Commenting on the company's performance, Sreekanth Nadella, Managing Director and CEO, KFin Technologies Limited said, *"We are happy to announce the Q1 financial results reflecting the accelerated execution of our growth strategy – substantially expand addressable market whilst reducing risk through business diversifaction. Revenue growth was strong, led by sustained momentum in our international business, both organic and through Ascent Fund Services, and by several new mandates from clients with AUM in excess of US$100 million. Margins reflect the current stage of Ascent's growth trajectory, along with planned annual increments and lower mark-to-market gains; we expect margins to expand as Ascent scales and as synergies are realized. Our Issuer Solutions business followed typical seasonal pattern - softer first quarter and expected growth driven corporate actions. We continued to invest in the platforms that differentiate KFintech in the market. This quarter, we advanced SIP automation on Finex platform, launched Aegix country's first AI-native investor relations platform, and rolled out SupremaPlus, our cloud-based global pension administration platform. Wealth segment delivered strong new business on the mPowerWealth platform. Deal momentum remained strong across all business segments, providing meaningful visibility into future revenue as these engagements convert over the coming quarters. As we advance through fiscal 2027, we remain focused on disciplined execution, expanding our international footprint, and investing in the technology platforms that position KFintech for sustained, long-term growth."*
