwh for Sathamangalam unit. Power generation was higher by 11% compared with previous year because of increase in sugar cane crushing.

Alcohol

The distillery was operated with high efficiency. As the availability of own molasses and molasses within the state was inadequate, the company has procured 37,832 tons of molasses from other States like UP and Bihar and operated distillery for a maximum possible number of days. Alcohol production was higher by 19.6 % than last year with this additional molasses purchase. Similarly, the company is procuring molasses from north India during current financial year as well to maximise the capacity utilisation.

Outlook

2018-19 and 2019-20 sugar years are going to be a balanced sugar production years globally and surplus sugar production years for India. Central and northern part of India is recording higher production than the estimates, southern part of India, particularly Tamilnadu records continuously its downward trend because of severe drought. Availability of water, Government policies on sugar and ethanol are the key factors going to decide the fate of sugar industry in India in general and Tamil Nadu in particular.

Risk and Concerns

Industry Risk

Whenever there is surplus sugar production in the country the selling price falls below cost of production. Most of the times when India produces surplus sugar, the Global sugar production also becomes surplus. Hence, exports also become unviable.

Risk Mitigation

Increasing ethanol production capacity in order to absorb surplus sugar available in the market for stabilisation of sugar price in the long run. Development of alternate usage of sugar and positive and proactive policies by the Government are the key drivers.

Risk specific To Company

Seven consecutive years of drought and failure of North east Monsoon (NEM) has lead to shrinkage of cane cultivation area in Tamil Nadu in general and in Your company's command area in particular. This has resulted in reduced raw material availability for crushing which adversely affects the overall capacity utilisation of the factories besides increasing the cost of production.

Risk Management

Your company gives top priority for development of sugar cane in the command area by optimising the utilisation of all resources.

A few major initiatives taken by the company are given below.

- Working on development of new sugar cane clones having characteristics like higher yield, high sugar recovery, early maturing, drought tolerant, pest & disease resistant etc., in association with SISMA and Sugar cane Breeding Institute, Coimbatore.
- Educating farmers on modern cultivation practices by organising technical seminars, providing technical support, demonstrating modern practices in Demo plots, etc.

- Providing technical and financial support to the farmers on development of irrigation infrastructure such as well deepening, lift irrigation, installation of new bore/pumps, etc.
- Promoting water conservation systems like micro irrigation system in association with the State Agriculture department.
- Promoting mechanisation right from soil preparation to harvest in order to reduce the overall cost of cultivation.

Discussion on Financial Performance with respect to Operational Performance

Due to marginal increase in cane availability the sugar output has increased by 11% compared to the previous year and sustained sugar price has helped the Company to marginally reduce the losses in the sugar segment. In the distillery segment the profitability improved marginally owing to higher output by 20% despite the drop in selling prices by around 12%.

The finance cost increased by 8% compared to the previous year which is mainly due to increased short term borrowings due to regulated sugar sales imposed by the Government of India to stem the free fall of sugar price. The resultant increase in borrowings necessitated to pay cane farmers towards their supplies.

Internal Control Systems and their adequacy

The Company has established a system of internal control across all its business operations and for safeguarding the Assets. The functions of Internal Audit are carried out by an Independent firm of Chartered Accountants, who submit their Reports on a quarterly basis to the Management. These Reports are also placed before the Audit Committee at its meetings and they are reviewed by the Audit Committee. The Board, Audit Committee and the Management ensure that the internal financial control system operates effectively.

The Internal Auditors review the adequacy of internal control systems and suggest necessary checks and balances to ensure and increase the effectiveness of the system. Clear policies have been laid down for approval and control of expenditure. Investment decisions involving capital expenditure are subjected to detailed appraisal and review. Capital and revenue expenditure are monitored and controlled with reference to approved budgets.

Human Resources / Industrial Relations

Human resources are the most important resources in an organization and need to be used efficiently, because success, stability and growth of an organization depend on its ability in acquiring, utilizing and developing the human resources for the benefit of the organization.

Employees attend a series of training sessions on Technical and soft skills as part of Employee Development Program. Special Onsite Program and In-house Training programme were conducted on safety. Key Performance Indicators are utilized for the career growth of employees. During the year, the industrial relations have been cordial, conducive and mutually productive.

The Human Resources Department created an Internal Complaint Committee for the prevention and redressal of sexual harassment of women at work place as per the requirement of Sexual Harassment of Women at Workplace (Prevention, Prohibition & Redressal) Act 2013. There were no incidents of sexual harassment reported during the year under review, in terms of the provisions of the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013.

Total number of employees as on 31st March 2019 was 492 in respect of sugar and allied operations.

INDEPENDENT AUDITORS' REPORT FOR THE YEAR ENDED 31ST MARCH 2019

To the members of Kothari Sugars and Chemicals Limited REPORT ON THE AUDIT OF FINANCIAL STATEMENTS Opinion

We have audited the financial statements of Kothari Sugars and Chemicals Limited ("the Company"), which comprise the Balance Sheet as at 31st March 2019 and the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and Notes to the Financial Statements, including a summary of the Significant Accounting Policies and other explanatory information (hereinafter referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2019, the Profit (including Other Comprehensive Income), the changes in Equity, and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing ("SAs") specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statement.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Financial Statements of the current period. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon and we do not provide a separate opinion on these matters.

We have determined the matters described below to be the key audit matters to be communicated in our report.

S. No.	Key Audit Matter	Response to Key Audit Matter
1.	Quantity of raw materials Significant portion of the material procurement is from individual farmers and sugarcane are accounted on weight-basis. Hence, any variance in the ascertainment of the quantity purchased may have a significant impact on the cost of materials.	We have carried out audit procedures, which included: ➤ Assessment of controls over ascertaining the quantity of purchase for which payment is made. ➤ Assessment of controls over calibration system of the weighing equipment.
2.	Contingent liabilities The Company has material amounts of disputed statutory levies such as Excise Duty, Customs Duty and Electricity taxes, which have not been paid pending adjudication by the respective authority. Refer to Note 43 of the financial statements.	We have carried out the validation of the information provided by the management, by performing the following procedures: ➤ Examining the relevant documents on record ➤ Evaluating the reasonableness of the underlying assumptions ➤ Relying on relevant external evidence available including legal opinion, relevant judicial pronouncements and industry practices ➤ Assessment to confirm that contingencies exist in each case.

Information other than the financial statements and Auditor's report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Corporate Governance Report and Shareholders' Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information, and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's responsibility for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting

standards specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3) (i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Financial Statements may be influenced. We consider quantitative materiality and qualitative factors (i) in planning the scope of our audit and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Annexure - B to the Independent Auditor's Report for the year ended 31st March 2019.

(Referred to in paragraph 2 under "Report on Other Legal and Regulatory Requirements" section of our report to the Members of Kothari Sugars and Chemicals Limited of even date)

Report on the Internal Financial Controls with reference to financial statement under Section 143(3)(i) of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to the financial statements of Kothari Sugars and Chemicals Limited ("the Company") as of 31st March 2019 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to the financial statements, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were in place and if such controls were operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial controls with reference to financial statements are designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

CORPORATE OVERVIEW

Kothari Sugars and Chemicals Limited (referred to as "KSCL" or the "Company") are the Manufacturers of Sugar, Alcohol and Power generation having units at Kattur and Sathamangalam, Tamilnadu.

KSCL has two sugar factories having a capacity to crush 6400 Tons of Cane per day, generate 33 MW of power and a distillery having a capacity of 60 KLPD.

The functional and presentation currency of the Company is Indian Rupees ("₹") which is the currency of the primary economic environment in which the Company operates.

The financial statements for the year ended 31st March, 2019 was approved for issue by the Board of Directors of the Company on 21st May, 2019 and is subject to the adoption by the shareholders in the ensuing Annual General Meeting.

SIGNIFICANT ACCOUNTING POLICIES

1. Statement of Compliance

The financial statements have been prepared in accordance with Ind AS notified under section 133 of the Companies Act 2013 [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

(a) New Standards issued

The Companies (Indian Accounting Standards) Amendment Rules, 2018 issued by the Ministry of Corporate Affairs (MCA) notified Ind AS 115, Revenue from Contracts with Customers. Ind AS 115 is effective from reporting periods beginning on or after April 1, 2018.

Ind AS 115, Revenue from contracts with customers deals with revenue recognition and established principles for reporting useful information to users of financial statements about the nature, amount of timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognized when a customer obtains control of a promised goods or services and thus has the ability to direct the use and obtain the benefits therein and reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The Standard replaces Ind AS 18 Revenue Recognition and Ind AS 11 Construction contracts and related appendices.

Following process to be applied before revenue can be recognized:

- (i) Identify contracts with customers
- (ii) Identify the separate performance obligation
- (iii) Determine the transaction price of the contract
- (iv) Allocate the transaction price of the separate performance obligations, and

- (v) Recognize the revenue as each performance obligation is satisfied.

1.1 Basis of preparation and presentation

The financial statements have been prepared in accordance with Ind AS notified under section 133 of the Companies Act 2013 [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principle accounting policies are set out below:

1.2 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

(a) Sale of goods

Revenue from the sale of goods is recognized when the goods are dispatched and titles have passed, at which time all the following conditions are satisfied:

- the company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the company; and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

In barter transaction, revenue is recognized at fair value of the goods given up when the goods are dispatched.

(b) Rendering of Services

Revenue from a contract to provide services is based on the agreements / arrangements with the concerned parties and when services are rendered.

(c) Dividend and interest income

- i) Dividend income from investments is recognized when the shareholder's right to receive payment has been established.
- ii) Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

(d) Insurance Claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

(e) Export incentives

Export incentives are treated as income in the year of export at the estimated realisable value.

1.3 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases

Company as Lessee

The Company's significant leasing arrangements are in respect of operating leases for premises that are cancellable in nature. Lease rentals under such agreements are recognised in the statement of Profit and loss as per the terms of the lease.

Rental expenses from operating leases are generally recognized on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognized in the year in which such benefits accrue.

Company as Lessor

The Company's significant leasing arrangements are in respect of operating leases for premises that are cancelable in nature. The lease rentals under such agreements are recognized in the Statement of Profit and Loss as per the terms of the lease.

Rental income from operating leases is generally recognized on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognized in the year in which such benefits accrue.

1.4 Functional and presentation currency and Foreign Currency Transactions

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which these entities operate (i.e. the "functional currency"). The financial statements are presented in Indian Rupee (₹), the national currency of India, which is the functional currency of the Company.

In preparing the financial statements of the company, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for :

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings; and
- Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.

1.5 Borrowing & related costs

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs), and the redemption amount is recognized in Profit and Loss over the period of borrowings using effective interest method.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

1.6 Government grants

Government grants are not recognized until there is reasonable assurance that the Company will comply with the conditions attaching to them and the grants will be received.

Government grants related to revenue nature are recognized on a systematic basis in the Statement of Profit and Loss over the periods necessary to match them with the related costs which they are intended to compensate and are adjusted with the related expenditure. If not related to a specific expenditure, it is taken as income and presented under "Other Income".

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

1.7 Employee Benefits

(a) Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period.

Defined benefit costs are categorized as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- Re-measurement.

The company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'.

Past service cost is recognized in profit or loss in the period of a plan amendment.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Re-measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Re-measurement recognized in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss.

Curtailment gains and losses are accounted for as past service costs. The retirement benefit obligation recognized in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Contributions paid/payable to defined contribution plans comprising of Superannuation and Provident Funds for certain employees covered under the respective Schemes are recognized in the Statement of Profit and Loss each year.

A liability for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

(b) Short-term and other long-term employee benefits

A liability is recognized for benefits accruing to employees in respect of wages and salaries in the period the related service is rendered.

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognized in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

Gratuity for certain employees is covered under a Scheme of Reliance Nippon Life Insurance Co.Limited and contributions in respect of such scheme are recognized in the Statement of Profit and Loss. The liability as at the Balance Sheet date is provided for based on the actuarial valuation carried out as at the end of the year.

1.8 Earnings per Share

The Company presents basic and diluted earnings per share (EPS) data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

1.9 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

(a) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

(b) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

(c) Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

1.10 Property, Plant and Equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognized so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Estimated useful lives of the assets are as follows:

Assets costing ₹ 5,000 and below are depreciated over a period of one year.

Assets on leased premises are depreciated on the remaining period of lease or as per the useful life prescribed in schedule II of the Companies Act 2013 whichever is earlier.

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use

of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

1.11 Investment Property

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost including transactions costs. Subsequent to initial recognition, investment properties are measured in accordance with Ind AS 16's requirement for cost model.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on de-recognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is de-recognized

1.12 Intangible Assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

(a) De-recognition of intangible assets

An intangible asset is de-recognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss when the asset is de-recognized.

(b) Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows: Licenses 3 to 6 years.

1.13 Impairment of Tangible & Intangible Assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired. Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss. When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

1.14 Inventories

Inventories are stated at the lower of cost and net realizable value. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Cost of inventory comprises of purchase price, cost of conversion and other directly attributable costs that have been incurred in bringing the inventories to their respective present location and condition. Borrowing costs are not included in the value of inventories.

The cost of inventories is computed on weighted average basis. Inventories are written down on a case-by-case basis if the anticipated net realizable value declines below the carrying amount of the inventories. Such write downs are recognized in the Statement of Profit and Loss. When the reason for a write-down of the inventories ceases to exist, the write-down is reversed.

1.15 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

1.16 Financial instruments

Financial assets and financial liabilities are recognized when a company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

1.17 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets

(a) Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortized cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition). The debt instruments carried at amortized cost include Deposits, Debtors, Loans and advances recoverable in cash.

The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. For the impairment policy on financial assets measured at amortised cost, refer note 1.17e. All other financial assets are subsequently measured at fair value.

(b) Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest expenses over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Expense is recognized on an effective interest basis for debt instruments other than those financial liabilities classified as at FVTPL. Interest expense is recognized in profit or loss and is included in the Finance cost line item.

(c) Investments in equity instruments at FVTPL (Fair Value Through Profit and Loss account)

The Company has elected to carry investment in equity instruments as Fair value through Profit and Loss account. On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in profit and loss account pertaining to investments in equity instruments. This election is permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in Profit and Loss account.

The Company has certain strategic equity investments and some are held for trading. The Company has elected the FVTPL irrevocable option for these investments (see note 6). Fair value is determined in the manner described in note 40.2.

Dividends on these investments in equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably. Dividends recognized in profit or loss is included in the 'Other income' line item.

(d) Financial assets at fair value through profit or loss (FVTPL)

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognized when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

(e) Impairment of financial assets

The Company applies the expected credit loss model for recognizing impairment loss on financial assets measured at amortized cost, lease receivables, trade receivables, and other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument through the expected life of that financial instrument.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind

AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward looking information or case to case basis

(f) De-recognition of financial assets

The Company de-recognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of that financial asset

(g) Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

For foreign currency denominated financial assets measured at amortized cost and FVTPL, the exchange differences are recognized in profit or loss except for those which are designated as hedging instruments in a hedging relationship.

1.18 Financial liabilities and Equity instrument

(a) Classification at debt or equity

Debt and equity instruments issued by the company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument

(b) Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a company entity are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

(c) Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for de-recognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Company, and commitments issued by the Company to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below

(i) Financial liabilities at FVTPL

Financial liabilities at FVTPL include derivative liabilities. Non-derivative financial liabilities are classified as at FVTPL when the financial liability is either contingent consideration recognized by the Company as an acquirer in a business combination to which Ind AS 103 applies or is held for trading or it is designated as at FVTPL. There are no non-derivative financial liabilities carried at FVTPL.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other income' line item. Fair value is determined in the manner described in note 40.2

(ii) Financial liabilities subsequently measured at amortized cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortized cost are determined based on the effective interest method. Interest expense that is not capitalized as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments

(including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

(iii) Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortized cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortized cost of the instruments and are recognized in 'Other income'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognized in profit or loss.

(iv) De-recognition of financial liabilities

The Company de-recognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

1.19 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

1.20 Key sources of estimation uncertainty

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Key assumption concerning the future and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year is as given below.

(a) Fair value measurement and valuation processes

Some of the Company's assets and liabilities are measured at fair value for financial reporting purposes. In estimating the fair value of an asset or a liability, the Company uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Company engages third party qualified valuers to perform the valuation. The management works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. NOTES FORMING PART OF FINANCIAL STATEMENTS
Note - 38
A. Defined contribution plans

The Company makes Provident Fund, Superannuation Fund which are defined contribution plans, for qualifying employees. Under the Schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised ₹ 119.62 Lakhs (2017-18 ₹ 112.90 Lakhs) for provident fund contribution and for superannuation fund contribution of ₹ 8.42 lakh (2017-18 ₹ 7.80 Lakhs) in the statement of Profit or loss. The contribution payable to these plans by the Company are at rates specified in the rules of the schemes.

B. Defined benefit plans (Gratuity)

In respect of Gratuity plan, the most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out as March 31, 2019 by Mr. S Krishnan, fellow of the Institute of actuaries of India. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit cost method. The following table sets forth the status of the Gratuity Plan of the Company and the amount recognized in the Balance Sheet and Statement of Profit and Loss. The Company provided the gratuity benefit through annual contributions to a fund managed by the M/s. Reliance Nippon Life Insurance Company Limited.

The Company is exposed to various risks in providing the above gratuity benefit which are as follows:

Interest Rate risk : The plan exposes the Company to the risk of fall in interest rates. A drop in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.

Investment risk : The probability or likelihood of occurrence of losses relative to the expected return on any particular investment which is inherent.

Salary escalation Risk : The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

Demographic risk : The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.

Gratuity

Liability to existing employees of the Company in respect of gratuity is covered under a common insurance policy administered by a trust maintained for the participating enterprises viz. Kothari Sugars and Chemicals Limited (KSCL) and Kothari Petrochemicals Limited (KPL).

The actuarially valued liabilities under the Projected Unit Credit Method for the employees of the participating enterprise of the trust are calculated enterprise wise. The investments available with the underwriter are adjusted in proportion to the liability and the shortfall is provided for in the books of the participating enterprise. Consequently, the actuarial loss / gain if any relating to the other participating enterprise is also borne by every other participating enterprise.

The following table sets forth the status of the Gratuity plan of the Company and the amounts recognized in the Balance sheet and Profit and loss Account.

NOTES FORMING PART OF FINANCIAL STATEMENTS
41.1 Credit Risk Management

Credit risk refers to the risk that a counter party will default on its contractual obligations resulting in financial loss to the Company. The Company is exposed to credit risk from its operating activities (predominantly trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to the customer credit risk management. The Company uses financial information and past experience to evaluate credit quality of majority of its customers and individual credit limits are defined in accordance with this assessment. Outstanding receivables and the credit worthiness of this counter parties are periodically monitored and taken up on case to case basis. There is no material expected credit loss based on the past experience. However, the Company assesses the impairment of trade receivables on case to case basis and has accordingly created loss allowance.

The credit risk on cash and bank balances is limited because the counter parties are banks with high credit ratings assigned by accredited rating agencies.

41.2 Liquidity Risk Management

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The table below provides details regarding contractual maturities of financial liabilities as at 31, March 2019.
