Industry Slowdown and Client Onboarding Challenges: The IT and professional services industry experienced a global slowdown in the first half of FY 2023-24. Our critical clients halted the hiring of new employees, causing a significant decline in fresh onboarding opportunities. This slowdown has significantly impacted our gross additions and put strain to manpower suppliers like us.

Strategic Operational Changes and Leadership Transition: Following a comprehensive review of our operations, DTL made strategic decisions to enhance efficiency and value. This included hiring key

employees like Mr. Siva Prasad Nanduri as our CEO. Additionally, we underwent significant changes such as expanding our office space, and transitioning to a stronger in-house team starting from June, albeit at increased costs.

Increased Overheads and Future Investment Strategy: As a result of the aforementioned changes, our Selling, General & Administrative overheads (SGA) significantly rose, impacting our bottom line. Despite this, the company views these expenses as necessary investments that will yield benefits in the upcoming financial years, beginning FY 24-25.

QUALIFICATIONS OF AUDITORS

There are no qualifications included by the Statutory Auditor in their audit reports and hence no effect is required to be given in the Restated Financial Statements.

2. *The Company has incurred Losses during the nine months period ended on December 31, 2023.*

We have incurred restated loss for the 9 months period ended on December 31, 2023 of Rs.171.70 Lakh. For further details, see “Management’s Discussion and Analysis of Financial Condition And Results Of Operation” on page number 199 of this Draft Red Herring Prospectus. There is no surety about the time frame by which we may be in position to recover from the losses and become profitable. Any failure to increase our revenue sufficiently to keep pace with our investments and other expenses could prevent us from achieving profitability or positive cash flow on a consistent basis. If we are unable to successfully address these risks and challenges as we encounter them, our business, cash flows, financial condition and

results of operations could be adversely affected. If we are unable to generate adequate revenue growth and manage our expenses and cash flows, we may continue to incur significant losses in the future.

3. ***Our top ten customers contribute approximately 88% of our revenues for the financial period ended December 31, 2023. Any loss of business from one or more of them may adversely affect our revenues and profitability.***

Our top ten clients contribute approximately 88% of our revenues for the financial period ended December 31, 2023. Any decline in our quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

4. ***Significance of recruiting, training and retaining qualified and experienced personnel who meet the IT Professional Services requirements of our clients may adversely affect our reputation, business prospects and future financial performance.***

Operations and growth of our business is totally relying on the factor that we are able to find, test, train, update, retain and deploy skilled IT professionals as per needs of our clients. Attracting and retaining qualified personnel who possess the skills and experience necessary to meet the requirements of our clients is significant. For any organization's smooth business operations and growing financial performance its necessary that it is able to retain talented professionals else, it may be adversely affected. In addition, we must continually evaluate and upgrade our database of available qualified IT professionals through recruiting and training programs to keep pace with changing client needs and emerging technologies. Competition for individuals with proven professional skills and experience is intense, and we expect demand for such individuals to remain strong in the foreseeable future. In particular, our IT professional services business involves skilled personnel, and our success depends upon our ability to attract, develop, motivate and retain skilled manpower. Qualified personnel may not be available to us in sufficient numbers and on terms of employment acceptable to us. We may not be able to effectively meet the expectations of our clients due to our failure to identify personnel with the requisite skills, experience or other attributes, and our training programs may not succeed in developing effective skills in a timely manner or at all.

5. ***Our intellectual property rights may be infringed upon or we may infringe the intellectual property rights of third parties.***

As on date of this Draft Red Herring Prospectus our Logo is duly registered. For further details please refer chapter title "Our Business" on page number 99 of this Draft Red Herring Prospectus. However, there is no assurance that our Trademark/Wordmark will not be infringed upon. Depending on whether we are able to discover any such infringement of our Trademark/wordmark or successfully enforce our legal rights in the jurisdictions where such infringements may occur, our business and branding may suffer as a result of any misuse of our trademark/wordmark. In such circumstances, our reputation and business may

be adversely affected. Further, if we decide to pursue action against such infringements to protect our reputation, it could result in diversion of our resources and our financial results may be adversely affected. Similarly, we may also infringe the intellectual property rights of third parties in the use of our Trademark in our operations. Although we are not aware of any such infringement by us, there is no assurance that we will not infringe or have not infringed the intellectual property rights of any third party. In the event of any such infringement, we may be subject to our claims or actions and our business, reputation, financial condition, and results of operations may be adversely affected.

6. *Our inability to cater to and suitably update and enhance our offerings may adversely affect our revenues and, thus, our business, results of operations and prospects.*

Our customers require variety of service offerings suited to different requirements. Our failure to introduce innovative service solutions on an on-going basis or to anticipate or to respond adequately to changing client requirements could adversely affect our business and financial results.

7. *Our ability to retain the present number of customers serviced by us and attract new customers is heavily dependent upon various factors including our reputation and our ability to maintain a high level of service quality. Any failure by us to retain or attract customers may impact its business and revenues.*

We believe that our strong brand reputation has helped us to attract and retain our customers. As a result, our reputation and perception of our brands are critical to our business. Our business heavily relies on our reputation, quality and popularity of our service, our visibility and perception amongst customers. Therefore, it is important that we retain the trust placed on us by our customers. At the same time, we must also continue to attract more number of customers at a consistent rate. Though, we attempt to retain our position by maintaining and improve our service offerings yet failure on our part to maintain and enhance our reputation or services quality may act as an hindrance in attainment of our customers' retention and addition objectives which in turn may adversely impact our business and revenues.

8. *Termination of agreements/arrangements with Customers, could negatively impact our revenues and profitability.*

Our business is dependent on the decisions and actions of our customers, and there are a number of factors relating to our clients that are outside our control that might result in the termination or surrender of their service contract or the loss of a client. Our business may be adversely affected if any of our contracts are terminated by our customers.

9. *Our IT Professional Services business where we fulfill IT professional needs of our clients is subject to extensive government regulations, which may restrict the types of services we are permitted to offer or result in additional tax or other costs that reduce our revenues and earnings.*

Our IT Professional Services business where we fulfill IT professional needs of our clients is subject to complex laws and regulations. These laws and regulations cover the following such as Minimum Wages Act, ESI Act, CLRA Act, EPF Act and ID Act, Gratuity Act, which vary from state to state in India and are subject to change. These laws and regulations sometimes limit the size and growth of markets. Changes in laws or government regulations may result in prohibition or restriction of certain types of employment services we are permitted to offer, or the imposition of new or additional licensing or tax requirements that could reduce our revenues and earnings. The economic environment and pricing

pressure could negatively impact our revenues and operating results. In the event that the Government of India or the government of another country changes its tax policies in a manner that is adverse to us, our tax expense may materially increase, reducing our profitability. There can be no assurance that we will be able to increase the fees charged to our clients in a timely manner and by a sufficient amount to cover increased costs as a result of any changes in laws or government regulations. Further, labour laws in India are complex and subject to sporadic change, and non-compliance with any requirements thereunder may result in penalties, loss of business and damage to our reputation.

10. We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for a fixed period of time and require renewal from time to time. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Statutory Approvals" at pages 108 and 218 respectively of this Draft Red Herring Prospectus.

11. Our Restated Financial Statements are Prepared and Signed by a Peer Reviewed Chartered Accountant who is not Statutory Auditor of our Company.

Our Restated Financial Statements are prepared and signed by M/s. V. N. Purohit & Co., Chartered Accountants, the Peer Reviewed Chartered Accountants (FRN: 304040E), who is not the Statutory Auditor of our Company.

12. The Company does not own the premises at which its registered office, Administrative Office and branch offices are located and the same has been taken on rent. Any termination of such rent agreement and/or non-renewal could adversely affect our operations.

The property on which our registered office, administrative office and branch offices are situated are not owned by us and same has been taken on lease. Any termination of such Lease Deed whether due to any breach or otherwise or non-renewal thereof, can adversely affect the business operations. For further details, please refer to chapter titled 'Our Business beginning on page 99 of the Draft Red Herring Prospectus.

The Lease Deed of our Branch Office situated in Hyderabad and Maharashtra have expired and the Company is in the process of renewal of same. Although we have not been asked to vacate these offices.

13. There have been some instances of delayed filing of records and returns required to be filed by the Company with various regulatory authorities.

There have been some instances of delayed filing by the Company in respect of the filings required to be made with regulatory authorities, including filings under Companies Act and Taxation Authorities. Till date, the Company has not received any notices from any authorities, however, there can be no assurance that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed or penalty imposed by regulators on us may adversely affect our business and results of operations.

14. Any disruption, downfall, slowdown or changes in Information Technology sector globally as well as in India may cause loss of business to our Company.

Our Company is reliant on the demand from the software industry for a significant portion of our revenue. Any downturn in the software industry or an inability to increase or effectively manage our sales could have an adverse impact on our Company's business and results of operations. We are into the business of Information Technology ('IT') professional resourcing, IT Consultancy, IT Training and Software AMC therefore our revenues are highly dependent on our customers from the software industry and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. Further, in the event, there takes place a shift of practice of developing our software in-house in the software industries, it may have an adverse impact on the demand for our services.

15. Our business is mainly dependent on the stability of policies and economic condition of USA.

The performance and growth of our business is necessarily dependent on the stability of policies and economic conditions of USA, which may be materially and adversely affected by political instability or regional conflicts, a general rise in interest rates, inflation, change in government policies, taxation, and economic slowdown elsewhere in the world or otherwise. Economic growth is affected by various factors including movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the economy of USA or a further increase in inflation could have a material adverse effect on our services and, as a result, on our business and financial results. Financial turmoil in USA and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability, including the financial crisis and deterioration of credit conditions in the USA, could also have a negative impact on our business.

16. Any disruption in our information technology systems may adversely affect our business, results of operations and prospects.

We depend extensively on the capacity and reliability of our information technology systems, which are subject to damage or incapacitation by natural disasters, human error, power loss, sabotage, computer viruses, hacking, acts of terrorism and similar events or the loss of support services from third parties. Considering the nature of our business and the industry in which we operate, it is imperative for us to have a robust information technology platform. If our data capturing, processing and sharing cannot be integrated and/ or we experience any defect or disruption in the use of, or damage to, our information

technology systems, it may adversely affect our operations and thereby our business and financial condition.

17. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

18. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

19. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter Group will collectively own approximately 70% of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

20. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us.

Through this Issue our Company propose to get listed on the SME Platform of NSE and further increase its service base in order to take the Company to the next level of operational and financial strength. Our Company will be severely dependent on its promoters to effectively implement its growth strategies. Our

Promoters have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Financial impact of the previously mentioned risk cannot be reasonably quantified.

21. Our success depends largely on our senior management and our ability to attract and retain our key personnel.

Our success depends on the continued services and performance of our key employees. Competition for senior employees in the industry is intense and we may not be able to retain our existing senior team members or attract and retain new senior team members in the future. The loss of any member of our key team may adversely affect our business, results of operations and financial condition. We do not maintain key man's life insurance for our Promoters, senior members of our management team or other key personnel.

22. In addition to normal remuneration or benefits and reimbursement of expenses, our Promoters, our Directors and Key Managerial Personnel are interested in our Company to the extent of their shareholding, and dividend entitlements etc.

Our Promoters, Directors and Key Management Personnel are deemed to be interested to the extent of the Equity Shares held by them, or their relatives, dividend entitlements, and benefits deriving from the directorship in Diensten Tech Limited. Our Promoters are interested in the transactions entered into the Company and its Promoter Group. For further information, please refer to the section titled "Our Promoter", "Capital Structure", "Our Management" and "Related Party Transactions", beginning on pages 142, 56, 120 and 155 respectively of this Draft Red Herring Prospectus.

23. There may be potential conflict of interests between our Company and entity promoted by our Promoters cum Director.

Our Company is engaged in the business of Information Technology ('IT') professional resourcing, IT Consultancy, IT Training and Software AMC and our Promoter cum Managing Director Mr. Vipul Prakash is owner and is also on the Board of Directors of various other ventures which is engaged in the same business activity. Further, we have not executed any Non-Compete Agreement with these organizations to not to engage in businesses similar to that of our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our other Promoter Group Entities in such circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour our Group Entities in which our Promoters have interests. There can be no assurance that our Promoters/Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our business, results of operations and financial condition. For further details please refer to chapter titled "Our Group Companies" beginning on page 151 of this Draft Red Herring Prospectus.

24. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is to be done as per the provisions of applicable law.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 69 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” will be done only in accordance with the applicable legal provisions. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

25. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

26. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see “Dividend Policy” on page 156 of this Draft Red Herring Prospectus.

27. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing

shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

28. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

29. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

30. *Third party industry and statistical data in this Draft Red Herring Prospectus may be incomplete, incorrect or unreliable.*

We have not independently verified data from industry and other publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

31. *Our Company has had negative cash flows from its operating activities, investing activities as well as financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

- 32. *We cannot assure you that our equity shares will be listed on the SME platform of NSE in a timely manner or at all, which may restrict your ability to dispose of the equity shares.***

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Red Herring Prospectus listed on NSE's SME platform in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the SME platform of NSE in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

- 33. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

- 34. *We may not be successful in implementing our business strategies.***

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

- 35. *We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.***

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect

the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of operations and cash flows. For further details of our business and clients, please refer chapter titled “Our Business” and “Management Discussion & Analysis of Financial Conditions and Result of Operation” beginning on page 99 & 199 of this Draft Red Herring Prospectus.

36. Our business is significantly affected by fluctuations in general economic activity, such as recent effects of COVID 19 viruses.

Our core business is providing skilled IT Professional experts to complete our client’s projects. Demand for these services is significantly affected by the general level of commercial activity and economic conditions in the regions and sectors in which we operate. An economic downturn in a region or sector in which we operate may adversely affect our operations in that region or sector, as the use of temporary employees may decrease or fewer permanent employees may be hired. Many of our Company’s top clients are multi-national corporations, and a downturn in the global markets may adversely affect their operations, thereby affecting our business, financial conditions or results of operations. When economic activity increases, temporary employees or contract workers are often added before full-time employees are hired. During period of economic downturn, however, many companies reduce their use of temporary employees before laying off full-time employees. We may also experience more competitive pricing pressure during periods of economic downturn. Also, declining unemployment levels can make it harder for us to identify professionals to place with our clients. Any significant economic downturns, such as those in 2008, 2009 and 2020, in India or in the global markets could have a material adverse effect on our business, financial condition and results of operations.

37. Unsecured loans have been taken by our Company which can be recalled by the lenders at any time.

The unsecured loans amount standing in the financial statement of our Company as on December 31, 2023 is Rs.832.67 Lakh. The same loan can be recalled by the respective lenders at any point of time, if our Company fails in repaying the loan obtained by it, shall cause reputational loss to our Company. For details of Unsecured Loans please refer “Financial Statement as Restated” page number 157 of this Draft Red Herring Prospectus.

38. We operate in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.

India is our primary market and we face high competition in our business from local as well as nationwide players in our industry. Our key services are available from a large number of players providing same or similar services in our industry. Thus, factors affecting our competitive success include, amongst other things, price, demand for our services, and availability of input services, brand recognition and reliability. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement and administrative costs and improve our operating efficiencies. If we fail to do so, our competitors may be able to provide their services at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Our competitors vary in size, and may have better financial, marketing personnel and other resources than us and certain of our competitors have a longer history of established business and reputation in the Indian market as compared with us. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our services, which may result in a decline in our revenues and profitability.

39. Our growth will depend on our ability to build our brand and failure to do so will negatively impact our ability to effectively compete in this industry.

We believe that we need to continue to build our brand, which will be critical for achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. The brand promotion activities that we may undertake may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we are unable to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

40. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

41. Any negative publicity or defect in service quality may cause the Company substantial costs which in turn could adversely affect our goodwill and our sales could be diminished.

Like any other business our business also relies on our service quality which enables us to gain customer trust. In this scenario it is very crucial for us to always maintain positive image of the Company. Any unfavorable publicity regarding our Company, brand, or facility we provide or any other unpredicted events could affect our reputation and our results from operations. We currently carry no services liability insurance with respect to our services. Although we attempt to maintain quality standards, we cannot assure that all our services would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

42. There being no alternate arrangements for meeting our capital requirements for the Objects of the issue. Any shortfall in raising the same could adversely affect our growth plans, operations and financial performance.

We meet our capital requirements through our bank finance, financial institutions, owned funds and internal accruals. There being no alternate arrangements for meeting our capital requirements for the Objects of the issue. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 69 of this Draft Red Herring Prospectus.

43. Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical financial and other industry information is either complete or accurate.

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

44. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company has entered into related party transactions with our Promoter(s), Directors, the Promoter Group and Group Companies in past financial years. While our Company believes that all such transactions have been conducted on the arms length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. *For details, please refer to Notes to Restated Financial Information on page 157 of this Draft Red Herring Prospectus.*

45. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily "circuit breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

46. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to our Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

47. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares will be determined by Book Built method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 76 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

48. Within the parameters as mentioned in the chapter titled 'Objects of this Issue' beginning on page 69 of this Draft Red Herring Prospectus , our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

The deployment of funds as stated in the "Objects of the Issue" beginning on page 69 of this Draft Red Herring Prospectus is entirely at our discretion and is not subject to monitoring by any independent agency. All the figures included under the "Objects of the Issue" are based on our own estimates. There has been no independent appraisal of the project. We have not entered into any definitive agreements to utilize a portion of the Issue.

EXTERNAL RISK FACTORS***49. Changes in the Government Policy could adversely affect economic conditions in India generally and our business in particular.***

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

50. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include Service tax, STT, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

51. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

52. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

53. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

54. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

55. The requirements of being a publicly-listed company may strain our resources.

We are not a publicly-listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. We may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations, and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

56. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position

Under the Companies Act, a public company incorporated in India must Issue its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

Key Assumptions:

- (1) *Trade Receivable:* The rise in estimated Trade Receivables of the Company from Rs. 533.63 Lakh in FY 23 to Rs. 1,676.06 Lakh is directly linked to an anticipated increase in our sales turnover for the fiscal year 2024. This uptick is a result of recent business acquisitions done by our Company. With these acquisitions, we expect a broader customer base and increased sales volume, leading to higher Trade Receivables as we await payment from customers. This growth reflects our strategic expansion efforts and underscores the importance of effective credit management as we navigate increased business activity. For details of Business Acquisitions please see chapter title “Our Business” on page number 99 of this Draft Red Herring Prospectus.
- (2) *Short Term Loans and Advances:* The estimated short-term loans and advances of the Company are expected to decrease from Rs. 3.9 Lakh in FY 23 to zero in FY 24, anticipating adjustments within the fiscal year. We target to clear these advances by the end of FY 24 and aims to streamline our financial position and optimize our cash flow management.
- (3) *Other Current Assets:* The decrease in the estimated Other Current Assets from Rs.335.45 Lakh in FY 23 to Rs.273.97 Lakh in FY 24 is because of the decreased rate of TDS from 10% to 2.8% along with the effect of increased Revenue.
- (4) *Trade Payables:* The decrease in the estimated Trade Payables from Rs.127.16 Lakh in FY 23 to Rs.35.83 Lakh in FY 24, is because the Company is expecting to make payment to vendors by the end of every month. Hence statutory payments are likely to comprise only trade payables.

GLOBAL ECONOMIC OVERVIEW

- Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.
- With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and than assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.
- Policymakers’ near-term challenge is to successfully manage the final descent of inflation to target, calibrating monetary policy in response to underlying inflation dynamics and—where wage and price pressures are clearly dissipating—adjusting to a less restrictive stance. At the same time, in many cases, with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation to rebuild budgetary capacity to deal with future shocks, raise revenue for new spending priorities, and curb the rise of public debt is needed. Targeted and carefully sequenced structural reforms would reinforce productivity growth and debt sustainability and accelerate convergence toward higher income levels. More efficient multilateral coordination is needed for, among other things, debt resolution, to avoid debt distress and create space for necessary investments, as well as to mitigate the effects of climate change.

- Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Table 1). Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.
- World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geoeconomic fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.
- These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance.

INDIAN ECONOMIC OVERVIEW

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices (2011-12) in the first quarter of 2023–24 is estimated at Rs. 40.37 trillion (US\$ 484.94 billion), showing a growth of 7.8% as compared to the first quarter of 2022-23 estimated at Rs. 37.44 trillion (US\$ 449.74 billion). Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In 2023-24 (April-September), India's service exports stood at US\$ 164.89 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-September) were estimated at US\$ 376.29 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in

monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 301.75 trillion (US\$ 3.62 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q1 of 2023-24 was Rs. 70.67 trillion (US\$ 848.92 billion), as against Rs. 65.42 trillion (US\$ 785.85 billion) in 2022-23, estimating a growth of 8%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) decreases to US\$ 9.2 billion in Q1 of 2023-24 from US\$ 17.9 billion in Q1 of 2022-2023. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise

lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

As we are into the business of Information Technology ('IT') professional resourcing, IT Consultancy, IT Training and Software AMC. Therefore it's required for us to understand overview of IT industry as well as staffing industry, as our business is a combination of both.

Information Technology Industry Global Overview

Information technology (IT) is the use of computers, storage, networking and other physical devices, infrastructure and processes to create, process, store, secure and exchange all forms of electronic data.

The main type of information technology (IT) are IT services, computer hardware, telecom, and software products. Computer hardware is the physical components that a computer system requires to function and encompasses everything within a PC or laptop. The services are used by large, small, and medium enterprises of financial services, retail and wholesale, manufacturing, healthcare and others.

The information technology (IT) market research report is one of a series of new reports from The Business Research Company that provides information technology (IT) market statistics, including information technology (IT) industry global market size, regional shares, competitors with information technology (IT) market share, detailed information technology (IT) market segments, market trends and opportunities, and any further data you may need to thrive in the information technology (IT) industry. This information technology

(IT) market research report delivers a complete perspective of everything you need, with an in-depth analysis of the current and future scenario of the industry.

The global information technology market grew from \$8179.48 billion in 2022 to \$8852.41 billion in 2023 at a compound annual growth rate (CAGR) of 8.2%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, causing inflation across goods and services and affecting many markets across the globe. The information technology market is expected to grow to \$11995.97 billion in 2027 at a CAGR of 7.9%.

The demand for cloud computing services is expected to drive the demand for IT services during the forecast period. In the cloud computing model, data is stored on the internet by a cloud computing provider, who manages and operates data storage as a service. Many companies are now choosing applications hosted in the cloud for their day-to-day operations. For example, according to statistics provided by hostingtribunal.com, 60% of computing workloads were running in the public cloud in 2019. Similarly, 94% of enterprise workloads are expected to be processed by cloud data centers in 2021. Companies are also opting for cloud-based data storage, thus boosting the demand for IT services.

The outbreak of COVID-19 disease (COVID-19) has acted as a significant restraint on the information technology market in 2020 as supply chains were disrupted due to trade restrictions and employees working for these establishments faced difficulties related to infrastructure and communication owing to lockdowns imposed by governments globally, forcing them to work from home. COVID-19 is an infectious disease with flu-like symptoms including fever, cough, and difficulty in breathing. The virus was first identified in 2019 in Wuhan, Hubei province of the People's Republic of China and spread globally, including Western Europe, North America, and Asia. Steps by national governments to contain the transmission have resulted in a decline in economic activity, with countries entering a state of 'lock down,' and the outbreak had a negative impact on businesses throughout 2020 and into 2021. However, it is expected that the information technology market will recover from the shock across the forecast period as it is a 'black swan event and not related to ongoing or fundamental weaknesses in the market or the global economy.

Over the past five years there has been an increasing prevalence of low cost open source alternatives. Open source has become a preferred platform for developing new technology. In the past, software publishers would open source software that was not making money, but now companies are open sourcing software to increase their presence and share in the market. Supabase, a YC-incubated startup that offers developers an open-source alternative, announced that it had raised a \$6 million in funding to create new open-source tools.

Major companies in the information technology (IT) market include Apple, Microsoft, Verizon Communications, China Mobile, AT&T Inc., Huawei, Deutsche Telekom AG, Dell Technologies Inc., Samsung Electronics Co., Ltd. and Comcast Corporation.

Indian Information Technology Industry Overview

INTRODUCTION

The IT & BPM sector has become one of the most significant growth catalysts for the Indian economy, contributing significantly to the country’s GDP and public welfare. The IT industry accounted for 7.4% of India’s GDP in FY22, and it is expected to contribute 10% to India’s GDP by 2025.

As innovative digital applications permeate sector after sector, India is now prepared for the next phase of growth in its IT revolution. India is viewed by the rest of the world as having one of the largest Internet user bases and the cheapest Internet rates, with 76 crore citizens now having access to the Internet.

The current emphasis is on the production of significant economic value and citizen empowerment, thanks to a solid foundation of digital infrastructure and enhanced digital access provided by the Digital India Programme. India is one of the countries with the quickest pace of digital adoption. This was accomplished through a mix of government action, commercial innovation and investment, and new

digital applications that are already improving and permeating a variety of activities and different forms of work, thus having a positive impact on the daily lives of citizens.

Formal and informal mentoring programs, aimed at fostering professional development among employees, are gaining popularity within technology companies. Notably, the educational background of informal employees differs significantly from that of formal employees, with only 50% of informal workers holding qualifications of SSC + Tech Diploma or lower, compared to 75% of formal employees who possess graduate degrees or higher. The Indian flexi staffing industry added 78,000 jobs in July-September 2022, up 6 per cent as compared to the previous quarter, on account of rise in demand across all sectors, a report said. "Buoyed by a strong festive season and rising demand across sectors, the Indian Staffing Federation (ISF) members added 78,000 new jobs in July-September quarter, a 6 per cent rise in new jobs over previous April-June quarter," said ISF's Flexi Staffing Employment Growth report. The new jobs in July-September are a combination of new jobs in general staffing and IT staffing, it stated. ISF is the apex industry body representing formal staffing, facility management and security services companies. New jobs in general staffing – which excludes IT staffing – grew 7.3 per cent in July-September, driven by the rise in demand in FMCG, e-commerce, manufacturing, retail, logistics, banking, hospitality, tourism, insurance, infrastructure, it stated. On the other hand, new jobs in IT staffing remained under pressure, growing a modest 2.2 per cent in the September quarter. While IT staffing industry continues to address market demands in niche skills, there is a visible impact of the slowdown in global markets even as big Indian IT players curtail new hiring, it stated.

Cumulatively, ISF's over 110 member companies added 2.32 lakh jobs in the past four quarters, i.e. during the period from October 2022 to September 2023, which includes the 78,000 new jobs in July-September, it stated. As on September 30, 2022, ISF member companies represented 14 lakh flexi staffing workers. Lohit Bhatia, President, ISF said the Indian staffing industry anticipated a steep rise in demand during the first lockdown-free festive season, and provided the formal workforce the different industries required. "Overall industry shows a resilient growth with new employment mobilized in July-September (2022) at 20 per cent year-on-year. To give a further break up, general staffing witnessed 24.6 per cent year-on-year growth, while new jobs in IT staffing sustained at 15.8 per cent year-on-year," Bhatia added. Over 110 members of the federation have generated employment for 90 lakh employees in the last 10 years and currently employs 14 lakh flexi staff annually.

India is the fifth largest economy in the world and India Inc. is one of the largest job generators. The employment comes from the organised industries in India that contribute to the GDP as well. However, it's a fact that most jobs are in the unorganised clusters in various industries that cater to around 6.3 crore MSMEs. For those working in the unorganised or unregulated workforces, there are no specific laws, wages or policies. They fall under the Staffing Industry, which covers a meagre 2 per cent of the possible employable population in India. Of the 400 million employable people in India, about 10 per cent are employed in the organised sector, while about 250 million are self-employed. This leaves almost 110 million people who are employed by the temporary or flexi-staffing sector and the unorganised sector. To bring a workforce system, laws and regulations into the staffing industry or the private employment services, the Indian Staffing Federation (ISF) is working towards growing this market.

The ISF is looking at interacting with law-making authorities to persuade them to recognize the staffing industry and to create adequate and appropriate laws to manage it. Hoping to establish a lasting awareness about itself among the key stakeholders (The government, employers, staffing companies, job seekers, trade unions, industry bodies, etc.), the ISF is the apex body representing the staffing industry that is authorised to talk with government agencies and other trade bodies on behalf of the staffing or private industry. Staffing or private employment services act as enablers for providing social security and long-term medical and retirement benefits to temporary or flexi-staff. Promoting staffing employment services therefore will address various issues about the employment benefits being provided to employees. While doing a lot on its part to put the unorganised workforce in the reckoning, the ISF also has some expectations and suggestions for the government for the upcoming Union Budget 2023-24.

PLI like schemes

Through schemes such as the PLI and the PMRPY, there will be a strong impetus towards formal employment generation as the PLI has been a great scheme for strengthening India's economy. Similar schemes and programmes, if implemented across sectors like agriculture, construction, etc., where a highly informal workforce is engaged, will ensure an increase in formal employment.

Additionally, new employment generation, which will bring new social security beneficiaries in these sectors, could be utilised as an incentive for the successful completion of projects. It will aid in faster project completion and speed up the formalisation of employment. The MSME sector, which employs a workforce of nearly 120 million, is out of the ambit of social security. PMRPY schemes can bring about new employment generation, encouraging employers and supporting formal employment. It could include voluntary coverage by companies that are outside the ambit of these schemes.

Early implementation of Labour Codes

The Labour Codes, which are a positive step by the host country of the G20 Summit, have already been approved by the parliament and are awaiting implementation. In the year of the G20 Summit, we look forward to hearing about the government's implementation roadmap for the Labour Codes and seek more clarity on it from the finance minister during the presentation of the Union Budget. With the government's focus on FDI in manufacturing, PLI schemes and the infrastructure push, labour reforms will provide the single biggest boost to the efforts of those who are working to attract foreign investment into the country and will also accelerate job creation across industrial sectors.

Social security is important

Providing social security benefits to gig workers will serve to bring social security outside of the confines of labour codes and make it available for the benefit of millions who are currently adopting gig work as a mode of employment. Similarly, social security benefits for domestic workers will bring a large section of the underprivileged domestic workers employed at various households into the social security ambit. If individual household owners are rewarded for providing social security to their domestic workers, there is a higher possibility of the 'mindset adoption' of this scheme. Any social security paid by a household owner to their domestic workers should be treated as a benefit towards their income tax (rewards individual).

Relaxation from inflation

For the individual worker at the individual level, the most important aspect of the Union Budget 2023-24 will be about it factoring in the inflation and the pandemic-related stress over the last three years into the various policies and plans that it comes forward with.

The government has been reviewing corporate taxes downwards, whereas individual tax slabs including cess remain high. Now that the COVID-19 related economic slowdown is behind us, the government needs to give more into the hands of the people so that they can spend more. Thus, everyone is expecting an increase in the Section 80C standard deduction and other slabs, a removal of the cess, and a relook at lowering the tax slabs.

It is observed that despite COVID-19's horrible impact on business around the world. The organized staffing business in India has continued to expand at a rapid pace. According to a survey, the Indian staffing business grew by 3.6% in fiscal year 2020-21, owing to a comeback in the fourth quarter of the previous fiscal year.

According to the report, post-pandemic flexi-employment market trends and it has influenced women, young, and high-skilled employees in a good way. It is also noted that regardless the pandemic situation, temporary staffing grew in IT, E-commerce, Logistics and Manufacturing sectors.

Flexi Staffing is growing trend in an Indian job economy. Around 72% of Flexi workers want to keep working as same, and 85% of Flexi workers are happy with their current situation.

The term "flexi staffing" describes a situation in which a corporation hires workers on a temporary basis, either for a long-specified period of time or until the task is completed. These employees could be via employment agencies or referrals on a contract basis. These type of services helps to hire people when the company is out of staff. If a company doesn't have enough employees, they can look for a new permanent employee, but they can also use flexible staffing services in which they can hire independent contractors, part-time employees, or temporary worker.

Growth in a flexi-work environment

According to the Flexi Staffing Employment Research Report "Annual Flexi Staffing Employment Trends: 2021," there was a 31% growth in Flexi work in India in 2021 relative to other types of employment. As the new WFH and hybrid modes gain mainstream popularity. Flexi employee's willingness for continuing to work in a temp arrangement has increased significantly in comparison to past years, the rate of flexi workers has increased from 8% in 2020 to 14% in 2021.

Women's participation in temporary employment was higher

Women's engagement in temp staffing increased by 6% under Covid, while men's participation decreased by 4%, owing to the new work arrangement allowing the majority of women to come back to work while also exploring a second career. Last year, the majority of flexi staffing options shifted from outdoor sales to critical delivery services.

Youth Employment in temporary positions is increasing actively

In India, an average of 4% of students have joined flexi jobs during the final year. It was observed that there were 21% more flexi employees with higher education and 11% with better skills in year 2021 than in 2020. Nearly 70% of temp worker profiles were graduates and above, owing to the increased need for skillsets in the IT and ITES sectors in 2021. The rising use and desire for digital services around the world fueled this need.

Sectors to boost flexi Jobs

Healthcare, IT & ITeS, Pharma, EdTech, and Ecommerce are the top five sectors predicted to continue to boost temp job demand in H2 2021, with employment growth exceeding 35%. The majority of growth is projected in the IT & ITeS industry, owing to first the extensive digital connectivity and, second Tech firm's

investment in hastened automation procedures. These IT organizations are placing a large stake on entry-level talent, particularly in temp roles, which is allowing more newbies to join this work structure.

The organized staffing market in India is growing beyond traditional skills, positions, industries, and is now taking center stage in a variety of sector. IT staffing, ecommerce, logistics, and manufacturing all saw increase in a pandemic year with only 3.6% growth. While Covid 2.0 may represent a shift in growth in Q1FY22 compared to Q4FY21, it appears that the staffing industry's trend is positive and here to stay.

If any such indication exists, the recoverable amount of assets is estimated. An impairment loss is recognized, whenever the carrying amount of assets or its cash generating units exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use which is determined based on the estimated future cash flow generated from the continuing use of an asset and from its disposal at the end of its useful life, discounted to their present value.
An impairment loss is reversed, if there has been a change in the estimates made to determine and recognize the recoverable amount in the earlier year, and to the extent that the assets' carrying amount does not exceed the carrying amount that would have been determined (net of depreciation or amortization), had no impairment loss been recognised.

Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on best estimates required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and are adjusted to reflect the current best estimates. Contingent liabilities are not recognized but are disclosed in the notes to accounts. Industry Slowdown and Client Onboarding Challenges: The IT and professional services industry experienced a global slowdown in the first half of FY 2023-24. Our critical clients halted the hiring of new employees, causing a significant decline in fresh onboarding opportunities. This slowdown has significantly impacted our gross additions and put strain to manpower suppliers like us.

Strategic Operational Changes and Leadership Transition: Following a comprehensive review of our operations, DTL made strategic decisions to enhance efficiency and value. This included hiring key employees like Mr. Siva Prasad Nanduri as our CEO. Additionally, we underwent significant changes such as expanding our office space, and transitioning to a stronger in-house team starting from June, albeit at increased costs.

Increased Overheads and Future Investment Strategy: As a result of the aforementioned changes, our Selling, General & Administrative overheads (SGA) significantly rose, impacting our bottom line. PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI

Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off

Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
