PRESS RELEASE

**Orient Technologies Reports Strategic Wins in a Challenging Q3 FY26;
Strengthens Long-Term Positioning Through Landmark Contracts**

Mumbai, 13th February 2026: Orient Technologies Ltd., a leading end-to-end IT infrastructure services player in India, has announced its financial results for the third quarter and nine months ended December 31st, 2025.

Q3 FY26 Overview

The third quarter of FY26 was marked by persistent global supply-chain disruptions, particularly impacting end-user computing (EUC) and data-center hardware availability. Acute shortages of semiconductor chipsets and sustained AI-led demand for advanced data-center infrastructure led to extended lead times and input cost inflation across servers, storage, and enterprise devices.

As a result, the Company witnessed temporary margin pressure during the quarter. Additionally, the loss of a large hyperscaler cloud services client and associated OEM savings-plan costs impacted in-quarter revenue and profitability.

While financial performance for Q3 reflects these headwinds, the Company continued to prioritize contractual commitments, customer continuity, and long-term strategic relationships.

Highlights of Consolidated Financial Performance – Q3 FY26:

- Revenue from operations stood at Rs. 200.10 crore in Q3 FY26 as against Rs. 206.85 crore in Q3 FY25.
- EBITDA was at Rs. 3.95 crore in Q3 FY26 as against Rs. 18.95 crore in Q3 FY25.
- Profit Before Exceptional Items and Tax was at Rs. (0.81) crore in Q3 FY26.

Highlights of Consolidated Financial Performance – 9M FY26:

- Revenue from operations stood at Rs. 685.47 crore in 9M FY26 as against Rs. 578.85 crore in 9M FY25.
- EBITDA was at Rs. 43.24 crore in 9M FY26 as against Rs. 53.32 crore in 9M FY25.
- Profit Before Exceptional Items and Tax was at Rs. 32.49 crore in 9M FY26.

Segmental Revenue:

The contribution to revenue from operations for each vertical for Q3 FY26 stands as follows:

- Telecommunication: 2.47%
- BSFI: 27.39%
- Govt & PSU: 19.19%
- ITeS: 19.17%
- Mid-Market & Others*: 31.78%

*Mid-market & Others includes healthcare, manufacturing, infrastructure, real estate, logistics, education, e-commerce, conglomerates, energy, and service industries, etc.

Strategic Wins in Q3 FY26

Despite supply-side headwinds, Orient Technologies secured multiple high-value contracts across government, pharma, utilities, and digital commerce — reinforcing its services-led positioning.

Digital India Corporation Mandate

The Company secured a **three-year managed services contract** from Digital India Corporation (DIC), with an average quarterly billing of **INR 15+ crore**.

The engagement covers end-to-end managed services for national digital platforms including UMANG and DigiLocker, spanning infrastructure, application support, security, scalability, and modernization.

This win strengthens Orient's presence in mission-critical government digital infrastructure.

Hybrid Cloud Infrastructure – Leading Pharmaceutical Company

The Company secured a **INR 2.65 crore engagement** to expand data-center storage and implement disaster recovery capabilities for a leading power utility, enhancing business continuity and compliance readiness.

Data Centre Expansion – Power Utility

The Company secured a **INR 2.65 crore engagement** to expand data-center storage and implement disaster recovery capabilities for a leading power utility, enhancing business continuity and compliance readiness.

Quick Commerce Network Modernization

In the Quick Commerce segment:

- A leading player awarded a INR 2.8 crore SD-WAN-as-a-Service contract to improve network visibility and dark-store uptime.
- Another company placed a INR 6 crore order for a complete network stack, including firewall and Wi-Fi solutions for warehouse operations.

New Turbe Service Delivery Centre Launched:

Orient Technologies Limited inaugurated a state-of-the-art Service Delivery Centre (SDC) in Turbe, Navi Mumbai, equipped with advanced NOC and SOC capabilities.

The facility enables 24/7 infrastructure monitoring, proactive threat detection, digital forensics, and performance management through a high-availability, automation-driven architecture. Designed to support multi-vendor, cloud, cybersecurity, and end-user environments, the SDC provides a secure, scalable platform aligned with global compliance standards.

Management Commentary:

Commenting on the results, **Mr. Ajay Sawant, Chairman & Managing Director**, Orient Technologies Ltd., said: “Q3 was a challenging quarter for the industry, driven primarily by global semiconductor shortages and supply-chain disruptions affecting end-user computing and data-centre hardware. AI-led data-centre investments globally have absorbed a disproportionate share of advanced chip capacity, resulting in extended lead times and pricing pressures across mainstream enterprise infrastructure.

During the quarter, we faced non-availability of critical hardware components. Despite cost inflation, we executed several contractually committed orders to honour long-standing customer relationships. While this created temporary margin pressure, it strengthened trust and reinforced our credibility as a dependable partner.

On the services side, the loss of a large hyperscaler cloud services client had an immediate impact on revenue and margins. Additionally, we absorbed OEM savings-plan costs associated with this client without corresponding revenue.

We expect supply-side challenges to continue into Q4. However, our strategic focus on managed services, subscription-led models such as DaaS, cybersecurity, and unified infrastructure management positions us well for recovery and margin normalization.

We remain committed to disciplined execution, strengthening OEM partnerships, and building long-term enterprise relationships. We thank our customers, employees, and

shareholders for their continued trust as we navigate short-term headwinds while staying firmly focused on sustainable value creation.”

Bonus Issue:

The Board of Directors, at its meeting held on January 06, 2026, approved and allotted 41,64,174 Bonus Equity Shares of ₹10 each in a 1:10 ratio to eligible shareholders as on January 05, 2025.

Following the allotment, the Company’s paid-up equity share capital increased from ₹41.64 crore (4,16,41,742 shares) to ₹45.81 crore (4,58,05,916 shares).

About Orient Technologies Ltd.

Orient Technologies Ltd. is an IT solutions and services provider specializing in innovative cloud and data management solutions for enterprises. Dedicated to driving digital transformation, the company offers scalable services designed to enhance operational efficiency and business resilience.

Orient Technologies is committed to investing in cutting-edge technologies and exploring new market opportunities. The company’s strategic focus is on expanding its cloud offerings and bolstering data security solutions, which are essential in today’s rapidly evolving business environment.
