SUMMARY OF OUR INDUSTRY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

GDP and Other Indicators

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030. According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing

steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown.

Steel in India

As of April 2022, India was the world's second-largest producer of crude steel, with an output of 10.14 MT. In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. In April-July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT respectively.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. In FY22, crude steel production in India is estimated to increase by 18%, to reach 120 million tonnes, driven by rising demand from customers. The consumption of finished steel stood at 105.751 MT in FY22. In July 2022, the consumption of finished steel stood at 9.17 MT.

Steel companies are looking to restart expansion projects on the back of burgeoning steel processes with a capacity addition of 29 MT. Between April 2021-January 2022, consumption of finished steel stood at 86.3 MT.

In FY22, demand for steel is expected to increase by 17% to 110 million tonnes, driven by rising construction activities. Tata Steel is planning to set up more scrap-based facilities that will have a capacity of at least a billion tonnes by 2025. Tata Steel in India is also planning to expand its annual capacity from 34 MTPA to 55 MTPA by 2030.

In FY22, exports and imports of finished steel stood at 13.49 MT and 4.67 MT, respectively. In FY22, India's export rose by 25.1% YoY, compared with 2021. India's per capita consumption of steel grew at a CAGR of 4.43% from 46 kgs in FY08 to 74.10 kgs in FY19. In July 2022 exports of finished steel stood at 3.80 lakh MT.

Government has taken various steps to boost the sector including the introduction of National Steel Policy 2017 and allowing 100% Foreign Direct Investment (FDI) in the steel sector under the automatic route. According to the data released by Department for Promotion of Industry and Internal Trade (DPIIT), between April 2000-March 2022, Indian metallurgical industries attracted FDI inflows of US\$ 17.1 billion.

The Government's National Steel Policy 2017 aims to increase the per capita steel consumption to 160 kgs by 2030-31. The Government has also promoted policy which provides a minimum value addition of 15% in notified steel products covered under preferential procurement.

In 2019, the Government introduced Steel Scrap Recycling Policy with an aim to reduce import.

The industry is also benefitting from the developments happening across various industries. The new Vehicle Scrappage policy will help in reducing the steel prices since the policy enables recycling the materials used in old vehicles. In the healthcare front, major steel producers are now exceeding their production capacities to produce oxygen cylinders for COVID patients. In 2021, Indian Railways is planning to procure over 11 lakh tons of steel from Steel Authority of India Limited (SAIL) for the track renewal and laying new lines across the country.

In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Offer as prescribed in the SEBI ICDR Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Offer, refer chapter titled "Objects of the Issue" beginning on page 83 of this Draft Red Herring Prospectus.

7. The steel industry is highly cyclical and volatility in steel prices may have an adverse effect on the Company's results of operations and financial condition

The industry in which we operate is highly cyclical. Steel prices fluctuate based on macroeconomic factors, including, amongst others, consumer confidence, employment rates, interest rates and inflation rates, general levels of infrastructure activities in the region of sale etc. We aim to grow our business in a sustainable manner with a vision to create quality conscious customers and give them value for their money accompanied by technological drive. However, due to the nature of our industry we cannot ascertain the consistency of our profitability and heavy volatility in steel prices may have an adverse effect on the Company's results of operations and financial condition.

8. The novel corona virus (Covid-19) pandemic outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the third wave of the virus and the likelihood of a fourth wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Further if in case due to any fourth or consequent wave of Corona virus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the

government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

9. Our profitability will suffer if we are not able to maintain our pricing, control costs or continue to grow our business through higher client engagements.

Our profit margin, and therefore our profitability, is largely a function of our level of activity and the rates we are able to charge for our services. If we are unable to maintain the pricing for our services without corresponding cost reductions, our profitability will suffer. The pricing and levels of activity we are able to achieve are affected by a number of factors, including our clients' perceptions of our ability to add value through our services, the length of time it takes to on-board new employees on any new or current client engagements, the volume of work for new clients or new engagements with current clients, competition, the introduction of new services by us or our competitors, our ability to accurately estimate, attain and sustain revenue from client contracts and general economic conditions.

10. We may not be able to manage the current growth of our business and operations in future.

We have experienced, and may continue to experience, rapid growth of our operational and financial resources. We have also experienced significant growth in the number of clients and types of services we provide, over the years. Our revenue from operations increased by 5.66% to ₹ 21050.98 lakhs in fiscal 2022 from ₹ 19923.61 lakhs in Fiscal 2021. The rapid growth which we have experienced requires us to constantly monitor, evaluate and, if appropriate, reallocate our management and financial and operational resources. In order to manage growth effectively, we must recruit new employees, including employees in middle-management and leadership positions, and implement and improve operational systems, procedures and internal controls on a timely basis. Failure in managing the foregoing factors could adversely affect our business, financial condition and results of operations.

11. Our Registered Office is located on leased premises and there can be no assurance that this lease agreement will be renewed upon termination or that we will be able to obtain other premise on lease on same or similar commercial terms.

Our Registered Office situated at Built up Shop No. B-5, Arihant Tower, Block D Market, Vivek Vihar, Jhilmil, Delhi- 110092 is owned by Mr. Ram Kumar Sharma. He had, vide lease deed dated October 15, 2022 agreed to let out the said premises to our Company for a period of 11 months, which can be further extended at the option and sole discretion of the Lessor on such terms and conditions that may be mutually settled.

We may not be able to renew or extend the lease agreement at commercially acceptable terms on expiry of the agreement. We may not be able to obtain alternate location, in a short span of time and it may create disruption in our operations which may adversely affect our financial conditions. Any disputes arising in future may also affect our business relations and our results of operations.

For further details regarding our properties, please refer to the Section titled "Our Business" on page 108 of this Draft Red Herring Prospectus.

12. We have not entered into any agreement with the suppliers or with any Consultant for our proposed expansion as specified in the objects of the Issue. Any delay in entering into such agreements may delay the implementation schedule, which may also lead to increase in prices of these equipment in future affecting our costs, revenue and profitability.

We are yet to place orders for our plant & machinery required for our proposed expansion, as specified in the section titled —Objects of the Issue on page 83 of this Draft Red Herring Prospectus. Any delay in

procurement of plant & machinery, equipment etc may delay the implementation schedule. We may also be subject to risks on account of inflation in the price of plant & machinery and other equipment that we require. Hence our project could face time and cost over-run which could have an adverse effect on our operations.

Further, we have not entered into any agreement with any consultant for civil related work for our proposed expansion. Any delay in appointing these parties could adversely affect our business operations. Negotiations in respect of specifications with suppliers or architect for civil work have been commenced and the agreements will be entered in due course once the negotiations are completed and Issue proceeds are procured.

13. Seasonality or cyclicity of the business of the issuer.

Steel is a cyclical industry that goes through alternate phases of boom and bust. The key reason for such cyclicity in the steel business is the nature of its customers. Steel production is consumed primarily by housing, infrastructure, automobile, shipbuilding, capital goods etc. Demand from all these industries is highly dependent on the state of the general economy. During the time of economic upcycle, demand for housing, automobiles as well as infrastructure investments increases, which leads to a higher demand for steel. The opposite situation prevails in downturns which may adversely affect our business, financial condition and results of operations.

14. Our inability to receive or renew the necessary licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company's operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions to operate our manufacturing units, some of which have been granted for a fixed period of time and need to be renewed from time to time. As of date of this Draft Red Herring Prospectus, there are no pending proceedings, which have been initiated against us by the statutory authorities. We cannot assure you that in the near future there will not be any legal actions taken against us for the same.

Further, these licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may adversely affect our business. For further details on the licenses obtained by our Company, please refer to the chapter titled — "Government and Other Statutory Approvals" on page 224 of this Draft Red Herring Prospectus

15. Our Promoter and Directors may have interest in our Company, Other than reimbursement of expenses incurred or remuneration.

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship and shareholding in our Company. For further details, please refer to the chapters titled "Our Promoter", beginning on page 160 respectively and "Restated Financial Information - Annexure VIII - Restated Statement of Related Party Transaction" on page 199 of this Draft Red Herring Prospectus.

16. If we are unable to successfully implement our proposed expansion plans our results of operations and financial condition could be adversely affected.

This expansion project, to the extent that they proceed, would involve risks, including risks associated with the timely completion of this project, and our failure to adequately manage these risks notwithstanding our upgraded operational and financial systems, procedures and controls could have a material adverse effect on our business, financial condition, results of operations and prospects. Factors that could affect our ability to complete this project on time include completing the project / civil construction, receiving the machineries of desired quality and on the scheduled time, a decline in demand for our products and general economic conditions. We may have to revise our schedule of implementation and completion of this expansion project on account of a various factors including delay in Issue process, market conditions, negotiation with suppliers and other external factors. This may entail rescheduling of implementation of this proposed

expansion project. Our Company is setting up the proposed expansion project on the land adjacent to the existing Unit and material approvals and licenses for the existing Unit will be applicable for the proposed expansion project. Therefore, there is less scope for delay in completion of the project and escalation in costs of the proposed expansion project.

For details on estimated schedule of implementation of proposed expansion project, please refer section —Object of Issue - Proposed schedule of implementation and deployment of Net Proceeds – Estimated Schedule of commencement and completion on page 83 of this Draft Red Herring Prospectus.

Our expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

17. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

Set out below are details of our total trade receivables (current and non-current) for the periods indicated:

(₹ In Lakhs)

Fiscals	Trade Receivables (current and non-current)	% of total Income
December 31, 2022	2457.96	15.00%
March 31, 2022	2714.68	12.87%
March 31, 2021	3305.72	16.58%
March 31, 2020	3086.24	15.11%

Further, there is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

18. Any adverse change in regulations governing our business and business of our clients, may adversely impact our business prospects and results of operations.

Government regulations and policies of India can affect the demand for, expenses related to and availability of our services. We have incurred and expect to continue incurring costs for compliance with such laws and regulations. Any changes in government regulations and policies, such as the withdrawal of or changes in tax benefits or incentives and subsidies, could adversely affect our business and results of operations. Further, regulatory requirements with respect to our services and those governing our clients are subject to change. An adverse change in the regulations, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Accordingly, our Company may be required to alter processes and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our clients.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay or interruptions in the operation of our delivery centres. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke or we may be deemed to be in breach of our arrangements with our clients.

Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new studies, which may adversely impact our business, results of operations, cash flows, financial condition and/or reputation.

19. Our Promoter and Key Managerial Personnel play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Senior Management remain associated with us

Accordingly, our performance is heavily dependent upon the services of our Promoter and Key Managerial Personnel. If our Promoter and Key Managerial Personnel are unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Our Promoter and Key Managerial Personnel, have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

20. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter Group will collectively own [●] % of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

21. Our Promoter Director Mr. Nishant Garg controls our Group Companies and our Promoter Group Entities and any default made by the Promoter Group Entities will also impact our Company.

Our Promoter Director Mr. Nishant Garg is also Directors / Promoters of entities forming part of our Promoter Group there may be situations in which he is unable to allocate sufficient time to our Company or effectively participate in the management of our Company, which could have a material adverse effect on our business.

Further, any defaults or negative incident involving these Companies may impact the Goodwill or fund raising capabilities of our Company which could have a material adverse effect on our business operations and financial conditions.

For further details regarding our group companies, please refer to the Section titled “Our Group Companies/ Entities” on page 166 of this Draft Red Herring Prospectus.

22. We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.

Our services are skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our business, financial condition and results of operations could be materially and adversely affected.

24. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

Also, we confirm that Related Party Transactions has been conducted at Arm’s Length Basis and impact of the same has been properly disclosed in the Audited Financial Statements. And all the related party transactions are in compliance with the applicable provisions of the Companies Act, 2013.

25. Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.

Our Company has employed 115 employees as on January 31, 2022 on our payroll. The above includes employees in the top and middle management (including Executive Director), and also employees and labour who are part of manufacturing unit and office staff. Apart from this, we also engage contract laborer to facilitate our manufacturing operations.

Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected.

Further, there might be instances where we will need to hire additional contract labour, either for specialized jobs or during periods of high customer orders. We have not entered into any agreement for hiring additional labourers and thus availability of appropriately skilled labour cannot be guaranteed. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

26. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.

There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition.

We have issued Equity Shares in the last 12 months at a price which may be lower than the Offer Price, as set out in the table below. For further details, see “Capital Structure” at page 63.

Date of allotment	Number of Equity Shares allotted	Face Value (₹)	Issue Price (₹)	Nature of consideration	Reason of Allotment

28. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a book built price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “Capital Structure” on page 63 of this Draft Red Herring Prospectus.

29. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 83 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

30. Our Company has availed unsecured loan from our Directors which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.

Our Company, as per the restated audited financial statement as on December 31, 2022 has availed total sum of ₹ 911.26 lakhs as unsecured loan including Rs. 373.12 lakhs of unsecured loans from our Directors, which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section —Unsecured Loans under —Restated Financial Information beginning on page no. 172 of this Draft Red Herring Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

31. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above ₹ 10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the Audit Committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

32. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed use of issue proceeds, as detailed in the section titled “*Objects of the Issue*” is to be partially and/or wholly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

33. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

34. Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

35. Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “Statement of Financial Indebtedness” beginning on page 203 of this Draft Red Herring Prospectus.

36. In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/or additional indebtedness.

As on December 31, 2022 our Company’s total outstanding secured loans are ₹ 6122.78 lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cashflows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger crossdefault provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “Statement of Financial Indebtedness” on page 203 of this Draft Red Herring Prospectus.

37. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 83 of this Draft Red Herring Prospectus.

38. Insurance coverage obtained by us may not adequately protect us against unforeseen losses.

We maintain general, building, car and machine insurance with various covers for our office premises which we consider adequate. We may not have identified every risk and further may not be insured against every risk because such risks are either uninsurable or not insurable on commercially acceptable terms, including

operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events or risks not covered by insurance policies such as COVID-19 and other pandemics, or due to the same being inadequate, could materially harm our cash flows, financial condition and future results of operations. However, we cannot provide any assurance that our insurance will be sufficient or effective under all circumstances and against all hazards or liabilities to which we may be subject. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all.

39. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “Dividend Policy” on page 171 of this Draft Red Herring Prospectus.

40. Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

41. Third party industry and statistical data in this Draft Red Herring Prospectus may be incomplete, incorrect or unreliable.

We have not independently verified data from the Industry and related data contained in this Draft Red Herring Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be accurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

42. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a book built price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

43. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME of Bombay Stock Exchange Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of Bombay Stock Exchange Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

44. There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the Book Running Lead Managers, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of these securities markets elsewhere in the world.

45. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and

deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

46. You may not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.

The Equity Shares will be listed on the SME Platform of Bombay Stock Exchange Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

47. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

48. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

49. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

50. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

51. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

52. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

53. Changes in the Government Policy could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

54. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

55. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include Service tax, STT, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

56. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

57. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments. For further details, please refer to the chapter titled "Statement of Possible Tax Benefits" on page 93 of this Draft Red Herring Prospectus.

58. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

59. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

DETAILS OF OBJECTS OF THE ISSUE:

1. Consolidation And Expansion Of Manufacturing Facilities

Our company has been strategically focusing on increasing production of higher value add products through backward & forward integration, expansion of specialized products manufacturing and offering customized solutions to its customers as well as increasing its exports. The Company plans to increase share of higher value-added product to around 25 % of its overall production over next few years, particularly through in house manufacturing to ensure stringent check on the quality and have less dependence on third party manufacturer.

As part of this strategic shift and add specialized high value product to its portfolio, the Company is planning further horizontal/forward expansion and diversification by installing a 450 TPA Induction Wire plant and a 250 TPA Collated Pneumatic Nail Plant (2nd Line). Oil Tempered Induction Wire is largely being utilized in the automotive sector widely for the manufacturing of suspension, clutch and valve springs. India has a very good demand for this product and the quality materials manufactured with this technology is largely being imported mainly from countries like Italy, Japan, South Korea, Malaysia and China. Our project will lead to an import substitution by allowing customer to shift procurement within India instead of importing at a higher cost. This expansion project would also be covered in PLI incentive scheme of Government of India. We have already installed one line of 250 TPA Collated Pneumatic Nail Plant and have established the necessary associated production facilities and hire specialized personnel for the same. OVERVIEW OF INDIAN ECONOMY

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback. India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

GDP and Other Indicators

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030. According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines

were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crores (US\$ 17.92 billion).
- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.

- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crores (US\$ 7.13 billion).
- The wheat procurement in Rabi 2021-22 and the anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

Steel in India

As of April 2022, India was the world's second-largest producer of crude steel, with an output of 10.14 MT. In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. In April-July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT respectively.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. In FY22, crude steel production in India is estimated to increase by 18%, to reach 120 million tonnes, driven by rising demand from customers. The consumption of finished steel stood at 105.751 MT in FY22. In July 2022, the consumption of finished steel stood at 9.17 MT.

Steel companies are looking to restart expansion projects on the back of burgeoning steel processes with a capacity addition of 29 MT. Between April 2021-January 2022, consumption of finished steel stood at 86.3 MT.

In FY22, demand for steel is expected to increase by 17% to 110 million tonnes, driven by rising construction activities. Tata Steel is planning to set up more scrap-based facilities that will have a capacity of at least a billion tonnes by 2025. Tata Steel in India is also planning to expand its annual capacity from 34 MTPA to 55 MTPA by 2030.

In FY22, exports and imports of finished steel stood at 13.49 MT and 4.67 MT, respectively. In FY22, India's export rose by 25.1% YoY, compared with 2021. India's per capita consumption of steel grew at a CAGR of 4.43% from 46 kgs in FY08 to 74.10 kgs in FY19. In July 2022 exports of finished steel stood at 3.80 lakh MT.

Government has taken various steps to boost the sector including the introduction of National Steel Policy 2017 and allowing 100% Foreign Direct Investment (FDI) in the steel sector under the automatic route. According to the data released by Department for Promotion of Industry and Internal Trade (DPIIT), between April 2000-March 2022, Indian metallurgical industries attracted FDI inflows of US\$ 17.1 billion.

The Government's National Steel Policy 2017 aims to increase the per capita steel consumption to 160 kgs by 2030-31. The Government has also promoted policy which provides a minimum value addition of 15% in notified steel products covered under preferential procurement.

In 2019, the Government introduced Steel Scrap Recycling Policy with an aim to reduce import.

The industry is also benefitting from the developments happening across various industries. The new Vehicle Scrappage policy will help in reducing the steel prices since the policy enables recycling the materials used in old vehicles. In the healthcare front, major steel producers are now exceeding their production capacities to produce oxygen cylinders for COVID patients. In 2021, Indian Railways is planning to procure over 11 lakh tons of steel from Steel Authority of India Limited (SAIL) for the track renewal and laying new lines across the country.

The Indian metals and steel sector benefits from robust demand from key buyer sectors like automotive, construction, and increased government spending in infrastructure improvement (construction of roads, railways, ports and airports) worth USD 1.4 trillion between 2020 and 2025.

However, supply chain disruptions and high input prices are issues because metals and steel sales prices have not increased enough to compensate for the rise in energy and raw material costs (coking and thermal coal, refractories and ferroalloys). While the Indian government removed import duties on raw materials like coking coal in May, it has also imposed export duties on steel products, to curb inflation and to increase supply in the domestic market. The resulting excess capacity triggered a price decrease of about 20% for finished steel goods. Therefore, the increase in profit margins seen in 2021 will not continue in 2022. That said, the government is likely to cut or abolish the duties again, which should help to support exports of key steel products, and partly compensate for sales price decreases in the domestic market. The EU's ban on steel imports from Russia should provide opportunities for Indian steel exporters.

Payments in the Indian metals and steel sector take 90-120 days on average. Businesses have performed well during the past two years, improving their financial risk profile. At the same time, a consolidation process has seen stronger businesses taking over stressed assets and insolvent peers. We expect the number of protracted payments to remain steady during the coming twelve months, with no substantial increase in insolvencies.

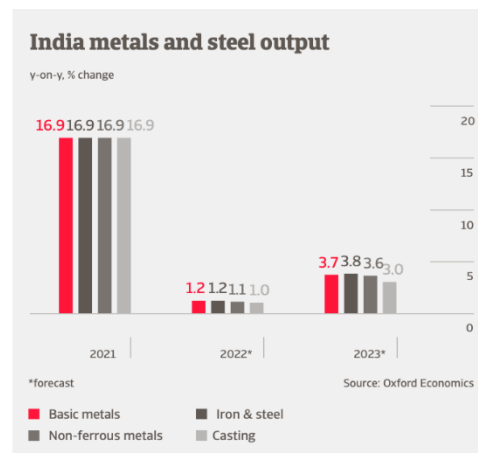

Currently we assess the credit risk situation of the Indian metals and steel sector as "Fair" across all segments, because high raw material prices still have a moderating effect on margins. However, export growth should accelerate in the coming months, leading to higher sales prices. Despite improved financial strength, most businesses are highly geared, due to high dependence on bank loans and other forms of external financing for capital expenditure. In the short-term, working capital requirements could increase on the back of higher input costs.

- The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31.

Industry Growth Drivers

- Between 2018-25F, the appliance and consumer electronics (ACE) sector will expand at a CAGR of 9.91%, contributing to the growth of the steel industry.
- Growth in automobile production is also expected to augment growth in steel production. Automobile production in India stood at 22.93 million units in FY22. According to ICRA, the Indian passenger vehicle (PV) industry is expected to post a growth of 22-25% in FY22.
- In March 2021, India Ratings and Research (Ind-Ra) revised the outlook for the auto sector to 'improving for FY22' from negative, backed by likely revival across segments, positive consumer sentiments amid macroeconomic tailwinds after recovering from the COVID-19 pandemic. The rating agency expects auto volumes to increase by 16-20% YoY in FY22 after recording a decline of ~14% YoY in FY21.
- Gross Value Added (GVA) of the construction industry at current prices increased at a CAGR of 8.4% between FY16 and FY20. Since construction industry is a major consumer of steel, expansion across construction industry will translate into growth of steel sector.

Policy Support

- Steel Clusters:** In September 2020, the Ministry of Steel prepared a draft framework policy for development of steel clusters in the country. The draft framework policy is aimed at facilitating and establishing greenfield steel clusters, along with development and expansion of the existing steel clusters.
- National Steel Policy 2017:** New National Steel Policy was formulated by the Ministry of Steel in 2016 to retain the objectives included in National Steel Policy (NSP) 2005. It aimed at covering broader aspects of steel sector across the country including environment and facilitation of new steel projects, growth of steel demand in India and raw materials. Under the policy, the central Government stated that all the Government tenders will give preference to domestically manufactured steel and iron products. Moreover, Indian steel makers importing intermediate products or raw materials can claim benefits of domestic procurement provision by adding minimum of 15% value to the product. The National steel policy, 2017 aspired to achieve 300MT of steelmaking capacity by 2030-31. This would translate into additional investments of Rs. 10 lakh crore (US\$ 156.08 billion). Further, it aimed to increase per capita steel consumption to 160 kgs by 2030-31.
- R&D and Innovation:** The scheme for the promotion of R&D in iron and steel sector has been continued under the 14th Finance Commission (FY20). Under the scheme, 26 projects have been approved with financial assistance of Rs. 161 crores (US\$ 24.98 million) from the Ministry of Steel. Ministry of Steel

is setting up industry driven institutional mechanism - Steel Research & Technology Mission of India (SRTMI) - with an initial corpus of US\$ 30.89 million. The institute will facilitate joint collaborative research projects in the sector. In October 2021, India and Russia signed an MoU to carry out R&D in the steel sector and produce coking coal (used in steel making). In September 2021, National Mineral Development Corporation Ltd. (NMDC) R&D Centre signed a MoU with CSIR-IMMT for joint research and development projects.

- d) **FDI:** 100% FDI through the automatic route is allowed in the Indian steel sector.

- f) **Reduction of Custom Duty on Plant & equipment's:** The Government has reduced the basic custom duty on the plants and equipment required for initial set up or expansion of iron ore pellets plants and iron ore beneficiation plants from 7.5/5% to 2.5%. Customs duty on imported flat-rolled stainless-steel products has been increased to 15% from 7.5%. Basic customs duty on steel grade dolomite and steel grade limestone is being reduced from 5% to 2.5%. Basic customs duty is being reduced from 10% to 5% on forged steel rings used in the manufacture of bearings of wind-operated electricity generators.
- g) **Production linked incentive (PLI) Scheme:** In November 2020, Union Cabinet approved the production-linked incentive (PLI) scheme in 10 key sectors (including electronics and white goods) to boost India's manufacturing capabilities and exports and promote the 'Atmanirbhar Bharat' initiative. India is a net exporter of finished steel and has the potential to become a frontrunner in certain grades of steel. PLI scheme has been approved for specialty steel with a financial outlay of Rs. 6,322 crore (US\$ 858.50 million) over a five-year period. July 2021, the Union Cabinet approved the production-linked incentive (PLI) scheme for specialty steel. The scheme is expected to attract investment worth ~Rs. 400 billion (US\$ 5.37 billion) and expand specialty steel capacity by 25 million tonnes (MT), to 42 MT in FY27, from 18 MT in FY21.

Opportunities

The Government of India has allocated Rs. 111 lakh crore (US\$1.4 trillion) under the National Infrastructure Pipeline (NIP) for FY2019-25. Sectors such as energy (24%), roads (18%), urban (17%) and railways (12%) account for ~71% of the projected infrastructure investments in India. The growth and development in all these sectors require lot of steel and alloys to be used. The sector-wise opportunities are highlighted as follows:

1. Automotive Industry

- The automotive industry is forecast to reach US\$ 260- 300 billion by 2026.
- The industry accounts for around 10% of the demand for steel in India.
- With increasing capacity addition in the automotive industry, demand for steel from the sector is expected to be robust

2. Capital Goods

- The capital goods sector accounts for 11% of the total steel consumption and is expected to increase 14-15% by 2025-26. It has the potential to increase in tonnage and market share.
- Corporate India's capex is expected to grow and generate greater demand for steel.

3. Infrastructure

- The infrastructure sector accounts for 9% of steel consumption and is expected to increase to 11% by 2025-26.
- Due to rising investment in infrastructure the demand for steel products would increase in the years ahead.
- 70% of the country's infrastructure, estimated at Rs. 6 lakh crore (US\$ 89.50 billion), is yet to come up. Thus, a significant growth potential for steel sector is present.*
- For various infrastructure sectors, including real estate and power, the Ministry of Finance planning to set up a stress fund.

4. Airports

- More and more modern and private airports are expected to be set up.
- In FY19, passenger traffic at Indian airports stood at 344.69 million.
- The number of operational airports stood at 103 as on 31 March 2019.
- Development of tier II city airports will sustain consumption growth.
- Estimated steel consumption in constructing airports is likely to grow more than 20% over the next few years.

5. Railways

- The Dedicated Rail Freight Corridor (DRFC) network expansion would be enhanced in the future.
- Introduction of high-speed bullet trains and metro trains will increase steel usage.
- Gauge conversion, setting up of new lines and electrification would drive demand for steel.
- The Indian Railways is planning to procure over 11 lakh tons of steel from the Steel Authority of India Limited (SAIL) for track renewal and laying new lines across the country.

6. Oil & Gas

- India's primary energy consumption of oil and gas is expected to increase to 10 mbpd and 14 bcfd, respectively, by 2040.
- This would lead to an increase in demand of steel tubes and pipes, providing a lucrative opportunity for the steel industry.

7. Power

- The Government has envisaged capacity addition of 58,384 MW from conventional sources between 2017-22*. Also, the Government is targeting to achieve 175 GW of renewable power capacity by generation 2022.
- This will lead to enhancement in both transmission and distribution capabilities, thereby raising steel demand from the sector.

8. Rural India

- Rural India is expected to reach per capita consumption of 12-14 kgs of finished steel by 2020.
- Policies like Pradhan Mantri Awa Yojana and Pradhan Mantri Gram Sadak Yojana are driving growing demand for steel in rural India.
- In FY19, per capita consumption of steel in rural India was estimated to be between 10-15 kgs.

Future Directions

Our company has been strategically focusing on increasing production of higher value add products through backward & forward integration, expansion of specialized products manufacturing and offering customized solutions to its customers as well as increasing its exports. Our promoter Mr. Nishant Garg is passionate about offering innovative product line and focused on the specialty steel market, to help boost the profitability of the Company. Our Company plans to increase share of higher value-added product to around 25 % of its overall production over next few years, particularly through in-house manufacturing to ensure stringent check on the quality and have less dependence on third party manufacturer.

As part of this strategic shift and to establish market, our Company had earlier started getting plastic coil

pneumatic nails and wire welded coil nails manufactured on job work basis through third parties by providing the raw material i.e. steel wire for further processing and contract manufacturing. After having the brand and customer base established for this specialty product, our Company has recently installed own in-house dedicated production line for manufacturing of collated pneumatic nails at the Company's main plant at Ghaziabad, i.e. Unit I. Our Company has already imported and installed machinery for the same, which is under trail and will likely be fully operational from Q1, 2023. These pneumatic nails are generally used in construction industry in specially developed Pneumatic Nail Guns, which are currently being utilized by the developed nations for saving the high labour costs as well as to enhance the speed of construction. As much as 95% of the production of the 1st line is likely to be exported given that currently India has a limited demand due to high cost of imported products. With product availability in India itself at lower cost, the adoption of this technology is likely to grow in India in future and likely to add to domestic demand and allow for import substitution. Given a very high global demand and limited supplies including from India, the product is expected to bring in higher profitability for the Company.

Our Company is planning further horizontal expansion and diversification by installing a 5000 TPA oil tempered Induction Wire plant. This product is largely being utilized in the automotive sector widely for the manufacturing of suspension, clutch and valve springs. Our Company has done extensive research and development for the technology and is in advance discussions for import of new technology/technology tie-up for this product to be at par with technology being used in developing countries. India currently has a very good demand for this product and the quality materials manufactured with this technology is largely being imported mainly from countries like Italy, Japan, South Korea, Malaysia and China. Our project will lead to an import substitution by allowing customer to shift procurement from us instead of from global suppliers.

Our company plan to continue to add similar new technologies/products to our basket to help increase value addition and improved margins. The Company is also planning to consolidate its manufacturing facilities in a larger single manufacturing facility nearby to achieve economies of scale and bring efficiencies in the manufacturing costs.

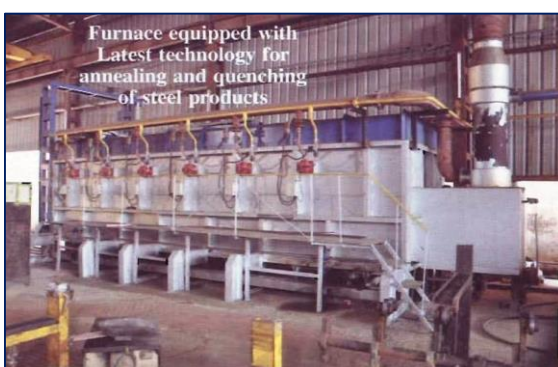

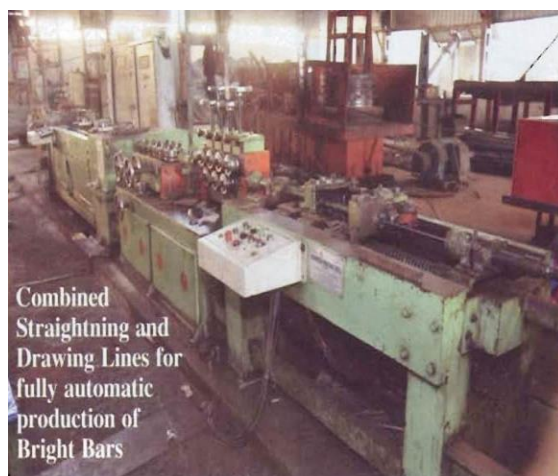

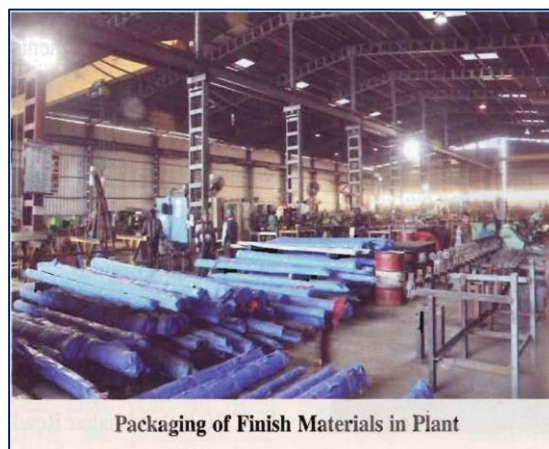

Our Company has robust growth and improvement in top line and bottom line on standalone basis in the past Financials years which is explained below:

OUR PRODUCTS & ITS APPLICATION

✓ S.S. Round Bright Bars - Size: 3mm to 100 mm

The Stainless-Steel Bright Bars can be described as raw materials that are primarily created from the stainless-steel alloy through the process of cold drawing. They have a very precise geometric molecular structure and come with a very smooth finish. This is why the bars have a very shiny appearance and that is why they are known as bright bars. Depending on the type and grade of stainless steel used in making the bright bars, they have different chemical composition and hence varied properties. The SS Bright Round Bars are highly corrosion resistant, durable, and come with enhanced strength. They also have excellent weld ability and machinability, which is why they are used for various applications.

Cold drawn bright bars vs Peeled Bars

The stainless-steel cold drawn bright bars are normally drawn at room temperatures, and that is why it is known as the cold working procedure. This cold drawing also has an impact on the properties of the metal. It helps in the desired scaling of the bar, and also helps to maintain a close dimensional tolerance. Also, the surface finish is quite vibrant and free of any scale. The Stainless-Steel Peeled Bars are manufactured by chipping off the surface of the steel. Thus, these bars have a very smooth and polished surface. Because of this method, some surface defects might easily be removed from the rolled product.

Application of SS Round Bright Bars

- Automobile Industries: Automobile industry majorly requires bright bars as they are required in making nuts, bolts, shafts and all the constituents of engines. For this purpose, special grade of bright bars is required.
- Heavy engineering Industries: used in making heavy machines and tools for manufacturing various products.
- Textile industry uses the bars for manufacturing machines required to make textiles
- Electric pumps and electric motors require bright steel bars
- Railway engines and coaches are made with usage of steel bright bars
- Army and defence sector require the bars for making arms and ammunitions
- Agricultural sector uses the bright bars to make machinery and equipment required for agriculture.
- Sports and health equipment are also crafted from bright steel bars
- Various types of machineries are manufactured, using bright bars
- Splendid decorative furniture and lamps are fabricated out of them
- These steel bars are used in manufacturing gears, bearings and hinges
- All the fixtures, tools and hoses are made with usage of bright steel bars
- Cold headed components are also drafted from the bright bars
- Bright steel bars are also used in the food processing industry for manufacturing machines.

- Oil and petroleum industry require bright steel bars
- These bars are used during mining process
- Bright bars are used making conveyor shafts

✓ **Carbon & Alloy Steel Bright Bars : Size: 3mm to 100 mm**

Carbon & Alloy Bright steel bar is usually a carbon steel alloy which has had the surface condition improved by drawing, peeling or grinding over the hot rolled finish supplied by the steel mill. Advantages achieved include improved machining, less wastage at component production stage, enhancement of physical and mechanical properties and improved dimensional tolerances and straightness. There are four types of carbon steel namely: low carbon steel, medium carbon steel, high carbon steel and very high carbon steel based on the amount of carbon present in the alloy. Lower carbon steels are softer and more easily formed, and steels with a higher carbon content are harder and stronger, but less ductile, and they become more difficult to machine and weld

Application of Carbon & Alloy Steel Bright Bars

- Chemical Industry
- Plumbing
- Heating
- Oil & Gas Industry
- Water Supply Systems

✓ Carbon & Alloy Steel Wires : Size: 0.25mm to 23mm

Alloy steel wire is a type of steel that contains other alloying elements in addition to carbon. The most common alloying elements include manganese, chromium, nickel, molybdenum, and vanadium. Alloy steel wires are used for various applications such as springs, fasteners, and cables. The process of making alloy steel wire begins with melting the raw material in an electric arc furnace. This is followed by adding the desired alloying elements and casting the molten metal into ingots. The ingots are then hot rolled into wire rods which are further made into wires of the desired thickness and hardness.

Application of Carbon & Alloy Steel Wires

Carbon steel wire rod is extensively used to manufacture many wire products, such as:

- Agricultural and commercial uses
- Bright wire for electrolytic zinc coating
- Normal for automatic nailing
- Barbed wire
- Chains
-  Screws, nuts and bolts

✓ Plastic Coil Pneumatic Nails and Wire Welded Coil Nails:

Our current finished product i.e. wires are raw material for producing this nails, hence it is part of forward integration strategy of our company. Maiden has imported new plant & machinery for producing this product and that has been installed at out Unit-I. The project is under trail & will commence the commercial operations from Q1' 23. Our company plans to produce plastic collated, paper collated and wire collated nails for the application in construction industry around the world. The project is targeted with 95% export-oriented production as these nails are used in Pneumatic Nail Guns, which are currently being utilized by the Developed nations for saving the high labor costs as well as to enhance the speed of construction.

Application of Plastic Coil Pneumatic Nails and Wire Welded Coil Nails

These handy tools use compressed air to hammer or shoot nails into wood. Typically, pneumatic nailers are dedicated to specialty uses, such as framing and sheathing, finish, or roofing. These nails are applied through Nail guns and is useful where ever multiple nails are needed to be installed. This smoothens the process and save time. As of now this product is mostly used in Export markets and specifically in construction of wooden houses.

3. Expand our Current Business Operations

Our company since its inception is engaged in the business of manufacturing and sales of Steel bright bars and steel wires with our fully integrated infrastructure at our plant located at Ghaziabad (Unit-I, II & III). Our company has three units spread across 12,500 square yards in Ghaziabad, having annual combined manufacturing capacity of 50,000 MT. We are planning to expand our current business operations by optimum utilization of resources and adding new product line as per our forward & backward integration strategy and also consolidate and shift our manufacturing operating to a single large facility over next 12 months.

Strategy ahead for Future Growth (Domestic & International market expansion):

Our company in the next step we plan to expand our markets by exploring markets of the USA, Europe & Africa. For this we have already built strong foundation by regularly exporting our products for last 3 years and regularly participating in various international exhibitions in the Europe specifically in Germany & Czech Republic which are central locations of European business for past 6 years. Our

Company aims to expand to these markets more aggressively in the coming years as those markets are very lucrative for the Indian Manufacturers. In order to develop these markets our company need to enhance product mix. In this regard our company has shortlisted products which are our forward and vertical integrations to our current product portfolio. These products specifically include:

1. **Collated Pneumatic Nails:** We have recently imported machinery and installed the same to produce collated pneumatic nails from in-house manufacturing facility. Currently, the project is undergoing trials and likely to commence commercial production from Q1 '2023. The project is targeted to produce plastic collated, paper collated and wire collated nails for the application in construction industry around the world. 95% of the production is targeted for exports as these nails are used in pneumatic nail guns, which are currently being utilized by the developed nations for saving the high labor costs as well as to enhance the speed of construction. Phase 2 of the same project includes popularizing the concept of the same technology in India as well to ensure that the nation is able to do construction activities at a faster pace. The product worldwide has a very good demand but very limited supply. The project would be amongst the first few in India.
2. **Oil Tempered Induction Wire:** This product is being utilized in the automotive sector of India widely for the manufacturing of suspension, clutch and valve springs. Currently Indian manufacturers generally use the technology, which results in a lower production. We are planning to setup a 5000 ton per annum capacity project to manufacture oil tempered Induction Wire with import of technology that has already been upgraded in other developed nations. India currently has huge demand and the quality materials manufactured from this technology are being imported from countries like Italy, Japan, South Korea, Malaysia and China. Our project will lead to import substitution and also possibly allow exports to developing nations. **Currently, the project is covered under the Production Linked Incentive (PLI) scheme of the Indian Government & Company is expected to enjoy benefits of the same over and above the manufacturing margins. Our company is targeting to commence commercial production of oil tempered induction wire within 12 months.**
3. Our Company over last 5 years, have been developing capabilities to manufacture speciality steels including super alloys. Although we haven't captured significant market yet with our volumes limited to around 1000 MT per annum, but believe that we are in right position to develop and grow the market for these speciality steel products and more than double our volumes over next 12-18 months. We plan extensive advertising and publicity in order to reach out to the right markets that require such steels as the demands are generally high globally. While the volumes of these speciality alloys are low, but margin are relatively much higher.
4. As we are planning to consolidate and expand our manufacturing facility in a single larger facility nearby over next 12 months, the consolidation and expansion is likely to result in economies of scale, better operational efficiencies and increase in production. We are also likely to better cater to large global customers looking to shift their manufacturing base to India with our larger facility.

OUR INFRASTRUCTURE

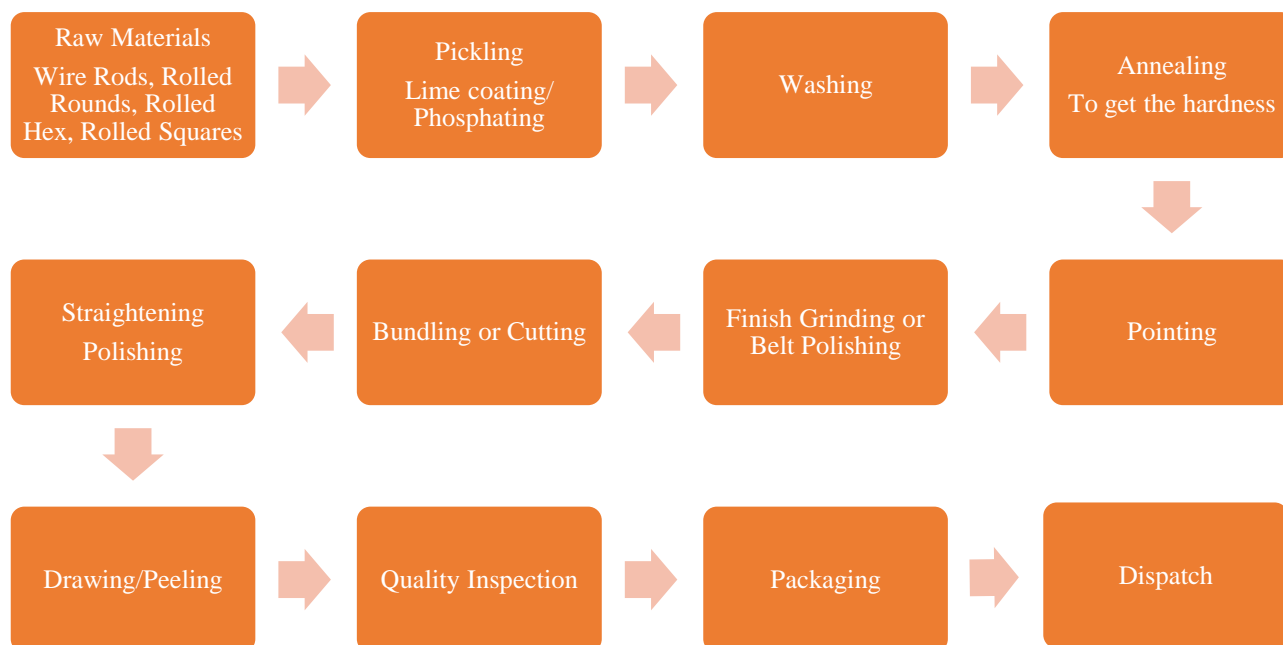

Our company has three manufacturing facilities in UPSIDC's Industrial Areas at Bulandshahar Road, Ghaziabad and Kavi Nagar Industrial Area, Ghaziabad, and the entire infrastructure is available in this industrial area.

MANUFACTURING PROCESS

The products manufactured by our Company typically go through the following procedure: -

The general manufacturing process of our products is as under:

1. The steel wire rods and steel rounds, hexagonal and squares are inspected by the QC department to check for surface cracks and accuracy of dimensions and chemical composition.
2. These raw materials are then made to go through the process of pickling during which they are dipped into 3 different tanks- first one being an acid tank for the purpose of rust removal, second, these materials are taken to water for washing away impact of acid on the material. Finally, the material is taken to lime or phosphate tank for the purpose of smoothness of finish in order to achieve better production on the machines and to reduce wear and tear of the machinery during the subsequent processes.
3. After this process of pointing is performed. At this step the tip of the pickled wire rod or round is trimmed using pointing machines in order to make it usable for the draw benches and wire drawing blocks to be used in the next step.
4. The pickled material is passed through draw benches or wire drawing blocks which pull the material through a die of specific size in order to achieve better accuracy and finish.
5. After this the pointed edges of the material that were made at the 3rd step are cut using bend saws. The cut edges are sold as scrap later on.
6. Further in order to get better straightening and polish of the finish and to further improve the surface of material the material is passed through automatic cutters and straightening machines and thus bright bars for standard customers is manufactured at this step in specific lengths and sizes.
7. After this, for the customers who require high quality product the bright bars are passed to center less grinders and disc polishing machines for shiny finish and better appearance of the product. This depends on specific requirement of the customers.
8. After this, the bright bars manufactured are bundled together and weighed on the weighing scales available with the company and tied together as bundles of specific weights using binding wires in order to handle the bundles easily.
9. Few customers also demand specific hardness of the finish product that is different from the original hardness of that grade of material. For this, process of annealing is performed i.e. heating of the material to specific levels

in an annealing furnace and then cooling it slowly at a specific rate.

10. After this point the material is inspected thoroughly for checking of surface finish, accuracy of dimensions, hardness of material, etc in our fully equipped in-house lab.
11. Some customers also demand Magnetic Particle Material test that is for the purpose of checking the internal cracks (if any exist in the finished material) For that we have procured separate machinery through which the entire lot is passed under a testing solution and the internal cracks get visible when dipped into the solution under LED lights.
12. The varieties of shapes are virtually endless and profiles are produced to the exact specification with very close tolerances.
13. The finished products is sent for packing and thereafter to dispatch section.
14. The finished products may further go for electroplating or some other coating by different outside vendors.
15. The scrap steel shall be squashed to compact size through Bailing Press and shall be sent to raw material supplier for re-melting or sold to scrap dealers of steel.

OUR R&D AND LABORATORY

Our company is growth oriented and always deliver the best to our clients. MFL constantly strive to develop something better. Our technical team is always trying to give our customers better than what they are getting today. Also, we try to keep up with the dynamic business scenario and therefore, try to enhance our capabilities with the best testing and development equipment. For this, our Company has a full-fledged working lab equipped with latest technologies for all kinds of metallurgical testing's and development. We also have well qualified team that operate this lab, for constant research and development of different materials. Our lab is capable of any kind of mechanical and chemical testing of the materials. The details of equipment installed includes:

1. Chemical Spectrometer
2. PMI for chemical testing on the spot
3. Ultrasonic testing for internal crack detection
4. MPI testing for surface cracks & sub surface cracks detection
5. Dial Gauges for Straightness testing
6. Microstructure Testing
7. Hardness Testing
8. Tensile Testing
9. General Digital Vernier Callipers & Micrometres for Size checks

All the above equipment is of latest technology which is calibrated regularly and is up to date in best condition.

CAPACITY AND UTILISATION

While, our nominal capacity is 50,000 ton per annum, due to the nature of business and industry in which the Company operates, it is difficult to ascertain the exact capacity available and its utilization since the same machineries can be used to manufacture various types of products of different dimensions and the available capacity and utilization varies based on different product mix. As a general approximation however, we are running at 70% of the capacity utilization. To fulfil the gap between installed capacity & utilized capacity, we have embarked on the forward integration as detailed above including for collated pneumatic nails. These forward integrations will utilize the spare capacity of production as our bright bars and wires are the basic raw materials of collated nails. This gives us new markets, added margins as well as reduced risks by way of reduced receivable cycle, since these products belong to short supply markets. This also should enable us to utilize our existing capacities to the optimum level. Availability of additional capital will also allow us to bridge this gap and help us utilize the planned expansion of the capacity in the planned consolidated manufacturing complex nearby, where the current manufacturing facilities are planned to be shifted and consolidated.

UTILITIES & INFRASTRUCTURE FACILITIES

Our office is equipped with computer systems, servers, relevant software and other communication equipment's, uninterrupted power supply, internet connectivity, security and other facilities, which are required for our business operations to function smoothly.

Material & Components

The basic material and components required for manufacturing bright bars and wires is ferrous metal including carbon steel, stainless steel and alloys. These materials are procured majorly from domestic suppliers like TATA Steel, SAIL etc. These are the large suppliers of these material and most of our requirements are met by them. Generally, there is no major inconsistency in the quality or fluctuation in price.

Land: An aggregate industrial land area admeasuring approximately 12,500 sq. yard is being utilized for our three manufacturing facilities for which required licenses and approvals including factory license has been granted by the competent authorities. The lay-out plan of the shed & building has been also approved by the competent authorities.

Shed & Building:

Factory Shed	10000 Sq. Yd.
Stores	200 sq. Yd.
Godown for RM & finished Goods	Inside factory shed
Genset Shed	50 sq. Yd.
Administration Office	500 sq. Yd.
Residence for staff	100 sq. yd. (at first Floor)
Security Guard Room	100 sq. Yd.
Rest Room/Toilets	100 sq. yd. (3 no's at GF)

Utilities:

Power Connection: Power connections of 200KVA at Unit I, 500KVA at Unit II, and 700KVA at Unit III are available. Gensets are available for backup in case of power failures.

Water: There is no significant water requirement and the requirement is met from the bore well. We also have water-harvesting system to reserve rain water and also recycling water with help of adequate technology and small investment. Per day consumption of all three manufacturing facilities is approximately 6,000 litres/day.

Manpower: The manpower requirement for smooth running of the manufacturing facilities in two shifts consists of:

Top Management	5
Skilled Mid-Level Managerial staff	15
Semi-skilled personnel	20
Unskilled labour	45
Administration	15
Marketing	5
Security Guards	10
Total	115

The manufacturing process is technical hence it requires qualified, experienced and trained manpower for smooth functioning of plant. Since, the promoters are well qualified and have good experience and networking in the industry, there is no difficulty in getting appropriate manpower for smooth working of this plant.

Transportation: Both inward and outward transportation is required for any business in manufacturing industry. Plant is linked with proper road for transportation of material and good numbers of large/ medium/small transporters are available all the time on one call.

Communication: Communication network is appropriate at the plant area. All major national communication service providers are providing their different communication services in this area resulting in availability of good communication options.

Storage Facilities: Adequate storage facilities are available at the manufacturing facilities for the raw material and finished products. The raw materials are heavy in form of wire rod coils and rounds of steel and have great variety of grades therefore separate 3,000 sq. yard area has been assigned to raw materials in the project layout. The raw material doesn't require any specific storage conditions. However, finished products need to be protected from rust and therefore appropriate storage arrangements have been made in the layout itself. A separate store is maintained for storage of consumables and tools.

Effluent Treatment: We have installed Effluent Treatment plants wherever it is required for the treatment of the chemicals used for coating and washing of our steel products.

FEMA replaced the erstwhile Foreign Exchange Regulation Act, 1973. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the government approval route, depending upon the sector in which foreign investment is sought to be made. The DIPP (now DPIIT) makes policy pronouncements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEM Rules. In case of any conflict, the FEM Rules prevail. Therefore, the regulatory framework, over a period of time consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DIPP (now DPIIT) issued the FDI Policy which consolidates the policy framework on FDI issued by DIPP (now DPIIT), in force on August 28, 2017 and reflects the FDI policy as on August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP (now DPIIT). As per the FDI Policy, FDI up to 100% is permitted in wholesale trading under automatic route and up to 51% is permitted in multi brand retail trading under the government route subject to certain conditions prescribed under FDI policy. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the RBI. At present, the FDI Policy does not prescribe any cap on the foreign investments in the sector in which the Company operates. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 (“FDI Policy 2020”), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy from time to time and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI issues Master Directions on Foreign Investment in India and updates the same from time to time. Presently, FDI in India is being governed by Master Directions on Foreign Investment No. RBI/FED/2017-18/60 FED Master Direction No. 11/2017-18 dated January 4, 2018, as updated from time to time by RBI. OCBs may invest in this Issue provided it obtains a prior approval from the RBI. On submission of such approval along with the Application Form, the OCB shall be eligible to be considered for share allocation.
