GLOBAL OUTLOOK

Global growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income—only three years after emerging from the pandemic-induced recession of 2020. Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it, including across major advanced economies. Although this tightening has been necessary for price stability, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. This drag is set to deepen given the lags between changes in monetary policy and its economic impacts, and the fact that real rates are expected to continue to increase.

Asset prices have been in broad, synchronous decline, investment growth has weakened substantially, and housing markets in many countries are worsening rapidly. Shockwaves continue to emanate from the Russian Federation's invasion of Ukraine, especially in energy and other commodity markets. Against this backdrop, confidence has fallen precipitously. The world's three major engines of growth—the United States, the euro area, and China—are undergoing a period of pronounced weakness, with adverse spillovers for emerging market and developing economies (EMDEs), many of which are already struggling with weakening domestic conditions.

Global inflation has been pushed higher by demand pressures, including those from the lagged effects of earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. In some countries, inflation has also been spurred by large currency depreciations relative to the U.S. dollar, as well as tight labor market conditions.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies. Although inflation is likely to gradually moderate over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. In response, central banks around the world have been tightening policy faster than previously expected. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers.

Fiscal space has narrowed considerably, and concerns over debt sustainability in many countries have risen as global financial conditions have made it more difficult to service debt loads that have accumulated rapidly in recent years, particularly during the pandemic. Nonetheless, many governments have announced new support measures to shield households and firms from the effects of sharply rising prices, slowing the pace of fiscal consolidation as pandemic-related stimulus is withdrawn.

INDIAN ECONOMY

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalized public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

3. *The Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.*

Our top ten customers Contributes 34.05%, 47.71% and 24.81% of our total sales for the year ended on March 31, 2023, March 31, 2022, and March 31, 2021 respectively. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in demand may adversely affect our ability to retain them. We cannot assure you that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

4. *Our business is highly dependent on technology and any disruption or failure of our technological systems may affect our operations.*

We rely on our information technology systems to provide us with connectivity across our business functions and connectivity with our trainers and end users through our software, hardware and network systems. Our business processes are majorly information technology enabled, and any failure in our information technology systems or loss of connectivity or any loss of data arising from such failure could disrupt our ability to track, record and analyze work in progress, monitor maintenance activities or share data with our network partners, process financial information, manage creditors/debtors or engage in normal business activities, which could have an adverse effect on our business and operations. Further, any failure, disruption or manipulation of our integrated information technology system could disrupt our ability to track and record transactions, which could have an adverse effect on our business and operations.

In addition, our success will depend, in part, on our ability to respond to and keep pace with new technological advances and emerging banking and consumer trends and other financial services industry standards and practices in a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction processing systems to customer requirements or improve market standards. Our information technology systems are subject to potential internal and external weaknesses, disruptions and failures such as damage or incapacitation by human error, natural disasters, electrical or telecommunication outages, nation/ region-wide

interruptions in the infrastructure, sabotage, computer viruses, hacking, cyber-attacks or similar events, or loss of support services from other third parties, or failures to timely upgrade our information technology systems.

5. ***Any failure to attract and retain qualified associates who meet the training requirements of our clients may adversely affect our business prospects, reputation and future financial performance.***

We depend on our ability to attract qualified associates who possess the skills and experience necessary to meet the training requirements of our clients. We must continually evaluate our base of available qualified personnel to keep pace with changing client needs. Competition for individuals with proven professional skills is intense, and demand for these individuals is expected to remain strong for the foreseeable future. Intense competition may limit our ability to attract and retain the qualified personnel necessary for us to meet our clients' training needs. There can be no assurance that qualified personnel will continue to be available in sufficient numbers and on terms of employment / association acceptable to us.

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of our customers. Disassociation of major customers can adversely affect the business of our

Company. The loss of or interruption of work by a significant customer or several significant customers or the inability to receive new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

- 11. Our Promoters play a key role in our functioning, and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.**

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have, over the years, built relations with various customers and other people who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

- 12. Our failure to perform in accordance with the standards prescribed in work order of our client could result in loss of business or compensation payment.**

We received work orders from our clients. Majority of these work orders may require us to adhere and design customized training materials, as per their requirements. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations.

In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation to our clients on the terms set out in our contracts. Our working capital requirements may increase under certain conditions, where payment terms do not include advance payments or include delayed payments from customers. Additionally, our working capital requirements have increased in recent years due to the general growth of our business. All these factors may result, or have resulted, in increases in our working capital needs. The details of working capital requirements are as follows:

14. We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on the results of operations and financial conditions.

Our company's 100% of the revenue is not derived from India. We export to various countries and receive revenue in foreign currency from such operations. Any changes in value of currencies with respect to the rupee may cause fluctuations in our operating results expressed in rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our company to the extent of the cost of services sold in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

15. Our inability to effectively manage our growth and related issues could materially and adversely affect our business and impact our future financial performance.

During the past few years, we have experienced consistent growth in our business operations. This has occurred through organic growth. Our rapid growth exposes us to a wide range of risks including business risks, operational risks, fraud risks and regulatory and legal risks. If we are not successful in executing our growth strategy, we may not achieve our planned revenues, therefore negatively impacting future profitability. Our growth strategy may involve significant risks which may have a material adverse effect on our business due to unexpected or underestimated costs. The Company's ability to continue to grow consistently will depend on a number of factors beyond its control, including the level of competition for opportunities for inorganic growth and our ability to successfully manage our organic growth.

16. Clients may delay or default in making payments for services which could affect the cash-flows and liquidity of the Company.

Cash collection trends measured by days outstanding have a material impact on the cash receipts and, consequently, on our cash flows. In general, an increase in bad debts or aged debtors leads to greater usage of operating working capital and increased interest costs. Trade receivables constitute a significant portion of our assets and are, therefore, a major business investment. Successful control of the trade receivables process demands the development of appropriate contracting, invoicing, credit, collection and financing policies. Our failure to maintain such policies could have a negative effect on its business, financial condition and results.

17. There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies.

We have at several instances, delayed in filing our GST and TDS returns either due to oversight or due to timely non-availability of populated data in the portal because of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes. Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Due to delayed filing of GST returns there have been instances of cancellation of GST return which have now been restored.

In respect of non-compliances related to ROC forms, for instance, our company has, from time-to-time borrowed vehicle loans, but has failed to register charge in relation to same. However, all the loans on the date of this Red Herring Prospectus, have been repaid and requisite NOC from the lender have been obtained. Further, there have been certain typographic / clerical errors in the forms filed with RoC. For instance, In form 2 filed for allotment of 990000 equity shares during financial year 2011-2012, Board Resolution for said allotment has not been attached and In MGT-7 for F.Y. 2014-15, the category of directors have been selected as Non-executive whereas in the appointment form they are selected as executive. The errors being typographic / clerical in nature, forms cannot be corrected.

Although no-show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

18. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Our Company is required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals. Further pursuant to change of name of the Company upon conversion from Private Limited to Public Limited, we further need to get our licenses updated. Also, we have applied for approvals which are necessary for furtherance of our objects. Failure by our Company to renew, alter, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. For details, please refer to chapter titled "Government Approvals" beginning on page 169 of this Red Herring Prospectus

22. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market for our industry is competitive on account of both the organized and unorganized players. Players in this industry generally compete on key attributes such as timely delivery, pricing, the quality etc. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in a changing market scenario and remain competitive. Moreover, the unorganized sector offers their services at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins, which may adversely affect our business operations and our financial condition.

23. *Our company has availed a credit facility from bank, and it is subject to certain restrictive covenants. Any Delay in issuing No Objection Certificate for the proposed issue may delay our proposed Initial public offering.*

In an event, Lender's delay in granting their NOC, it will delay our proposed Initial public offering which may delay our Schedule of Implementations and consequently impact our functioning to that extent.

24. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our registered office, from where we operate, is not insured. However, in the opinion of board, we are not prone to risks associated with our several businesses, such as loss or damage by fire, theft and robbery considering nature of our business. We believe we have got our assets and employees adequately insured; however, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time, to cover all material losses. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected.

25. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Although Lease Deed for the branch office premise of the Company situated at Sai Prithvi Cyber Arcade, Office Space on First Floor, House No 2-52/2/5/5&6, Plot Nos 21, 22, 23, Guttala Begumpet Village, Serilingampally Municipality, Ranga Reddy District (Presently Greater Hyderabad Municipal Corporation) Hyderabad, India is duly notarized, the same is not registered. Further, the said agreement does not contain clear tenure of the lease period. In case of any dispute, such inadequately stamped agreement may not be admissible as evidence in court, and parties to that agreement may not be able to legally enforce the same. Any potential dispute due to non-compliance of local laws relating to registration may adversely impact the operations and profitability of our Company.

Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

27. Our revenues and profitability vary across our business verticals, thereby making our future financial results less predictable.

Our revenues and profitability vary across our verticals. Our results of operations may fluctuate in the future depending on a number of factors, including but not limited to:

- Our ability to increase and/or maintain the proportion of our high-margin business verticals compared to the proportion of our relatively thin margin verticals.
- entering into new contracts and contract renewals, and the selection process and timing for performing these contracts that are subject to contingencies beyond our control;
- the size, complexity, timing of revenue recognition, pricing terms and profitability of significant contracts;
- changes in our pricing policies or those of our competitors;
- financial condition or business prospects of our clients;
- unanticipated variations in the duration, size and scope of our contracts;
- seasonal changes that may affect the demand for our services, the mix of services or the relative proportion of services revenue from our various business segments within a reporting period; and
- Unanticipated cancellations or contract terminations.

As a result of these factors, our results of operations and cash flows may fluctuate from financial reporting period to period. A significant proportion of our operating expenses, particularly full time employee expenses, are fixed. As such, unanticipated variations in key contracts may result in variations in our results of operations in any particular financial period.

28. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter Group will collectively own 73.50% of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

29. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 31. *Within the parameters mentioned in the chapter titled “Objects of this Issue” of this Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

We intend to use a substantial portion of the Net Issue Proceeds to meet the working capital requirement. We intend to deploy the Net Issue Proceeds in the financial year 2023-24 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc.,

For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” beginning on Page No. 68 of this Red Herring Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” beginning on Page No. 68 of this Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

- 32. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.***

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled “Object of the Issue” beginning on Page No. 68 of this Red Herring Prospectus.

- 33. *Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.***

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer chapter titled “Objects of the Issue” beginning on Page No. 68 of this Red Herring Prospectus.

- 34. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

35. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders' investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

36. *Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

37. *The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.*

Our Promoter's average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)*
1.	Vikrant Shivajirao Patil	3430000	2.89
2.	Vinaya Vikrant Patil	5100000	0.02

*The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire and Shares allotted to them as reduced by amount received on sell of shares i.e. net of sale consideration is divided by net quantity of shares acquired.

38. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also have to comply with the provisions of the listing agreement to be signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. The failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

EXTERNAL RISK FACTORS

39. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant

volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations. In case where such situations arise in future, it may affect our financial operations.

40. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed Sunflower Broking Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

41. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and traded on stock exchange. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

42. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure

or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

43. *We are subject to risks arising from interest rate fluctuations, which could adversely impact on our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

44. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and their implications have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

45. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI, or any other government agency, can be obtained on any particular terms or at all.

46. *Global economic, geopolitical, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic, geopolitical and political factors that are beyond our control influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

47. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquakes, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

48. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

The Covid-19 pandemic had brought the world to a standstill, affecting all sectors and the livelihood of many are at stake including the Indian economy. However, our Country has achieved normalcy by various measures taken by the Government. Further, our Country in the past has experienced natural calamities such as earthquakes, tsunami, floods etc. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

49. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may

adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. GLOBAL OUTLOOK

Global growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income—only three years after emerging from the pandemic-induced recession of 2020. Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it, including across major advanced economies (figure 1.1.A). Although this tightening has been necessary for price stability, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. This drag is set to deepen given the lags between changes in monetary policy and its economic impacts, and the fact that real rates are expected to continue to increase.

Asset prices have been in broad, synchronous decline, investment growth has weakened substantially, and housing markets in many countries are worsening rapidly. Shockwaves continue to emanate from the Russian Federation’s invasion of Ukraine, especially in energy and other commodity markets. Against this backdrop, confidence has fallen precipitously. The world’s three major engines of growth—the United States, the euro area, and China—are undergoing a period of pronounced weakness, with adverse spillovers for emerging market and developing economies (EMDEs), many of which are already struggling with weakening domestic conditions.

Global inflation has been pushed higher by demand pressures, including those from the lagged effects of earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. In some countries, inflation has also been spurred by large currency depreciations relative to the U.S. dollar, as well as tight labor market conditions.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies. Although inflation is likely to gradually moderate over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. In response, central banks around the world have been tightening policy faster than previously expected. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers (figure 1.1.B).

Fiscal space has narrowed considerably, and concerns over debt sustainability in many countries have risen as global financial conditions have made it more difficult to service debt loads that have accumulated rapidly in recent years, particularly during the pandemic. Nonetheless, many governments have announced new support measures to shield households and firms from the effects of sharply rising prices, slowing the pace of fiscal consolidation as pandemic-related stimulus is withdrawn.

Most commodity prices have eased, to varying degrees, largely due to the slowdown in global growth and concerns about the possibility of a global recession. By historical standards, however, they remain elevated, prolonging challenges associated with energy and food insecurity. Crude oil prices have steadily declined from their mid-2022 peak; meanwhile, natural gas prices in Europe soared to an all-time high in August but have since fallen back toward pre-invasion levels. Non-energy prices, particularly metal prices, have declined alongside weak demand. While food prices have eased from earlier peaks, food price inflation remains very high in some EMDEs.

Against this backdrop, global growth is forecast to slow to 1.7 percent in 2023 (figure 1.1.C). This pace of growth would be the third weakest in nearly three decades, overshadowed only by the global recessions caused by the pandemic in 2020 and the global financial crisis in 2009. This forecast is 1.3 percentage points lower than in June, largely reflecting more aggressive monetary policy tightening, deteriorating financial conditions, and declining confidence. Growth projections have been downgraded for almost all advanced economies and about two-thirds of EMDEs in 2023, and for about half of all countries in 2024 (figure 1.1.D). Global trade is also expected to slow sharply alongside global growth, despite support from a continued recovery in services trade. Downgrades to growth projections mean that global activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon, with EMDEs accounting for most of the shortfall from trend (figure 1.1.E). This suggests that the negative shocks of the past three years—namely the pandemic, the invasion

of Ukraine, and the rapid increase in inflation and associated tightening of monetary policy worldwide—are having a lasting impact on economic prospects.

In advanced economies, conditions have deteriorated sharply, owing to declining confidence alongside high inflation and rapid monetary policy tightening. In the United States, one of the most aggressive monetary policy tightening cycles in recent history is expected to slow growth sharply. The euro area is also contending with severe energy supply disruptions and price hikes associated with the Russian Federation’s invasion of Ukraine. In all, growth in advanced economies is forecast to slow from 2.5 percent in 2022 to 0.5 percent in 2023.

In EMDEs, growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent. The downward revision results in large part from weaker external demand and tighter financing conditions. EMDE growth is anticipated to remain essentially unchanged in 2023 relative to last year, as a pickup in China offsets a decline in other EMDEs. Excluding China, EMDE growth is forecast to decelerate from 3.8 percent in 2022 to 2.7 percent in 2023 as significantly weaker external demand is compounded by high inflation, tighter financial conditions, and other domestic headwinds. The deviation between EMDE investment and its pre-pandemic trend is expected to remain substantial. EMDE investment growth is envisaged to remain below its 2000-21 average pace, dampened significantly by weakening activity, heightened uncertainty, and rising borrowing costs. Low-income countries (LICs) are expected to grow 5.1 percent in 2023, with forecasts downgraded in about 65 percent of countries. Cost-of-living increases and a deterioration in the external environment are weighing heavily on activity in many LICs and compounding weakness in LICs with fragile and conflict affected situations (FCS).

As a result of the sharp slowdown in global growth, per capita income is not expected to surpass 2019 levels until at least 2024 in about one-third of EMDEs. Per capita income growth is expected to be slowest where poverty is highest (figure 1.1.F). In Sub-Saharan Africa—which accounts for about 60 percent of the world’s poor - growth in per capita income over 2023-24 is forecast to average only 1.2 percent, far less than the pace that would be needed over the remainder of the decade to reach a 3 percent poverty rate by 2030.

FIGURE 1.1 Global prospects

High global inflation has prompted rapid, synchronous monetary tightening. This has contributed to worsening financial conditions, particularly for less creditworthy emerging market and developing economies (EMDEs). Global growth in 2023 is expected to be the third weakest in nearly three decades, overshadowed only by global recessions. Most country forecasts have been downgraded. The recovery from the pandemic recession is far from complete, especially in EMDEs, and the per-capita income outlook is particularly subdued for poverty-stricken countries.

Poverty data are the poverty headcount ratio at \$2.15 a day (2017 PPP).

Global Trade

Global trade growth decelerated in the second half of 2022, in tandem with deteriorating activity in major economies. Weakening trade mirrored the slowdown in global industrial production, as demand shifted toward its pre-pandemic composition and away from goods. Despite this moderation, goods trade surpassed pre-pandemic levels last year; meanwhile, services trade continued to recover, supported by the gradual shift in demand toward services. Tourism flows rebounded as many countries eased travel restrictions but remained well below pre-pandemic levels and uneven across regions (WTO 2022).

Global Inflation

Inflation rose throughout 2022 in almost all economies. Median global headline inflation exceeded 9 percent in the second half of the year, its highest level since 1995. Inflation reached almost 10 percent in EMDEs, its highest level since 2008,

and in advanced economies just over 9 percent, the highest since 1982. Inflation was above target in virtually all countries that have adopted inflation targeting.

Soaring inflation in 2022 reflected a combination of demand and supply factors (Ha, Kose, and Ohnsorge 2022; Shapiro 2022). On the demand side, the acceleration of growth during the initial rebound from the 2020 global recession, as well as the lagged effects of earlier macroeconomic support, contributed to persistent price pressures. Price increases were particularly large in sectors such as shipping and air travel, where compositional shifts in demand encountered ongoing capacity constraints and supply chain disruptions (Kalemli-Özcan et al. 2022). On the supply side, shortages of key commodities, exacerbated by Russia's invasion of Ukraine, contributed substantially to higher energy and food prices. In some countries, tight conditions and mismatches in labor markets further added to rising wages and higher input and production costs. Finally, many countries experienced large currency depreciations that passed through into higher import, producer, and consumer prices. The higher share of food in consumer spending has caused inflation to accelerate more in low-income countries compared to other EMDEs.

INDIAN ECONOMY

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalized public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localized lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimizing the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

India's Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India's underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

Source: Various Agencies

Note: ADB stands for Asian Development Bank, IMF is International Monetary Fund

India's economic resilience can be seen in the domestic stimulus to growth seamlessly replacing the external stimuli. The growth of exports may have moderated in the second half of FY23. However, their surge in FY22 and the first half of FY23 induced a shift in the gears of the production processes from mild acceleration to cruise mode. Manufacturing and investment activities consequently gained traction. By the time the growth of exports moderated, the rebound in domestic consumption had sufficiently matured to take forward the growth of India's economy. Private Consumption as a percentage of GDP stood at 58.4 per cent in Q2 of FY23, the highest among the second quarters of all the years since 2013-14,

supported by a rebound in contact-intensive services such as trade, hotel and transport, which registered sequential growth of 16 per cent in real terms in Q2 of FY23 compared to the previous quarter.

Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November 2022, as indicated by Motilal Oswal's Economic Activity Index. The index estimates that private consumption grew at a five-month high pace of 5.6 per cent YoY, driven by auto sales and broad-based expansion of services.

Manpower Industry

The global staffing services market is believed to have crossed the \$500-billion mark in 2022 after staying put at around \$490 billion for three straight years, barring the first year under the pandemic when it had shrunk by a tenth. Still, it remains a highly fragmented market.

There are around 162,000 companies operating across 41 countries, as per the World Employment Confederation Report 2021, and the top three companies accounted for only 14.3% of the total market. This highlights the fragmented nature of the competitive landscape.

Quick Highlights

- The global staffing services market is believed to have crossed the \$500-billion mark in 2022 after staying put around \$490 billion for three straight years.
- India accounted for 4.3% of the global staffing services market in 2020 in revenue terms.
- In terms of volumes Indian market is the sixth largest in the world and accounts for 5.8% of the total global market and has the potential to grow exponentially in the long term.
- In terms of revenue, temporary staffing accounted for over four-fifth of the total.
- As per the Indian Staffing Federation, the total number of temporary workers in India reached 3.3 million in 2018 from 2.1 million in 2014, recording a CAGR of 16.1%.

- The General Staffing segment is forecast to more than double to almost Rs 2 trillion by the year ending March 2026, as per Frost & Sullivan.

India Staffing Market Dynamics

The size of the HR services market in FY2021 was estimated at Rs 1.45 trillion. The market recorded strong growth in the past five years, expanding at a CAGR of 13.1% between FY2016 and FY2020, though this was punctuated by a marginal 4% growth in FY2021, according to Frost & Sullivan.

India accounted for 4.3% of the global staffing services market in 2020 in revenue terms. Although this value seems insignificant, in terms of volumes Indian market is the sixth largest in the world and accounts for 5.8% of the total global market and has the potential to grow exponentially in the long term.

If we look at the structure of the market, it is segmented into temporary staffing, permanent staffing, and other HR services such as payroll, time and attendance and recruitment process outsourcing. Temporary staffing is by far the largest segment and is further divided into general staffing, IT staffing and professional staffing.

INDIAN HR SERVICES MARKET REVENUE (RS CR)

In terms of revenue, temporary staffing accounted for over four-fifth of the total.

As per the Indian Staffing Federation, the total number of temporary workers in India reached 3.3 million in 2018 from 2.1 million in 2014, recording a CAGR of 16.1%.

General staffing was the largest segment (in volume terms), accounting for around half of the total, followed by IT staffing at 25% of the market in FY2021. In terms of revenue, general staffing dominates even more, accounting for around three-fourths of the total Rs 1.18 trillion in FY21, according to Frost & Sullivan.

Temporary general staffing in India is a fairly nascent industry when compared to developed markets like the United States, Japan, France and Germany. However, in the last five years, this segment has evolved into a strong contributor to the country's economy.

The general staffing services segment includes temporary staff placed in sectors like e-commerce, retail, telecom, financial services, healthcare, hospitality and manufacturing segments. This includes both blue- and grey-collar workers. The segment is forecast to more than double to almost Rs 2 trillion by the year ending March 2026, as per Frost & Sullivan.

IT staffing involves providing skilled IT professionals, on contract, by staffing companies to end-user companies for a defined duration. Based on a contractual agreement, staffing agencies screen, hire and deploy IT professionals to the customer's site. The contracts are either time-based or project-based where the salaries and other benefits of professional flexi-staff are met by the staffing company.

This was estimated to be Rs 21,750 crore business in FY21, having grown at a CAGR of 17.8% from FY2016 – FY 2020, which dipped to 5.4% during the first year under the pandemic. This is expected to grow at a CAGR of 20.2% to reach Rs 54,600 crore by FY26.

The third pillar of the temporary staffing business is professional staffing services, which was worth Rs 5,800 crore in FY21. It is projected to grow at CAGR of 12.6% to almost double by FY26.

2. Use of Estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management’s best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods

3. Basis of Consolidation

The assets, liabilities, costs and revenues of the individual consolidated companies are fully consolidated on a line-by-line basis, regardless of the percentage owned, while the carrying value of consolidated investments held by the Holding Company and other consolidated companies is eliminated against the related share of equity.

All intercompany balances and transactions, including unrealised profits deriving from transactions between consolidated companies, are eliminated. Unrealised losses are eliminated, unless it is likely that they will be recovered in the future.

4. Property, Plant and Equipment

Property, Plant and Equipment are stated at cost less accumulated depreciation. Cost comprises of all expenses incurred to bring the assets to its present location and condition. Borrowing cost directly attributable to the acquisition /construction are included in the cost of fixed assets. Adjustments arising from exchange rate variations attributable to the fixed assets are capitalized.

In case of new projects / expansion of existing projects, expenditure incurred during construction / preoperative period including interest and finance charge on specific / general purpose loans, prior to commencement of commercial production are capitalized. The same are allocated to the respective t on completion of construction / erection of the capital project / fixed assets.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future economic benefits from the existing asset beyond its previously assessed standard of performance.

Capital assets (including expenditure incurred during the construction period) under erection / installation are stated in the Balance Sheet as "Capital Work in Progress."

5. Impairment of Assets

At each balance sheet date, the Company reviews the carrying amount of its fixed assets to determine whether there is any indication that those assets suffered an impairment loss. If any such indication exists, the recoverable amount of the assets is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the assets and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the assets.

6. Depreciation

All fixed assets, except capital work in progress, are depreciated on WDV Method. Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013. All Fixed Assets individually costing Rs. 5,000 or less are fully depreciated in the year of installation/purchase. Depreciation on additions to / deletions from fixed assets made during the period is provided on pro-rata basis from / up to the date of such addition /deletion as the case may be.

7. Investments

Investments are classified into current investments and non-current investments. Current investments i.e., investments that are readily realizable and intended to be held for not more than a year valued at cost. Any permanent reduction in the carrying amount or any reversals of such, reductions are charged or credited to the Statement of Profit & loss Account.

The Company's contributions to provident fund are considered as defined contribution plan and are charged as an expense as they fall due based on the amount of contribution required to be made when the services are rendered by the employees.

Defined Benefits Plan:

For defined benefit plans in the form of gratuity, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in the Profit and Loss Account in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested while otherwise, it is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for un-recognised past service cost, as reduced by the fair value of plan assets.

Short term Employee benefits:

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service. The cost of such compensated absences is accounted as under:

- in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- in case of non-accumulating compensated absences, when the absences occur.

Share based payment:

The Employee Stock Option Plan (ESOPs) of the Company are in accordance with Companies act, 2013. The Plan provide for grant of options on equity shares to employees of the Company to acquire the equity shares of the Company that vest in a cliff vesting or in a graded manner and that are to be exercised within a specified period.

In accordance with the Guidance Note on Accounting for Employee Share-based Payments, issued by The Institute of Chartered Accountants of India, the cost of equity-settled transactions is measured using the Fair value method. The Fair value of ESOP is amortised on a straight-line basis over the vesting period of the option as employee compensation cost. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the number of equity instruments that are outstanding and expected to vest.

The options that do not vest because of failure to satisfy vesting condition are reversed by a credit to employee compensation expense, equal to the amortised portion of value of lapsed portion. In respect of the options which expire unexercised the balance standing to the credit of Employee's Stock Option (Grant) Outstanding accounts is transferred to Profit & Loss Account.

Ms. Vinaya Vikrant Patil (Promoter cum Whole Time Director)

Arjun Kondiba Sawant (Petitioner) V/s. Vinaya Vikrant Patil (Respondents) (Registration no. WP/430/2020 Dated January 15, 2020 Pending with Honorable High Court of Bombay)

This writ petition challenges an order passed by the trial court (Fourth Joint Civil Judge, Junior Division, Satara) on an application made under Order 26 Rule 9 of the Code of Civil Procedure 1908 (“Code”) for appointment of a Court Commissioner for local investigation (the impugned order). The impugned order was passed on a miscellaneous application made by the Respondent herein who was the original plaintiff before the trial court.

The case was that a larger property owned by two brothers Arjun and Bajirao was originally partitioned between them. The plaintiff was the subsequent purchaser of Bajirao’s Share from one Mr. Pankaj. The Plaintiff’s suit is for demarcation of her land inter alia on the footing that the defendants in the original matter, encroached upon the land purchased by the plaintiff from Mr. Pankaj.

The defendants in the original suit are contesting the suit claiming reliance upon a declaration that there was no partition of property between Arjun and Bajirao. The defendants have sought a decree of partition in their suit.

The contest between the parties being of the partition of the larger property between Mr. Arjun and Mr. Bajirao and that the defendant herein was in independent and settled possession of Bajirao’s share in it and hence the present suit has been filed praying cancellation of the appointment of the local commissioner as the same is contradictory to the law and the same has been allowed and the suit is at the state of pre- admission on the date of reporting in this document.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from

the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 196.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
