*For further details of the outstanding litigation proceedings, see “Outstanding Litigations and Material Developments” beginning on page 159 of this Red Herring Prospectus.						

We cannot provide assurance that these legal proceedings will be decided in his favor. Such litigation could divert management time and attention, and consume financial resources in their defense or prosecution.

2. *Extensive government regulation and the impact of plastics on the environment could have a severe impact on our ability to continue our business operations, which could adversely affect our business, results of operations and financial condition.*

We are engaged in the business of Manufacturing Polymer based products primarily Polythene LF Tube, Tarpoulin sheets etc. The raw material utilized to manufacture these products predominantly consists of plastic. The increasing reliance of the world on plastics and plastic products and their impact on the environment, could lead to promulgation of stricter government regulations and adoption of rigorous waste management rules which in turn may require us to make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Increased awareness of plastic pollution and its staggering impact on our environment might lead to imposition of complete or partial ban on the industrial usage of plastics or supply of plastics, which could have a severe impact on the operation of our manufacturing unit and our continued business operations. On happening of any of the abovementioned events, we may have to completely halt our business operations or reduce our production to comply with the prevalent government and industrial regulations.

In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Further, halting of our business operations could be construed as an event of default by our secured lenders as per the loan agreements executed by our Company, consequently we may be required to repay the outstanding secured loans, failure of which would authorise our lenders to take appropriate actions enlisted as consequences of defaults of such agreements. We cannot assure you that the above-mentioned events will not occur or if they occur, we will effectively be able to deal with such events. In the event, we are forced to shut down our manufacturing units or halt our business operations, the continuity of our business operations, revenue, result of operations and financial condition might be adversely affected.

3. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on December 31, 2022, our Company’s total fund based indebtedness is 661.04 lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if

any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows. Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled “*Financial Indebtedness*” on page 157 of this Draft Prospectus.

4. *Substantial portion of our revenues has been dependent upon few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.*

For the period ended December 31, 2022, our top ten clients accounted for approximately 94%, of our revenue from operations. However the loss of any significant client would have a material effect on our financial results. The loss of any significant client would have a material effect on our financial results.

Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. However, in case of any change in the buying pattern of our end users or disassociation of major customers can adversely affect our business or if our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Further, loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

5. *Our Company does not have long term agreement with suppliers for supply of raw material. Our inability to obtain raw material in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability.*

We depend on a number of suppliers within India for procurement of raw materials required for manufacturing our products. In December 2022 and Fiscals 2022, 2021 and 2020, our cost of material consumed amounted to 74.85%, 59.91%, 74.13% and 59.05 % of our total revenue respectively. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

6. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Such orders may be amended or cancelled prior to finalization, and should such an amendment or cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our

sales from period to period may fluctuate significantly as a result of changes in our clients' preferences. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

7. Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.

Our manufacturing unit is located at Kolkata, West Bengal. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our Manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our results of operations and financial condition as a whole.

In addition to the above if our manufacturing unit suffer losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such noncompliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

8. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cashflow could adversely impact our business, financial condition and results of operations.

Our Company had reported certain negative cash flows from its operating, investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

(Rs in lakhs)

Particulars	For the period ended	For the year ended March 31		
	December 2022	2022	2021	2020
Net Cash from Operating Activities	421.72	(298.02)	(176.01)	112.18
Net Cash from Investing Activities	(331.81)	196.66	(69.45)	(78.74)
Net Cash used in Financing Activities	(58.27)	102.15	242.53	(38.55)
Net Increase / (Decrease) in Cash and Cash equivalents	31.64	0.79	(2.93)	(5.10)

For details, please refer "Management's Discussion and Analysis of Financial Conditions and Results of Operations of our Company" on page no. 148 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

9. Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.

Our business requires significant working capital, such as to finance the purchase of raw materials, consumables, stores & spares and payments for operating expenses before we receive payment from our customers. In addition, the actual amount of our future capital requirements may differ from estimates as a result of, among other factors, cost overruns, unanticipated expenses, regulatory changes, economic conditions,

additional market developments. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from such defaults based primarily age of the debt and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debts arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risk and liability claims. All these factors, could have a significant effect on our profitability and cash flows and accordingly an increase in working capital requirements may have an adverse effect on our financial condition and results of operations.

10. *The IPO Proceeds will be used to repay unsecured loans.*

We intend to use the proceeds from the Issue to repay our unsecured loans. As on December 31, 2022, we have availed an aggregate of ₹ 191.87 lakhs of unsecured loans from them and these loans were to utilized to fund working capital expenditures and for general business purpose. We intend to repay an aggregate of ₹180.00 lakhs of the said outstanding loan. We believe that the proposed repayment will enable us to improve our debt-equity ratio and the total unsecured loans after the proposed repayment will be ₹180.00 lakhs. For details, refer the chapter “Objects of the Issue” on page no 61 of this Draft Prospectus.

11. *We are dependent on our key management team as well as our mid-to-senior personnel and we heavily rely on their knowledge and experience in operating our business. The loss of or our inability to attract or retain such persons could materially adversely affect our business performance.*

Our business and the implementation of our strategy is dependent upon our key management teammid-to-senior personnel who oversee our day-to-day operations, strategy and growth of our business. There can be no assurance that we will be able to retain these personnel or find adequate replacements in a timely manner, or at all. We may not be able to hire and train replacement personnel immediately when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. Further, our competitors may offer compensation and remuneration packages beyond what we are offering to our key management team. If one or more members of our key management team are unable or unwilling to continue in their present positions, such persons would be difficult to replace in a timely and cost effective manner, and our business, prospects, results of operations and cash flows could be materially adversely affected.

12. *In addition to normal remuneration, other benefits and reimbursement of expenses of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors/ Promoters or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoters and will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

- 13. Our company could suffer adverse publicity and incur substantial costs as a result of defects in its products, which in turn could adversely affect the brand value, and its sales could be diminished if the company is associated with negative publicity.**

Any failure or defect in final products could result in a claim for damages, regardless of the responsibility for such a failure or defect. Although the company attempt to maintain quality standards, it cannot assure that all item would be of uniform quality, which in turn could adversely affect the value of brand, and sales could be diminished if the company is associated with negative publicity. Any negative publicity regarding Company, brand, or its products, including those arising from a drop in quality, or any other unforeseen events could affect company's reputation and its results from operations.

- 14. The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.**

Our manufacturing process requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involve significant capital expenditure and per unit cost of electricity produced is very high. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

- 15. Any non-availability of technical, skilled, semi-skilled and un-skilled manpower and / or increased employee costs could negatively affect our ability to operate efficiently and result in disruptions to our manufacturing operations.**

Our operations are dependent on access to a large pool of technical, skilled, semi-skilled and un-skilled manpower. Our dependence on such technical, skilled, semi-skilled and un-skilled manpower may result in significant risks for our operations, relating to the availability of such manpower. There can be no assurance that we will have adequate access to the required manpower at reasonable rates, as and when required, or at all. As a result, we may be required to incur additional costs to ensure smooth running of our operations. The labour cost in India has been increasing over the past years due to increasing competition for quality employees among manufacturing companies as well as growth in inflation and general wage increases. For the period ended December 31, 2022 and for Fiscals 2022, 2021 and 2020, our employees benefit expenses as per our Restated Financials, amounted to ₹ 12.89 lakhs, ₹18.18 lakhs, ₹ 15.14 lakhs and ₹ 14.37 lakhs respectively. We cannot assure that these or future agreements may not significantly result in increased employee costs and that we will be able to pass on the increased costs to our customers, partially or at all. Our inability to pass the increased costs may impact our profitability and future growth prospectus. Additionally our operations may be adversely affected by circumstances beyond our control such as work stoppages, labour disputes and shortage of qualified skilled labour or lack of availability of adequate infrastructure. We cannot assure you that manpower, whether hired through contractors or directly, will continue to be available at reasonable wages in the areas where our manufacturing units are located.

- 16. Industrial accidents at our manufacturing facility may adversely affect our operation.**

Our manufacturing facilities are subject to operating risk resulting in fatal accidents which can cause injury to the labour and employees of the company and this could also cause damage to the property and plant and machinery situated at the factory which could have an adverse effect on our operations. Though, we have taken adequate safety measures in order to avoid such mishaps, but in case of any such happening of the event out of our control, we cannot assure you whether it will be sufficient or not. Further occurrence of such accidents could impact our production schedules, costs, revenue and ability to meet customer demand.

- 17. Our Company has availed certain unsecured loans of ₹191.87 which are recallable in nature. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.**

As at December 31, 2022, our Company has outstanding unsecured loans aggregating to ₹ 191.87 lakhs, which are availed from lenders and may be recalled at any time. We cannot assure you that our lenders would not demand repayment of unsecured loans extended to us. In the event, our lenders seek repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to carry out the operations or complete our ongoing operations.

Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “Financial Indebtedness” on page 157 of this Draft Prospectus.

18. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.*

Any failure or defect in our products could result in a claim against us for damages or may lead to recalling of our products regardless of our responsibility for such a failure or defect. However, our Company is well equipped with in-house testing laboratory to test the products. Our finished product has to undergo a strict quality check to ensure that they are of relevant quality as per the standards set. Our in house testing laboratory regulates and monitors the quality and ensures that the same is as per the required standards. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, or any other unforeseen events could affect our reputation and our results from operations.

19. *Our existing is concentrated in a single region i.e., West Bengal and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.*

All our facilities like registered office, manufacturing unit is located in West Bengal which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facilities are susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company’s operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing facilities could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, continuous addition of industries in and around our manufacturing facilities without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business.

20. *The present production capacity installed at our manufacturing unit is not fully utilized.*

The installed capacity at our manufacturing unit is not fully utilized. The underutilization of the available capacity can affect our capacity to fully absorb fixed cost and thus may impact our manufacturing efficiency. The underutilization of installed capacity in future may affect profitability due to increase in per unit fixed cost of production. For further details of installed capacity and utilization, please refer to chapter titled “Our Business” beginning on page 81 of this Draft Prospectus.

21. *Our financing agreements contain covenants that limit our flexibility in operating our business. Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, results of operations and financial condition.*

As of December 31, 2022, our total outstanding indebtedness was 661.04, out of which 469.17 were loans availed from Banks and 191.87 loans availed from NBFC. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our businesses. Further, our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions, any of which could adversely affect our business and financial condition.

We are required to obtain prior approval from our lenders for, among other things:

- Effect any change in capital structure;
- Implement any scheme of expansion/modernization/diversification/renovation or acquire any fixed assets during any accounting year, except such schemes which have already been approved by the Bank.
- Formulate any scheme of amalgamation or reconstruction.
- Enter into borrowing arrangements either secured or unsecured with any other bank, Financial Institution, company or person.

We are required to obtain the required consents of the lenders under our financing agreements before undertaking these significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Further, if we are forced to issue additional equity to the lenders, ownership interest of the existing shareholders in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost. If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

22. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

23. *We may face labour disruptions that could interfere with our operations.*

We are exposed to the risk of strikes and other industrial actions. Although we believe that we have good relations with our employees presently, there can be no assurance that our employees will not undertake or

participate in strikes, work stoppages or other industrial actions in the future. Any labor disruptions may adversely affect our operations by delaying or slowing down our manufacturing, increasing our manufacturing cost or even halting a portion of our manufacturing. This may also cause failure in delivering sales commitments, hurt our relationships with customers and disrupt our supply chain, further affecting our revenue and margins. If there is any prolonged disruption or shutdown of operations at our manufacturing facilities, we may not be able to replace the equipment or inventories, or use different facilities to continue our operations in a timely and cost effective manner or at all. We may not be able to recover from damages or interruptions caused to our manufacturing facilities in a timely manner or at all. The occurrence of any such event could result in the temporary or long-term closure of any of our manufacturing facilities, severely disrupt our business operations and materially and adversely affect our business, results of operations, financial condition and cash flows.

- 24. *Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the funding plan has not been appraised by any bank or financial institution and is not subject to any monitoring by any independent agency. Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.***

Our Company intends to use the Net Proceeds from the Fresh Issue for the purposes described in “Objects of the Issue” on page 61 of this Draft Prospectus. In terms of Regulation 262 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ` 10,000 lakhs. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. The funding plans are in accordance with our own estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business. Our Board will have significant flexibility in temporarily investing the Net Proceeds of the Issue. Accordingly, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of its business, increased profitability or an increase in the value of your investment.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in this Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

- 25. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.***

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

- 26. *We have substantial capital expenditure requirements and may require additional financing to meet those requirements, which could have a material adverse effect on our results of operations, cash flows and financial condition.***

For the period ended December 31, 2022 and for the fiscal 2022, 2021 and 2020 our capital expenditures (net additions), reflected in our financial statements as additions/adjustments to property, plant and equipment were, 366.53 lakhs, Rs. 181.71 lakhs, Rs. 169.45 lakhs and Rs. 76.52 lakhs respectively. The actual amount and timing of our future capital requirements may differ from estimates due to, among other factors, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, economic conditions, weather related delays, technological changes, additional market developments. Our sources of additional financing, where required to meet our capital expenditure plans, may include the incurrence of debt, the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows. Any issuance of equity to raise additional funds, on the other hand, would result in a dilution of the shareholding of existing shareholders.

27. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects/ schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” on page 61 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

28. Our lenders have charge over our movable and immovable properties in respect of finance availed by us. Our inability to meet our obligations under our debt financing arrangements could adversely affect our business, results of operations and cash flows.

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable and immovable properties. The total amounts outstanding and payable by us as secured loans for the nine-month period ended December 31, 2022 and for the Fiscal 2022, 2021 and 2020 were Rs. 469.17 lakhs, Rs. 298.42 lakhs, Rs.283.18 lakhs and Rs. 229.40 lakhs. For further details, please refer to Note 5– Borrowings –Long Term Borrowings and Note 7– Borrowings – Short Term Borrowings, beginning in the chapter titled “Financial Information” on Page 127, under the chapter titled “Financial Statements” beginning on page 125 of this Draft prospectus.

In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to Invocation/forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. Any failure on our part to comply with the terms in our loan agreements would generally result in events of default under these loan agreements. In such a case, the lenders under each of these respective loan agreements may, at their discretion, accelerate payment and declare the entire outstanding amounts under these loans due and payable, and in certain instances, enforce their security which has been constituted over our various assets and take possession of those assets, which could adversely affect our liquidity and materially and adversely affect our business and operations.

29. Our Company’s failure to maintain the quality standards of the products or keep pace with the technological developments could adversely impact our business, results of operations and financial condition.

Our products depend on customer’s expectations and choice or demand of the customer as we also produce the products as per particular customer’s needs. Any failure to maintain the quality standards may affect our business. Although we have put in place quality control procedures, we cannot assure that our products will always be able to satisfy our customers’ quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customers’ expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. While, we believe that we have always expanded our capacities to cater to the growing demand of our customers and also endeavor regularly update our existing technology and acquire or develop new technologies on a continuous basis, our failure to anticipate or to

respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

30. *We depend on third parties for our suppliers, logistics and transportation needs. Any disruptions in the same may adversely affect our operations, business, cash flows and financial condition.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our distribution centres to various stores. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage, shrinkage and our inability to claim insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition. We rely on third party suppliers for our business. We are exposed to the risk of these suppliers, third party manufacturers and service providers failing to adhere to the standards set for them by us and statutory and/ or regulatory bodies in respect of factors such as quality, quantum of production, weights and measures and safety standards and noncompliance of relevant rules and regulations, and any consequent action by such statutory and/ or regulatory bodies or otherwise, could adversely affect our business operations, results of operations, cash flows and financial condition, due to reasons such as shortage of supply, product liability claims and product recalls. This may also result in lost confidence on the part of our customers and adversely affect our reputation. Further, any delay or failure to deliver the products in a timely manner would result in adverse effect on our business operations, results of operation, cash flows and financial condition. Any litigation involving such third parties may cause a material adverse effect on our reputation.

31. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Further, in the future, we may also be required to obtain new licenses, registrations and approvals for any proposed or upcoming projects, including any expansion of existing projects. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. Further, these licenses, registrations and approvals are subject to several conditions, and we cannot assure that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by us to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our operations and may have a material adverse effect on our business. For further details on the licenses obtained by us and licenses for which renewal and other applications have been made, please see the chapter titled “Government and Other Statutory Approvals” beginning on page 164 of this Draft Prospectus.

32. *The outbreak of COVID-19 or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

An outbreak of a novel strain of coronavirus (COVID-19) was recognized by the World Health Organization as a public health emergency of international concern on January 30, 2020, and as a pandemic on March 11, 2020. The outbreak of COVID-19 has significantly and adversely impacted and will likely continue to impact economic activity and has contributed to significant volatility in global financial markets and led to operational challenges. It is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, stagnation, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. In particular, a number of governments and organizations have revised GDP growth forecasts for 2021 downwards in response to the economic slowdown caused by the spread of COVID-19, and it is possible that the COVID-19 pandemic will cause a prolonged global economic crisis or recession.

In response to the COVID-19 outbreak, the governments of many countries, including India have taken preventive or protective actions, such as issuing advisories and imposing country or state wide lockdowns, including restrictions on travel and temporary closure of business operations and increased remote working protocols, which have significantly slowed down economic activity. On March 14, 2020, India declared COVID-19 as a —notified disaster and imposed a nationwide lockdown announced on March 24, 2020. While a majority of the eligible population under India’s vaccine scheme is now fully vaccinated, the likelihood of subsequent waves of the COVID-19 pandemic in India remains high especially against any new variants of COVID-19, for example, B.1.1.529 (Omicron) variant and we may be subject to further lockdowns or other restrictions in the rest of Fiscal 2022 and beyond. In the event subsequent waves worsen or are not controlled in a timely manner, we may not be able to (i) manage our operations at their full capacity; and (ii) successfully implement our growth strategy. Even though we have taken various initiatives to raise awareness for COVID as well as implemented social distancing and hygiene measures in our manufacturing facility, we cannot assure you that in the event of another COVID-19 wave additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of COVID-19.

The impact of the ongoing pandemic cannot be ascertained at this time, and while we cannot currently estimate the duration or future impact of the COVID-19 pandemic on our business or on the Indian or global economy, there is a likelihood that the effects could continue into Fiscal 2022 and beyond. In addition, if our Key Managerial Personnel or a significant percentage of our workforce is unable to work due to COVID-19 illness, quarantine, limitations on travel or other government restrictions in connection with the COVID-19 pandemic, our operations may be negatively impacted.

33. *We may be unable to comply with changes in environmental, health and safety, labour laws and other applicable regulations.*

We are subject to various laws and regulations in relation to environmental protection, such as the Water Act, Air Act, as well as environmental laws and regulations, health and safety laws, and labour laws. These laws and regulations impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our manufacturing operations. We are also subject to the laws and regulations governing employees, including in relation to minimum wage and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits. For details on such regulations and policies applicable to our business, see “*Key Regulations and Policies*” on page 92 of this Draft Prospectus. Laws and regulations may limit the amount of hazardous and pollutant discharge that our manufacturing facility may release into the air, soil and water. The discharge of materials that are chemical in nature or of other hazardous substances into the air, soil or water beyond these limits may cause us to be liable to regulatory bodies or third parties. Any of the foregoing could subject us to litigation, which could increase contingent costs, require considerable attention from the management, and adversely affect our reputation in the event we were found liable. Additionally, the government or the relevant regulatory bodies may require us to shut down our manufacturing plants, which in turn could lead to product shortages that delay or prevent us from fulfilling our obligations to customers. Furthermore, in the event our manufacturing activities are shut down or suspended, we may continue to incur costs including those incurred to comply with regulations, appeal regulatory decisions, and compensate our workforce.

34. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

35. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and there can be no assurance that we will be able to pay dividends in the future.*

We currently intend to invest our future earnings, if any, to fund our growth. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital

requirements and capital expenditures. Hence, there can be no assurance that we will be able to pay dividends in the future.

- 36. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” of this Draft Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. Further, the industry data mentioned in this Draft Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

- 37. *Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 38. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 39. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

- 40. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

41. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms. In addition, we cannot assure you that any required approvals for borrowing in foreign currency will be granted to us without onerous conditions, or at all. Such, and other, limitations on raising foreign capital may adversely affect our business growth, results of operations, and financial condition.

EXTERNAL RISK FACTORS

42. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

43. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

44. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

45. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties

and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

46. We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.

We are incorporated in and our operations are in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include: political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;

- occurrence of natural or man-made disasters;
- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- changes in India's tax, trade, fiscal or monetary policies;
- prevailing regional conditions,
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- Other significant regulatory or economic developments in or affecting India.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

47. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us

and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see “*Statement of Special Tax Benefits*” on page 70 of this Draft Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

48. Any adverse change in India's credit rating by an international rating agency could materially adversely affect our business and profitability.

Any adverse change in India's credit ratings by international rating agencies may adversely impact the Indian economy and consequently our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

49. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

50. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and

market conditions other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in NIFTY, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

SECTION VI – ABOUT OUR COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY OVERVIEW

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia's war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent. The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation are plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia's war in Ukraine could escalate, and tighter global financing conditions could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress. In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macro prudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

Forces Shaping the Outlook

The global fight against inflation, Russia's war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

Despite these headwinds, real GDP was surprisingly strong in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia's invasion of Ukraine.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most—though not all – major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

Risks to the Outlook

The balance of risks to the global outlook remains tilted to the downside, with scope for lower growth and higher inflation, but adverse risks have moderated since the October 2022 World Economic Outlook.

Note: Real effective exchange rates are assumed to remain constant at the levels prevailing during October 26, 2022–November 23, 2022. Economies are listed on the basis of economic size. The aggregated quarterly data are seasonally adjusted. WEO = World Economic Outlook.

1/ Difference based on rounded figures for the current and October 2022 WEO forecasts. Countries whose forecasts have been updated relative to October 2022 WEO forecasts account for approximately 90 percent of world GDP measured at purchasing-power-parity weights.

2/ For World Output (Emerging Market and Developing Economies), the quarterly estimates and projections account for approximately 90 percent (80 percent) of annual world (emerging market and developing economies) output at purchasing-power-parity weights.

3/ Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.

4/ For India, data and projections are presented on a fiscal year basis, with FY 2022/23 (starting in April 2022) shown in the 2022 column. India's growth projections are 5.4 percent in 2023 and 6.8 percent in 2024 based on calendar year.

5/ Indonesia, Malaysia, Philippines, Singapore, Thailand.

6/ Simple average of growth rates for export and import volumes (goods and services).

7/ Simple average of prices of UK Brent, Dubai Fateh, and West Texas Intermediate crude oil. The average assumed price of oil in US dollars a barrel, based on futures markets (as of November 29, 2022), is \$81.13 in 2023 and \$75.36 in 2024.

8/ Excludes Venezuela.

9/ The inflation rate for the euro area is 5.7% in 2023 and 3.3% in 2024, that for Japan is 2.8% in 2023 and 2.0% in 2024, and that for the United States is 4.0% in 2023 and 2.2% in 2024.

Upside risks- Plausible upside risks include more favorable surprises to domestic spending- as in the third quarter of 2022 - which, however, would increase inflation further. At the same time, there is room for an upside scenario with lower-than-expected inflation and less monetary tightening:

- **Pent-up demand boost:** Fueled by the stock of excess private savings from the pandemic fiscal support and, in many cases, still-tight labor markets and solid wage growth, pent-up demand remains an upside risk to the growth outlook. In some advanced economies, recent data show that households are still on net adding to their stock of excess savings (as in some euro area countries and the United Kingdom) or have ample savings left (as in the United States). This leaves scope for a further boost to consumption—particularly of services, including tourism. However, the boost to demand could stoke core inflation, leading to even tighter monetary policies and a stronger-than-expected slowdown later on. Pent-up demand could also fuel a stronger rebound in China.
- **Faster disinflation:** An easing in labor market pressures in some advanced economies due to falling vacancies could cool wage inflation without necessarily increasing unemployment. A sharp fall in the prices of goods, as consumers shift back to services, could further push down inflation. Such developments could imply a “softer” landing with less monetary tightening.

Downside risks - Numerous downside risks continue to weigh on the global outlook, lowering growth while, in a number of cases, adding further to inflation:

- **China's recovery stalling:** Amid still-low population immunity levels and insufficient hospital capacity, especially outside the major urban areas, significant health consequences could hamper the recovery. A deepening crisis in the real estate market remains a major source of vulnerability, with risks of widespread defaults by developers and resulting financial sector instability. Spillovers to the rest of the world would operate primarily through lower demand and potentially renewed supply chain problems.
- **War in Ukraine escalating:** An escalation of the war in Ukraine remains a major source of vulnerability, particularly for Europe and lower-income countries. Europe is facing lower-than anticipated gas prices, having stored enough gas to make shortages unlikely this winter. However, refilling storage with much-diminished Russian flows will be challenging ahead of next winter, particularly if it is a very cold one and China's energy demand picks up, causing price spikes. A possible increase in food prices from a failed extension of the Black Sea grain initiative would put further pressure on lower-income countries that are experiencing food insecurity and have limited budgetary room to cushion the impact on households and businesses. With elevated food and fuel prices, social unrest may increase.
- **Debt distress:** Since October, sovereign spreads for emerging market and developing economies have modestly declined on the back of an easing in global financial conditions (Box 1) and dollar depreciation. About 15 percent of low-income countries are estimated to be in debt distress, with an additional 45 percent at high risk of debt distress and about 25 percent of emerging market economies also at high risk. The combination of high debt levels from the pandemic, lower growth, and higher borrowing costs exacerbates the vulnerability of these economies, especially those with significant near-term dollar financing needs.
- **Inflation persisting:** Persistent labor market tightness could translate into stronger-than-expected wage growth. Higher-than-expected oil, gas, and food prices from the war in Ukraine or from a faster rebound in China's growth could again raise headline inflation and pass through into underlying inflation. Such developments could cause inflation expectations to de-anchor and require an even tighter monetary policy.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's Gross Domestic Production

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL PLASTIC MARKET

The global plastic market size was valued at USD 593.00 billion in 2021. It is expected to expand at a compound annual growth rate (CAGR) of 3.7% from 2022 to 2030. The increasing plastic consumption in the construction, automotive, and electrical & electronics industries is projected to support market growth during the forecast period. Regulations to decrease gross vehicle weight to improve fuel efficiency and eventually reduce carbon emissions are driving plastic consumption as a substitute for metals, including aluminum and steel, for manufacturing automotive components.

The growth of the construction industry in emerging markets such as Brazil, China, India, and Mexico has been instrumental in fueling the demand for plastics. The progress of the overall market can be attributed to increased foreign investment in these domestic construction markets, as a result of easing FDI norms and requirements for better public and industrial infrastructure.

The plastics market demand in the U.S. was valued at USD 86.02 billion in 2021. The high market share of the country is attributed to the presence of the well-established automotive, aerospace & defense, and electronics industries. The country is characterized by a low-risk environment, a stable economy, and a robust financial sector. These factors have provided a multitude of opportunities for investors in recent years, which are likely to trigger infrastructure spending in the country. This, in turn, is projected to positively impact the demand for plastics in the U.S. construction industry.

The growing population, coupled with rapid urbanization and industrialization in emerging economies, has been impelling federal governments to increase their construction spending to cater to increasing infrastructure needs. Rising construction spending by governments, particularly in China and India, will drive the demand for plastic in infrastructure and construction applications.

Stringent regulations regarding depletion and recyclability of conventional materials such as metal and wood are anticipated to drive greater plastic demand from construction industries in insulation, pipes, cables, floorings, windows, storage tanks, and others. Polymer fittings are also generally quite simple and easy to install, compared to metals or wood, with a wide range of color combinations adding to their aesthetic appeal.

Plastic has 85% less specific gravity compared to metals. When used in the automotive and construction industries, they enable approximately 80% weight savings and 30% to 50% cost savings in individual components. The increasing incidences of positive cases of COVID-19 across the globe due to new virus variants are positively influencing the demand for plastic in medical devices such as testing equipment, ventilators, gloves, syringes, surgical trays, and medical bags.

Product Insights

Polyethylene held the largest market revenue share of more than 25.0% of the overall demand in 2021. It is primarily used in the packaging sector, which includes containers and bottles, plastic bags, plastic films, and geomembranes. Based on its molecular weight, there are different types of polymers of PE such as HDPE, LDPE, and LLDPE. For instance, low molecular weight polymers of PE find use in lubricants; medium molecular weight polymers are used as wax, miscible with paraffin; high molecular weight polymers are commonly used in the plastic industry.

Rising demand for packaged food, trays, bottles for milk and fruit juices, crates, caps for food packaging, drums, and other liquid food packaging, to combat the spread of COVID-19 across the world is expected to drive the demand for polyethylene in the coming years.

Application Insights

The injection molding application segment held the largest revenue share of over 43.0% of the overall demand in 2021. Injection molding is a common method for producing custom plastic parts. It is a discontinuous process as the plastic parts are produced in molds and are required to be cooled before being removed. This process requires an injection molding machine, molds, and plastic materials. The molten plastic is injected into a mold cavity and then cooled to create the final product. It is generally used in the production of automobile parts, containers, and medical devices among others.

Calendering is one of the potential application segments in the plastics market. It is used to process thermoplastic materials into films and sheeting. It is mainly used for PVC as well as certain other modified thermoplastics. The process consists of five steps - pre-blending, fluxing, calendering, cooling, and winding-up. It allows specialty surface treatments of films or sheets such as enhancing or embossing the physical properties or in-line lamination. The growing packaging industry is driving the demand for films and sheets which, in turn, is further creating the demand for calendering.

INDIAN PLASTIC MARKET

Indian plastic industry market is one of the leading sectors in the country's economy. The history of the plastic industry in India dates to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,000 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floorcoverings, medical items, packaging items, plastic films, pipes, raw material, etc. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crores (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crores (US\$ 126 billion) in 4-5 years.

Indian plastics industry also delivers plastic materials to many other industry such as automotive, consumer packaging, & electronics. Over the past few decades, the demand for Plastic has developed by 8 percent yearly. A similar development rate is anticipated to continue during the forecast period. The progress rate of the plastics industry in India is among the top in the world, with plastics consumption rising at 16 percent per year. Considering a rising middle class with low per capita consumption of plastics. This high progress rate is expected to continue, as the per capita consumption of plastics will certainly increase. Although India's plastics industry has been hit by the nation's general economic emergency over the past 2 years, with the weakening rupee, underlying economic movement rests strong as the use of plastic is increasing in more & more segments, opening new markets & substituting traditional materials.

Potential of Indian Plastics Market:

Despite country having a populace of approximately 1.2 Bn & a workforce of 467 Mn, many local plastics businesses have reported issues with labor shortages. This has steered to an increased amount of investment in industrial technology like automation & conveyor belt systems. Apart from the lack of an expert manufacturing labor, the plastics industry in India is also fronting the issue of a countrywide power shortage. The electricity demand shortage is about 13 percent. This offers excellent opportunities for companies proposing energy saving solutions, green industrial technology, & ancillary equipment.

Faster globalization, fast change in technology, & rising consumerism have brought about innovative changes & abundant chances for petrochemical firms in the Indian plastics industry to raise domestically & globally. Meanwhile, major investments are also estimated in the Indian plastics industry during the forecast period, owing to its rapidly expanding market size. The plastic industry in India is one of the fastest rising segments which is estimated to rise further owing to increasing demand for inexpensive packaging.

MARKET ANALYSIS

India Plastics Market was worth US\$ 36.07 Bn in 2020 and total revenue is expected to grow at a rate of 6.6% CAGR from 2021 to 2027, reaching almost US \$ 56.42 Bn in 2027.

Plastic goods producers urge the PM to start a Petrochem regulator:

The plastic good producers have urged Prime Minister Narendra Modi to establish the Petrochemical Controlling Authority to make a fair rating mechanism & guarantee that PSUs such as IOCL, GAIL, BPCL help local plastic processing units. The administration's anti-dumping duty & compulsory BIS standards were creating a non-tariff barrier & the Indian plastic processing industry being import-dependent has to see a huge issue.

The plastic good producers have claimed an instant prohibition on the export of the raw material, polymer, from country to ease supplies in the nation & check the cost rise striking zero duty on polymer imports. With China, establishes of more than 50,000 PPU of which 90 percent are MSME. The segment openly employs more than fifty lakh people & pays more than `three lakh crore to the nation's GDP.

Values of the raw materials such as PVC, ABS, etc. have improved reaching between 30 percent & 140 percent over the past 5 months. The petrochemical businesses are captivating benefit of the flow in polymer values by limiting the supplies to local processing units & liberating the material after the value increase in consistent intervals. The polymer processing units have also associated with private companies thus impressive unjustified polymer costs in the local market as compared to global costs. Polymer costs are 10-15 percent lower in the global market & Indian petrochemical manufacturers do not enter into promoting contracts as foreign manufacturers do.

Indian raw material producers export in huge quantities & make scarcity causing in an exponential rise in value in the last 5 months. This is together with a simple drop in demand owing to the pandemic, which has down the line caused in a working capital crisis. The increasing imports of plastic goods from China are also creating the Indian plastic market uncompetitive in the local market & higher raw material costs are making exports of plastic goods uncompetitive. If

polymer costs in country are carried at par with the world-wide costs, presence of thousands of PPU in India are at stake.

GOVERNMENT INITIATIVES

- The Union Ministry of Commerce and Industry of India targets to increase the plastic exports of the country to US\$ 25 billion by 2025. There are multiple plastic parks are being set up in the country in a phased manner that will help improve the plastic manufacturing outputs of the country. Under the plastic park schemes, funds of up to 50% of the project costs or a ceiling cost of Rs. 40 crore (US\$ 5 million) per project.
- Government initiatives like “Digital India”, “Make in India”, and “Skill India” will also boost India’s Plastic industry. For instance, under the “Digital India” program, the government aims to reduce the import dependence of products from other countries, which will lift the local plastic part manufacturers.
- The government also launched a program for building Centres of Excellence (CoEs) to develop the existing petrochemical technology and promote the research environment pertaining to the sector in the country. This will aid in promoting and developing new applications of polymers and plastics in the country. Additionally, about 23 Central Institute of Plastics Engineering & Technology (CIPET) have been approved to accelerate financial and technological collaboration for promoting skills in chemicals and petrochemicals sector.

It is often blended with other fibres like cotton to get the desirable properties of both materials. We are also engaged in business of Trading of Polyester Fabric. Based on the orders received from our customers for Polyester Fabric, we order the exact requirement from our suppliers and make the final product available to our customers as and when the demand arises.

MANUFACTURING PROCESS

Manufacturing Processing Steps

Step -1: Procuring of Raw Materials

Our manufacturing process starts with procurement of raw materials i.e. Linear Low Density Polyethylene (LLDPE), Low Density Polyethylene (LDP), High density Polyethylene (HDPE) and Metallocene from several authorized vendors in various quantities, depending on the demand of the customer. All our raw materials are easily available in the market. We have stringent quality control checks before any consignment is accepted as the quality of raw materials has a direct bearing on the quality of finished products.

Step -2: Mixing in Automatic Mixer

The mixing of raw materials and master batch is done with the use of machine called “mixer” and the proportion of raw materials is decided by the supervisor depending upon the specification of the customer.

Step -3: Hopper Feeder

As per the requirements, the raw materials are weighed and fed to the feeder of the extruder which is known as hopper

and subsequently the material passes through a screw and barrel system where it is processed at the desired set temperature.

Step -4: Heating

The raw material is heated to a molten point through the heaters located in the extruder to form a homogeneous mixture. The heat profile is an important part as the material may thermally degrade if overheated.

Step -5: Screen Change Filter

The melted mixture comes out of the barrel and passes through a screen filter that removes contaminants and impurities from the mixture. After all the impurities and dirt in the raw material are been removed the mixture is passed on the next step.

Step -6: Die Zone

The mixture then passes through the die zone. In die zone, there are different sizes of Die pin which are used accordingly to shape the product. The material will continue through the feed pipe and be pushed through the custom-created die and air is injected via a hole in the die center to radially inflate the material into a thin tube to create a desired profile shape.

Step -7: Air cooling

After passing through the die, the next step in the process is cooling. The material so formed is known as film. The film is cooled typically with high speed air, and pulled upward by equipment called nip rollers. Cooling aims to ensure no change occurs in the shape of the product and helps to maintain the rigidity. As the film cools it crystallizes at what is called the frost line. As the tube reaches the nip rollers, at the top of the line, the film is now cool enough to flatten and is then referred to as lay-flat or collapsed tubing. The film is then transported downstream by rollers for further processing.

Step -8: Quality checks

2.1 Significant accounting policies

a) Use of estimates

The preparation of the financial statements in conformity with generally accepted accounting principles in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company's most significant estimates include those on the useful life of assets, deferred taxes and provision for taxes. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates.

b) Current-non-current classification

Assets

An asset is classified as current when it satisfies any of the following criteria:

- a. it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle;
 - b. it is held primarily for the purposes of being traded;
 - c. it is expected to be realised within 12 months after the reporting date; or
 - d. it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.
- Current assets include the current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- a. it is expected to be settled in the company's normal operating cycle;
 - b. it is held primarily for the purposes of being traded;
 - c. it is due to be settled within 12 months after the reporting date; or
 - d. the company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.
- Current liabilities include the current portion of non-current financial liabilities.

All other liabilities are classified as non-current.

c) Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Cost includes all incidental costs related to acquisition and installation, other pre-operative costs and interest on borrowed funds, if any, used to finance the acquisitions of fixed assets and is capitalized up to the date the assets are ready for commercial use.

Depreciation is provided over the estimated useful life of the assets using written down value method. The rates of depreciation used are those which have been calculated as per the method specified in Schedule II of the Companies Act, 2013. The new Companies Act prescribes that the asset should be written off over its useful life as estimated by the management and provides the indicative useful lives for the different class of assets. Other assets are depreciated over their balance useful life.

d) Impairment of assets

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the statement of profit and loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

e) Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

f) Inventories

Inventory consists of Raw material, store and spares and Finished goods is valued at cost. Cost of inventories comprises of all cost of purchases and other costs incurred in bringing the inventory to their present location and condition. Cost is assigned on First-In-First-Out (FIFO) basis. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

OVERVIEW

Industry Overview

Indian plastic industry market is one of the leading sectors in the country's economy. The history of the plastic industry in India dates to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,000 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floor coverings, medical items, packaging items, plastic films, pipes, raw material, etc. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crores (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crores (US\$ 126 billion) in 4-5 years.

Indian plastics industry also delivers plastic materials to many other industries such as automotive, consumer packaging, & electronics. Over the past few decades, the demand for Plastic has developed by 8 percent yearly. A similar development rate is anticipated to continue during the forecast period. The progress rate of the plastics industry in India is among the top in the world, with plastics consumption rising at 16 percent per year. Considering a rising middle class with low per capita consumption of plastics. This high progress rate is expected to continue, as the per capita consumption of plastics will certainly increase. Although India's plastics industry has been hit by the nation's general economic emergency over the past 2 years, with the weakening rupee, underlying economic movement rests strong as the use of plastic is increasing in more & more segments, opening new markets & substituting traditional materials.

Potential of Indian Plastics Market:

Despite country having a populace of approximately 1.2 Bn & a workforce of 467 Mn, many local plastics businesses have reported issues with labor shortages. This has steered to an increased amount of investment in industrial technology like automation & conveyor belt systems. Apart from the lack of an expert manufacturing labor, the plastics industry in India is also fronting the issue of a countrywide power shortage. The electricity demand shortage is about 13 percent. This offers excellent opportunities for companies proposing energy saving solutions, green industrial technology, & ancillary equipment.

Faster globalization, fast change in technology & rising consumerism have brought about innovative changes & abundant chances for petrochemical firms in the Indian plastics industry to raise domestically & globally. Meanwhile, major investments are also estimated in the Indian plastics industry during the forecast period, owing to its rapidly expanding market size. The plastic industry in India is one of the fastest rising segments which is estimated to rise further owing to increasing demand for inexpensive packaging.

Significant Developments after December 31, 2022 that may affect our Future Results of Operations

Except as mentioned in Risk Factors, there are no significant developments.

Impact of COVID-19

IMPACT OF COVID -19 ON OUR BUSINESS OPERATIONS

The pandemic outbreak has caused an economic downturn on a global scale, including closures of many businesses and reduced consumer spending, as well as significant market disruption and volatility. The demand for our products is dependent on and directly affected by factors affecting industries where our products were supplied. In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, the Company's business operations were disrupted from March 24, 2020 as the manufacturing unit was discontinued for considerable time. From, May 2020, we resumed our manufacturing activities in a phased manner in line with the directives issued by the central and state governments. Despite the impact of the COVID-19 pandemic, our revenue from operations for the Quarter ended December 31, 2022 and for Fiscals 2022, 2021 and 2020 was Rs. 1444.49, 1,947.48, 1,634.76 and 1,089.39 respectively. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations. It is difficult for us to predict the impact that COVID-19 will have on us, our customers or suppliers in the future. For more details, see Risk Factors Affecting Results of Operations and Financial Condition – COVID-19 Pandemic on page 21 of this Draft Prospectus.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

General economic and market conditions in India

Our business is highly dependent on economic and political conditions in India. General economic and political conditions in India that affect the commodities market may have a material adverse effect on our business which include macroeconomic policies, industry-specific trends, legislation and regulations, upward and downward trends in the market, consumer confidence, currency and interest rate fluctuations. Moreover, market conditions may change rapidly due to any adverse economic and political conditions and we may not be able to respond to such changes in a timely manner, or at all. Any adverse impact of general economic or political conditions could materially adversely affect our business, financial condition, cash flows, results of operations and prospects.

Cost and Availability of Raw Materials

Our cost of materials consumed constitutes the largest component of our cost structure. For the financial period for the nine month ended December 31, 2022 and year ended March 31, 2022, March 31, 2021 and March 31, 2020 were ₹ 1,285.90 million, 1,473.10 million, 1,080.00 million and 947.10 million respectively, or 89.02%, 75.64%, 66.06% and 86.94% respectively. The price and availability of such raw materials is dependent on several factors beyond our control, including overall economic conditions, availability levels, market demand & competition for such raw materials, transportation costs, duties & taxes and trade restrictions. We usually don't enter into long-term supply contracts with any of our suppliers and typically source raw materials from third-party suppliers or the open market. The absence of long-term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers, which

may reduce our profit margins. We also face a risk that one or more of our existing suppliers may discontinue these supplies to us, and any inability on our part to procure raw materials from alternate suppliers in a timely fashion, or on commercially acceptable terms, may adversely affect our operations.

If, for any reason, primary suppliers of raw material should curtail or discontinue their delivery of such materials or products to us in the quantities we need, or on commercially acceptable terms, production schedules could be disrupted and our business and results of operations could be adversely affected.

Unexpected market movements and disruptions could affect our business

Any reduction in demand or a temporary or permanent discontinuation of processing of such products could have an adverse effect on our business, results of operations and financial condition. Any materially adverse social, political or economic development, natural calamities, civil disruptions, regulatory developments or changes in the policies of the government could adversely affect our manufacturing and distribution activities, result in modification of our business strategy, or require us to incur significant capital expenditure, which will in turn have a material adverse effect on our business, financial condition, results of operations, and cash flows. Further, our sales may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our products or services, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations or to successfully introduce new products or services in these markets could adversely affect our business, prospects, results of operations, financial condition, and cash flows. The occurrence of, or our inability to effectively respond to, any unfavorable events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

Competition

The industry in which we operate is intensely competitive. We compete with several regional and local companies, as well as large multi-national companies that are larger and have substantially greater resources than we do, including the ability to spend more on advertising and marketing. We also face competition from new entrants who may have more flexibility in responding to changing business and economic conditions. Competition in our businesses can be based on, among other things, quality, pricing, and innovation, perceived value, brand recognition, promotional activities, advertising, special events, new product introductions and other activities. It is difficult for us to predict the timing and scale of our competitors' actions in these areas. We expect competition to continue to be intense as our existing competitors expand their operations and introduce new products. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability. Our business faces significant competition, particularly from other vertically integrated peer companies. Some of our competitors may be larger than us, or develop alliances to compete against us, have more financial and other resources and have products with greater brand recognition than ours. Our competitors in certain regions may also have better access or exclusive arrangements to procure raw materials required in our operations and may procure them at lower costs than us, and consequently be able to sell their products at lower prices. As a result, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition.

Government Regulations and Policies

Government regulations and policies, of India can affect the demand for, expenses related to and availability of our products and their raw materials. These regulations and policies are extensive and cover a broad range of industries, some of which are politically sensitive. These regulations and policies and the tax regimes to which we are subject could change at any time, with little or no warning or time for us to prepare. For further details see, "*Risk Factors – Internal Risk Factors - We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses in timely manner or comply with such rules and regulations or at all may adversely affect our operations, may adversely affect our business, prospects and results of operations*" on page no.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public offers, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – issue LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the LM with a copy to the Registrar, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in accordance with April 20, 2022 Circular.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued, issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Issue shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Nondebt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

As per the FDI policy, the sector in which our Company operates, is permitted up to 100% of the paid-up share capital of such company under the automatic route.
