Creating value through R&D...

Proven capability in ‘process development to commercialization’

- Wide range of field of research - from nano technology to new-age processes and product development
- Developed indigenous technology for production of HFC 134a
- Holds process patent for HFC-32 by the US Patent & Trademark Office
- Filed 12 patents for different processes...many more in pipeline

Technology driven company...

R&D, an integral component of business strategy

- dedicated R&D centres for core businesses
- equipped with state-of-the-art equipment
- a pool of qualified & experienced scientists and engineers (drawn from India's premier academic institutes)
- collaborating with a number of global innovators
- engaged in developing cutting edge technologies

Building capabilities...

Built around people, processes and systems

- Creating the right environment – well-being, fun, excitement
- Overall development – challenging assignments, focus on competency building and domain expertise
- Unleashing potential – Learning, Education & Training

... TQM - the SRF way

Businesses united through a common management system

Our work ethos - **'People satisfy customers efficiently'**

- Build Quality into the process
- Focus on 'continuous improvement'
- People participation through systematic approaches
- Robust planning and execution

Invested Rs. 1250 cr in last 4 years

2007

2nd Compounding Unit plant (Pantnagar) - EPB

2008

15 MW Wind Power Farm - TTB

2009

Polyester Industrial Yarn - TTB

2009

2nd line of BOPET Film - PFB

2010

PET Polymerisation Plant - PFB

2010

Laminated Fabric Project - TTB

We always find a better way

Ongoing projects - Rs. 1500 cr

At Dahej Chemical Complex in Gujarat

- Second HFC-134a plant
- Flexible Multipurpose Plant
- Multipurpose Chemical Plant
- Intermediate Speciality Plant and
- Captive Power Plant

At Gummidipoondi in Tamil Nadu

- Capacity Enhancement of Coated Fabrics

Three new overseas units

- Greenfield unit to manufacture BOPP films – **South Africa**
- Joint Venture to manufacture BOPET films (project to be reviewed by Board) – **Bangladesh**
- Setting up a BOPET Film Line and a Metalizer Project - **Thailand**

Leading the way...

- The only tyre cord company outside Japan to have won the prestigious **Deming Application Prize**
- The first to introduce Spin Draw and Converter Dipping in tyre cord business in India
- The only company in India to have ventured into manufacturing **Polyester Industrial Yarn/ Fabric** for radial tyres
- The only company in India to have developed technology to manufacture **HFC-134a**, a new generation refrigerant
- The first in India to commercially launch **8μ Polyester film**
- The first in India to start **polymer compounding**
- The first company in India to give stock options to all its employees including non management staff

We always find a better way

Business benchmarks - snapshots

TTB

- Pioneered replacement of rayon with Nylon 6 tyre cord
- Pioneered replacement of cotton with Nylon 6 in bicycles
- Entire range of textile reinforcement

CB

- The only Indian manufacturer of HFC 134a
- Leading exporter of refrigerants from India
- Partnering with leading international agro & pharma Cos.

PFB

- Facilities for metallization and holography
- Caters to the leading FMCG companies of India

EPB

- More than 150 grades of engineering plastics

Awards & recognitions

2005

Responsible Care Logo

2006

Greentech Safety Platinum Award

2007

Greentech Environment Excellence Platinum Award

2009

ILO Recognition for creating awareness on HIV / AIDS

2011

NRM project chosen by a consortium of Netherland based Civil Society Organizations as a unique model of Business-NGO partnership

Deming Application Prize

2004 – Tyre Cord Business
