INTERNAL RISK FACTORS

Risks relating to our business

1. *Our business and results of operations are dependent on the contracts that we enter into with our customers. Any breach of the conditions under these contracts may adversely affect our business and results of operations.*

We have entered into contracts/ master service agreements with our customers which, depending on the customer, may contain terms and conditions which typically include:

- Delivery, Implementations and Payments
- Evaluation and Acceptance
- License
- Site Access
- Implementation
- Breach and Termination
- Force Majeure
- Confidentiality
- No Hire

In addition, our agreements with customers and other third parties include indemnification or other provisions under which we agree to indemnify or otherwise be liable to them for losses suffered or incurred as a result of claims of intellectual property infringement, or any default, breach or omission by us in relation to the agreements. The term of these contractual provisions often survives termination or expiration of the applicable agreement. Any dispute with a customer with respect to such obligations could have adverse effects on our relationship with that customer and other current and prospective customers, reduce demand for our products, damage our reputation and harm our business, results of operations and financial condition. While we internally consider all such factors prior to entering into these contracts, we cannot assure you that we will be able to continue to enter into similar such contracts in the future, which are not more onerous than the contracts we enter into currently. Additionally, non-compliance with the terms of our contracts, including breach of confidentiality provisions, may subject us to damages or penalties, lead to termination of the contracts and also result in us being unable to attract further business in the future.

2. *Failure to protect our intellectual property could harm our ability to compete effectively.*

We are highly dependent on our ability to protect our proprietary technology. We rely on a combination of copyright and trademark laws, as well as non-disclosure agreements and other contractual provisions to establish and maintain our proprietary rights. We intend to protect our intellectual property rights vigorously. However, there can be no assurance that these measures will be successful.

The laws protecting intellectual property rights vary and certain jurisdictions, including India, may provide less protection for our technologies and other intellectual property assets as compared to other jurisdictions, such as USA. Further, as intellectual property rights protection is limited by territory, successfully obtaining intellectual property rights protection in one jurisdiction may not necessarily provide protection in another jurisdiction and we may have to seek such protection in multiple jurisdictions where we and our customers operate. The process for obtaining intellectual property rights protection in certain jurisdictions can be lengthy and may entail substantial costs.

While we have obtained trademark registrations for certain of our brands, we have made applications for obtaining trademark registrations with respect certain of our brands. For further details, see “***Government and Other Approvals – Intellectual Property***” on page 244 of this Draft Prospectus. The protective steps that we take to protect our intellectual property rights, including registrations under trademark laws, confidentiality provisions and contractual arrangements, may be inadequate to deter misappropriation of our intellectual property. There can be no assurance that we will be able to

protect our intellectual property rights in the future, including by successfully maintaining or renewing our intellectual property registrations.

We may be unable to detect the unauthorised use of, or take appropriate steps to enforce, our intellectual property rights in India or abroad. Failure to protect our intellectual property and trademarks could harm our reputation and affect our ability to compete effectively. Further, defending our intellectual property rights may require significant financial and managerial resources, the expenditure of which may materially adversely affect our business, results of operations, financial condition and prospects.

Although the non-disclosure obligations under our employment contracts with certain of our employees extend beyond the term of the contract, we cannot assure protection of our know-how or other confidential or proprietary information once these agreements are terminated. The disclosure of such information about us and our products could have an adverse effect on our business, resulting operations, financial condition and prospects.

Further, even if we are successful in obtaining intellectual property rights registration in any jurisdiction, there is no certainty that our intellectual property rights will provide us with substantial protection or commercial benefit. Despite our efforts to protect our intellectual property, some of our innovations may not be protectable, and our intellectual property rights may offer insufficient protection from competition or unauthorized use, lapse or expire, be challenged, narrowed, invalidated, or misappropriated by third parties, or be deemed unenforceable or abandoned, which, could have a material adverse effect on our business, financial condition, results of operations and prospects and the legal remedies available to us may not adequately compensate us.

3. *We may be subject to intellectual property infringement claims by other companies which could materially increase costs and materially harm our ability to generate future revenues and profits.*

Claims of intellectual property infringement are becoming increasingly common as the software industry develops and as related legal protections, including copyrights and patents are applied to software products. Although we do not believe that our products infringe on the rights of third parties, and will continue to assert infringement claims against us in the future. Further, as we provide our products and services to several customers, there is a greater likelihood of such infringement claims in the future.

In the case of third party software, we believe this software is licensed from the entity holding the intellectual property rights. Although we believe that we have secured all necessary licences for all third party intellectual property that is integrated into our products, third parties may assert infringement claims against us in the future. Any such assertion or infringement claim, regardless of merit, may result in litigation and the court or regulatory authority may decide that the intellectual property right we seek to enforce is invalid or unenforceable, or may refuse to stop the other party from using the technology at issue on the grounds that the intellectual property asserted does not cover the technology in question. Due to the substantial investigation required in connection with intellectual property litigation, there is a risk that some of our confidential information could be disclosed or otherwise compromised during the litigation process.

In addition, as we continue to develop new software products and expand our portfolio using new technologies, our exposure to threats of infringement may increase. Likewise, any of the software services provided by us could also be subject to intellectual property infringement claims. Any infringement claim and related litigation could be time-consuming and may divert our management's efforts and attention from our Company's operations, disrupting our ability to generate revenues or pursue new market opportunities and may result in significantly increased costs as a result of us defending such claims or attempting to license the intellectual property rights or reworking our products to avoid infringing third party rights. Our Company may also incur additional fees and be required to pay severe penalties or damages for violating contractual terms, misuse or excessive use of our license to intellectual property rights, which could cause significant damage to our Company's reputation and brand image and adversely affect our business, financial condition and results of operation. Typically, our agreements with our channel partners and customers contain provisions which require us to indemnify them for damages sustained by them as a result of any infringement claims involving our products. Any of the foregoing infringement claims and related litigations could have a material adverse impact on our business and operating results as well as our ability to generate future revenues and profits.

4. *We face intense competition. If we are unable to compete effectively, the results of operations and prospects for our business could be harmed.*

We operate in an intensely competitive industry that experiences rapid technological developments, changes in industry standards, and changes in customer requirements. Our competitors include large IT consulting firms, captive divisions of large multinational technology firms, large Indian IT services firms, in-house IT departments of large corporations, in addition to numerous smaller local competitors in the various geographic markets in which we operate.

The technology services industry is experiencing rapid changes that are affecting the competitive landscape. We may face competition from companies that increase in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. These transactions may include consolidation activity among global technology majors, hardware manufacturers, software companies and vendors, and service providers. The result of any such vertical integration may be greater integration of products and services and a larger portfolio of services on offer, in each case, relative to what was previously offered by such independent vendors. Our access to such products and services may be reduced as a result of such an industry trend and we may otherwise become disadvantaged relative to our potentially more circumscribed service portfolio.

Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, lowering our gross margin percentage, and requiring us to recognise impairments on our assets.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to offer services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer.

We may face competition in countries where we currently operate, as well as in countries in which we expect to expand our operations and may have limited or no experience. We also expect additional competition from technology services firms with current operations in other country, such as UAE, Africa & Middle East, which have competitive cost structures. Many of our competitors have significantly greater financial, technical, and marketing resources, generate greater revenues, have more extensive existing client relationships and technology partners, and have greater international brand recognition than we do. We may be unable to compete successfully against these competitors, or may lose clients to these competitors. There is a risk that increased competition could put downward pressure on the prices we can charge for our services and on our operating margins. Additionally, we believe that our ability to compete also depends in part on factors outside of our control, such as the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs.

5. *Our revenues, expenses and profitability may be subject to significant fluctuation and hence may be difficult to predict. This increases the likelihood that our results of operations could fall below the expectations of investors and market analysts, which could cause the market price of the Equity Shares to decline.*

Our revenues, expenses and profitability are likely to vary significantly in the future from period to period. Factors which result in fluctuations in our revenues, expenses and profits include:

- the size, complexity, timing, pricing terms and profitability of significant contracts, as well as changes in the corporate decision-making processes of our clients;
- the business or financial condition of our clients or the economy generally, or any developments in the IT sector in macro-economic factors, which may affect the rate of growth in the use of technology in business, type of technology spending by our clients and the demand for our services;
- the effect of increased wage pressure in India and other country in which we operate;
- the size and timing of our facilities' expansion;
- our ability to expand sales to our existing customers and increase sales of our services to new customers, of whom some may be reluctant to change their current IT systems due to the high costs already incurred on implementing such systems and/or the potential disruption it would cause with personnel, processes, and infrastructures; and

- our ability to forecast accurately our clients' demand patterns to ensure the availability of trained employees to satisfy such demand.

A significant portion of our total operating expenses, particularly expenses related to personnel and facilities, are fixed in advance of any period. As a result, unanticipated variations in the size and scope of projects, as well as unanticipated cancellations, contract terminations or the deferral of contracts or changes occurring as a result of our clients reorganising their operations, or unanticipated variations in the number and timing of projects or employee utilisation rates, or the accuracy of estimating resources required to complete ongoing projects, may cause significant variations in operating results in any particular period. In addition, demands for higher compensation could lead to employee disputes and, potentially, work stoppages or slowdowns.

As a result, unanticipated variations to our projects in the manner and with the effects as mentioned above may cause significant variations in our results of operations in any particular quarter. Our pricing remains competitive and clients remain focused on cost reduction and capital conservation and cost management limitations may not be sufficient to negate pressure on pricing and utilisation rates. We may not be able to sustain our historical levels of profitability.

6. *Exchange rate fluctuations in various currencies in which we do business could negatively impact our business, financial condition and results of operations.*

Although our reporting currency is in Rupees, we transact a significant portion of our business in several other currencies, primarily AED and USD. Approximately 25.30%, 21.74% and 24.27% of our revenue from operations in the Fiscal Years 2023, 2022 and 2021, respectively, were derived from sales outside of India. However, a large portion of our costs are in Rupees. Approximately, 48%, 61% and 57% of our total operating expenses in the Fiscal Years 2023, 2022 and 2021, respectively, were incurred in Rupees. The exchange rate between the Rupee and foreign currencies has fluctuated significantly in recent years and may continue to fluctuate in the future. Any significant appreciation of the Rupee against foreign currencies in which we do business can fundamentally affect our competitiveness in the long-term. As our financial statements are presented in Rupees, such fluctuations could have a material impact on our reported results. Our clients generally demand that all risks associated with such fluctuations are borne by us.

As mentioned above, the exchange rate between the Rupees and foreign currencies has fluctuated significantly in recent years and is likely to continue fluctuating in the future. If the value of the Rupee declines, the size of our debt and interest expenses in currencies other than Rupees may increase. This will adversely impact our net income. We also experience other market risks, including changes in the interest rates related to our borrowings. We use derivative financial instruments to reduce or mitigate these risks where possible. However, if our strategies to reduce market risks (including through the use of derivative instruments) are not successful, our business, financial condition and results of operations may be adversely impacted.

7. *Our success depends upon our ability to develop new products and services and enhance our existing products and services.*

Rapid technological advances, changing delivery models and evolving standards in computer software development and communications infrastructure, changing and increasingly sophisticated customer needs and frequent new product introductions and enhancements characterise the industry in which we compete. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet critical business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits.

Our success depends upon our ability to anticipate, design, develop, test, market, license and support new software products, services, and enhancements of current products and services on a timely basis in response to both competitive threats and evolving industry requirements. The software industry is increasingly focused on cloud computing, mobility, social media and platform as a service among other continually evolving shifts. In addition, our software products, services, and enhancements must remain compatible with standard platforms and file formats. Often, we must integrate software licensed or acquired from third parties with our proprietary software to create or improve our products. If we are unable to successfully integrate third party software to develop new software products, services, and enhancements to existing products and services, or to complete the development of new products and services which we license or acquire from third parties, our operating results will materially suffer.

If we are unable to develop new or sufficiently differentiated products and services, enhance our product offerings and support services in a timely manner or position and price our products and services to meet demand including in response

to new industry standards, customers may not purchase or subscribe to our software products or cloud offerings or renew software support or cloud subscription contracts. Renewals of these contracts are important to the growth of our business.

We have continued to refresh and release new enhanced offerings of our on-premise and cloud software products and services. Our business may be adversely affected if:

- we do not continue to develop and release these or other new or enhanced products and services within the anticipated time frames,
- there is a delay in market acceptance of a new, enhanced or acquired product line or service,
- there are changes in IT industry standards or trends and preferences that we do not adequately anticipate
- or address with our product development efforts,
- we do not timely optimise complementary product lines and services, or
- we fail to adequately integrate, support, or enhance acquired product lines or services.

8. *If our software products and services do not gain market acceptance, our operating results may be negatively affected.*

To effectively meet customer demand, it is important that we continue to enhance our software products and services. The markets for our software products and services are rapidly evolving due to which the level of acceptance of products and services is not certain. If the markets for our software products and services fail to develop, develop more slowly than expected or experience increased competition, our business may suffer. As a result, we may be unable to:

- successfully market our existing products and services,
- develop and successfully launch new software products and services and enhancements to existing software products and services,
- complete customer implementations on a timely basis, or
- complete software products and services currently under development.

If our software products and services are not accepted by our customers or by associated businesses in our target verticals and markets, our business, operating results and financial condition will be materially adversely affected.

9. *Software and Product development is a long, expensive, and uncertain process and our current expenditure in research and development may not provide a sufficient or timely return.*

The development of our software, and products is a costly, complex and time-consuming process, and the investment in their development often involves a long wait until a return is achieved on such an investment. We have made, and will continue to make, significant investments in software product research and development and related product opportunities. Investments in new technology and processes are inherently speculative. Commercial success depends on many factors, including the degree of innovation of the software products and services developed through our research and development efforts, sufficient support from our channel partners, and effective distribution and marketing. Accelerated software product introductions and short product life cycles require high levels of expenditure on research and development. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases.

We must continue to dedicate a significant amount of resources to our research and development efforts in order to maintain our competitive position. However, significant revenues from new software product and service investments may not be achieved for a number of years, or at all. Moreover, new software products and services may not be profitable, and even if they are profitable, operating margins for new software products and services may not be in line with the margins we have experienced for our existing or historical software products and services.

Moreover, we may determine that certain software product candidates or programs do not have sufficient potential to warrant the continued allocation of resources and accordingly, we may elect to terminate such programs. If we terminate a software product in development in which we have invested significant resources, our prospects may suffer, as we will have expended resources on a project that will not provide any return on our investment and also, may have missed the

opportunity to have allocated those resources to potentially more productive uses. In turn, this may adversely impact our business, operating results and financial condition.

10. *Our cloud strategy, including our Software as a Service (SaaS) offerings, may impact our revenues and profitability from our existing and future on-premise enterprise software offerings.*

We offer customers a full range of consumption models, including the deployment of our products through our cloud-based SaaS offering. These business models continue to evolve, and we may not be able to compete effectively, generate significant revenues or maintain the profitability of our cloud offerings. Additionally, the increasing prevalence of cloud and SaaS delivery models offered by us and our competitors may unfavourably impact the pricing and demand of our on-premise enterprise software offerings, which may reduce our revenues and profitability.

As customer demand for our cloud offerings increases, we may experience volatility in our reported revenues and operating results due to the differences in timing of revenue recognition for our new on-premise software licences. Customers generally purchase our cloud offerings on a subscription basis and revenues from these offerings are generally recognised proportionately over the terms of the subscriptions. This is in contrast to revenues associated with our on-premise software licences arrangements whereby on-premise software licences revenues are generally recognised in full at the time of delivery of the related software licenses.

If we continue to see more of our customers selecting our SaaS offerings, with payments made on a monthly or periodic basis rather than based on a perpetual licence with upfront fees, this could, in some cases, result in instances where reported revenue and cash flow could be lower in the short term when compared to our historical perpetual licence model, as well as vary between periods depending on our customers' preference to license or subscribe to our subscription-based offerings. While we expect that, over time, the transition to a cloud and subscription model will help our business to generate revenue growth by attracting new users and by keeping our user base current (as subscriptions allow users to receive the latest product updates and thereby increasing recurring revenue per user), there is no assurance that our short term revenue and operating cash flows will not be adversely affected during any ongoing transition period.

11. *The business practices of our customers with respect to the collection, use and management of confidential information could give rise to operational interruption, liabilities or reputational harm as a result of governmental regulation, legal requirements or industry standards relating to consumer privacy and data protection.*

Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user confidential data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business. Any failure or perceived failure by us to comply with the Non-Disclosure Agreements in Indian or foreign laws and regulations, including laws and regulations regulating data security, or other policies, public perception, standards, or legal obligations, could result in lost or restricted business, proceedings, actions or fines brought against us or levied by governmental entities or could adversely affect our business and our reputation.

Furthermore, the costs of compliance with, and other conditions imposed by laws, regulations and policies that are applicable to the businesses of our customers may limit the use and adoption of, and reduce the overall demand for, our products and services. Privacy and confidential information security concerns may inhibit market adoption of our products and services, particularly in certain industries and foreign countries. Any such changes in the laws of any of the markets in which we operate or intend to in the future may adversely affect our results of operations and business prospects.

12. *We may be liable to our clients for damages caused by system failures, disclosure of confidential information or data security breaches, which could also harm our reputation, damage our relationship with clients and cause us to lose clients.*

Any failure in a client's system using our services or solutions could result in a claim for substantial damages against us, regardless of our responsibility for such failure, exposing us to a risk of loss or litigation and possible liability, including for breach of contractual confidentiality provisions or privacy laws. We also often have access to, or are required to collect and store, confidential client data. We face a number of threats to our data centres and networks such as unauthorized access, security breaches, computer hacks, computer viruses, worms, malicious applications, interruptions or malfunctions in our operations, computer attacks, disruptions or other security problems caused by unauthorized access to, improper use or misappropriation of systems by third parties (including sub-contractors and former employees) or our personnel. While we have in place an established process for actively monitoring related risks, the evolving nature of cyber-threats is an ever-present risk of disruption, we are dependent upon the optimum functioning of software and hardware to ensure efficient

and secure transfer of datasets between clients and our onshore and offshore sites, as well as between different global teams. Certain events may lead to disruptions in telecommunications software and hardware, which could have a moderate to severe impact on our ability to deliver services. These events may span from minor repair issues to major failures of servers, data-centres or connectivity.

In addition, our facilities are also vulnerable to damage or interruption from human error or negligence, intentional bad acts, terrorist attacks, power losses, hardware failures, systems failures, telecommunication failures and similar events. It is critical to our business that our infrastructure remains secure and is perceived by clients to be secure.

We may be required to expend significant capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish the value of our brand name.

Although we attempt to limit our contractual liability for consequential damages in rendering our services, some of our client agreements do not limit our potential liability for breaches of confidentiality, intentional infringement of intellectual property rights of third parties, non-compliance with applicable laws, fraud, breaches due to gross negligence or wilful misconduct, death or personal injury caused as a result of our negligence and we cannot be assured that such limitations on liability will be enforceable in all cases, or that they will otherwise protect us from liability for damages.

Further, we also face risks relating to compliance with applicable laws, rules and regulations relating to the collection, storage, use, sharing, disclosure, protection and security of confidential information, as well as requests from regulatory and government authorities relating to such data. Any failure or perceived failure by us to prevent information security breaches or to comply with privacy policies or privacy-related legal and contractual obligations could cause our clients to lose trust in us and our services. Any perception that the privacy of information is unsafe or vulnerable when using our services, could damage our reputation and substantially harm our business.

13. Our international sales and operations subject us to additional risks that can adversely affect our results of operations.

We derive a significant portion of our revenues from our business operations outside India. In Fiscals 2023, 2022 and 2021, our business operations outside India contributed 25.21%, 21.74% and 24.27% of our revenue from operations, respectively. Compliance with international laws and regulations that apply to our international operations may increase our cost of doing business in such foreign jurisdictions. The table below sets forth our revenue by end market geography (based on location of the specific customer site that we serve, irrespective of the location of the headquarters of the customer) for the periods indicated:

Particulars of the Region	For the Fiscal Year ended March 31					
	2023		2022		2021	
	Amount (₹ Lakhs)	% of total revenue from operations	Amount (₹ Lakhs)	% of total revenue from operations	Amount (₹ Lakhs)	% of total revenue from operations
Revenue from Indian Operations						
-India	1,649.31	74.78%	1,364.52	78.25%	960.27	75.73%
-Seychelles and Botswana	303.30	13.75%	12.39	0.71%	48.68	3.84%
Revenue from Overseas Operations						
-UAE	252.92	11.46%	366.73	21.03	259.10	20.43%

These laws and regulations include local laws which may include labour relations laws, tax laws, intellectual property laws, anti-competition regulations, import, foreign currency and trade restrictions. Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or our employees, prohibitions on the conduct of our business, as well as default under our contracts with customers.

Compliance with these laws requires a significant amount of management attention and effort, which may divert management's attention from managing our business operations and growth strategy, and increase our expenses as we engage specialised or other additional resources to assist us with our compliance efforts. Our success depends, in part, on our ability to anticipate these risks and manage these difficulties.

We are also subject to a variety of other risks and challenges in managing operations in various countries, including those related to:

- general economic and political conditions in each country or region.

- common local business behaviors that are in direct conflict with our business ethics, practices and conduct policies;
- customers' attitude which may differ in each country which require varied customer-handling procedure;
- language barrier and difficulties in communication;
- tighter restrictions on doing business in one or more of our target international markets.
- longer payment cycles and difficulties in collecting accounts receivable;
- overlapping tax regimes and foreign exchange currency risks;
- reduced protection for intellectual property rights in some countries.

In addition, we may not possess the same familiarity with the economy, customer preferences, commercial operation and distribution network in some of the markets where propose to expand our operations. Further, expanding our geographical footprint poses risks and potential costs such as failure to attract a sufficient number of customers, or to anticipate competitive conditions that are different from those in our existing markets, and significant marketing and promotion costs, among others. We may face the risk that our competitors and the established players in such geographies may enjoy better brand visibility, and may be more experienced in such markets and they may enjoy better relationships with channel partners and customers, gain early access to information regarding attractive marketing opportunities and be better placed to launch software products or services with other advantages of being a first mover.

Further, our expansion plans could be delayed or abandoned, and we may incur additional expenditure for execution than anticipated, and may divert our resources, including our management's attention, from other aspects of our business. Consequently, it may place a strain on our management, operational and financial resources, as well as our information systems, any of which could impact our competitive position and reduce our revenue and profitability. There can be no assurance that we will be able to effectively manage our expansion into new international markets.

14. *We may not be able to extend our arrangements with our clients and may need to renegotiate the terms of our contracts from time to time. Further, our clients may terminate contracts before completion, negotiate adverse terms of the contract or choose not to renew contracts, which could materially adversely affect our business, financial condition and results of operations*

We enter into contracts with our clients for specific projects on agreed mutual deliverables of one time charges and after Go-Live Monthly Subscription. The term of master services agreements we enter into typically range from or in some cases remain until such agreements are terminated, usually when there are no more subsisting statements of works or purchase orders with the client. A substantial portion of our revenues is generated from repeat business, which we define as revenues from a client who also contributed to our revenues during the prior fiscal year. The revenue contribution from repeat clients as a percentage of our revenue attributable to the Services segment is set out below:

Particulars of the Customers	Fiscal 2023		Fiscal 2022		Fiscal 2021	
	Amount (₹ in Lakhs)	Percentage of Total Revenue from Operations	Amount (₹ in Lakhs)	Percentage of Total Revenue from Operations	Amount (₹ in Lakhs)	Percentage of Total Revenue from Operations
Top 10	1428.47	64.77%	1402.18	71.23%	776.28	61.22%
Top 5	1241.54	56.29%	1116.14	56.70%	587.41	46.32%

We may be unable to renew some or all of these contracts with our clients on satisfactory terms or at all for various reasons, especially because many of them have options to renew or not to renew agreement's term at their discretion. In case of renewal, any contract renegotiations may result in new contract terms that are less favourable to us, such as heightened performance obligations. Such provisions could significantly increase our costs and risks and adversely affect our business. In addition, our clients can terminate many of our master services agreements and work orders for cause or breach of service obligations, change of control, changes in the organizational, corporate and managerial structure, initiation of bankruptcy or insolvency of our Company. Therefore, we must seek to obtain new engagements when our current engagements are terminated or successfully completed but not renewed, maintain relationships with existing clients and secure new clients to expand our business. In addition, large and complex projects may involve multiple engagements or stages, and a client may choose not to retain us for additional stages or may cancel or delay additional planned engagements. The contribution

of revenue from new clients to our revenue from operations is typically small for the first year. This is because new engagements typically begin with lesser volume of business, which is expected to gradually grow over a period of time and any failure to do so may adversely affect our return on resources utilized in the development of such client relationships. If we fail to maintain the relationships and successfully obtain new engagements from our existing clients, we may not achieve our revenue growth and other financial goals. We may not be able to renew our contracts on favourable terms, or to replace any client that elects to terminate or not renew its contract with us, which could materially adversely affect our revenue and thus our results of operations. Further, terminations or delays in engagements may make it difficult to plan our project resource requirements.

15. *The length of our sales cycle may fluctuate significantly and depends on several external factors which may result in significant fluctuations in revenues being recognised on a quarterly basis.*

A customer's decision to purchase our software products or our services often involves a comprehensive implementation process across the customer's network(s) which includes customer education, pre-purchase evaluation by a number of employees in our customers' organisations and, often, a significant strategic or operational decision by our customers. Our sales efforts involve educating our customers about the use and benefits of our products and solutions, including any potential cost savings achievable by organisations that partner with us.

Customers typically undertake a significantly long evaluation process which also involves evaluation of our competitors' services and can result in a lengthy sales cycle. Moreover, a purchase decision by a potential customer typically requires extended evaluation, testing and the approval of senior decision makers, including the boards of directors of our customers. We spend substantial time, effort and money on our sales efforts without any assurance that our efforts will produce any sales. Additionally, licensing and implementing our software products and any related services may entail a significant commitment of resources by prospective customers, accompanied by the risks and delays frequently associated with significant technology implementation projects.

Our customers plan their IT purchases based on their annual IT budget (fiscal year of many of our Indian customers begins on April 1 and ends on March 31) and typically increase their IT procurement in such six month period to enable them to fully utilise their annual budgets. Due to this, our revenue from operations is typically higher in the six month period ending March 31 of a particular fiscal, or the three months period ending March 31 of a particular fiscal, on a quarterly basis, as compared to other quarters. Consequently, our profits before tax are also higher in such six month or three month period given that our expenses are usually spread across the 12 months of a particular fiscal.

Further, in weaker economic environments, it is not uncommon to see reduced IT spending. It may take several months, or even several quarters, for marketing opportunities to materialise. For example, if a customer's decision to purchase our software is delayed or if the implementation of these software products takes longer than originally anticipated, the date on which we are able to recognise revenues from these licences will be delayed. Such delays and fluctuations could cause our revenues and results of operation to fluctuate significantly across time periods, and we may not be able to adjust our costs quickly enough to offset such lower revenues, potentially adversely impacting our business, operating results and financial condition.

16. *Our software products and services may contain coding, or configuration errors or other defects that could harm our reputation, be expensive to correct, delay revenues, and expose us to litigation.*

Our software products and services are fairly complex. Despite testing prior to the release and throughout the lifecycle of a product or service, our products may sometimes contain coding errors that can impact their function, performance and security, and result in other negative consequences. This includes third party software products or services incorporated into our own software products.

Errors may be found in new software products or services or improvements to existing products or services after delivery to our customers. If these defects are discovered after the release of such products to our customers, we may not be able to successfully correct such errors in a timely manner. In addition, despite the extensive tests we conduct on all our software products and services, we may not be able to fully simulate the environment in which our products and services will operate in the customers' ecosystem, and, as a result, we may be unable to adequately detect the design defects or software or hardware errors which may become apparent only after the products are used in an end-user's environment, and users have transitioned to our services. The occurrence of errors, defects and failures in our software products and services could result in the delay or the denial of market acceptance of our products and alleviating such errors and failures may require us to incur significant expenditure.

Customers often use our services and solutions for critical business processes and as a result, any defect or disruption in our products and solutions, any data breaches or misappropriation of proprietary information, or any error in execution, including human error or third-party activity such as denial of service attacks or hacking, may cause customers to reconsider renewing their contract with us. The errors in or failure of our software products and services could also result in us losing customer transaction documents and other customer files, causing significant customer dissatisfaction and possibly giving rise to claims for monetary damages and litigations. The harm to our reputation resulting from such product and service errors and failures may be materially damaging.

Our agreements typically contain provisions designed to limit our exposure to claims. These agreements regularly contain terms such as the exclusion of all implied warranties and the limitation of the availability of consequential or incidental damages. However, such provisions may not effectively protect us against claims and litigations, and the associated liabilities and costs associated with them. Any claims for actual or alleged losses to our customers' businesses may require us to spend significant time and money in litigation or arbitration or to pay significant settlements or damages. Defending a lawsuit, regardless of merit, can be costly and can divert management's attention and resources and harm our reputation and business operations.

17. *Our sales to government departments and agencies expose us to business volatility and risks, including government budgeting cycles and appropriations.*

Historically, we have derived some of our revenues from contracts with the Government of India. Typically government contracts are subject to several approvals to fund the expenditures under these contracts. We are exposed to business volatility and risks associated with government business including termination of contracts, expropriations, suspension of business and debarment from future government business, without in many cases the possibility of effective legal or financial recourse. Further, agreements with government departments are typically in relation to a specified set of requirements and deliverables and may not be renewed. Finally, sales to government departments may involve longer payment cycles which may increase our trade receivables and average debtor days. If our sales to government departments fall in the future, our overall revenues and results of operations may be adversely affected.

18. *The loss of licences to use third party software or the lack of support or enhancement of such software could adversely affect our business and operations.*

We currently depend on a limited number of third party software products. If such software products were to become unavailable for any reason, we might experience delays or increased costs in continuing the production of our existing software products or the development of our new software products. For our products, we typically rely on software that we license from third parties, including software that is integrated with internally developed software and which may be used in our products to perform key functions. These third party software licences may not continue to be available to us on commercially reasonable terms or at all and the related software may not continue to be appropriately supported, maintained, or enhanced by the licensors. The loss of the license to use, or the inability by licensors to support, maintain, or enhance any of such software, could result in increased costs, lost revenues or delays until equivalent software is internally developed or licensed from another third party and integrated with our software. There can be no assurance that we will be successful in licensing third party software on commercially acceptable terms in a timely manner. Such increased costs, lost revenues or delays could adversely affect our business and operations.

19. *Our operating results could be adversely affected by any weakening of economic conditions.*

Our overall performance depends in part on the global economic conditions. Certain economies have experienced periods of downturn as a result of a multitude of factors, including, but not limited to, turmoil in the credit and financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, increases in unemployment and volatility in commodity prices and worldwide stock markets, and excessive government debt.

Any general weakening of, and related declining corporate confidence in, the global economy or the curtailment of government or corporate spending could cause current or potential customers to reduce or eliminate their IT budgets and spending, which could cause customers to delay, decrease or cancel purchases of our products and services or cause customers not to pay us or to delay paying us for previously purchased products and services.

Moreover, any instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. During such downturns, many customers may delay or reduce technology purchases. Contract negotiations may become more protracted or conditions could result in reductions in the licensing of our software products and the sale of cloud and other services, longer sales cycles, pressure on our margins, difficulties in collection of accounts receivable or delayed payments, increased default risks associated

with our accounts receivables, slower adoption of new technologies and increased price competition. In addition, deterioration of the global credit markets could adversely impact our ability to complete licensing transactions and services transactions, including maintenance and support renewals. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy, or a curtailment in government or corporate spending could delay or decrease our revenues and therefore have a material adverse effect on our business, operating results and financial condition.

20. ***Our success depends on our ability to retain and attract qualified senior management and other key personnel, and if we are not able to retain them or recruit additional qualified personnel, we may be unable to successfully develop our business.***

Our performance depends largely on the efforts and abilities of our Promoters, senior management and other key personnel, see “***Our Management***” and “***Our Business – Employees***” beginning on pages 160 and 117 of this Draft Prospectus, respectively. We believe that the inputs and experience of our Promoters, senior management and key managerial personnel are valuable for the growth and development of business and operations and the strategic directions taken by our Company. Our business and operations are led by our management team, the loss of whose services might significantly delay or prevent the achievement of our business. Competition among IT companies for qualified employees is intense, and the ability to retain and attract qualified individuals is critical to our success. Furthermore, as we expect to continue to expand our operations and develop new products and services, we will need to continue to attract and retain experienced senior management and key R&D and sales personnel.

We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees for our business needs. We cannot assure you that we will be able to recruit and retain qualified and capable employees or find adequate replacements in a timely manner, or at all. If we lose the services of any of member of our management team or key personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel. Further, we may require a long period of time to hire and train replacement personnel. The loss of the services of such persons may have an adverse effect on our business, financial condition, cash flows and results of operations.

21. ***We have experienced growth in recent years and may be unable to sustain our growth or manage it effectively.***

We have experienced growth in the recent years. Our revenue from operations grew at a 26.32% from ₹1755.17 Lakhs in the Fiscal Year ended March 31, 2022, to ₹2205.53 Lakhs in the Fiscal Year ended March 31, 2023. Sustaining our growth will require investments including in assets and will also put pressure on our ability to effectively manage and control historical and emerging risks. An expansion in the size of our business and the scope and complexity of our operations could strain our internal control framework and processes, which may result in delays, increased costs, and lower quality products. We may be unable to effectively manage this growth or achieve the desired profitability in the expected timeframe or at all.

22. ***There may be delays or defaults in payment by our customers or the tightening of payment periods by third-party manufacturers which could negatively affect our cash flows. As a result, we experience significant working capital requirements and our inability to meet our working capital requirements may materially and adversely affect our business, cash flows and financial condition.***

Our business requires a significant amount of working capital to finance our operations and our inability to meet our working capital requirements may adversely affect our cash flow cycle. Our working capital requirements increase primarily due to a considerable difference between the holding levels of our trade payables and our trade receivables.

The table below sets forth details of our trade payables, trade receivables, and working capital cycle, as of the dates indicated.

Particulars	For the Fiscal Year ended March 31								
	2023			2022			2021		
	Number of days	Amount (₹ in Lakhs)	% of Revenue from operations	Number of days	Amount (₹ in Lakhs)	% of Revenue from operations	Number of days	Amount (₹ in Lakhs)	% of Revenue from operations
Trade Receivables	201	1214.25	55	114	544.20	31	62	235.54	17

Particulars	For the Fiscal Year ended March 31								
	2023			2022			2021		
	Number of days	Amount (₹ in Lakhs)	% of Revenue from operations	Number of days	Amount (₹ in Lakhs)	% of Revenue from operations	Number of days	Amount (₹ in Lakhs)	% of Revenue from operations
Trade Payables	132	97.72	4	117	118.04	7	89	81.48	6
Allowance for bad debts	5	33.30	2	4	18.38	1	6	23.27	2

Our working capital requirements may further increase if the holding level of trade receivables is further increased or if there is a further decrease in holding period of trade payables. We cannot assure you that we will continue to be successful in arranging adequate working capital for our existing or expanded operations on acceptable terms or at all, which may materially and adversely affect our business, cash flows and financial condition.

23. *Our Company has made investments in other companies. While the investments offer the opportunity for substantial returns and capital gains, they also involve a high degree of risk that can result in substantial losses*

We have made an investment in Micro Park Logistics Private Limited in the past and may continue to make such investments in the future with parties that we believe can provide access to new markets, capabilities, or assets. The acquisition and investments subject us to risks and we cannot assure that any such investments will be successful or meet our expectations. There can be no assurance that our Company will correctly evaluate the nature and magnitude of the various factors that may affect the value of such investments. If it does not, we may suffer losses, dilute value to shareholders, may not be able to take advantage of appropriate investment opportunities or complete transactions on terms commercially acceptable to us. In addition, our Company has not made any provision in the Restated Financial Statements for a decline in the value of such investments. The value of the investments may fluctuate due to variety of factors that are difficult to predict, such as domestic or international economic and political developments, which may significantly affect the value of our investments and thereby affect our results of operations and financial condition.

While we conduct due diligence exercises and evaluate the financial and business model of potential investee companies, there can be no assurance that such investee company is, and will continue to be, fully compliant with all necessary regulations. We may also fail to discover liabilities that are not properly disclosed, or we may be unable to assess adequately as part of our diligence efforts liabilities that may arise out of regulatory non-compliance, contractual obligations or breaches. If we are unable to obtain indemnification protection or other contractual protections or relief for any material liabilities associated with our acquisitions or investments, our business, financial condition, and results of operations could be harmed.

Operational risks

24. *We do not own our Registered Office, land on which our warehouse, and showrooms, are located. A failure to renew our existing lease arrangements at commercially favourable terms or at all may have a material adverse effect on our business, financial condition, and results of operations.*

We do not own our Branch Office situated at Saif Office Q1-03-034/A, P.O. Box 121793 Sharjah-U.A.E and the said lease arrangement with the said third parties is due for renewal by the end of this calendar year, the details of which are set forth in the table below:

Name of the entity which owns/ has leased the property	Location	Whether Lessor is related party	Purpose	Lease Tenure	Rental Amount
Diera Orient Real Estate Est	Saif Office Q1-03-034/A P.O. Box 121793 Sharjah-U.A.E	No	Branch Office	January 01, 2023 to December 31, 2023	AED 58,000/- per annum.

We cannot assure you that we will be able to renew our lease on commercially acceptable terms or at all. Upon expiration of the agreement, we will be required to negotiate the terms and conditions on which the lease agreement may be renewed. In the event that this existing lease is terminated or they are not renewed on commercially acceptable terms or at all, we may suffer a disruption in our operations. If alternative premise is not available at the same or similar costs, size or locations,

our business, financial condition, and results of operations may be adversely affected. For further details, see “*Our Business – Property*” on page 146 of this Draft Prospectus.

25. *We may be subject to increased employee costs, which may adversely affect our business and results of operations.*

As of the date of this Draft Prospectus, our workforce comprised 107 employees. Our employee benefits expense comprising payments made to all the personnel on our payroll and engaged in our operations for the Fiscal Years ended March 31, 2023, March 31, 2022, and March 31, 2021, is stated below:

Particulars	For the Fiscal Year ended March 31					
	2023		2022		2021	
	Amount (₹ in Lakhs)	% of total revenue from operations	Amount (₹ in Lakhs)	% of total revenue from operations	Amount (₹ in Lakhs)	% of total revenue from operations
Employee Benefit Expenses	679.42	30.81%	595.46	34.15%	553.00	39.84%

Our business operations are significantly dependent on the cooperation and continued support of our workforce. Strikes or work stoppages by our workforce could halt and disrupt our distribution channels which could impact our ability to deliver customer orders in a timely manner or at all, which could adversely affect the results of our operations and reputation. There have been no employee unrest in the for the Fiscal Years ended March 31, 2023, March 31, 2022, and March 31, 2021 on account of labour-related disputes including strikes, lockouts. However, there can be no assurance that we will not experience work disruptions in the future due to disputes or other problems with our workforce.

26. *Failure or malfunction of our equipment could adversely affect our ability to conduct our operations.*

Our operations are subject to risks inherent in the use of the equipment and servers. We may experience failures or other issues either because of defects, faulty maintenance or repair, or improper use or lack of timely servicing of our equipment. Any significant malfunction or breakdown of our machineries may entail significant repair and maintenance costs and cause disruptions and delays in our operations. Any injury caused by our equipment due to equipment defects, improper maintenance or improper operation could subject us to liability claims. We cannot assure you that we would be able to effectively respond to any such events, in a timely manner and at an acceptable cost, which could lead to an inability to effectively provide our services and, therefore, affect our business and reputation.

27. *We may need to change our pricing models to compete successfully.*

The competition we face in the sales of our products and services and general economic and business conditions as well as changes in the IT industry standards and landscape, can put pressure on us to change our pricing models. If our competitors offer deep discounts on certain products or services or develop products that the marketplace considers more valuable, we may need to lower prices or offer other favourable terms in order to compete successfully. Any such changes may reduce our sales or margins and could adversely affect our business and operating results. The increased availability and adoption of open-source software may also cause us to change our pricing models in the short term as we transition to increase our presence in the cloud platform.

Some of our competitors may bundle products for promotional purposes or as a long-term pricing strategy or provide guarantees of prices and product implementations. These practices could, over time, significantly constrain the prices that we can charge for some of our products. If we do not adapt our pricing models to reflect changes in customer use of our products or changes in customer demand, our revenues could decrease.

28. *The proper functioning of our solutions may be impaired by fraudulent or malicious activity, including non-materially adversely is possible that fraudulent or malicious activity, including non-human traffic, could impair the proper functioning of our solutions.*

For instance, the use of automated or manual mechanisms could adversely affect the performance of our services and solutions. It may be difficult to detect fraudulent or malicious activity, particularly because the perpetrators of such activity may have significant resources at their disposal, may frequently change their tactics and may become more sophisticated, requiring us to update, upgrade and improve our processes for detecting and controlling such activity. Such fraudulent or malicious activity could result in negative publicity and reputational harm and require significant additional management time and attention. Further, if we fail to detect or prevent fraudulent or malicious activity in a timely manner, or at all, our customers may experience or perceive a reduced return on their investment or heightened risk associated with the use of

our products and services, resulting in refusals to pay, demands for refunds, loss of confidence, withdrawal of future business and potential legal claims.

29. *Our ability to operate our cloud computing infrastructure relies on access to sufficient, reliable and cost effective electric power, reliable internet and telecommunication services and other technical services.*

Since our cloud computing infrastructure relies on third parties to provide power sufficient to meet operational needs, our cloud computing infrastructure could have a limited or inadequate amount of electrical resources necessary to meet our customer requirements. We attempt to manage our power resources and limit exposure to system downtime due to power outages by having redundant power feeds from the grid and by using backup generators and battery power. However, these protections may not limit our exposure to power shortages or outages entirely or may not be able to consistently meet our requirements. Any system downtime resulting from insufficient power resources or power outages or if for any reason such electricity is not available or we are unable to switch to alternate power source in a short time could cause physical damage to equipment, lead to shutdown of our data centres, increase our susceptibility to security breaches, increase costs associated with restarting data centres, damage our reputation and lead us to lose current and potential customers, which would harm our business and results of operations. Further, while we are currently able to obtain power at costs that we believe are reasonable, a significant increase in the cost of power or a decrease in its availability could have materially adverse consequences including, among others, placing us at a cost disadvantage if we are forced to increase our service rates.

We may lose customers, or our customers may reduce the services purchased from us due to increased power costs and limited availability of power resources, or we may incur costs for data centre space which we cannot utilize, which would reduce our revenue and have a material and adverse effect on our cost of revenue and results of operations. Our offerings also rely on performance of our network infrastructure, including internet and telecommunications services provided by third parties. We depend on uninterrupted and error-free service. We do not exercise control over the providers of these services, which increases our vulnerability to problems with the services provided by them. We may experience interruptions or delays in network service. Any failure on our part or the part of our third-party suppliers to achieve or maintain high data transmission capacity, reliability or performance could significantly reduce customer demand for our services and have a material and adverse effect on our business and results.

Risks related to our financial position

30. *The financial statements of our Company have been restated only for the Fiscal Years ended March 31, 2023, March 31, 2022, and March 31, 2021, which does not have the effect of the material developments of our Company undertaken post-Fiscal Year ended March 31, 2023.*

The Peer Reviewed Auditor has restated summary statement of assets and liabilities of our Company as at March 31, 2023, 2022 and 2021, restated summary statement of profit and loss, restated summary statement of cash flows for the financial year ended on March 31, 2023, 2022 and 2021, and restated statement of significant accounting policies along with other explanatory information. However, there have been significant developments specified hereinafter, the effect for which has been stated in the aforesaid Restated Financial Statements:

- Pursuant to Shareholders' resolution dated May 02, 2023, each fully paid-up Equity Share of our Company having face value of ₹100.00/- each was subdivided into Equity Share of face value of ₹10.00/- each. Therefore, 25,000 equity shares of our Company of face value of ₹ 100 each were sub-divided into 2,50,000 Equity Share of face value ₹ 10 each.
- 1,00,00,000 Bonus Equity Shares were issued on June 16, 2023, in the ratio of 40 Bonus Shares for every 1 Equity Share held.

For details with respect to the aforesaid information, "***Restated Financial Information – Note XLIII – Details of Accounting Ratio as Restated***" on page 219 of this Draft Prospectus.

31. ***We have substantial capital expenditure and working capital requirements and may require additional financing to meet those requirements, which could have an adverse effect on our results of operations and financial condition.***

Our business is capital intensive as we require significant capital to operate. Historically, we have funded our capital expenditure requirements through a combination of internal accruals and term loans. Our capital expenditure for the Fiscal Years ended March 31, 2023, March 31, 2022, and March 31, 2021 are set out below in the respective tables:

Particulars	For the Fiscal Year ended March 31		
	2023 (₹ in Lakhs)	2022 (₹ in Lakhs)	2021 (₹ in Lakhs)
Computer & Printer	5.31	16.70	4.52
Vehicle	-	-	8.27
Furniture & Electrical Fittings	-	220.65	-
Building	-	108.96	-
Office Equipment	2.81	21.54	-
Electrical Installation	-	107.64	-
Air Conditioner	-	21.99	-
Capital work-in-progress (Net)	-	--	29.64
Total Capital Expenditure	8.12	497.48	42.43

The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other factors, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, economic conditions, weather related delays, technological changes and additional market developments and new opportunities. Furthermore, we require a significant amount of working capital to maintain optimum inventory levels of finished goods as well as to offer credit to our customers, and fulfil our payment obligations towards our suppliers. The table below sets forth our working capital as of the dates stated:

Particulars	For the Fiscal Year ended March 31		
	2023 (₹ in Lakhs)	2022 (₹ in Lakhs)	2021 (₹ in Lakhs)
Working Capital	1100.36	621.99	324.54
Working capital (in number of days)	182	130	85

Notes:

Working capital has been calculated as inventories plus trade receivables less trade payables

Working capital days is computed as Inventory days plus Trade receivable days minus Trade payable days. Inventory days is calculated as Inventory divided by revenue from operations multiplied by 365 days. Trade receivables days is calculated as Trade receivables divided by revenue from operations multiplied by 365 days. Trade payable days is calculated as Trade payable divided by revenue from operations multiplied by 365 days.

Our working capital requirements may increase if payment terms lead to reduced advance payments from our customers or longer payment schedules, and we may need to raise additional capital from time to time to meet these requirements. While we do not anticipate seeking additional working capital financing in the immediate future, an inability to do so on terms acceptable to us could adversely affect our business operations.

Our sources of additional financing, where required to meet our capital expenditure plans or working capital requirements, may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, would result in a dilution of your shareholding. For details in relation to the terms of our existing financing arrangements, see “**Financial Indebtedness**” on page 235 of this Draft Prospectus.

32. ***Our inability to collect receivables in time or at all and default in payment from our customers could result in the reduction of our profits and affect our cash flows.***

Cash collection trends measured by days outstanding have a material impact on our cash flows. In general, an increase in bad debts or aged debtors leads to greater usage of operating working capital and increased interest costs. The table below sets forth our trade receivables and allowance for doubtful debts as of the dates stated:

Particulars	For the Fiscal Year ended March 31		
	2023	2022	2021
Trade Receivables (₹ in Lakhs)	1,214.25	544.20	235.54
Trade receivables turnover ratio	2.49	3.67	4.27
Trade receivables days	201	114	62
Trade Receivables ageing schedule of undisputed trade receivables – considered good			
Outstanding for less than 6 months	1149.91	456.61	210.11
Outstanding for more than 6 months	64.34	87.59	25.43

Notes:

Trade receivables are non-interest bearing and are generally on terms of 30 to 60 days (net of loss allowance).

Trade receivables turnover ratio is calculated as revenue from operations divided by trade receivables.

Trade receivables days is calculated as Trade receivables divided by revenue from operations multiplied by 365 days.

Includes undisputed trade receivables which are considered good, and which are either unbilled, not due or outstanding for less than six months since due date of payment

For information on the ageing of our trade receivables, “**Restated Financial Information – Note XXXV – Trade Receivables ageing schedule**” on page 210 of this Draft Prospectus.

Our business depends on our ability to successfully obtain payments from our customers for products provided. There is no guarantee that we will accurately assess the creditworthiness of our customers, and actual losses on amounts due to us from customer could differ from those that we currently anticipate.

33. ***We have incurred significant indebtedness, and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.***

As of March 31, 2023, we had aggregate outstanding borrowings (including current borrowings and non-current borrowings) of ₹397.97 Lakhs. For further details on the nature of our outstanding borrowings, see “**Financial Indebtedness**” on page 235 of this Draft Prospectus. The table below sets forth certain information on our total borrowings, debt to equity ratio, finance cost and interest coverage ratio as of the dates stated:

Particulars	For the Fiscal Year ended March 31		
	2023	2022	2021
Total Borrowings (₹ in Lakhs)	397.97	592.05	437.81
Debt to equity ratio	0.13	0.33	0.19
Finance cost	30.69	26.64	24.36
Interest coverage ratio	3.60%	6.69%	11.85%

Notes:

Total borrowing is calculated as the sum of current and non-current borrowings

Debt to equity ratio is calculated as total borrowings divided by total equity

Interest coverage ratio is calculated as profit before tax (PBIT) plus finance cost divided by finance cost

Any increase in interest rates will increase our finance costs, which may adversely affect our business and financial condition. Our interest rate risk arises majorly from the term loans from banks carrying floating rate of interest. The

exposure of our borrowings to interest rate changes at the end of the last three Fiscal Years are set forth in the table below.

Particulars	For the Fiscal Year ended March 31		
	2023	2022	2021
Variable rate borrowing (₹ in Lakhs)	397.97	592.05	437.81
Weighted average interest rate	7.71	4.50	5.56

As of March 31, 2023, we had total secured borrowings (current and non-current borrowings) of ₹147.97 Lakhs. These borrowings are secured, in favour of the lenders. For further details, see “**Financial Indebtedness**” on page 235 of this Draft Prospectus, “**Restated Financial Information – Note VII – Long Term Borrowings**” on page on page 198 of this Draft Prospectus. As some of these secured assets pertain to our [], our rights in respect of transferring or disposing of these assets are restricted. In the event we fail to service our debt obligations, the lenders have the right to enforce the security in respect of our secured borrowings and dispose of our assets to recover the amounts due from us which would adversely affect our business, financial condition, and results of operations.

Furthermore, our loan agreements with our lenders also contain certain negative covenants, including but not limited to, that our Company cannot change the shareholding pattern of our Promoters or Company’s management or constitution or effect a merger, amalgamation, compromise, or reconstruction, undertake a buyback, or effect any change in our shareholding pattern without the consent of the relevant lender. Furthermore, any alteration to our Memorandum of Association and Articles of Association in a manner that adversely affects the rights or interests of the lender under these financing agreements, also require the consent of the concerned lender. Any failure on our part to comply with these terms in our financing agreements including the security agreements would generally result in events of default under these financing agreements. In such a case, the lenders under each of these respective loan agreements may, at their discretion, accelerate payment and declare the entire outstanding amounts under these loans due and payable, and in certain instances, enforce their security which has been constituted. While there have been no instances in the past of any such default of our debt obligations or breach of covenants in our financing agreements, we cannot assure you that we will be able to obtain necessary approvals to undertake any of these activities as and when required or to comply with such covenants or other covenants in the future. For details in relation to the terms of our financing arrangements, see “**Financial Indebtedness**” on page 235 of this Draft Prospectus.

34. We may not have sufficient insurance coverage to cover our economic losses as well as certain other risks, including those pertaining to litigation and claims by third parties.

Our business involves certain risks which may adversely affect our profitability, including third-party liability claims, employee fraud. Our principal types of coverage include among others. See “**Our Business – Insurance**” on page 146 of this Draft Prospectus for further details on our insurance coverage. Our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business. While none of our insurance policies are due for renewal as of date, we cannot assure you that such renewals in the future (on expiry) will be granted in a timely manner, at acceptable cost or at all.

Furthermore, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. The table below sets forth certain information on our insurance coverage as at the dates stated:

Particulars	For the Fiscal Year ended March 31					
	2023		2022		2021	
	Amount (₹ in Lakhs)	% of assets	Amount (₹ in Lakhs)	% of assets	Amount (₹ in Lakhs)	% of assets
Insured Assets	1191.99	100	1183.86	100	686.38	100

**Includes Non-Current tangible assets (other than land), Stock and Cash.*

While our insurance claims have not exceeded our insurance coverage and we have not recognized any losses in the last three Fiscal Years due to partial or total rejection of our claims by our insurers, there can be no assurance that claims in the future will continue to be covered or accepted in full by our insurance policies. The occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events not covered by insurance policies, could materially harm our financial condition and future results of operations. There can be no assurance that any claims filed will be honored fully or timely under our insurance policies. Also, our financial condition may be affected to the extent we suffer any loss or damage that is not covered by insurance, or which exceeds our insurance coverage. Any such uninsured

losses or liabilities could result in an adverse effect on our business operations, financial condition, results of operations and cash flows.

35. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest.*

We have, from time to time, entered into various transactions with related parties, including for [certain types of related party transactions]. In addition, we rely on our related parties for occupying buildings owned by them and leased to us for our business operations. For further details on our lease agreements, see “*Our Business – Property*” on page 146 of this Draft Prospectus.

The table below sets forth the total amount of our related party transactions in the ordinary course of business for the Fiscal Years stated:

Particulars	For the Fiscal Year ended March 31					
	2023		2022		2021	
	Amount (₹ in Lakhs)	% of revenue	Amount (₹ in Lakhs)	% of revenue	Amount (₹ in Lakhs)	% of revenue
Total Related Party Transactions	206.99	9.33%	157.76	8.98%	211.57	15.19%

For information on all our related party transactions, see “*Restated Financial Information – Note II – Related Party Disclosures – Particulars of transactions with related parties*” on page 213 of this Draft Prospectus.

Some of our related party transactions include lease/ permitted use of our Registered Office to our Company from our Directors and members of our Promoter Group. For further information, see “*Our Management – Interest of Directors*”, “*Our Promoter and Promoter Group – Interest of our Promoters*”, on pages 165, and 177, respectively.

The transactions with related parties have been conducted in the ordinary course of business and on an arm’s length basis, in accordance with applicable laws, and are not prejudicial to the interest of our Company. It is likely that we will continue to enter into related party transactions in the future. Some of these transactions may require significant capital outlay and there can be no assurance that we will be able to make a return on these investments. Although all related-party transactions that we may enter into will be subject to Audit Committee, Board or shareholder approval, as may be required under the Companies Act, 2013 and the SEBI (LODR) Regulations, we cannot assure you that such transactions, individually or in the aggregate, will perform as expected/ result in the benefit envisaged therein, or that we could not have undertaken such transactions on more favorable terms with any unrelated parties.

36. *Our contingent liabilities as stated in our Restated Financial Information could adversely affect our financial condition.*

As of March 31, 2023, our Restated Financial Information disclosed the following contingent liabilities:

Nature of Contingent Liabilities	For the Fiscal Year ended March 31		
	2023 (₹ in Lakhs)	2022 (₹ in Lakhs)	2021 (₹ in Lakhs)
Direct Tax	14.96	14.96	14.96
Indirect Tax	4.66	10.88	8.50
Bank Guarantee	9.56	45.12	-
Total	29.18	70.96	23.46

For details see, “*Restated Financial Information – Note XXXII – Contingent liabilities*” on page 208 of this Draft Prospectus.

Our contingent liabilities may become actual liabilities and if a significant portion of these liabilities materialize, it could have an adverse effect on our business, financial condition, and results of operations. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current Fiscal or in the future.

If at any time we are compelled to realize all or a material proportion of these contingent liabilities, it would have a material and adverse effect on our business, financial condition, and results of operations.

37. *We have experienced negative cash flows from financing activities in previous fiscal and cannot assure you that we will not experience negative cash flows in future periods. Negative cash flows may adversely affect our financial condition, results of operations and prospects.*

The following table sets forth certain information relating to our cash flows for the fiscals indicated therein, as per the Restated Financial Information:

Net Cash Flow from/ (used in)	For the Fiscal Year ended March 31		
	2023 (₹ in Lakhs)	2022 (₹ in Lakhs)	2021 (₹ in Lakhs)
Investing Activities	(1.90)	(456.32)	(38.00)
Financing Activities	(224.77)	127.60	18.23

We may, in the future, experience negative cash flows as well. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. This situation may have an adverse effect on our cash flows, business, future financial performance and results of operations. For more information, see *“Management’s Discussion and Analysis of Financial Position and Results of Operations”* on page 224 of this Draft Prospectus.

Legal and regulatory risks

38. *Our Company was incorporated in 1996 and certain documents filed by us with the RoC and certain corporate records and other documents, are not traceable. We cannot assure you that such forms or records will be available at all or any time in the future.*

The secretarial records for certain past allotments of Equity Shares made by our Company could not be traced as the relevant information was not available in the records maintained by our Company, at the MCA Portal maintained by the Ministry of Corporate Affairs and the RoC, despite conducting internal searches and engaging an independent practicing company secretary to conduct online search at the MCA Portal maintained by the Ministry of Corporate Affairs and physical search of RoC. These allotments include allotment of (i) 3,000 equity shares of ₹10 each on March 28, 1997; (ii) 3,000 equity shares of ₹10 each on September 29, 1997 (iii) 4,000 equity shares of ₹10 each on March 05, 1998 (iv) 2,500 equity shares of ₹10 each on November 28, 1998, and (ii) 8,000 equity shares of ₹10 each on March 27, 1999 for which the relevant forms were not traceable.

While certain information in relation to the allotments have been disclosed in the section *“Capital Structure”* beginning on page 71, in this Draft Prospectus, based on audited financial statements of our Company, annual returns, and other corporate records of our Company, as available, we may not be able to furnish any further information, other than what is already disclosed in *“Capital Structure”* beginning on page 71, or assure that the other records will be available in the future. While no legal proceedings or regulatory action has been initiated against our Company in relation to untraceable secretarial and other corporate records and documents as of the date of this Draft Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future.

Further, until May 29, 2022, our Company was not supposed to submit any statement to the bank towards various loan facilities availed. The Bank vide Addendum to the master agreement, dated May 30, 2022, included a clause to submit statement of trade receivables to bank on a quarterly basis. During the Fiscal Year 2023, for the third quarter our Company had submitted delayed statement for trade receivable dated February 28, 2023, and had failed to submit the said statement thereafter. The said information has been emphasized by the Peer Reviewed Auditor, under the Section titled *“Restated Financial Statements – Annexure VII – Nature of security of long term and short term borrowings”* on page 198 of this Draft Prospectus.

39. *There are certain delays in payment of statutory dues by us. Any further delay in payment of statutory dues may attract financial penalties from the respective government authorities and in turn may have an adverse impact on our financial condition and cash flows.*

We have had instances of delay in the payment of certain statutory dues namely being GSTR9C and GSTR9 for the Fiscal Years ended March 31, 2022, 2021, 2020, 2019, 2018, 2017. There can be no assurance that such defaults/ delay may not arise in the future. This may lead to financial penalties from respective government authorities which may have a material adverse impact on our financial condition and cash flows.

40. *There are outstanding legal proceedings involving our Company and one of our Directors. Any adverse outcome in such proceedings may have an adverse impact on our reputation, business, financial condition, results of operations and cash flows.*

There are outstanding legal proceedings involving our Company and one of our Directors. These proceedings are pending at different levels of adjudication before various courts and regulatory authorities. Such proceedings could divert management time and attention and consume financial resources in their defense. Furthermore, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition, results of operations and future cash flows.

A summary of the outstanding proceedings involving our Company, Subsidiary, Directors, Promoters and Group Companies in accordance with requirements under the SEBI ICDR Regulations, as disclosed in this Draft Prospectus, to the extent quantifiable, are set out below:

Name of Entity	Criminal proceedings	Tax proceedings	Statutory or Regulatory Proceedings	Disciplinary actions by SEBI or Stock Exchanges against our Promoters	Material civil litigations	Aggregate amount involved (₹ in Lakhs)*
Company						
By the Company	Nil	Nil	1	Nil	1	88.18
Against the Company	Nil	Nil	Nil	Nil	Nil	Nil
Directors						
By the Directors	Nil	Nil	Nil	Nil	Nil	Nil
Against the Directors	Nil	Nil	Nil	Nil	Nil	Nil
Promoters						
By the Promoters	Nil	Nil	Nil	Nil	Nil	Nil
Against the Promoters	Nil	Nil	Nil	Nil	Nil	Nil

For further details of such legal proceedings and notices involving our Company and Promoters, see “**Outstanding Litigation and Material Developments**” on page 236.

We cannot provide any assurance that these legal proceedings will be decided in our favor. Decisions in such proceedings adverse to our interests may have an adverse effect on our business, results of operations and financial condition.

41. *Our Company is yet to apply for a No Objection Certificate from our lenders for the purpose of this Issue.*

Our Company is yet to apply for a No Objection Certificate from our lenders for the purpose of this Issue. Additionally, this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If we are unable in the future to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition. For further details of our loans, please refer to the Section titled “**Financial Indebtedness**” beginning on Page 235 of this Draft Prospectus.

Risks related to our Promoters and Promoter Group

42. We depend on the skills and experience of our Promoters, Key Managerial Personnel, Senior Management and employees with technical expertise for our business and future growth.

We benefit from the strategic guidance of our Promoters. If their involvement in our business reduces in the future, we may be unable to implement our plans as anticipated or maintain administrative control as we currently do, which in turn could adversely affect our business, results of operations, financial condition, and prospects. As our Promoters are presently engaged in other businesses, any increased focus on such real estate business may divert their attention from our business. For further information, see “*Our Promoters and Promoter Group – Interest of our Promoters*” on page 177 of Draft Prospectus.

Furthermore, our future performance will also depend on the continued service of our Key Managerial Personnel and Senior Management and persons with technical expertise, and the loss of any such employee and the inability to find an adequate replacement may impair our relationship with our customers and our level of technical expertise, which may adversely affect our business, results of operations, financial condition, and prospects. For details of our Board, Key Managerial Personnel and Senior Management, see “*Our Management – Key Managerial Personnel and Senior Management*” on page 173 of this Draft Prospectus.

In addition, our success in expanding our business will also partly depend on our ability to attract, retain, and motivate mid-to-senior management personnel. The table below sets forth the breakdown of our staff:

Sr. No.	Particulars	No. of Employees
1.	Technical	91
2.	Marketing	7
3.	Administrative	9
Total		107

We cannot assure you that we will be able to retain our staff or find adequate replacements in a timely manner, or at all. Competition for skilled personnel is intense, and we may need to increase our levels of employee compensation to attract and retain our staff. Even if we were to offer higher compensation and other benefits, there is no assurance that these individuals will continue to work for us or that we will successfully attract new talent.

The table below sets forth information on our attrition rates for the Fiscals stated:

Particulars	For the Fiscal Year ended March 31		
	2023	2022	2021
Number of Key Managerial Personnel and Senior Management	7	7	7
Attrition Rate(1) (Key Managerial Personnel including Senior Management)	14%	14%	14%
Total staff	106	108	107
Total staff employed	106	108	107
Attrition Rate(1)	8%	13%	12%

Attrition rate for a particular category is calculated as total number of employees who have resigned during the period divided by average number of employees as on 1st date of each month during such period.

We may also require significant time to hire and train replacement personnel when skilled personnel terminate their employment with us. The loss of the services of our staff could adversely affect our business, results of operations and financial condition.

43. We have not been able to obtain certain records of the educational qualification and experience of our promoter, Swati Rajurkar, and have relied on declarations and undertakings furnished by her for details of her profiles included in this Draft Prospectus.

One of our Promoter, *Swati Rajurkar*, has been unable to trace copies of documents pertaining to her educational qualifications and profile. While he has written a letter to the concerned university requesting for a copy of her degree certificates, a response from the university is awaited and there is no assurance that the university will respond to such letter in a timely manner or at all. Accordingly, reliance has been placed on certificates furnished by him to us and the LMs to disclose details of his educational qualifications in this Draft Prospectus. We and the LMs have been unable to

independently verify these details prior to inclusion in this Draft Prospectus. Further, there can be no assurances that she will be able to trace the relevant documents pertaining to his educational qualifications in future, or at all.

44. ***Our Promoters and certain of our Directors (some of whom are our Key Managerial Personnel) may have interests in the Company other than reimbursement of expenses incurred or normal remuneration or benefits. Further, we have acquired land from entities who are related to our Promoters and Directors.***

Our Promoters and certain of our Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses. In addition to the above, our Promoters and certain of our directors hold Equity Shares, pursuant to which they may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders.

We cannot assure you that our Promoter and our Directors will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future. This may give rise to a conflict of interest, which may adversely affect our business, financial condition, cash flows and results of operations.

For further details, see “***Our Management – Interest of Directors***”, “***Our Promoters and Promoter Group – Interest of our Promoters***” and “***Restated Financial Information – Note XXXVII – Related party disclosures***” on pages 165, 177, and 213 of this Draft Prospectus.

45. ***Our Promoters, who are also our Directors, and members of our Promoter Group will continue to hold a significant equity stake in our Company after the Issue and their interests may differ from those of the other shareholders.***

As of date of this Draft Prospectus, our Promoters, who are also our Directors, and Promoter Group hold the entire paid-up equity share capital of our Company. For details, see “***Capital Structure***” on page 71 of this Draft Prospectus. Our Promoters and members of our Promoter Group will therefore have the ability to influence our operations significantly. This will include the ability to appoint Directors to our Board and the right to approve significant actions at Board and Shareholders’ meetings including issue of Equity Shares, payment of dividends, determining business plans and mergers and acquisitions strategies. Furthermore, if, in the future, our Promoters and members of our Promoter Group are unwilling to dilute their equity stake in our Company and do not, or are unable to, fund us, our growth may be affected. In addition, the trading price of the Equity Shares could be materially adversely affected if potential new investors are disinclined to invest in us because they perceive disadvantages to a large shareholding being concentrated in the hands of our Promoters.

46. ***Our Promoters have provided personal guarantees to lenders for certain loan facilities availed of by certain members of our Promoter Group, which if invoked may adversely affect our Promoters’ ability to manage the affairs of our Company and which in turn may adversely impact our business and operations.***

Our Promoters have given guarantees in relation to certain borrowings availed by certain members of our Promoter Group. In the event of default in repayment of such borrowings by such Promoter Group members, these guarantees may be invoked by the lenders thereby adversely affecting our Promoters’ ability to manage the affairs of our Company and this, in turn, could adversely affect our business and operations.

The details of guarantees provided by our Promoters, namely being, Mr. Hitesh Dhiraklal Parikh, Mr. Sanjay Yadavrao Mokashi, Mr. Prashant Renukadas Rajurka, or our Directors, namely being, Mr. Meher Shrerram Pophali, and Mr. Manish Suresh Peshkar as of the date of this Draft Prospectus.

For further details in relation to the personal guarantees provided, see “***History and Certain Corporate Matters***” on page 156 of this Draft Prospectus.

47. ***Conflict of interest may arise out of common business objects shared by our Company and our Promoter Group.***

Some of our Promoter Group Entities are in similar business line as of our Company. As a result, there may be conflict of interests in allocating business opportunities between us and our Promoter Group Entities. We have not entered into any non-solicitation or non-compete agreement with such entity. There can be no assurance that such entities will not provide comparable services, expand their presence, solicit our employees or acquire interests in competing ventures in the locations or segments in which we operate. A conflict of interest may occur between our business and the business of such entity, which could have an adverse effect on our business, prospects, results of operations and financial condition.

For further details in relation to the personal guarantees provided, see the section titled “***Our Promoters***” and “***Our Group Companies***” on pages 175 and 180 of this Draft Prospectus.

Risks related to the Objects of the Issue

48. ***The Objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled “Objects of the Offer”. Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.***

Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time and consequently our funding requirements may also change. Our estimates may exceed the value that would have been determined by third party appraisals and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of the Issue is entirely at the discretion of our management. The Board after consideration and approval by the Audit Committee will disclose the utilisation of Net Proceeds under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilized. Our Company will issue a disclosure to the Stock Exchange, on a half-yearly basis, deviations, if any, in the Use of Proceeds of the Issue from the Objects stated in this Draft Prospectus or by way of an explanatory statement to the notice for a general meeting.

49. ***We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.***

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer section titled “*Object for the Issue*” beginning on Page 84 of this Draft Prospectus.

50. ***Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.***

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer section titled “*Objects of the Issue*” on page 84 of this Draft Prospectus.

51. ***In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Section “*Objects of the Issue*” on page 84 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issues based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business and development plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

52. ***We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders for such capital expenditure.***

We intend to utilise major portion of the Net Proceeds for setting up the funding capital expenditure towards server workstations, peripheral with softwares and services of compu-link, key computers, and Digi-Tech Sakes, and working capital requirements. While we have obtained quotations from different vendors in relation to the aforementioned subject required for funding such capital expenditure, we are yet to place orders for such objects stated above. Accordingly, orders worth ₹1,960.00 Lakhs, which constitute 100% of the total estimated costs are yet to be placed. There can be no assurance that we will be able to place orders for such in a timely manner or at all. Further, in the event of any delay in placement of such orders, the proposed schedule for implementation and deployment of the Net Proceeds may be extended or may vary accordingly.

Other risks

53. ***Product liability and other civil claims and costs incurred because of product recalls could harm our business, results of operations and financial condition.***

We face an inherent business risk of exposure to product liability or recall claims in the event that our products are damaged. While there have been no such claims in the past, we cannot assure you that we will not experience any material product liability claims in the future or that we will not incur significant costs to defend any such claims. We cannot assure you that such claims will not be brought against us in the future, and any adverse determination may have an adverse effect on our business, results of operations and financial condition and reputation.

54. ***If there is deterioration in the reputation and market perception of our brands, or if our sales and marketing efforts are ineffective, it could adversely affect our sales, profitability and the implementation of our growth strategy.***

Our brand and reputation are among our important assets, and the performance and quality of products are critical to the

success of our business. In particular, we operate and sell our products under our “ HospyCare”,  Micropro brand which has been registered under class 9, 42, 35 of the Trademarks Act. The success of our products depends on the effectiveness of the product design, quality of the materials. While there have been no such instances of deterioration in our brand and reputation in the past, any adverse change in the quality of products rendered by us including due to reasons beyond our control, or allegations of defects, even when false, at any of our manufacturing facilities could tarnish the image of our brands, result in negative reviews and feedback from our customers. See, “***Our Business***” on page 117 of this Draft Prospectus for further details.

Furthermore, our brand building also depends on the effectiveness of sales and promotional activities and choice of channel partners. There can be no assurance that our efforts in these areas would always be effective. Any adverse development or decline in our brand value and reputation may adversely affect our business, results of operations and financial condition.

55. ***We may not be able to detect or prevent fraud or other misconduct committed by our employees or third parties.***

Fraud or other misconduct by our employees, such as unauthorized business transactions, bribery may be difficult to detect or prevent. It could subject us to financial loss while seriously damaging our reputation. While we have not experienced any material instances of fraud or other misconduct in the past, we cannot assure you that fraud or other misconduct will not occur in the future. In such event, our ability to effectively attract prospective stakeholders, obtain financing on favorable terms and conduct other business activities may be impaired.

56. ***Industry information included in this draft prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial, and other industry information is either complete or accurate.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this draft prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

57. ***This Draft Prospectus contains certain non-GAAP financial measures and certain other selected statistical information related to our operations and financial performance. These non-GAAP measures and statistical information may vary from any standard methodology that is applicable across the manufacturing industry, and therefore may not be comparable with financial or statistical information of similar nomenclature computed and presented by other manufacturing companies.***

Certain non-GAAP financial measures and certain other statistical information relating to our operations and financial performance have been included in this Draft Prospectus. We compute and disclose such non-GAAP financial measures and such other statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of manufacturing companies, many of which provide such non-GAAP financial measures and other statistical and operational information when reporting their financial results. These non-GAAP financial measures and other statistical and other information relating to our operations and financial performance may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other manufacturing companies. For further details, see “**Management’s Discussion and Analysis Of Financial Condition And Results Of Operations**” on page 224.

EXTERNAL RISK FACTORS

58. ***Political, economic or other factors including but not limited to any changes in laws, rules and regulations and legal uncertainties that are beyond our control may have an adverse impact on our business, results of operations, financial condition and cash flows.***

External risks may have an adverse impact on our business, results of operations, financial condition, and cash flows, should any of them materialize. For instance, (i) an increase in interest rates may adversely impact our access to capital and increase our borrowing costs; (ii) a sustained period of high inflation may increase our employee costs and decrease demand for our products and services, which may have an adverse effect on our profitability and competitive advantage; (iii) a downgrade of India’s sovereign rating by international credit rating agencies may adversely impact our access to capital and increase our borrowing costs; (iv) a change in tariff and non-tariff barriers in countries where we import raw materials and export our products may affect our financial condition; (v) a decline in India’s foreign exchange reserves may affect liquidity and interest rates in the Indian economy as well as the valuation of the Indian Rupee; (vi) political instability, resulting from a change in government or in economic and Fiscal policies, may adversely affect economic conditions in India; (vii) the occurrence of natural or man-made disaster or epidemic or pandemic such as Covid-19 may adversely affect economic conditions in India; and (viii) civil unrest, acts of violence, terrorist attacks, regional conflicts or situations of war may adversely affect the financial markets, which may impact our business and financial condition. For example, in February 2022, Russia commenced military operations in Ukraine, and the conflict is currently on-going as of the date of this Draft Prospectus.

Lastly, changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, which may adversely affect our business, results of operations, financial condition, and prospects. For instance, the Government of India has announced the union budget for the Fiscal Year ending 2023, pursuant to which the Finance Bill, 2022, has introduced various amendments. The Finance Bill has received assent from the President of India on March 30, 2021, and has been enacted as the Finance Act, 2022. We have not fully determined the impact of these recent and proposed laws and regulations on our business. As such, there is no certainty on the impact that the Finance Act, 2022 may have on our business and operations or on the industry in which we operate.

59. ***A slowdown in economic growth in other countries and jurisdictions, such as Europe, China and the United States, could cause our business to suffer.***

The Indian financial markets and economy are influenced by market and economic conditions in other countries, including conditions in the United States, Europe, and certain emerging economies in Asia. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and us. Furthermore, concerns relating to trade wars between large economies such as the United States of America and China may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the

Indian economy. Following the United Kingdom's exit from the European Union ("**Brexit**"), there still remains significant uncertainty around the impact of Brexit on the general economic conditions in the United Kingdom and the European Union and any consequential impact on global financial markets.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries, affecting economic stability in India which may have an adverse effect on our business.

60. *If inflation rises in India, increased costs may result in a decline in profits.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation in the recent past. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials, and other expenses. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. While the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect. There can be no assurance that inflation in India will not worsen.

61. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

India's sovereign debt rating could be downgraded due to several factors, including changes in tax or Fiscal policy or a decline in India's foreign exchange reserves, all of which are outside the control of our Company. Our borrowing costs and our access to the debt capital markets depend significantly on the sovereign credit ratings of India. Any adverse reactions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

62. *Changes in trade policies may affect us.*

Any change in policies by the countries, in terms of tariff and non-tariff barriers, from which our suppliers import their raw materials, components and/or countries to which we export our products, may have an adverse effect on our profitability.

Risks related to the Issue and the Equity Shares

63. *Our ability to pay dividends in the future will depend on our future earnings, cash flows, working capital requirements, capital expenditures, financial condition, and restrictive covenants of our financing arrangements.*

Our Company did not declare any dividend in the past. Any dividends to be declared and paid in the future are required to be recommended by our Company's Board of Directors and approved by our Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act, 2013, as amended.

For further information, see "**Dividend Policy**" on page 185 of this Draft Prospectus, the amount of our future dividend payments, if any, will depend on our future earnings, cash flows, financial condition, working capital requirements, capital expenditures, restrictive covenants of our financing arrangements, applicable Indian legal restrictions and other factors. We cannot assure you that we will generate sufficient revenues to cover our operating expenses and, as such, pay dividends to our Company's shareholders consistent with our past practices, or at all. We may decide to retain all of our future earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. Additionally, our ability to pay dividends may also be restricted by the terms of financing arrangements that we may enter into. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. As a result, we may not declare dividends in the foreseeable future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

64. *Foreign currency exchange rate fluctuations may have an adverse effect on net dividends to foreign investors*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates

during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

65. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, , appointment of monitoring agency is required only for Issue size above ₹10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (LODR) Regulations. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the Stock Exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

66. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.*

Our Promoter's average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price may be decided by the Company acting through the IPO Committee, in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and built-up of Equity Shares by our Promoter in our Company, please refer to "**Capital Structure**" on page 71 of this Draft Prospectus.

67. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company, in consultation with the Lead Manager, and through the Fixed Price Process. This price will be based on numerous factors, as described under "**Basis for Issue Price**" on page 95 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of equity shares may be influenced by many factors, some of which are beyond our control, including:

- the failure of security analysts to cover the Equity Shares after this Issue, or changes in the estimates of our performance by analysts;
- the activities of competitors and business partners;
- future sales of the Equity Shares by our Company or our shareholders;
- investor perception of us and the industry in which we operate;
- our quarterly or annual earnings or those of our competitors;
- developments affecting Fiscal, industrial, or environmental regulations;
- results of operations that vary from the expectations of securities analysts and investors;
- fluctuations in stock market prices and volume;
- the public's reaction to our press releases and adverse media reports; and
- general economic and stock market conditions.

The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to resell your Equity Shares at or above the Issue Price.

68. ***QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares) at any stage after submitting an Application, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.***

Pursuant to the SEBI (ICDR) Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw their Application (in terms of quantity of Equity Shares) at any stage after submitting an Application. Similarly, Retail Individual Investors can revise or withdraw their Application at any time during the Issue Period and until the Issue Closing Date, but not thereafter. Therefore, QIBs and Non-Institutional Investors will not be able to withdraw or lower their Application following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

69. ***The Equity Shares have never been publicly traded and after the Issue, the Equity Shares may experience price and volume fluctuations and an active trading market for the Equity Shares may not develop, which may mean you may be unable to resell your Equity Shares at or above the Issue Price, or at all.***

There has been no public market for the Equity Shares of our Company prior to this Issue and an active trading market for the Equity Shares may not develop or be sustained after this Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Furthermore, the price at which the Equity Shares are initially traded may not correspond to the prices at which the Equity Shares will trade in the market subsequent to this Issue.

The Issue Price of the Equity Shares is proposed to be determined by the Company in consultation with the Lead Manager and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may fluctuate after this Issue as a result of several factors, including volatility in the Indian and global securities markets, the results of our operations, the performance of our competitors, developments in the automotive industry and changing perceptions in the market about investments in general and our Company including adverse media reports on us or changes in the estimates of our performance or recommendations by financial analysts.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could mean that you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

70. ***Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as whether STT is paid, the quantum of gains and any available treaty exemptions. Furthermore, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India.

Furthermore, if non-resident shareholders of entities holding the Equity Shares exit by way of sale or redemption of the shares held by them, such non-resident shareholders could be taxed on capital gains in India if the offshore shares derive substantial value from Indian assets, subject to certain exemptions.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument (“MLI”), if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed, or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends. Furthermore, provisions of the MLI have effect on India’s tax treaties, including tax rates specified therein, from Fiscal Year 2021 onwards where the other country has also ratified the MLI and notified the relevant tax treaty as a Covered Tax Agreement.

General Anti-Avoidance Rules (“GAAR”) seeks to deny the tax benefit to any arrangement, whose main purpose is to obtain a tax benefit, subject to the satisfaction of certain tests. If GAAR provisions are invoked, the tax authorities have wide powers, including cancellation of a proposed transaction or ignoring the impact of a transaction undertaken by the company, denial of tax benefit under the IT Act, denial of a benefit available under a tax treaty, etc.

Similarly, any business income realised from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller.

Furthermore, the Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company’s business and operations.

Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company’s business, results of operations, financial condition and cash flows.

71. *Any future issuance of Equity Shares or convertible securities or other equity linked instruments by us may dilute your shareholding, and significant sales of Equity Shares by our Promoters or major Shareholders, may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including a primary offering or convertible securities or other equity linked instruments, may lead to the dilution of investors’ shareholdings in our Company and may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt-financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. Additionally, the disposal, pledge, or encumbrance of the Equity Shares by any of our Promoters or the perception that such transactions may occur, may affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that our Promoters will not dispose of further Equity Shares after the completion of the Issue (subject to compliance with the lock-in provisions under the SEBI (ICDR) Regulations) or pledge or encumber their Equity Shares.

72. *You will not be able to sell any of the Equity Shares you purchase in the Issue on the Stock Exchanges until the Issue receives the appropriate trading approvals.*

The Equity Shares will be listed on BSE Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. The Allotment of Equity Shares in this Issue and the credit of such Equity Shares to the applicant’s demat account with depository participant and listing is expected to commence within the period as may be prescribed under applicable law. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors’ ability to dispose their Equity Shares. We cannot assure that the Equity Shares will be credited to investors’ demat accounts, or that trading in the Equity Shares will commence, within the time periods prescribed under law.

73. *The requirements of being a listed company may strain our resources.*

The requirements of being a listed company may strain our resources. We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators, and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations which will require us to file audited annual and unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

74. *Foreign investors are subject to foreign investment restrictions under Indian law, which may adversely affect the market price of the Equity Shares.*

Under the exchange control regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such requirements or falls under any of the exceptions specified by the RBI, then the approval of the RBI will be required. Additionally, shareholders who seek to convert the Indian Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the Indian income tax authority. We cannot assure investors that any required approval from the RBI or any other Indian government agency can be obtained on any particular terms, or at all.

Furthermore, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the GoI, as prescribed in the Consolidated FDI Policy and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular term or at all.

For further information, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 300 of this Draft Prospectus.

75. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India is required to offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the Equity Shares who have voted on such resolution. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

76. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

WORLD ECONOMIC OUTLOOK

Tentative signs in early 2023 that the world economy could achieve a soft landing—with inflation coming down and growth steady—have receded amid stubbornly high inflation and recent financial sector turmoil. Although inflation has declined as central banks have raised interest rates and food and energy prices have come down, underlying price pressures are proving sticky, with labor markets tight in a number of economies. Side effects from the fast rise in policy rates are becoming apparent, as banking sector vulnerabilities have come into focus and fears of contagion have risen across the broader financial sector, including nonbank financial institutions. Policymakers have taken forceful actions to stabilize the banking system. As discussed in depth in the Global Financial Stability Report, financial conditions are fluctuating with the shifts in sentiment.

In parallel, the other major forces that shaped the world economy in 2022 seem set to continue into this year, but with changed intensities. Debt levels remain high, limiting the ability of fiscal policymakers to respond to new challenges. Commodity prices that rose sharply following Russia’s invasion of Ukraine have moderated, but the war continues, and geopolitical tensions are high. Infectious COVID-19 strains caused widespread outbreaks last year, but economies that were hit hard—most notably China—appear to be recovering, easing supply-chain disruptions. Despite the fillips from lower food and energy prices and improved supply-chain functioning, risks are firmly to the downside with the increased uncertainty from the recent financial sector turmoil.

The baseline forecast, which assumes that the recent financial sector stresses are contained, is for growth to fall from 3.4 percent in 2022 to 2.8 percent in 2023, before rising slowly and settling at 3.0 percent five years out—the lowest medium-term forecast in decades. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7 percent in 2022 to 1.3 percent in 2023. In a plausible alternative scenario with further financial sector stress, global growth declines to about 2.5 percent in 2023—the weakest growth since the global downturn of 2001, barring the initial COVID-19 crisis in 2020 and during the global financial crisis in 2009—with advanced economy growth falling below 1 percent. The anemic outlook reflects the tight policy stances needed to bring down inflation, the fallout from the recent deterioration in financial conditions, the ongoing war in Ukraine, and growing geoeconomic fragmentation. Global headline inflation is set to fall from 8.7 percent in 2022 to 7.0 percent in 2023 on the back of lower commodity prices but underlying (core) inflation is likely to decline more slowly. Inflation’s return to target is unlikely before 2025 in most cases. Once inflation rates are back to targets, deeper structural drivers will likely reduce interest rates toward their pre-pandemic levels.

Risks to the outlook are heavily skewed to the downside, with the chances of a hard landing having risen sharply. Financial sector stress could amplify and contagion could take hold, weakening the real economy through a sharp deterioration in financing conditions and compelling central banks to reconsider their policy paths. Pockets of sovereign debt distress could, in the context of higher borrowing costs and lower growth, spread and become more systemic. The war in Ukraine could intensify and lead to more food and energy price spikes, pushing inflation up. Core inflation could turn out more persistent than anticipated, requiring even more monetary tightening to tame. Fragmentation into geopolitical blocs has the scope to generate large output losses, including through its effects on foreign direct investment.

Policymakers have a narrow path to walk to improve prospects and minimize risks. Central banks need to remain steady with their tighter anti-inflation stance, but also be ready to adjust and use their full set of policy instruments—including to address financial stability concerns—as developments demand. Fiscal policymakers should buttress monetary and financial

policymakers' actions in getting inflation back to target while maintaining financial stability. In most cases, governments should aim for an overall tight stance while providing targeted support to those struggling most with the cost-of-living crisis. In a severe downside scenario, automatic stabilizers should be allowed to operate fully, and temporary support measures be utilized as needed, fiscal space permitting. Medium-term debt sustainability will require well-timed fiscal consolidation but also debt restructuring in some cases (Chapter 3). Currencies should be allowed to adjust to changing fundamentals, but deploying capital flow management policies on outflows may be warranted in crisis or imminent crisis circumstances, without substituting for needed macroeconomic policy adjustment. Measures to address structural factors impeding supply could ameliorate medium-term growth. Steps to strengthen multilateral cooperation are essential to make progress in creating a more resilient world economy, including by bolstering the global financial safety net, mitigating the costs of climate change, and reducing the adverse effects of geoeconomic fragmentation.

OVERVIEW OF THE GLOBAL INFORMATION TECHNOLOGY MARKET

The global information technology market grew from \$8179.48 billion in 2022 to \$8852.41 billion in 2023 at a compound annual growth rate (CAGR) of 8.2%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, causing inflation across goods and services and affecting many markets across the globe. The information technology market is expected to grow to \$11995.97 billion in 2027 at a CAGR of 7.9%.

The information technology (IT) market consists of revenues earned by entities by providing IT services such as computer networking, broadcasting, systems design services and information distribution technologies like television and telephones and other equipment used during the process. The market value includes the value of related goods sold by the service provider or included within the service offering.

The information technology market also includes sales of computers, computer peripherals and telecommunications equipment which are used in providing IT services. Values in this market are 'factory gate' values, that is the value of goods sold by the manufacturers or creators of the goods, whether to other entities (including downstream manufacturers, wholesalers, distributors and retailers) or directly to end customers.

The value of goods in this market includes related services sold by the creators of the goods. Only goods and services traded between entities or sold to end consumers are included.

Information technology (IT) is the use of computers, storage, networking and other physical devices, infrastructure and processes to create, process, store, secure and exchange all forms of electronic data.

Asia-Pacific was the largest region in the information technology (IT) market in 2022. North America was the second largest region of the information technology market.

The regions covered in the information technology market are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.

The main type of information technology (IT) are IT services, computer hardware, telecom, and software products. Computer hardware is the physical components that a computer system requires to function and encompasses everything within a PC or laptop. The services are used by large, small, and medium enterprises of financial services, retail and wholesale, manufacturing, healthcare and others.

The demand for cloud computing services is expected to drive the demand for IT services during the forecast period. In the cloud computing model, data is stored on the internet by a cloud computing provider, who manages and operates data storage as a service. Many companies are now choosing applications hosted in the cloud for their day-to-day operations. For example, according to statistics provided by hostingtribunal.com, 60% of computing workloads were running in the public cloud in 2019. Similarly, 94% of enterprise workloads are expected to be processed by cloud data centers in 2021. Companies are also opting for cloud-based data storage, thus boosting the demand for IT services.

The outbreak of COVID-19 disease (COVID-19) has acted as a significant restraint on the information technology market in 2020 as supply chains were disrupted due to trade restrictions and employees working for these establishments faced difficulties related to infrastructure and communication owing to lockdowns imposed by governments globally, forcing them to work from home. COVID-19 is an infectious disease with flu-like symptoms including fever, cough, and difficulty in breathing. The virus

was first identified in 2019 in Wuhan, Hubei province of the People's Republic of China and spread globally, including Western Europe, North America, and Asia. Steps by national governments to contain the transmission have resulted in a decline in economic activity, with countries entering a state of 'lock down,' and the outbreak had a negative impact on businesses throughout 2020 and into 2021.

However, it is expected that the information technology market will recover from the shock across the forecast period as it is a 'black swan event and not related to ongoing or fundamental weaknesses in the market or the global economy. Over the past five years there has been an increasing prevalence of low cost open source alternatives. Open source has become a preferred platform for developing new technology. In the past, software publishers would open source software that was not making money, but now companies are open sourcing software to increase their presence and share in the market. Supabase, a YC-incubated startup that offers developers an open-source alternative, announced that it had raised a \$6 million in funding to create new open-source tools.

The countries covered in the information technology (IT) market are Argentina, Australia, Austria, Belgium, Brazil, Canada, Chile, China, Colombia, Czech Republic, Denmark, Egypt, Finland, France, Germany, Hong Kong, India, Indonesia, Ireland, Israel, Italy, Japan, Malaysia, Mexico, Netherlands, New Zealand, Nigeria, Norway, Peru, Philippines, Poland, Portugal, Romania, Russia, Saudi Arabia, Singapore, South Africa, South Korea, Spain, Sweden, Switzerland, Thailand, Turkey, UAE, UK, USA, Venezuela and Vietnam. Asia-Pacific was the largest region in the information technology (IT) market in 2022. North America was the second largest region of the information technology market. The regions covered in the information technology market are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

Market Size

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

B. SIGNIFICANT ACCOUNTING POLICIES

1.01 BASIS OF ACCOUNTING AND PREPARATION OF FINANCIAL STATEMENTS

The restated summary statement of assets and liabilities of the Company as at March 31, 2023, 2022 and 2021 and the related restated summary statement of profits and loss and cash flows for the year ended March 31, 2023, 2022 and 2021 (herein collectively referred to as ("Restated Summary Statements")) have been compiled by the management from the audited Financial Statements for the year ended on March 31, 2023, 2022 and 2021. Restated Summary Statements have been prepared to comply in all material respects with the provisions of Part I of Chapter III of the Companies Act, 2013 (the "Act") read with Companies (Prospectus and Allotment of Securities) Rules, 2014, Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 ("ICDR Regulations") issued by SEBI and Guidance note on Reports in Companies Prospectuses (Revised 2019) ("Guidance Note"). Restated Summary Statements have been prepared specifically for inclusion in the offer document to be filed by the Company with the NSE in connection with its proposed IPO. The Company's management has recast the Financial Statements in the form required by Schedule III of the Companies Act, 2013 for the purpose of restated Summary Statements.

The Restated Financial Statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, including the Accounting Standards as prescribed by the Section 133 of the Companies Act, 2013 ("the Act") read with Rule 7 of Companies (Accounts) Rules, 2014.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III to the Companies Act, 2013.

1.02 USE OF ESTIMATES

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

1.03 PROPERTY, PLANT & EQUIPMENT

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

1.04 DEPRECIATION / AMORTISATION

Tangible Assets:

Depreciable amount of assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation on tangible fixed assets has been provided using straight line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

1.05 IMPAIRMENT OF ASSETS

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of the recoverable value.

1.06 FOREIGN CURRENCY TRANSACTIONS

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount, the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

Exchange differences arising on the settlement of monetary items or on reporting such monetary items of company at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise except in cases where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying cost of such assets.

1.07 FOREIGN CURRENCY TRANSLATION

Initial Recognition

A foreign currency transaction is any transaction that is denominated in or needs to settle in any foreign currency. PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, an RII also had the option to submit the ASBA Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six working days.

Phase II:

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III:

The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three working days.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment ('FDI') through press notes and press releases.

The DPIIT issued the Consolidated FDI Policy, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular. Pursuant to Press Note 2 (2021 Series) issued by DPIIT, the FDI Policy was amended to reflect the increase in FDI limit up to 74% foreign investment under the automatic route.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government, OCBs cannot participate in the Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (i) within the United States only to 'qualified institutional buyers' (as defined in Rule 144A under the Securities Act and referred to in this Draft Prospectus as 'U.S. QIBs') in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act, and (ii) outside the United States in 'offshore transactions' in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur. For the avoidance of doubt, the term 'U.S. QIBs' does not refer to a category of institutional investors defined under applicable Indian regulations and referred to in this Draft Prospectus as 'QIBs'.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Applicants are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.
