Enviro Infra Engineers Strengthens Order Book with Multi Segment Project Wins and Enhances Revenue Visibility

- Order book increases by ₹2,240 crore since March 2026 on steady order inflows, with clear two-year execution visibility. Present Order book stands at more than Rs 4600 crore with Execution Order Book in Water and Waste Water Treatment Segment at more than Rs 2500 crore, Order Book in Renewable Segment at more than Rs. 1000 Crore and O&M Order Book at more than Rs 1100 Crore.
- Robust orderbook underpins revenue visibility over the next 15–24 months
- Revenue visibility of approx. Rs 2000 crore in F.Y. 2027
- Diversified portfolio across water and renewables drives growth momentum
- BESS entry marks strategic diversification alongside strong core business wins
- Strong footprint across India with Geographical Expansion in states like Bihar, Maharashtra, Assam, Karnataka and Telangana

New Delhi, April 16, 2026: Enviro Infra Engineers Limited (EIEL) (NSE: EIEL, BSE: 544290), a leading EPC company in water and wastewater treatment, has reported strong order inflows since March 2026, significantly strengthening its order book and providing clear revenue visibility for the medium term.

The Company has secured new orders aggregating to over ₹2,240 crore across its water, wastewater, and renewable energy segments since March 2026, comprising more than ₹1,170 crore from the water and wastewater segment and over ₹1,070 crore from the renewable energy segment.

These projects are expected to be executed over the next 15–24 months, providing visibility on revenues and supporting the Company's growth trajectory.

Key recent developments include marking the Company's entry into the Battery Energy Storage System (BESS) segment through four projects awarded by NTPC worth ₹ 1,070 crore. With a total capacity of 930 MWh, these projects are being implemented across states such as **Uttar Pradesh, Assam, Karnataka and Telangana**, representing a strategic expansion into the renewable energy value chain.

In the core water treatment segment, the Company has secured one project from Bihar Urban Infrastructure Development Corporation Limited AMRUT 2.0 worth ₹ 411 crore in **Aurangabad, Bihar** and two projects worth approx ₹972 crore under the Swachh Bharat Mission (Urban) 2.0 in **Pune and Nashik, Maharashtra**. These projects further strengthen the Company's presence in core water and sanitation infrastructure.

Commenting on the developments, **Mr. Sanjay Jain, Chairman**, said: *"The steady inflow of orders across our core and emerging business segments reflects our execution capabilities and strategic focus on high-growth infrastructure areas. Our entry into the BESS segment marks an important milestone in diversifying our portfolio, while our strong*

presence in water and wastewater continues to drive stable growth. With a robust and diversified order book, we have clear visibility on project execution and revenues to the tune of Rs 2000 Crore with steady growth over the next two years.”

The Company continues to benefit from sectoral tailwinds, including increased government spending on water infrastructure and growing investments in renewable energy and storage solutions. The demand outlook from the various Govt. Schemes like AMRUT 2.0, Namami Gange and Swachh Bharat Mission continues to be strong.

With a diversified order book, strong geographical presence across multiple states, established execution record of accomplishment, and exposure to high-growth segments, EIEL remains well-positioned to deliver sustainable growth over the medium term.

About Enviro Infra Engineers Limited (EIEL):

EIEL is one of the leading EPC Companies in the business of Water and Wastewater Treatment Plants (WWTPs) and Water Supply Scheme Projects (WSSPs) for government authorities/bodies with over 15 years of experience. WWTPs include Sewage Treatment Plants (STPs), Sewerage Schemes (SS), Common Effluent Treatment Plants (CETPs) and ZLD Plants.

EIEL forayed into the renewable segment in F.Y. 2025-26. Within its 1st year of operations in the renewable segment, it created a renewable company by the name of EIE Renewables Private Limited. It is developing 79 MW of Solar Power Plants under IPP & C&I. The recently awarded projects in the BESS segment which entails EPC of 930 MWH of BESS shall give a big boost to the company in the renewable segment besides its strong presence in the Water and Waste Water Treatment segment.

The Company has an in-house team for designing, engineering and construction, which makes us self-reliant on all aspects of our business. We have a team of engineers who are supported by third-party consultants and industry experts to ensure compliance and quality standards laid down by the industry and government agencies & departments. We also have our own team for civil construction works thereby reducing dependence on third parties. The scope of our services typically includes design and engineering of the projects, procurement of raw materials, execution at site with overall project management up to the commissioning of projects. Post commissioning, operations and maintenance of these plants for a certain period of time which generally spans from 5 to 15 years is a part of the award. We have a team of dedicated engineers and personnel focused on operations and maintenance of completed project.
