to its shareholders, in respect of all shareholders' resolutions. However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

**Step 1 : Access through Depositories CDSL/NSDL e-Voting system in case of individual Members holding shares in demat mode.**

- (iv) In terms of SEBI circular no. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. ## INDUSTRIAL SCENARIO

The India conveyor belt market is witnessing significant growth, driven by the rapidly expanding manufacturing sector in the country. The surging demand for efficient material handling solutions has considerably increased the adoption of conveyor belts across various industries, such as automotive, food processing, pharmaceuticals, and logistics, which, in turn, is influencing the market growth. Moreover, the initiatives by the Government of India (GoI), such as the 'Make in India' campaign that encourages domestic production, is creating a favorable environment for conveyor belt manufacturers.

A conveyor belt is a continuous loop of material used within a belt conveyor system for transporting goods, raw materials, bulk solids, and products between locations. Available in lightweight, medium-weight, and heavy-weight variants, conveyor belts are manufactured using rubber, polyvinyl chloride (PVC), thermoplastic polyurethane (TPU), steel cord reinforcement, and multi-ply textile fabric constructions to meet diverse industrial load and durability requirements.

The global conveyor belt market size reached USD 7.12 Billion in 2025 and is projected to reach USD 8.90 Billion by 2034, exhibiting a CAGR of 2.51% during 2026-2034. Rising industrial automation, expanding mining operations, growing e-commerce logistics infrastructure, and broad adoption of conveyor systems in aviation and manufacturing are the primary forces driving market growth.

Medium-weight conveyor belt dominates the type segment at 56.9% in 2025, while mining and metallurgy leads the end-use segment at 40.9%. Asia Pacific commands a leading 37.1% regional share in 2025, reflecting the region's role as both the world's largest manufacturing base and a key mining hub.

Our opinion on the Standalone Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone Ind AS Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

## **Responsibilities of Management and Those Charged with Governance for the Standalone Ind AS Financial Statements**

The Company's Management and Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Standalone Ind AS Financial Statement that give a true and fair view of the financial position, financial performance including Other Comprehensive Income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including IND AS specified under Section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Ind AS Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Ind AS Financial Statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Company's Board of Directors is also responsible for overseeing the Company's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements**

Our objectives are to obtain reasonable assurance about whether the Standalone Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013 we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls in place with reference to Standalone Ind AS Financial Statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Standalone Ind AS Financial Statements, including the disclosures, and whether the Standalone Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Ind AS Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Ind AS Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### **(D) Recognition of Income and Expenses**

- i. Revenue from the sale of goods is recognized when all the following conditions have been satisfied:
  - a. the entity has transferred to the buyer the significant risks and rewards of ownership of the goods;
  - b. the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
  - c. the amount of revenue can be measured reliably;
  - d. it is probable that the economic benefits associated with the transaction will flow to the entity; and
  - e. the costs incurred or to be incurred in respect of the transaction can be measured reliably.
- ii. (a) Sales are measured at the fair value of consideration received or receivable. Based on the educational material on Ind AS 115 issued by ICAI, the company has assumed that the recovery of excise duty flows to the company on its own account. This is for the reason that it is a liability of the manufacturer which forms a part of the cost of production, irrespective of whether the goods are sold or not. However, Goods and Service Tax (GST) is not received by the company on its own account. Rather, it is tax collected on valued added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.
- (b) The Company recognizes revenue from contracts with customers in accordance with Ind AS 115 based on the transaction price representing the consideration expected to be entitled under the respective contracts. Revenue is measured after considering contractual terms, settlements, adjustments and other commercial factors affecting realizable consideration. Wherever contractual consideration undergoes subsequent adjustment in accordance with customer contracts and the same is determinable and accepted, appropriate effect is given in revenue recognition and related statutory compliances. In respect of pending contractual matters where final determination remains uncertain as at the reporting date, the Company has considered the principles of measurement uncertainty and constraint under Ind AS 115.

- iii. When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognized by reference to the stage of completion of the transaction at the end of the reporting period. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:
  - a. the amount of revenue can be measured reliably;
  - b. it is probable that the economic benefits associated with the transaction will flow to the entity;
  - c. the stage of completion of the transaction at the end of the reporting period can be measured reliably; and
  - d. the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.
- iv. Dividend is recognised when the shareholder's right to receive payment is established.
- v. Interest is recognised using the effective interest method as set out in Ind AS 39.
- vi. Other incomes have been recognized on accrual basis in financial statements except for cash flow information.

### **(E) Cost recognition**

Costs and expenses are recognized when incurred and are classified according to their nature. Expenditure capitalized represents employee costs, stores and other manufacturing supplies, and other expenses incurred for construction including product development undertaken by the Company.

### **(F) Provisions, Contingent Liability and Contingent Assets**

Disputed liabilities and claims against the company including claims raised by fiscal authorities (e.g. Sales Tax, Income Tax, Excise etc.) pending in appeal / court for which no reliable estimate can be made and or involves uncertainty of the outcome of the amount of the obligation or which are remotely poised for crystallization are not provided for in accounts but disclosed in notes to accounts.

However, present obligation as a result of past event with possibility of outflow of resources, when reliable estimation can be made of the amount of obligation, is recognized in accounts in terms of discounted value, if the time value of money is material using a current pre-tax rate that reflects the risk specific to the liability.

Contingent asset is disclosed by way of notes to accounts, if any.

### **(G) Foreign currency**

The company's financial statements are presented in INR("₹"), which is also the company's functional currency.

- i. Transactions in foreign currencies are recognized at rate of overseas currency ruling on the date of transactions. Gain / Loss arising on account of rise or fall in overseas currencies vis-à-vis functional currency between the date of transaction and that of payment is charged to Statement of Profit & Loss.
- ii. Monetary Assets/Liabilities in foreign currencies are translated into functional currency at the exchange rate ruling at the Reporting Date and the resultant gain or loss, is accounted for in the Statement of Profit & Loss.
- iii. Non-Monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

## (H) Taxation

### i. Income Tax

Income tax expense is recognized in net profit in the Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity, in such case it is recognized in other comprehensive income. Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period i.e. as per the provisions of the Income Tax Act, 1961, as amended from time to time. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis

### ii. Deferred Tax

Deferred tax is provided using balance sheet approach on temporary differences at the reporting date as difference between the tax base and the carrying amount of assets and liabilities. Deferred tax is recognized subject to the probability that taxable profit will be available against which the temporary differences can be reversed.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized either in other comprehensive income or in equity. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax relates to the same taxable entity and the same taxation authority and the company intends to settle its current tax assets and liabilities on a net basis.

### **(I) Earnings per share**

Basic Earnings per share is calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit for the period attributed to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

### **(J) Inventories**

Inventories are valued at the lower of cost and net realizable value. Cost of raw materials, components and consumables are ascertained on a moving weighted average/monthly moving weighted average basis. Cost including fixed and variable production overheads, are allocated to work-in-progress and finished goods determined on a full absorption cost basis. Net realizable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all costs incurred in bringing the inventory to their present location and condition.

### **(K) Property, plant and equipment**

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any. Freehold land is measured at cost and is not depreciated. The cost comprises of the purchase price and any attributable cost for bringing the asset to its working condition for its intended use; like freight, duties, taxes and other incidental expenses, net of CENVAT or Goods and service tax (GST) credit.

Interest cost incurred for constructed assets is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is provided on the Written down Value (WDV) method over the estimated useful lives of the assets considering the nature, estimated usage, operating conditions, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support. The estimated useful life of items of Property, Plant & Equipment is mentioned below:

|                                                           | Years |
|-----------------------------------------------------------|-------|
| <b>Factory Buildings</b>                                  | 30    |
| <b>Buildings (Other than Factory Buildings)</b>           | 60    |
| <b>Plant &amp; Machinery</b>                              | 25    |
| <b>Furniture &amp; Fixtures and Laboratory Equipments</b> | 10    |
| <b>Vehicles</b>                                           | 8     |
| <b>Office Equipments</b>                                  | 5     |
| <b>Computers</b>                                          | 3     |

On transition to Ind AS, the Company had elected to carry forward the previous GAAP net carrying value of all its property, plant and equipment recognized as at 1st April, 2017 as the deemed cost.

Till year ended 31st March, 2019, the estimated useful life of certain assets of plant and machinery were 15 years with residual value of 5% of original cost. The management, based on internal and external technical evaluation, reassessed the estimates. On the basis of technical evaluation made by the Management, the Company has revised the useful life of those assets in the range of 25 years and residual value to 20% of original cost effective from 1st April, 2019.

#### **(L) Other intangible assets**

Intangible Assets are initially recognized at:-

- In case the assets are acquired separately, then at cost,
- In case the assets are internally generated, then at capitalized development cost subject to satisfaction of criteria of recognition (identifiability, control and future economic benefit) laid down from clause 11 to 17 of IND AS 38.

Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment loss. Research costs are recognized as expense in the period in which it is incurred.

Intangible assets with finite useful life are assessed for impairment whenever there is an indication that the intangible assets may be impaired. Intangible assets with infinite useful life including goodwill are tested for impairment annually.

Intangible assets with finite useful life are amortized over the useful economic life on a straight line basis. In case of Trade Marks the useful life is taken to be 5 years and in case of Software, the useful life is taken as 3 years.

Any item of intangible assets is de-recognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de recognition of the intangible asset (calculated as the difference between the net disposal proceeds and the carrying amount of the intangible asset) is charged to revenue in the income statement when the intangible asset is de-recognised.

On transition to Ind AS, the Company had elected to carry forward the previous GAAP net carrying value of all its property, plant and equipment recognized as at 1st April, 2017 as the deemed cost.

## (M) Leases 116

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

### As a lessee

#### a) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment.

#### b) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments primarily comprise of fixed payments.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made.

#### c) Short-term leases and leases of low value assets

The Company applies the short-term lease recognition exemption to its short-term leases of office spaces and certain equipment (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

### As a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in

negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income.

#### **(N) Impairment**

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the Statement of Profit and Loss.

The company assesses impairment based on Expected Credit Losses (ECL) model at an amount equal to:-

- 12 months Expected Credit Losses, or
- Lifetime Expected Credit Losses depending upon whether there has been a significant increase in credit risk since initial recognition.

However, for trade receivables, the company does not track the changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

As at March 31, 2026, none of the Company's property, plant and equipment and intangible assets were considered impaired.

#### **(O) Employee benefits**

- i. Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be incurred when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.
- ii. ESI is provided on the basis of actual liability accrued and paid to authorities.

- iii. Gratuity Liability is on the basis of actuarial valuation as per IND AS-19. Liability recognized in the balance sheet in respect of gratuity is the present value of the defined benefit obligation at the end of each reporting period less the fair value of plan assets.
- iv. The defined benefit obligation is calculated annually by actuaries. The present value of defined benefit is determined by discounting the estimated future cash outflows by reference to market yield at the end of each reporting period on government bonds that have terms approximate to the terms of the related obligation. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.
- v. In accordance with Indian law, eligible employees of the Company is entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary).

## **(R) Financial instruments**

### **i) Classification, initial recognition and measurement:**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets other than equity instruments are classified into categories: financial assets at fair value through profit or loss and at amortised cost. Financial assets that are equity instruments are classified as fair value through profit or loss or fair value through other comprehensive income. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities.

Financial instruments are recognized on the balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognized at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognized in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

- **Financial assets at Amortised Cost:**  
Financial assets having contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding and that are held within a business model whose objective is to hold such assets in order to collect such contractual cash flows are classified in this category. Subsequently, these are measured at amortised cost using the effective interest method less any impairment losses.
- **Financial Liabilities:**  
All financial liabilities are initially recognized at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. Financial liabilities are classified as measured at amortized cost or fair value through profit and loss (FVTPL). A financial liability is classified as FVTPL if it is classified as held for trading, or it is a derivative or is designated as such on initial recognition. Financial Liabilities at FVTPL are measured at fair value and net gain or losses, including any interest expense, are recognized in statement of profit and loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in statement of profit and loss. Any gain or loss on de-recognition is also recognized in statement of profit and loss.

### **ii) Derecognition of financial assets and financial liabilities:**

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks

and rewards of ownership of the asset to another entity which qualifies for de-recognition as per Ind AS 109. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

Financial liabilities are de-recognized from the Company's Balance Sheet when the obligation specified in the contract is discharged, cancelled or expires.

### **iii) Impairment of financial assets:**

The Company recognizes a loss allowance for expected credit losses (ECL) on a financial asset that is at amortized cost. Loss allowance in respect of financial assets is measured at an amount equal to life time ECL and is calculated as the difference between their carrying amount and the present value of the expected future cash flows discounted at the original effective interest rate.

### **(S) Borrowing Cost**

Borrowing cost that are directly attributable to the acquisition, construction, or production of a qualifying asset are capitalized as a part of the cost of such asset till such time the asset is ready for its intended use or sale.

Borrowing cost consists of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing cost is recognized as expense in the period in which they are incurred.

### **(T) Cash and cash equivalents**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

### **(U) Investments**

Long term investments intended to be held for more than a year from the date of acquisition, are classified as long term investments and are carried at cost. Provision is made for diminution, other than temporary, in value of investments. Current investments are valued at lower of cost and market value.

**Total Liability****82.17****56.81****VI. Sensitivity Analysis**

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

| Sensitivity analysis - Gratuity      | 2025-26  |          | 2024-25  |          |
|--------------------------------------|----------|----------|----------|----------|
|                                      | Increase | Decrease | Increase | Decrease |
| Discount rate (1% movement)          | (5.04)   | 5.70     | (3.70)   | 4.20     |
| Salary growth rate (1% movement)     | 5.77     | (5.19)   | 4.23     | (3.79)   |
| Employee turnover rate (1% movement) | 0.72     | (0.81)   | 0.43     | (0.48)   |

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligations as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumption may be correlated. Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligations has been calculated using the Projected Unit Credit Method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the balance sheet.
