SUMMARY OF OUR INDUSTRY

TEXTILE INDUSTRY

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

FMCG INDUSTRY IN INDIA

The FMCG sector in India expanded due to consumer-driven growth and higher product prices, especially for essential goods. FMCG sector provides employment to around 3 million people accounting for approximately 5% of the total factory employment in India. FMCG sales in the country grew 7-9% by revenues in 2022-23. The key growth drivers for the sector include favourable Government initiatives & policies, a growing rural market and youth population, new branded products, and growth of e-commerce platforms. Resilience needs to be the key factor in the manufacturing process, daily operations, retail and logistic channels, consumer insights and communication that will help FMCG companies to withstand the test of time and create more value for consumers in the long run. India's fast-moving consumer goods (FMCG) sector grew 7.5% by volumes in the April-June 2023 quarter, the highest in the last eight quarters, led by a revival in rural India and higher growth in modern trade.

Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle class population which is larger than the total population of USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

EXTERNAL RISK FACTORS

56. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

58. Our business is dependent on economic growth in India.

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009, Several parts of the country experienced below average rainfall, leading to reduced farm output which impaired economic growth. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

59. The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public

facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy.

60. Global economic downturn and adverse market conditions could cause our business to suffer. A slowdown in economic growth in India could cause our business to suffer.

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. Our performance and growth is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact our results of operations, and consequently the price of our Equity Shares.

61. Any downgrading of India's debt rating by an independent agency may harm our ability to raise debt financing.

In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

For further details please refer to the chapter "Government and Other Approvals" beginning on page 198 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. WORLD ECONOMIC OUTLOOK - GLOBAL PROSPECTS AND POLICIES

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia's invasion of Ukraine—manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks' generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure (Figure 1.1). Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist (see also Chapter 1 of the April 2023 *Global Financial Stability Report*).

Figure 1.1. Broad Equity and Bank Equity Indices for Selected Major Economies
(Index; January 1, 2023 = 100)

Sources: Bloomberg Finance L.P.; and IMF staff calculations.
 Note: Latest data available are for March 28, 2023.

Prior to recent financial sector ructions, activity in the world economy had shown nascent signs of stabilizing in early 2023 after the adverse shocks of last year (Figure 1.2, panels 1 and 2). Russia's invasion of Ukraine and the ongoing war caused severe commodity and energy price shocks and trade disruptions, provoking the beginning of a significant reorientation and adjustment across many economies. More contagious COVID-19 strains emerged and spread widely. Outbreaks particularly affected activity in economies in which populations had lower levels of immunity and in which strict lockdowns were implemented, such as in China. Although these developments imperiled the recovery, activity in many economies turned out better than expected in the second half of 2022, typically reflecting stronger-than-anticipated domestic conditions. Labor markets in advanced economies—most notably, the United States—have stayed very strong, with unemployment rates historically low. Even so, confidence remains depressed across all regions compared with where it was at the beginning of 2022, before Russia invaded Ukraine and the resurgence of COVID-19 in the second quarter (Figure 1.2, panel 3).

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks' tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geoeconomic fragmentation with Russia's war in Ukraine, and China's economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing—particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability.

Inflation Is Declining with Rapid Rate Rises but Remains Elevated amid Financial Sector Stress

Global headline inflation has been declining since mid-2022 at a three-month seasonally adjusted annualized rate (Figure 1.3). A fall in fuel and energy commodity prices, particularly for the United States, euro area, and Latin America, has contributed to this decline (see Figure 1.SF.1). To dampen demand and reduce underlying (core) inflation, the lion's share of central banks around the world have been raising interest rates since 2021, both at a faster pace and in a more synchronous manner than in the previous global monetary tightening episode just before the global financial crisis (Figure 1.4). This more restrictive monetary policy has started to show up in a slowdown in new home construction in many countries (see Box 1.1). Inflation excluding volatile food and energy prices has been declining at a three-month rate—although at a slower pace than headline

their varying exposure to underlying shocks. For example, headline inflation is running at nearly 7 percent (year over year) in the euro area—with some member states seeing rates near 15 percent—and above 10 percent in the United Kingdom, leaving household budgets stretched. The effects of earlier cost shocks and historically tight labor markets are also translating into more persistent underlying price pressures and stickier inflation. The labor market tightness in part reflects a slow post-pandemic recovery in labor supply, with, in particular, fewer older workers participating in the labor force (Duval and others 2022). The ratios of job openings to the number of people unemployed in the United States and the euro area at the end of 2022 were at their highest levels in decades (Figure 1.5). At the same time, the cost pressures from wages have so far remained contained despite the tightness of labor markets, with no signs of a wage-price spiral dynamic—in which both wages and prices accelerate in tandem for a sustained period—taking hold. In fact, real wage growth in advanced economies has been lower than it was at the end of 2021, unlike what took place in most of the earlier historical episodes with circumstances similar to those prevailing in 2021, when prices were accelerating and real wage growth was declining, on average (Figure 1.6).

Inflation expectations have so far remained anchored, with professional forecasters maintaining their five-year-ahead projected inflation rates near their pre-pandemic levels (Figure 1.7). To ensure this remains the case, major

The shaded band depicts the 25th to the 75th percentiles of the cross-economy distribution of the indicated inflation measure. The 35 economies in the sample for the figure account for about 81 percent of 2022 world output. CPI = consumer price index; SAAR = seasonally adjusted annualized rate.

Curves that are farther out from the origin may indicate greater labor market frictions. Labor markets are tight when the unemployment rate is low and the job openings rate is high.

will stay higher for longer than previously expected to address sticky inflation. As of early 2023, however, financial markets anticipated that less policy tightening would be needed than central banks suggested, leading to a divergence that raised the risks for a significant market repricing. This is most clearly evident in the case of the United States (Figure 1.8, blue versus dashed black lines). A repricing materialized in early March, with the market-implied policy path shifting up to close much of the gap with the Federal Reserve's announced expected policy path as markets responded to news about inflation (Figure 1.8, green line). But recent financial sector turbulence and the associated tightening of credit conditions have pushed the market-implied policy rate path back down, reopening the gap in the United States (Figure 1.8, red line). This may reflect in part the emergence of liquidity and safety premiums in response to financial market volatility rather than pure policy expectations. Nevertheless, the risks to financial markets from sudden repricing due to policy rate expectation changes—also highlighted in the January 2023 *World Economic Outlook (WEO) Update*—remain highly relevant (see also Chapter 1 of the April 2023 *Global Financial Stability Report*).

INDIAN ECONOMIC OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to be come the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

- Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs.173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024. Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit.
- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Development

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of July 5, 2024, India's foreign exchange reserves stood at US\$ 657.15 billion.
- In May 2024, India saw a total of US\$ 6.9 billion in PE-VC investments.
- Merchandise exports in June 2024 stood at US\$ 35.20 billion, with total merchandise exports of US\$ 109.96 billion during the period of April 2024 to June 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3 position in the global number of scientific publications.
- In June 2024, the gross Goods and Services Tax (GST) stood at highest monthly revenue collection at Rs. 1.74 lakh crore (US\$ 20.83 billion) vs Rs. 1.73 lakh crore (US\$ 20.71 billion).
- Between April 2000–March 2024, cumulative FDI equity inflows to India stood at US\$ 97 billion.
- In May 2024, the overall IIP (Index of Industrial Production) stood at 154.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 136.5, 149.7 and 229.3, respectively, in May 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.08% (Provisional) for June 2024.
- Foreign Institutional Investors (FII) inflows between April–July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January- (up to 15 July) 2024.
- The wheat procurement during Rabi Marketing Season (RMS) 2024-25 (till May) was estimated to be 266 lakh metric tonnes (LMT) and the rice procured in Kharif Marketing Season (KMS) 2024-25 was 400 LMT.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion)..
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.

- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.
- On October 7, 2022, the Department for Promotion of Industry, and Internal Trade (DPIIT) launched Credit Guarantee Scheme for Start-ups (CGSS) aiming to provide credit guarantees up to a specified limit by start-ups, facilitated by Scheduled Commercial Banks, Non-Banking Financial Companies and Securities and Exchange Board of India (SEBI) registered Alternative Investment Funds (AIFs).
- Telecom Technology Development Fund (TTDF) Scheme was launched in October 2022 by the Universal Service Obligation Fund (USOF), a body under the Department of Telecommunications. The objective is to fund R&D in rural-specific communication technology applications and form synergies among academia, start-ups, research institutes, and the industry to build and develop the telecom ecosystem.

TEXTILE INDUSTRY

INTRODUCTION

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

MARKET SIZE

The market for Indian textiles and apparel is projected to grow at a 10% CAGR to reach US\$ 350 billion by 2030. Moreover, India is the world's 3rd largest exporter of Textiles and Apparel. India ranks among the top five global exporters in several textile categories, with exports expected to reach US\$100 billion.

The textiles and apparel industry contributes 2.3% to the country's GDP, 13% to industrial production and 12% to exports. The textile industry in India is predicted to double its contribution to the GDP, rising from 2.3% to approximately 5% by the end of this decade.

Textile manufacturing in India has been steadily recovering amid the pandemic. The Manufacturing of Textiles Index for the month of April 2024 is 105.9.

Global apparel market is expected to grow at a CAGR of around 8% to reach US\$ 2.37 trillion by 2030 and the Global Textile & Apparel trade is expected to grow at a CAGR of 4% to reach US\$ 1.2 trillion by 2030.

The Indian Technical Textile market has a huge potential of a 10% growth rate, increased penetration level of 9-10% and is the 5th largest technical textiles market in the world. India's sportech industry is estimated around US\$ 1.17 million in 2022-23.

The Indian Medical Textiles market for drapes and gowns is around US\$ 9.71 million in 2022 and is expected to grow at 15% to reach US\$ 22.45 million by 2027.

The Indian composites market is expected to reach an estimated value of US\$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027.

India is the world's largest producer of cotton. In the first advances, the agriculture ministry projected cotton output for 2023-24 at 31.6 million bales. The government is supporting the sector through funding and machinery sponsoring.

Top players in the sector are achieving sustainability in their products by manufacturing textiles that use natural recyclable materials.

FMCG INDUSTRY IN INDIA

INTRODUCTION

The FMCG sector in India expanded due to consumer-driven growth and higher product prices, especially for essential goods. FMCG sector provides employment to around 3 million people accounting for approximately 5% of the total factory employment in India. FMCG sales in the country grew 7-9% by revenues in 2022-23. The key growth drivers for the sector include favourable Government initiatives & policies, a growing rural market and youth population, new branded products, and growth of e-commerce platforms. Resilience needs to be the key factor in the manufacturing process, daily operations, retail and logistic channels, consumer insights and communication that will help FMCG companies to withstand the test of time and create more value for consumers in the long run. India's fast-moving consumer goods (FMCG) sector grew 7.5% by volumes in the April-June 2023 quarter, the highest in the last eight quarters, led by a revival in rural India and higher growth in modern trade.

Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle class population which is larger than the total population of USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access and changing lifestyles have been the key growth drivers for the sector. The urban segment (accounts for a revenue share of around 65%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

Market Size

Total revenue of FMCG market is expected to grow at a CAGR of 27.9% through 2021-27, reaching nearly US\$ 615.87 billion. In 2022, urban segment contributed 65% whereas rural India contributed more than 35% to the overall annual FMCG sales. Good harvest, government spending expected to aid rural demand recovery in FY24. The sector had grown 8.5% in revenues and 2.5% in volumes last fiscal year. In the January-June period of 2022, the sector witnessed value growth of about 8.4% on account of price hikes due to inflationary pressures. In third quarter of FY23, the FMCG sector clocked a value growth of 9.0% YoY — lower than the 9.2% YoY value growth seen in third quarter of FY22.

Indian food processing market size reached US\$ 307.2 billion in 2022 and is expected to reach US\$ 470 billion by 2028, exhibiting a growth rate (CAGR) of 9.5% during 2023-2028..

Digital advertising grew to reach US\$ 9.92 billion by 2023, with the FMCG industry being the biggest contributor at 42% share of the total digital spend.

India includes 780 million internet users, where an average Indian person spends around 7.3 hours per day on their smartphone, one of the highest in the world. Number of active internet users in India will increase to 900 million by 2025 from 759 million in 2022. In 2022, India's consumer spending was US\$ 2,049.57 billion. Indian villages, which contribute more than 35% to overall annual FMCG sales, are crucial for overall revival of the sector. E-commerce now accounts for 17% of the overall FMCG consumption among evolved buyers, who are affluent and make average spends of about Rs. 5,620 (US\$ 677.11 million).

The Indian e-commerce market is anticipated to grow from US\$ 83 billion in 2022 to US\$ 185 billion in 2026. By 2030, it is expected to have an annual gross merchandise value of US\$ 350 billion. Fuelling e-commerce growth, India is expected to have over 907 million internet users by 2023, which accounts for ~64% of the total population of the country.

The India online grocery market size has been projected to grow from US\$ 4,540 million in 2022 to US\$ 76,761.0 million by 2032, at a CAGR of 32.7% through 2032.

FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as Revlon and Lotus took ~20 years to reach the Rs. 100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

Other Reports

Fast-moving consumer goods (FMCG) is the fourth-largest sector in the Indian economy. There are three main segments the sector food and beverages, which accounts for 19% of the sector; healthcare, which accounts for 31% of the share; and household and personal care, which accounts for the remaining 50% share. The urban segment contributes to about 65% of the revenue share, while the rural segment accounts for 35%. The rise in

rural consumption will drive the FMCG market. The Indian processed food market is projected to expand to US\$ 470 billion by 2025.

Final consumption expenditure increased at a CAGR of 8.8% during 2015-22.

The India online grocery market size was projected to grow from US\$ 4,540 million in 2022 to US\$ 76,761.0 million by 2032, at a CAGR of 32.7% through 2032. By 2030, it is expected to have an annual gross merchandise value of US\$ 350 billion.

The FMCG sector has received good investments and support from the Government in the recent past. Union Budget 2023-24 has allocated US\$ 976 million for PLI schemes that aims to reduce import costs, improve the cost competitiveness of domestically produced goods, increase domestic capacity, and promote exports. In 2021-22, the government approved the Production Linked Incentive Scheme for Food Processing Industry (PLISFPI) with an outlay of Rs. 10,900 crore (US\$ 1.4 billion) to help Indian brands of food products in the international markets.

In October 2022, Dabur acquired 51% stake in Badshah Masala Private Limited for Rs. 587.52 crore (US\$ 71.81 million) less proportionate debt as on the closing date, with the Badshah enterprise being valued at Rs 1,152 crore (US\$ 140.81 million).

The outlook of the FMCG sector looks on track with the pandemic easing out. Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. On the other hand, with the share of the unorganised market in the FMCG sector falling, the organised sector growth is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail. The FMCG market in India is expected to increase at a CAGR of 14.9% to reach US\$ 220 billion by 2025, from US\$ 110 billion in 2020.
