4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

- 1. Our business is highly dependent on technology and any disruption or failure of our technology systems may affect our operations.**

We believe that our technological capabilities play a key role in helping us effectively manage our operations, maintain operational and fiscal controls, and support our efforts to enhance client service levels. Our business is significantly dependent on the efficient and uninterrupted operation of our technology infrastructure and systems to provide our support services and back-office processing. For further details of our business, see "Business Overview" on page 88 of this Prospectus.

We expect our clients to continue to demand more sophisticated and customized solutions. We may lose clients and our business could be affected if we fail to implement and maintain our technology systems or fail to upgrade or replace our technology systems to handle increased volumes, meet the demands of our clients and protect against disruptions of our operations. Our operating efficiency may decline and our growth may suffer if our technology systems are unable to handle additional volume of our operations as we grow. Some of our existing technologies and processes in the business may become obsolete or perform less

efficiently compared to newer and better technologies and processes in the future. Certain of our competitors may have access to similar or superior technology or may have better adapted themselves to technological changes. The service industry could also experience unexpected disruptions from technology-based start-ups. The cost of upgrading or implementing new technologies, upgrading our systems or expanding their capacity could be significant and could affect our business, operations, financial condition and results of operations.

2. *Our failure to perform in accordance with the standards prescribed in our client contracts could result in loss of business or payment of liquidated damages.*

We enter into various contracts with our clients such as banks and financial services companies. Certain of these contracts may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls.

Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact the continued performance of our contractual obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In certain instances, we may also be required to bear consequential liability. In the event there is an increase in liability against us, our business, financial condition and results of operations may be affected.

For further details of our business, please refer section titled “Business Overview” on page 88 of this Prospectus.

3. *The properties used by the Company for the purpose of its operations are not owned by us. Any termination of the relevant lease agreement or rent agreement in connection with such properties or our failure to renew the same could adversely affect our operations.*

Our registered office is located at GF-22 Hans Bhawan, Bahadur Saha Zafar Marg, New Delhi-110002, Delhi, India and the same is not owned by us. We have obtained this property on rent from our promoter company RDSL through Rent Agreement dated September 20, 2021 starting from the date of agreement for a period of 11 months.

Further our corporate office is situated at C- 69, C Block, Sector 2, Noida, Uttar Pradesh 201301, India and our Branch office located at Old No. 7, New No. 13, First Street, Nandanam Extension, Chennai – 600035, Tamil Nadu, India are also not owned by us. We have obtained these properties on rent for period of 11 months.

Any termination of the lease in connection with these properties or our failure to renew the same, in a timely manner or at all could adversely affect our operations.

For details regarding properties taken on lease refer the Section titled —Properties – “Business Overview” beginning on page no. 88 of this Prospectus.

4. *If our customers default in their repayment obligations, our business, results of operations, financial condition and cash flows may be adversely affected.*

Our customers may default on their obligations to us due to a variety of factors, including as a result of their bankruptcy, lack of liquidity, government or other regulatory intervention, other reasons such as their inability to adapt to changes in the macro business environment or any other factors which impact their incomes. Additionally, some customers may intentionally default on their repayment obligations. For instance, in past our debtor has defaulted in payment of dues for which our company has filed an application to NCLT for corporate insolvency process under section 9 of IBC Code, 2016 against such debtor.

Further if any such case arises in future, it will impact the financial condition of our company and we need to involve in legal matters for realization of pending dues. Also such adverse impact may limit our ability to recover the dues from such customers and the predictability of our cash flows. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients and increasing credit losses due to financial difficulties of customers could adversely affect our business, financial condition, results of operations and cash flows.

For further details of our business, please refer section titled “Business Overview” on page 88 of this Prospectus.

5. *If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes, our business and growth could be adversely affected.*

Our business is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological. Our clients' needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new services, capabilities and technologies on a timely and cost-effective basis and to provide a wide range of services.

Transitioning to new technologies may be disruptive to our resources and the services we provide. The process of developing our platform is also extremely complex and is expected to become increasingly complex and expensive in the future due to the introduction of new platforms, operating systems and technologies. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services, or retain and attract skilled staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth. In addition, there may be circumstances when our clients are dissatisfied with our services due to which our business, financial condition, reputation or results of operations could be materially adversely affected.

For further details of our business, please refer section titled "Business Overview" on page 88 of this Prospectus.

6. *We have a substantial amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As of March 31, 2022, our long-term borrowings were ₹12.90 Lakhs & short term borrowings were ₹288.44 Lakhs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "Financial Information of our Company" on page 134 of this Prospectus.

7. *The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.*

The Restated Financial Information of our Company as disclosed in section titled "Restated Financial statements" beginning on Page no. 134 of this Prospectus for the year ended on March 31, 2022, March 31, 2021, March 31, 2020 and March 31, 2019 are provided by peer reviewed chartered accountants who is not the statutory Auditor of our Company.

8. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to developed relationships with customer. For further details, see the section titled "Business Overview" on page 88 of this Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our service;
- Changes in the Indian regulatory environment in field of service industry

There can be no assurance that we will be able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. We cannot assure you that we will not face any time or cost overruns in respect of implementation of our strategies in the future. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business

and implement our growth strategy could have effect on our business, financial condition and profitability.

9. We require certain approvals and licenses in the ordinary course of business and the failure to successfully obtain such registrations would adversely affect our operations, results of operations and financial condition.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company from private to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 180 of this Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

10. There are outstanding legal proceedings involving our Company, Directors and Promoters. Any adverse decision in such proceedings may have an material adverse effect on our business, results of operations and financial condition.

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities.

We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. A summary of the pending civil and other proceedings involving the Company is provided below:

If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

For further details of legal proceedings involving the Company, please see “Outstanding Litigations and Material Developments” beginning on page 175 of this Prospectus

11. We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.

Our services are manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower.

High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

For further details of our employees, please refer chapter titled “Business Overview” beginning on Page 88 of this Prospectus.

12. Misconduct or errors by manpower engaged by us could expose us to business risks or losses that could affect our business prospects, results of operations and financial condition.

Misconduct or errors by manpower engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our business. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. The risks associated with the deployment of manpower engaged by us include, among others, possible claims relating to:

- Actions or inactions, including matters for which we may have to indemnify our clients;
- Our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services;
- Failure of manpower engaged by us to adequately perform their duties or absenteeism;
- Errors or malicious acts or violation of security, privacy, health and safety regulations; and

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and effect our business. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and consequently, our business, financial condition, results of operations and prospects.

13. Our registered office from where our operations are carried out is shared between our Company with our Holding Company and Group Companies.

Our Registered Office situated at GF-22, Hans Bhawan, 1, Bahadur Shah Zafar Marg, ITO, New Delhi East Delhi, Delhi– 110002, India is shared with our group Companies including our holding company. Any dispute arises in future between our holding company and our group companies, consequences to which we may have to change our registered office and place of operations from where we are presently operating. Also the change in registered office will affect our business operations.

For further details regarding ownership of our registered office, please refer chapter titled “Business Overview” beginning on Page 88 of this Prospectus.

14. Our top ten customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top ten customers have contributed 84.71%, 89.73%, 74.74% and 74.06% of our revenues for the year ended March 31, 2022, March 31, 2021, March 31, 2020 and March 31, 2019 respectively based on Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers which majorly includes Banks, NBFC's or other financial institutions, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business, we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long-term relationships with Banks, NBFC's or other financial institutions, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

15. Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.

As on March 31, 2022, our total secured borrowings amounted to Rs. 168.70 Lakhs from Banks. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;

48. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

49. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see "Basis for Issue Price" beginning on page 72 of this Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

50. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

51. The requirements of being a listed company may strain our resources and distract management.

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

52. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

EXTERNAL RISK FACTORS

53. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

54. *Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.*

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the “CCI”). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void.

Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

55. *The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.*

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

56. *You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.*

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

57. Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.

We currently operate only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the IT industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

58. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

59. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in

the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

60. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well.

Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

GLOBAL OUTLOOK

The war in Ukraine has triggered a costly humanitarian crisis that, without a swift and peaceful resolution, could become overwhelming. Global growth is expected to slow significantly in 2022, largely as a consequence of the war. A severe double-digit drop in GDP is expected in Ukraine due to fighting. A deep contraction is projected for Russia due to sanctions and European countries' decisions to scale back energy imports. The economic costs of war are expected to spread farther afield through commodity markets, trade, and—to a lesser extent—financial interlinkages. Fuel and food price rises are already having a global impact, with vulnerable populations—particularly in low-income countries—most affected. Elevated inflation will complicate the trade-offs central banks face between containing price pressures and safeguarding growth. Interest rates are expected to rise as central banks tighten policy, exerting pressure on emerging market and developing economies. Moreover, many countries have limited fiscal policy space to cushion the impact of the war on their economies. The invasion has contributed to economic fragmentation as a significant number of countries sever commercial ties with Russia and risks derailing the post-pandemic recovery. It also threatens the rules-based frameworks that have facilitated greater global economic integration and helped lift millions out of poverty. In addition, the conflict adds to the economic strains wrought by the pandemic. Although many parts of the world appear to be moving past the acute phase of the COVID-19 crisis, deaths remain high, especially among the unvaccinated. Moreover, recent lockdowns in key manufacturing and trade hubs in China will likely compound supply disruptions elsewhere.

Global growth is projected to slow from an estimated 6.1 percent in 2021 to 3.6 percent in 2022 and 2023. This is 0.8 and 0.2 percentage points lower for 2022 and 2023 than in the January World Economic Outlook Update. Beyond 2023, global growth is forecast to decline to about 3.3 percent over the medium term. Crucially, this forecast assumes that the conflict remains confined to Ukraine, further sanctions on Russia exempt the energy sector (although the impact of European countries' decisions to wean themselves off Russian energy and embargoes announced through March 31, 2022, are factored into the baseline), and the pandemic's health and economic impacts abate over the course of 2022. With a few exceptions, employment and output will typically remain below pre-pandemic trends through 2026. Scarring effects are expected to be much larger in emerging market and developing economies than in advanced economies—reflecting more limited policy support and generally slower vaccination—with output expected to remain below the pre-pandemic trend throughout the forecast horizon. Unusually high uncertainty surrounds this forecast, and downside risks to the global outlook dominate—including from a possible worsening of the war, escalation of sanctions on Russia, a sharper-than-anticipated deceleration in China as a strict zero-COVID strategy is tested by Omicron, and a renewed flare-up of the pandemic should a new, more virulent virus strain emerge. Moreover, the war in Ukraine has increased the probability of wider social tensions because of higher food and energy prices, which would further weigh on the outlook.

Inflation is expected to remain elevated for longer than in the previous forecast, driven by war-induced commodity price increases and broadening price pressures. For 2022, inflation is projected at 5.7 percent in advanced economies and 8.7 percent in emerging market and developing economies—1.8 and 2.8 percentage points higher than projected in January. Although a gradual resolution of supply-demand imbalances and a modest pickup in labor supply are expected in the baseline, easing price inflation eventually, uncertainty again surrounds the forecast. Conditions could significantly deteriorate. Worsening supply-demand imbalances—including those stemming from the war—and further increases in commodity prices could lead to persistently high inflation, rising inflation expectations, and stronger wage growth. If signs emerge that inflation will be high over the medium term, central banks will be forced to react faster than currently anticipated—raising interest rates and exposing debt vulnerabilities, particularly in emerging markets.

The war in Ukraine will amplify economic forces already shaping the global recovery from the pandemic. The war has further increased commodity prices and intensified supply disruptions, adding to inflation. Even before Russia invaded Ukraine, broad price pressures had led central banks to tighten monetary policy and indicate increasingly hawkish future stances. As a result, interest rates had risen sharply and asset price volatility had increased since the start of 2022—hitting household and corporate balance sheets, consumption, and investment. The prospect of higher borrowing costs has also increased the cost of extended fiscal

support. These changes are occurring faster than previously expected even as many parts of the global economy—particularly countries with low vaccination rates—must contend with continued strain on health care systems because of the pandemic.

The war has also added to already high uncertainty about the global outlook. Although many countries appear to be moving past the acute phase of the pandemic, new variants could again lead to waves of infection and further disruption. Inflation pressure could strengthen more than anticipated and demand more aggressive policy responses. Tighter financial conditions will shine a harsh spotlight on debt vulnerabilities among sovereign and corporate borrowers, risking widespread debt distress.

Moreover, with continued tight policies toward the real estate sector and the possibility of more widespread lockdowns as part of the strict zero-COVID strategy, China's economy could slow more than currently projected—with consequences for Asia and beyond. This could further set back the recovery, particularly in emerging market and developing economies. More limited policy space could compound scarring effects, particularly in emerging market and developing economies, where medium-term baseline output is expected to be close to 6 percent below pre-pandemic projections.

More fundamentally, geopolitical tensions threaten the rules-based frameworks that have governed international economic relations since World War II. Current sanctions imposed with the aim of pressing Russia to end the war are already cutting financial and trade linkages between Russia and other countries, with far-reaching repercussions. Increased global polarization also impedes the cooperation essential for long-term prosperity. This could include derailing the urgent climate change agenda and undermining multilateral efforts to improve debt resolution frameworks, trade integration, and initiatives to avoid future pandemics.

Fragmentation and Fragility Set to Slow Growth during 2022–23

The war in Ukraine has led to extensive loss of life, triggered the biggest refugee crisis in Europe since World War II, and severely set back the global recovery. After a strong recovery in 2021, short-term indicators suggest that global activity has slowed (see Figure 1.1). Global growth is projected to decline from an estimated 6.1 percent in 2021 to 3.6 percent in 2022–23—0.8 and 0.2 percentage points lower for 2022 and 2023 than in the January 2022 World Economic Outlook. The ongoing war in Ukraine and sanctions on Russia are expected to reduce global growth in 2022 through direct impacts on the two countries and global spillovers. This shock comes just as the threat from the Omicron variant appeared to be fading, with many parts of world moving past the acute phase of the pandemic.

(Three-month moving average)

Note: Units for industrial production are annualized percent change. For PMIs, units are deviation from 50. PMI above 50 indicates expansion, below 50 indicates contraction. PMI = purchasing managers' index.

Five principal forces shape the near-term global outlook:

War in Ukraine—The invasion and resulting sanctions on Russia will have important consequences for the global economy. The baseline forecast assumes that the theater of conflict remains limited to Ukraine and that sanctions on Russia (along with European plans to become independent of Russian energy) do not tighten beyond those announced by March 31 and remain in place over the forecast horizon. The effects of conflict and sanctions will hit Ukraine, Russia, and Belarus directly. But international spillovers via global commodity prices, trade and financial linkages, labor supply, and humanitarian impacts will spread the effects more widely—notably in Europe.

Monetary tightening and financial market volatility—Even before the war, inflation had risen significantly (Figure 1.2), and many central banks tightened monetary policy. This contributed to a rapid increase in nominal interest rates across advanced economy sovereign borrowers. In the months ahead, policy rates are generally expected to rise further and record-high central bank balance sheets will begin to unwind, most notably in advanced economies. In emerging market and developing economies, several central banks also tightened policy, adding to those that had already done so in 2021. One exception is China, where inflation remains low and the central bank cut policy rates in January 2022 to support the recovery. Expectations of tighter policy and worries about the war have contributed to financial market volatility and risk repricing (see the April 2022 Global Financial Stability Report). In particular, the war and related sanctions have tightened global financial conditions, lowered risk appetite, and induced flight-to-quality flows.

In Russia, the sanctions and the impairment of domestic financial intermediation have led to large increases in its sovereign and credit default swap spreads. Emerging market economies in the region, as well as Caucasus, Central Asia, and North Africa, have also seen their sovereign spreads widen (Figure 1.3). Emerging markets capital outflows in early March were as large and fast as those seen early in the pandemic, albeit concentrated among a few economies. Since mid-March, though, the situation has stabilized, with slow-but-steady capital inflows reversing around one quarter of initial losses. Overall, markets have so far differentiated across emerging market securities based on geographic proximity, trade linkages, and commodity exposures to Russia and Ukraine.

Fiscal withdrawal—Policy space in many countries has been eroded by necessary higher COVID-related spending and lower tax revenue in 2020–21. Faced with rising borrowing costs, governments are increasingly challenged by the imperative to rebuild buffers. Fiscal support is set to generally decline in 2022 and 2023—particularly in advanced economies—as emergency measures to cushion the impact of the pandemic are wound down (Figure 1.4; also see the April 2022 Fiscal Monitor for more discussion on the evolution of fiscal measures over the acute phase of the pandemic and subsequent recovery).

China’s slowdown—Slowing growth in China’s economy has wider ramifications for Asia and for commodity exporters. The combination of more transmissible variants and a zero-COVID strategy entail the prospect of more frequent lockdowns, with attendant effects on private consumption in China. Moreover, the continued tight stance toward highly leveraged property developers means that real estate investment remains subdued.

Pandemic and vaccine access—Worker shortages and mobility restrictions compounded supply disruptions and bottlenecks early in 2022, constraining activity and adding to inflation. Restrictions have begun to ease as the peak of the Omicron wave passes and global weekly COVID deaths decline (Figure 1.5). The risk of infection leading to severe illness or death appears lower for the dominant Omicron strain than for others—especially for the vaccinated and boosted. The baseline assumes that the health and economic impacts of the virus start to fade in the second quarter of 2022 and that hospitalizations and deaths are brought to low levels in most countries by the end of the year. A key assumption in the baseline is that the virus does not mutate into new strains requiring further restrictions.

The baseline assumes that most countries will not attain the target of 70 percent full vaccination in 2022. Given vaccination shortfalls in low-income countries, the possibility of renewed outbreaks is factored into the baseline. Yet their impact on activity is assumed to be less than in earlier waves. Adaptation has improved, effective therapeutics are more readily available, and immunity due to previous infection or vaccination has increased. The forecasts are based on information up to 31 March 2022.

National Digital Communications Policy 2018

With significant capabilities in both telecommunications and software, India, more than most countries, stands poised to benefit from harnessing new digital technologies and platforms to unlock productivity, as well as to reach unserved and underserved markets; thus, catalyzing economic growth and development, generating new-age jobs and livelihoods, and ensuring access to next generation services for its citizens. This policy aims for Universal Coverage rather than revenue maximization. This policy and principles framework will enable creation of a vibrant competitive telecom market to strengthen India's long-term competitiveness and serve the needs of our aspiring nation. The Policy aims to remove regulatory barriers and reduce the regulatory burden that hampers investments; innovation and consumer interest and identifies steps to strengthen the sector's institutional mechanism and legislative framework, to ensure that India's economy and citizens can derive the full potential of its digital communications sector.

Data Center Policy, 2020

Indian Data Centre market has seen tremendous growth in the past decade, riding on the explosion of data through smart phones, social networking sites, ecommerce, digital entertainment, digital education, digital payments and many other digital businesses/services. This growth in data is further stimulated by adoption of emerging technologies such as quantum computing, artificial intelligence, internet of things etc. While the Data Centre sector is witnessing growth in the country, there are known impediments to its growth such as lack of infrastructure or Industry status of the Data Centres, complex clearance processes, time consuming approvals, high cost of power, lack of published standards, absence of specialized building norms for building the Data Centres, submarine cable network connectivity limited to few states and high cost of capital and operational expenditure etc. This policy aims to offset these challenges in order to accelerate the current pace of growth and propel India in becoming a global Data Centre hub. The Customer Preference Regulations, inter alia, provide for: (i) registration of senders (businesses and telemarketers) with telecom service providers to reducing the ability of unknown entities reaching customers with calls and messages that are fraudulent or otherwise of dubious nature; (ii) registration of headers, i.e. alphanumeric string of characters or numbers assigned to a sender of commercial communications for segregating different types of messages related to one time passwords, balance enquires, flight alerts, special offers, etc.; and (iii) complete control to the subscriber to consent to receiving commercial communication and the ability to revoke the consent already granted. Additionally, the concept of registered templates for both message service and voice communication has been introduced to prevent deliberate mixing of

promotional messages into the transactional stream. The salient features of these regulations also include the adoption of 'distributed ledger technology' (or blockchain) by telecom service providers to ensure regulatory compliance is carried out for sending commercial communication. Every telecom service provider is required to develop an ecosystem, with the prescribed functions, to regulate the delivery of the commercial communications to customers.

Banks may decide the periodicity at which re-verification of antecedents should be resorted to. Further among others, these guidelines requires the banks to ensure that contracts with the recovery agents do not induce adoption of uncivilized, unlawful and questionable behaviour or recovery process and to ensure that the recovery agents are properly trained to handle with care and sensitivity, their responsibilities, in particular aspects like hours of calling, privacy of customer information etc.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issues of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs issueing facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement f or SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Applicants to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the LM will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the LM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges, and the LM. All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI applicants using the UPI payment mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications
- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.
