Performance Highlights – YTD

Key Highlights

- ✓ While the overall monsoon was just 1% below the long period average, the erratic nature of the same in Q2FY22 had a significant impact on the overall agricultural activities across India
 - Monsoon were lower than normal in the month of July and August, while the month of September witnessed excess rainfall leading to a decline in the overall crop acreage
 - Also, flood-like situations in key agricultural geographies across India further compounded the problem and impacted the spraying activity in the fields
- ✓ The base of Q2FY21 was high, as on account of COVID-19 pandemic in Q1 FY21, there was spill over of sales from the first quarter to second quarter in last fiscal year
- ✓ The company continue to focus on disciplined sales through monitoring ground level liquidation, consumption patterns and disciplined credit policies along with collections from channel partners
- ✓ Despite inconsistent rainfall and unfavourable climatic environment during the 2nd quarter of current financial year, we are able to maintain our performance in Q2FY22 and also record 9% y-o-y growth in H1FY22, better than the overall industry estimates
- ✓ Able to sustain operating margins on higher base on back of initiatives taken to pass on the input cost increases
