Overall Secured MSME loan (LAP) segment grew at a strong pace with portfolio outstanding registering a CAGR of nearly 16% from Fiscal 2019 to Fiscal 2024. CRISIL MI&A estimates such outstanding secured MSME loans given out by banks and NBFCs to be around ₹10.3 trillion as of Fiscal 2024 and ₹10.8 trillion as of Q1 Fiscal 2025. A secured MSME loan can be obtained by mortgaging a residential or commercial real estate with the lender.

In Fiscal 2022, overall secured MSME loan portfolio outstanding grew at a slower rate of about 11% year-on-year. NBFCs moved towards niche credit assessments without the requirement of property collateral to help provide credit and meet the rapid demand from MSMEs. In Fiscal 2023, overall secured MSME loan segment bounced back with about 22% year-on-year growth as economic activity normalised through support of RBI and centre's promotion of Aatmanirbhar Bharat. In Fiscal 2024, overall secured MSME portfolio grew at about 24% year-on-year backed by robust economic conditions and increase in domestic consumption and growth.

Over the last few years, expansion in branch network, more data availability and government initiatives like GST, Udyam, and increasing formalisation of the MSME segment has led to increasing focus of lenders, especially the NBFCs, on this space. NBFCs (including HFCs, NBFC-Fintech) enjoy a market share of 36% as of March 2024 in overall secured MSME portfolio outstanding.

NBFCs/HFCs have established a significant presence in MSME loans by prioritizing customer needs, ensuring quick turnaround times, delivering excellent customer service, and expanding their geographic reach. Over time, the MSME portfolio of NBFCs has shown faster growth compared to the overall MSME portfolio at a systemic level. CRISIL MI&A expects the competitive positioning of NBFCs to remain strong, given their strong target customer and product focus.

### **Threats and challenges in MSME Loan Segment**

MSME lending segment is expected to witness a rapid growth in the upcoming fiscals, however, there are a few risks associated with lending to this segment.

- **Inadequate credit history of borrowers:** Generally, small borrowers often lack credit history, which is necessary for underwriting. Additionally, they do not have the financial capabilities to invest in maintaining proper accounts due to which it becomes difficult for lenders to assess their creditworthiness.
- **Borrowers susceptible to policy and regulatory changes:** Owing to the highly dynamic industry environment, MSMEs are vulnerable to policy and regulatory changes to which they might not have a capability to cope with.
- **Borrowers lack liquidity and are vulnerable to cash flow challenges:** MSMEs often face delays in payments which significantly impact their cash flow cycle and in-turn impact their repayment behavior.
- **Borrowers are unable or unwilling to share all information:** Borrowers usually do not have all the required information available because of which lenders cannot assess the borrowers in a better manner.
- **MSMEs lack updated technology as compared to large companies:** Large companies have higher sophistication of technology, which MSME players lack owing to low capital; hence they face the risk of getting outdated.
- **Inadequate financial literacy:** MSME owners often lack financial expertise. The lack of financial literacy may lead to poor financial planning.

## COMMERCIAL VEHICLE FINANCING IN INDIA

**Robust recovery witnessed in commercial vehicle sales driven by government spending and sustained user demand**

Note: CV sales include LCV & MHCV goods carrying vehicles. Source: SIAM, CRISIL MI&A

The commercial vehicle (CV) industry, which consists of Light Commercial Vehicles (LCV), Medium and Heavy Commercial Vehicles (MHCV) exhibited noteworthy recovery in Fiscal year 2023, achieving a remarkable growth rate of around 32% year-on-year, albeit on a low base. This resurgence can be attributed to pent-up replacement demand, improved transporter profitability, pick up in capex, which was hampered during the preceding 2-3 years due to economic stagnation and the disruptive impact of the pandemic. Commercial vehicle sales witnessed muted growth in Fiscal 2024, LCV sales in Fiscal 2024 witnessed a degrowth of 3% while M&HCV sales witnessed minimal growth rate of 4% primarily due to high base of Fiscal 2023.

**Light commercial vehicles account for around 59% of total commercial vehicle sales as of Fiscal 2024**

Note: CV sales include LCV & MHCV goods carrying vehicles, Source: SIAM, CRISIL MI&A

Light commercial vehicle (LCV) sales stood at around 543,000 as of Fiscal 2024, while medium and heavy commercial vehicle (M&HCV) sales stood at around 373,000. In Fiscal 2023, LCV sales recorded a growth of 23%, rebounding to pre-COVID heights. The surge in sales was attributed to robust replacement demand, particularly in the sub-one-ton category, which was deferred due to economic challenges and the pandemic. In Fiscal 2024, LCV sales witnessed a 3% degrowth in sales after an all-time high sale in the previous fiscal. The lower utilisation of vehicles coupled with the increase in asset costs led to the degrowth in sales. LCV segment is also considered to be less cyclical than the M&HCV segment due to its usage in e-commerce delivery fleets and other essential economic activities, providing better last mile connectivity.

M&HCV segment sales are expected to decline in the near term, due to decline in the volume up for replacement and the oversupply of tonnage in the system, hindering the volume growth. The higher tonnage available in the system is restricting volume growth in the current fiscal as the trend towards higher tonnage vehicles is expected to continue implying tonnage growth will be in line with GDP but volumes will be limited.

### Top 10 states account for around 70% of total commercial vehicle sales as of Fiscal 2024

Top 10 states account for around 70% of total commercial vehicle sales as of Fiscal 2024, with top five states accounting for 46% of total commercial vehicle sales. Among states Maharashtra had the highest share in CV sales as of Fiscal 2024 at nearly 13% followed by Uttar Pradesh (nearly 10%) and Gujarat (nearly 8%).

### Key Growth drivers of Commercial Vehicle Sales in India

#### Healthy industrial growth in Fiscal 2024

The Indian industry's gross value added (GVA) had been growing rapidly, in line with the GDP averaging 7% between Fiscals 2018 and 2023. After consecutive weak Fiscals of 2020 and 2021 due to the COVID-19 outbreak, industrial GVA is estimated to have grown by around 7% year-on-year in Fiscal 2023 and around 7.4% year-on-year in Fiscal 2024E.

Over the next five-year period (Fiscals 2024-2029), industry GVA is expected to be robust driven by the government's focus on 'Make in India' with the stated aim of the government to push up the share of Manufacturing in India's GDP from 17% to 25%. Moreover, improvement in infrastructure and higher expected corporate expenditure is likely to support the capex cycle going forward post-Fiscal 2024.

## **Scrappage policy**

In August 2018, MoRTH (Ministry of Road, Transport and Highways) considered incentivising the scrapping of vehicles sold before April 2005 (15 years old). After deliberations on the modalities of implementation of the norm, the government aims to promote vehicle scrapping by exempting registration charges for truck purchases made after scrapping older trucks. To incentivise scrappage of older vehicles, the government has increased the registration charges for older vehicles and increased stringency of fitness tests. CRISIL MI&A expects the impact of the norms to be limited on additional scrappage (apart from vehicles scrapped in the normal course of business).

## **Increasing freight rates to aid in materialisation of deferred demand**

In Fiscal 2024, fuel prices constituted approximately 55% of transporter costs, exerting a considerable influence on their overall profitability. During this period, diesel prices experienced a modest increase of around 2%. Concurrently, freight rates also rose by an estimated 6%, signalling improved transporter profitability and heightened demand for freight services. These favourable factors are expected to boost CV sales, as the industry capitalises on the increased demand in the transportation sector. A rise in utilisation translates into better cash flow for transporters and, hence, augurs well for CV sales.

**Capacity utilisation and profitability of transporters:** Rising capacity utilisation and profitability of transporters in India are boosting demand for commercial vehicles. Higher fleet efficiency and profits enable transporters to invest in new vehicles, supporting growth in the commercial vehicle industry.

## **Rise in Private Final Consumption Expenditure (PFCE)**

LCVs are primarily used for last-mile transport and redistribution of commodities. PFCE is a good indicator of domestic consumption demand, and accounts for over 90% of LCV goods tonnage capacity. Apart from the usual freight demand, an increase in rural consumption and a rise in urban expenditure boosts demand for smaller vehicles to transport consumer goods. Moreover, a rise in consumption of non-food items, consumer durables and FMCG products fuels demand for LCVs.

## **Increasing adoption of hub-and-spoke network**

The road transport industry is gradually moving towards the hub-and-spoke distribution model, wherein industries have large hubs in major regions. Goods are consolidated at these hubs and sent to several touch points (spokes) in the hinterland. Freight is distributed over the last mile via LCVs, such as sub-one-tonne CVs and pick-ups. With rising adoption of the network, sales for LCVs is expected to rise.

## **Substitution of three wheelers**

Small commercial vehicles (SCVs), especially sub-one-tonne models (0.75-tonne payload), can substitute large three-wheelers of similar payload capacity, given the SCVs' ability to carry loads beyond payload capacity, run on longer routes, maintain better balance, and be more cost-efficient. The pace of substitution, which is tapering off, remains a key parameter that impacts LCV sales.

## **Key Growth Drivers of Used Commercial Vehicle Sales in India**

### **Higher affordability as compared to new vehicles**

Used commercial vehicles are generally more affordable as compared to new vehicles, making them accessible to small and medium sized businesses. The lower upfront cost of used vehicles makes them accessible to a wider range of customers who may not have the financial capacity to invest in a brand-new commercial vehicle.

### **Cost effectiveness**

Depreciation rate of new commercial vehicles is usually higher, resulting in a more significant loss in value over time. Used commercial vehicles on the other hand, have already undergone their initial depreciation making them a more cost-effective solution to businesses.

## Improved quality and reliability

Advancement in technology and manufacturing processes has led to improvement in quality and reliability of used commercial vehicles, customers now have a higher confidence in the performance and durability of used commercial vehicles.

## Rise in micro, small and medium enterprises in India

There has been a significant rise in micro, small and medium enterprises in India due to favourable government policies and economic scenario, used commercial vehicles act as a sustainable option to fulfil their logistics and transportation needs due to their lower cost of acquisition and cost effectiveness.

## Right to win for NBFCs

NBFCs held the lion's share in overall commercial vehicle financing on account of relatively superior customer connect in small fleet operators ("SFOs") and first-time buyers customer segment, strong and deep understanding of local economy, ease of loan processing, relatively higher loan-to-value ("LTV"), and higher risk-taking ability of NBFCs. Banks primarily have more focus on financing large fleet operators ("LFOs") based on their superior credit profiles. They also prefer big ticket financing, like that for MHCVs. While the sector has been under stress and delinquencies over past two years, the quality of the portfolio improved in Fiscal 2023 as economic activity picked up thus increasing repayment capabilities. This has enabled banks to capture and expand market share in both LFOs and SFOs as they can offer better loan rates and higher ticket size than NBFCs. However, as banks are more cautious in lending to riskier CV asset classes, NBFCs can maintain their strong hold and build better customer profiles that will support them going forward.

## Commercial Vehicle Financing is expected to witness a CAGR of 11-13% from Fiscal 2024-2027

New Commercial vehicle financing segment is expected to grow at a CAGR of 11-13% till Fiscal 2027. The segment witnessed a growth of approximately 13% CAGR from Fiscals 2019 to 2024. The segment witnessed a very slow growth during Fiscals 2021 and 2022, primarily due to COVID-19 pandemic and nation-wide lockdowns. Post that, the growth has been higher at around 19% in Fiscal 2023 and around 30% in Fiscal 2024. The growth was primarily due to increase in private consumption and freight demand. Going forward, growth in the segment is expected to be supported by rising demand for LCVs due to increased private consumption, greater availability of redistribution freight and improved finance while demand for M&HCVs is expected to grow due to improvement in economic activity across the country, along with steady agricultural output and government's focus on infrastructural development.

## Urban areas account for the highest share among tiers across Fiscals 2019-2024

As of Fiscal 2024, Urban regions account for the highest share accounting for nearly 42% share in overall commercial vehicle financing, followed by rural regions accounting for nearly 40% share and semi-urban regions accounting for nearly 13% market share.

Among top 15 states, Madhya Pradesh witnessed the fastest growth in the last five Fiscals growing at a CAGR of approximately 16% followed by Chhattisgarh and Tamil Nadu which grew at approximately 16% and approximately 15% CAGR from Fiscal 2019-2024.

**NBFCs operating in commercial vehicle financing had return on assets at 3.0%**

NBFCs have a strong presence in the commercial vehicle financing space with a dominant share in used commercial vehicle financing. Primarily, small fleet operators and drivers turned owners, and first-time buyers are the core customer segment for majority of the NBFCs in this segment. As this customer segment is comparatively riskier than those catered by banks (Large & medium sized fleet operators), NBFCs which are operating in both used and new commercial vehicle financing are able to charge higher yields (nearly 16%), which in turn translates to higher net interest margins for the players which usually range between 7-8%. Operational expenses are approximately around 3% for NBFCs due to their extensive on-ground presence and underwriting mechanisms, while credit costs usually range between 1.5-2% with return on assets estimates at around 3%.

Among NBFCs in the commercial vehicle financing space, NBFCs which cater to customers in the used commercial vehicle space usually have a loan tenure of 3-5 years while NBFCs focused on new commercial vehicles have an average loan tenure of 4-7 years. Used commercial vehicle NBFC financiers are also able to attract 3-5% higher yields as compared to new commercial vehicle financiers.

#### Threats and challenges in the Commercial Vehicle Financing Industry:

- **Economic Scenario:** The financial performance of auto-finance companies depends on the offtake of vehicles, which depends on the overall macroeconomic factors, such as GDP growth and the economic cycle. The commercial vehicles (CV) industry transports over half of the total freight handled in the country. As transportation is linked to all sectors, demand for CVs is closely linked to overall economic growth. CV demand is also driven by growth in industrial and agricultural production, freight movement, rising share of roadways in freight movement, and changes in freight rates. Any economic slowdown directly impacts CV sales.
- **Regulatory Environment:** Changing regulatory framework for auto-finance companies has been crucial in determining growth path of NBFCs. Over years, regulations of NBFCs have been converging with those of banks; this could lead to keener competition in the future. Also, higher provisioning requirements will impact the profitability of these companies.
- **Insufficiency of data for credit appraisal:** Credit-score availability in India is still at a nascent stage, despite the presence of credit bureaus. In several cases, borrowers lack formal income-proof documents. This makes it difficult to judge the ability of borrowers to repay.
- **Asset Quality and Recovery Risk:** The absence of an established and transparent secondary market makes it difficult to recover the value in many cases.

### CONSTRUCTION EQUIPMENT FINANCING IN INDIA

#### Construction equipment volumes to normalise this fiscal after two years of double-digit growth

The new construction equipment (CE) sector achieved record sales in Fiscal 2024, with 24% on-year increase in volume and 25% on-year rise in value. This performance was driven by growth in end-user industries. Volume is expected to de-grow 8-10% in this fiscal because of moderation to come into play this fiscal in the construction equipment industry due to the high base effect and normalisation of central government capital allocation for key infrastructure industries. These are expected to slow down construction activity, impacting the sales of construction equipment but the industry is expected to maintain high levels of sales in volume at 100,000+ with growing end-user industry segments such as roads, railways and urban infrastructure.

Infrastructure sector growth is led by the healthy rise on high bases in state and central government capex budgets, government initiatives such as GatiShakti and the focus on the National Infrastructure Pipeline. The mining sector is also expected to grow this fiscal to meet rising demand from the power and metal sectors.

**Threats and challenges in the Construction Equipment Financing Industry:**

- **NBFCs serve riskier customer segment:** In terms of customer mix, banks mainly focus on large customers (contractors). In comparison, NBFCs focus mainly on retail customers, including first-time buyers (FTBs), a riskier segment.
- **Cyclical nature of Construction equipment finance Industry:** The CEF industry is inherently cyclical. A challenging macroeconomic environment and delays in execution of infrastructure projects adversely affect cash flows of borrowers. The cyclical nature leads to high volatility in asset quality of financiers, impacting their profitability.
- **Repossession and resale of assets:** One of the major issues faced by NBFCs in the construction equipment financing space is the storage of repossessed equipment from loans that have turned NPAs. Loan recovery is challenging for NBFCs in the case of a default. Furthermore, the secondary market for repossessed/used construction equipment is underdeveloped in India. Thus, resale of used equipment is a challenge for construction equipment sellers.

**TRACTOR LOAN FINANCING IN INDIA**

**Tractor financing market**

Tractor loan disbursements increased by 13.3% CAGR between Fiscals 2019 and 2024. Further, tractor loan portfolio increased at 14.4% CAGR between Fiscal 2019 and Fiscal 2024 and is expected to increase at a moderate pace of 11-13% CAGR between Fiscal 2024 and Fiscal 2027.

### Key factors which drive competitiveness of NBFCs in tractor financing

#### Factors favouring NBFCs

##### Better presence in rural markets

The tractor financing segment is increasingly becoming a stronghold of NBFCs due to their greater ability to tap rural markets by offering loans at rates much lower than those of unorganised players. Though tractor demand is majorly dependent on the rural economy and monsoon, NBFCs remain poised to dominate the tractor financing segment.

Rural demand, increasing farm mechanisation, support from the government and normal monsoon are some of the critical factors which are expected to aid tractor growth in the long term, and this will be backed by improving rural infrastructure, especially as the government continues to invest in developing rural roadways. Greater ability of NBFCs to tap specific markets and/or customer segments by offering financing at much lower rates than the unorganised sector may enable them to retain their market position. Captive players can capitalise on it to increase their share.

##### Eligibility requirements

NBFCs have started using alternate data and methods using technology to assess creditworthiness of borrowers due to which NBFCs can moderate certain requirements regarding land holding, income documentation, etc. and the procedure to obtain loan also becomes simpler. These factors play a vital role to attract borrowers who are majorly from rural and semi-urban areas.

##### Faster turnaround time

With the help of technology and on-ground presence, NBFCs have been able to reduce their turnaround time of processing tractor loan applications as compared to banks and therefore can attract customers who need immediate funding.

##### Flexible financing options

NBFCs provide flexible financing options to borrowers depending on each borrower's needs, harvesting pattern, and borrowers' income pattern. Further, such flexibility also helps in timely repayment from borrowers.

### Threats and challenges in Tractor Financing Industry

- **Seasonal Income Dependency:** Tractor financing relies heavily on agricultural income, which is seasonal and unpredictable. Poor crop yields or irregular monsoons can affect farmers' ability to repay loans.

- **Asset Repossession Challenges:** Repossessing tractors in rural areas can be difficult due to logistical issues and resistance from local communities, leading to delayed or non-recovery of financed assets.
- **Creditworthiness of Borrowers:** Many farmers lack formal credit histories, making it harder for lenders to assess their repayment ability accurately. This increases the risk of defaults on tractor loans.

## CONSUMER LENDING IN INDIA

### Consumer Durable Loan

#### Consumer durables financing market continues the healthy momentum

The outstanding loan book for consumer durables expanded 27% on-year to ₹0.71 trillion in Fiscal 2024. The growth momentum is expected to continue in Fiscal 2025. The healthy consumer durables credit growth in Fiscal 2024 was driven by resilient consumption and increasing financing penetration in the segment. Increased demand during the festive season also supported growth. CRISIL MI&A expects the outstanding loan book for consumer durables to grow with 19-21% CAGR between Fiscal 2024 and Fiscal 2027.

The healthy consumer durables credit growth in Fiscal 2024 was driven by resilient consumption, aspirational spending and increasing financing penetration in the segment. Increased demand during the festive season also supported growth. However, growth slowed in the last quarter of the fiscal year because the RBI halted the issuance of new loans on a key non-bank lender's existing product in the third quarter due to non-compliance with digital lending guidelines.

### Urban areas account for the highest share among tiers across Fiscals 2019-2024

Urban regions account for the highest share as of Fiscal 2024, accounting for around 50% share in overall consumer durables, this was followed by rural regions accounting for around 33% share and semi-urban regions accounting for around 12% market share. From Fiscals 2019-2024, rural regions witnessed a growth in market share of 10%, outpacing urban regions which witnessed a 5% fall in market share.

### Prime and below-prime customers to support NBFCs' credit growth

Growth of NBFCs in the consumer durables financing space is led by innovative financing models and low ticket-size disbursements. NBFCs' ability to provide customised products, better customer understanding, etc. will aid them to underwrite below-prime customers as well. The major consumer base comprises Tier 2 and below cities and disbursements are primarily to prime and below-prime customers (as against higher-rated consumers). As the incremental portfolio undergoes further seasoning, asset quality will remain a key monitorable.

### NBFCs account for majority share in Consumer Durable Finance Outstanding across fiscals

Among lenders, NBFCs accounted for the highest share in Consumer Durable finance outstanding (nearly 66%) as of Fiscal 2024, which was followed by private banks with around 25% market share. From Fiscal 2021 to Fiscal 2024, NBFCs have gained nearly 8% market share. Among major lenders, NBFCs witnessed the fastest growth in Consumer Durable Finance Outstanding witnessing a CAGR of approximately 22% from Fiscal 2019-2024, while private banks grew at 21% CAGR.

Among lenders, NBFCs had the lowest GNPA's across fiscals with 90+ DPD for Fiscal 2024 at 2.4% followed by Private Sector Banks with 3.9%. From Fiscal 2019-2024, NBFCs have witnessed a significant improvement in their NPA levels falling from 5.2% in Fiscal 2019 to 2.4% in Fiscal 2024.

## Threats and challenges in Consumer Durable Loan Segment

- **Regulatory Challenges:** Strict regulatory requirements and compliance standards can limit the approval and disbursement of loans, adding complexity to operations and increasing the administrative burden on lenders to adhere to changing guidelines.
- **Market Competition:** Intense competition from new age fintech companies pressures traditional lenders to innovate continuously, offer better terms, and improve customer experiences to maintain market share.
- **Technology and Fraud Risk:** Increased reliance on digital processes exposes lenders to a higher risk of cyber threats and fraud, necessitating robust cybersecurity measures and continuous monitoring to safeguard customer and company data effectively.

## PERSONAL LOANS

### Strong disbursements especially from NBFCs led to robust personal loan book growth in Fiscal 2024

The amount of personal loans outstanding has increased from ₹4.2 trillion in fiscal 2019 to ₹13.4 trillion in Fiscal 2024 at a CAGR of approximately 25.9%, driven by the rise in new age lenders, increasing lender focus on Tier 1 customers and beyond and a structural shift to a consumption driven economy. Personal loan outstanding stood at ₹13.8 trillion as of Q1 Fiscal 2025 and is likely to reach around ₹20-24 trillion in Fiscal 2027.

This growth is likely to be driven by healthy momentum in banks supported by their higher customer base in Tier 1 cities. Parallely, NBFCs would also continue to display aggressive growth in their personal loan book. NBFCs build their retail book through lower ticket-size personal loans and focus on growth in Tier 2 and below cities. Banks focus on the salaried middle-age group borrowers and have a higher share in Tier 1 cities as compared with NBFCs. End use of the personal loan can range from education loan, medical loan, travel loan, marriage loan, loan for self-employed, and other categories as personal loans are unsecured in nature with minimal or no end-use monitoring.

### Personal Loan Outstanding was ₹13.8 trillion as of Q1 Fiscal 2025

Note: P – Projected, Source: CRIF Highmark, CRISIL MI&A

The personal loan industry witnessed a CAGR of 25.9% from fiscal 2019 to 2024, exhibiting credit expansion across both banking institutions and Non-Banking Financial Companies (NBFCs). This positive trajectory was underpinned by the emergence of financial technology (fintech) companies and digital platforms. In response to this market trend, the RBI has implemented stricter regulations concerning consumer credit.

Specifically, the RBI has increased the risk weight attached to unsecured consumer loans by 25 percentage points, raising it to 125%. By increasing the risk weight associated with unsecured consumer loans, the RBI is setting a foundation for a more secure and sustainable credit environment. While these measures are expected to impact growth in the short term, but it is expected to promote stability and resilience in the industry over the long term, ensuring a healthier growth trajectory in the future.

## Threats and challenges in Personal Loan Segment

### Unsecured nature of loans may lead to asset quality concerns.

Personal loans are unsecured in nature and carry very high risk for lenders. In case of defaults by borrowers, it becomes very difficult for the lenders to recover the loan amount, and therefore NPAs in the segment are quite high as compared to other segments. This may affect the overall profitability of lenders. From an asset-quality perspective, higher caution is required for non-bank lenders since GNPA's continue to be elevated. With focused high double-digit growth in unsecured loans, lenders need to be cautious when onboarding loans with a weaker credit profile to prevent asset quality deterioration or higher write-offs. Higher inflation, coupled with stagnant income, could also cramp a borrower's repayment capability.

### RBI increases risk weight on assets for unsecured lending – encompassing personal loans and credit card loans

The RBI has heightened the risk weight attached to unsecured consumer loans by raising it to 125%. This move is intended to temper growth in the rapidly growing consumer credit segment & monitor dependence on bank borrowings of NBFCs. This move is to have considerable impact across the player group such as banks, NBFCs and fintechs. For banks, impact on capital adequacy ratio (CAR) will not be material, as banks are well capitalised and would hold sufficient capital buffers in managing the impact but could see the possible increase in lending rates for personal loans, and slight impact on incremental loan growth. For NBFCs, there would be an increase in cost of funds because of increase in risk weight for bank exposure to NBFCs. As a result, NBFCs could increase reliance on non-convertible debentures (NCDs) or bonds in the medium term. As RBI urged underwriting models of fintechs' players to be strengthened and to be relooked at, this could result in an increase in operating expenses, reduction in loan origination in unsecured personal loan segment, and increase in need to raise capital for

maintaining CAR levels. In effect, this regulatory adjustment is anticipated to have a notable impact on the growth momentum in the short to medium term across the player group.

### The exuberant growth and entailing risks

Ease of borrowing, innovative products such as travel now, pay later (TNPL), no-cost equated monthly instalments, burgeoning lifestyle expenses, etc., have contributed significantly to the rise in demand for personal loans. For personal loans, improved underwriting capabilities of banks and NBFCs (including fintechs), due to better availability of information and technology, have been the primary growth drivers. Personal loans are inherently riskier due to the absence of collateral, which means in cases of borrower default, the lender's ability to recover the outstanding amount is compromised.

In addition, the rise in personal loans was also driven by overleveraging of borrowers in addition to tapping new customers. This overleveraging at the borrower end could augment asset quality vulnerability.

## GOLD LOANS

*Gold loans credit outstanding is expected to grow at a CAGR of 18-20% from Fiscal 2024 to 2027*

Source: CRIF Highmark, CRISIL MI&A

The gold loan sector is still largely catered by unorganised players with potential for new entrants to enter the market and create space. Gold loans are typically small ticket, short duration, convenient and instant credit, and are typically sourced and serviced through a physical branch infrastructure. Moreover, the gold loan product and customer segment are adjacent to the small ticket financing segment for both consumers and small businesses alike. Going forward, CRISIL MI&A believes the following factors are expected to support industry growth:

- Scope to capture share from unorganised gold loan financiers.
- Initiatives to increase awareness and increasing comfort of customers with gold loans due to the convenience.
- Geographic diversification to markets beyond the southern part of India.

Demand for gold loans from micro enterprises and individuals to fund working capital and personal requirements is expected to increase owing to the pickup in economic activity. In addition, with demand reviving and market expansion through doorstep gold loans model, CRISIL MI&A expects gold loan credit outstanding to grow at a CAGR of 18-20% from Fiscal 2024 to 2027.

**Gold loan disbursement witnessed a CAGR of approximately 35% from Fiscal 2019 to Fiscal 2024, with disbursement in Fiscal 2024 at ₹12.5 trillion.**

Source: CRIF Highmark, CRISIL MI&A

Gold loans disbursement has witnessed a huge uptick in the past five fiscals, with disbursements growing at a CAGR of approximately 35% from Fiscal 2019 to Fiscal 2024, with ₹12.5 trillion disbursements as of Fiscal 2024 from ₹2.8 trillion. in Fiscal 2019. Gold loan disbursements as of Q1 Fiscal 2025 stood at ₹4.2 trillion.

**Urban regions accounted for around 42% share of overall gold loan credit outstanding as of Fiscal 2024**

Note: "Others" includes Small Finance Banks and foreign banks.

Among tier brackets, urban regions accounted for nearly 42% share in overall gold loan credit outstanding which was followed by rural regions accounting for nearly 39% market share and semi-urban regions accounting for nearly 11% market share. During the last five fiscals, urban regions have lost nearly 2% market share which was primarily captured by semi-urban regions.

**NBFCs account for nearly 8% share in overall gold loans credit, with Public Sector Banks accounting for the highest share**

Note: "Others" includes Small Finance Banks and foreign banks.

### Threats and challenges in Gold Loan Segment

- **Price Volatility of Gold:** Fluctuations in gold prices can significantly impact loan security and lenders' risk exposure. Declines in gold value reduce collateral strength, raising the risk of losses on defaulted loans.
- **Regulatory Oversight and Compliance:** Stringent regulations and periodic changes in guidelines require gold loan providers to maintain high compliance standards. This adds operational complexities and can restrict certain lending practices.
- **Competition from Informal Lenders:** Local and unregulated lenders offer quick, often more flexible, gold loans, posing competition to formal financial institutions and making it harder to maintain competitive pricing.
- **Risk of Loan Defaults and Fraud:** Gold loan providers face risks of fraud through fake or impure gold collaterals, as well as default risks from borrowers. Robust valuation and verification processes are essential to mitigate these threats

### NEW PASSENGER VEHICLE FINANCING MARKET

**Vehicle loan (passenger vehicles loan) portfolio expected to grow at 14-16% CAGR from Fiscal 2024 to Fiscal 2027**

Note: The above data includes lending portfolio of new passenger vehicles.

Source: CRIF Highmark, CRISIL MI&A

Passenger vehicle loan portfolio witnessed 12.1% CAGR between Fiscal 2019 to Fiscal 2024. In Fiscal 2023, passenger vehicle segment grew by 21.9% year-on-year due to improvement in economic activities of the post-COVID period. In Fiscal 2024, the passenger vehicle loan portfolio grew by 19.8% due to increasing finance

penetration. CRISIL MI&A estimates finance penetration for passenger vehicles to be between 75% to 80%, which is expected to improve in the upcoming years.

### **NBFC's ability to tap markets not serviced by Banks is expected to help them gain an edge**

Over the years, banks have gained further inroads into the new-PV financing market, grabbing significantly greater share from non-captive NBFCs as captives have been able to maintain share with their superior connect to customers through their dealerships. Auto loans will be a favoured option for both banks and NBFCs with the consideration that new PVs carry low risk. In Fiscal 2024, banks gained higher share due to their better ability to cross-sell and offer lower financing costs compared with NBFCs on account of higher repo rates translating into higher cost of funds for non-banks. Also, delinquencies in this segment are low considering a better consumer profile, leading to banks becoming more aggressive in this segment. NBFCs have more penetration in the rural and semi-urban parts of the country. Thus, they can tap markets, which otherwise will not be accessible through banking channels.

### Threats and challenges in Passenger Vehicle Loan Segment

- **Market Competition and Interest Rate Pressure:** Intense competition among banks, NBFCs, and fintechs drives down interest rates, squeezing profit margins. Lenders must offer competitive terms to attract customers, affecting revenue growth.
- **Vehicle Depreciation and Resale Risk:** The rapid depreciation of vehicle value reduces the collateral strength, especially in the case of defaults. Poor resale values can lead to significant losses for lenders in repossession cases.
- **Credit Risk and Loan Default:** Economic uncertainty and job instability increase the likelihood of loan defaults, impacting lenders' profitability. Borrowers with lower creditworthiness pose higher risks, requiring stringent credit assessments.

### TWO-WHEELER LOANS

Two-wheeler domestic sales grew by 14% to reach sales volume of 18.4 lakh units in Fiscal 2024. Two-wheeler volumes are expected to improve by 13-15% in Fiscal 2025 on account of recovery of rural market sales aided by healthy crop prices and incomes finally catching up with the hike in vehicle prices and pent-up replacement demand. Furthermore, the introduction of electric scooter models by OEMs is also helping drive volumes.

### Two-wheeler financing market

Two-wheeler financing witnessed a CAGR of 18.2% from Fiscal 2019 to Fiscal 2024, reaching ₹1.39 trillion in Fiscal 2024 and ₹1.47 trillion by Q1 Fiscal 2025. During the fiscals, growth in two-wheeler financing was robust in Fiscal 2020 and Fiscal 2021, witnessing a year-on-year growth of around 22% and 9%, respectively, while growth completely slowed down in Fiscal 2022 primarily due to the COVID-19 pandemic and lockdowns across the nation, with outstanding growing at 2% in Fiscal 2022. Post-Fiscal 2022 financing again picked up pace with outstanding growing at approximately 29% in Fiscal 2023 from the past Fiscal. By Fiscal 2024, outstanding touched ₹1.39 trillion growing by 32% year-on-year. Going forward, two-wheeler financing is expected to grow at a CAGR of 17-19% from Fiscal 2024 to Fiscal 2027 and is expected to reach ₹2.20-2.40 trillion by Fiscal 2027. CRISIL MI&A expects two-wheeler finance penetration at 35-40% as of Fiscal 2025.

**NBFCs account for the highest share in two-wheeler financing across Fiscal 2019 – Q1 Fiscal 2025**

The two-wheeler financing segment is increasingly becoming a stronghold of NBFCs due to their greater ability to tap rural markets by offering loans at rates much lower than those of unorganised players. The limited presence of banks in rural markets also helps them. Though weaker demand sentiments have delayed their expansion, NBFCs remain poised to dominate the two-wheeler financing segment this fiscal as well as banks are likely to tread the space carefully.

NBFCs accounted for highest share in credit outstanding among lenders, accounting for 67% as of Q1 Fiscal 2025, rising from 62% market share in Fiscal 2019, followed by private sector banks accounting for second highest share (29%) as of Q1 Fiscal 2025, declining from 33% in Fiscal 2019. The under-penetrated rural market will be the key growth segment for NBFCs. Rising income will be further aided by better rural connectivity and rising participation of women in both urban and rural areas.

In Fiscal 2024, overall disbursements grew at a slower growth of 25.8% on account of strong growth of two-wheeler sales.

### Threats and challenges in Two-wheeler Loan Segment

- **High Default Risk:** Two-wheeler loans often target low-income or first-time borrowers, leading to a higher risk of defaults. Economic fluctuations can worsen repayment challenges, impacting the overall loan portfolio quality.
- **Intense Market Competition:** Heavy competition from banks, NBFCs, and fintechs results in lower interest rates and thin profit margins. Lenders face pressure to provide favorable terms and flexible options to attract borrowers.
- **Vehicle Depreciation and Limited Resale Value:** Two-wheelers depreciate quickly, reducing their value as collateral. This creates challenges in recovering loan amounts through repossession and resale in case of defaults.

## MICROFINANCE INDUSTRY

### Rising penetration to support continued growth of the industry

With economic revival and unmet demand in rural regions, CRISIL MI&A expects the overall MFI portfolio size to grow at CAGR of 16-18% between Fiscals 2024 and 2027. Key drivers for the superior growth outlook include increasing penetration into the hinterland and expansion into newer states, faster growth in the rural segment, increase in average ticket size and higher usage of support systems such as credit bureaus. The presence of self-regulatory organisations, such as MFIN and Sa-Dhan, is also expected to support the sustainable growth of the industry going forward. Moreover, household credit is a huge untapped market for the MFI players. The country has seen household credit penetration via MFI loans rising, but it is still on the lower side.

NBFCs' MFI have the highest share of overall MFI loan outstanding, which increased from 29% in Fiscal 2019 to 39% in Fiscal 2024. Banks have lost a minor share in MFI loans because of NBFCs' MFI prioritizing customer needs, ensuring quick turnaround times, delivering excellent customer service, and expanding their geographic reach. CRISIL MI&A expects the competitive positioning of NBFCs' MFI to remain strong, given their strong target customer and product focus.

**Threats and challenges in Microfinance Industry:**

- **Financial literacy:** People in rural areas often lack financial knowledge and therefore having transaction with them and making them understand terms and conditions of loan products become challenging.
- **Over-indebtedness:** Due to lack of adequate financial literacy, the industry is susceptible to borrowers failing to manage their debt properly which leads to over-indebtedness and adversely impacts repayment capabilities particularly in geographical areas that are highly penetrated.
- **Higher NPAs:** Since micro loans are unsecured, risk of credit loss increases. Moreover, NPAs are higher in microfinance sector as compared to housing, vehicle, etc. owing to customer profile.
- **Prone to external shocks:** Historically, Micro borrowers have been prone to socio-economic and environmental disturbances which significantly impact their repayment capabilities.
- **Cost of outreach:** Reaching rural areas and servicing small loan amounts involve high cost of operations. Setting-up branches and/or having partnership with agents, high disbursement and collection cost involved (employees need to visit remote villages for sourcing and collection of small loan amounts which increase the transportation cost) increase the overall cost of MFIs focusing in rural areas.
- **Technological challenges:** People in rural areas are not so tech savvy to understand and carry out banking transactions and therefore requirement of manual involvement is more which is time consuming and also increases the cost.
- **Dominance of Cash Transactions:** Cash transactions continue to be the dominant mode of loan repayments in the microfinance sector. The reliance on cash-based repayments can be prone to errors and increase the risk of frauds, posing challenges for microfinance lenders in maintaining accurate records and reducing operational complexities.

### Overview

We are one of the leading, diversified retail-focused non-banking financial companies (“**NBFCs**”) in India in terms of Total Gross Loan book size, according to the CRISIL Report. Our Company is categorized as an Upper Layer NBFC (NBFC-UL) by the RBI. We offer a large portfolio of lending products that cater to a growing and diverse customer base through a wide omni-channel distribution network. Our lending products are offered through our three business verticals: Enterprise Lending, Asset Finance and Consumer Finance. We believe that the success of our business model and operating philosophy is evidenced by our strong and sustained growth and profitability metrics. Our Total Gross Loans stood at ₹986.2 billion as at September 30, 2024, reflecting a CAGR of 20.93% between March 31, 2022 to September 30, 2024. Our assets under management stood at ₹902.3 billion as at March 31, 2024 reflecting a CAGR of 21.18% between Fiscal 2022 and Fiscal 2024. In Fiscal 2024, we generated a profit after tax of ₹24.6 billion, which reflected a CAGR of 55.98% between Fiscal 2022 and Fiscal 2024. Our Total Gross Loans growth, operating efficiencies and strong asset quality helped us deliver Return on Average Assets of 3.03% and Return on Average Equity of 19.55% for Fiscal 2024, which is one of the highest amongst our NBFC peers, according to the CRISIL Report.

We began our journey in 2007 as a subsidiary of HDFC Bank Limited (“**HDFC Bank**”), which is the largest private sector bank in India in terms of total assets of ₹36,880.7 billion as at September 30, 2024, with businesses (including those of its subsidiaries) spanning across retail and commercial banking, asset management, life insurance, general insurance and broking, as per the CRISIL Report. Under HDFC Bank’s parentage, we have embedded a philosophy of balancing between delivering long-term sustainable growth and profitability. We have

derived benefits from HDFC Bank's parentage, including its brand recognition, while still establishing a set-up independent from HDFC Bank across our various functions including sourcing, underwriting, operations and risk management functions.

We are one of India's largest and fastest growing customer franchises, according to the CRISIL Report, and we served 17.5 million customers as at September 30, 2024, which grew at a CAGR of 28.22% between March 31, 2022 and September 30, 2024. We primarily cater to underserved and underbanked customers in low to middle-income households with minimal or no credit history. Our customers mainly comprise of salaried and self-employed individuals, as well as business owners and entrepreneurs. We aim to meet the demands of our various customer categories with our diversified product offerings, strong geographical presence across India, technology backed rapid turnaround times and strong customer service. Our focus has remained on building a highly granular loan book with our 20 largest customers accounting for less than 0.36% of our Total Gross Loans as at September 30, 2024. Our aggregated average ticket size stood at approximately ₹145,000 as at September 30, 2024.

We are a diversified NBFC, with a goal of having an optimal mix across products, while maintaining a balanced approach to secured and unsecured loans in our loan book. We believe that our strategy of portfolio diversification across both products and geographies creates a strong and sustainable franchise. Secured loans represented 71.08% of our Total Gross Loans and unsecured loans represented 28.92% of our Total Gross Loans as at September 30, 2024. Our diversified product portfolio serves multiple credit needs of customers across three business verticals:

- *Enterprise Lending*, accounting for 39.85% of our Total Gross Loans as at September 30, 2024—secured and unsecured loans primarily to micro, small and medium enterprises (“**MSMEs**”) to meet their varied and evolving business needs;
- *Asset Finance*, accounting for 37.36% of our Total Gross Loans as at September 30, 2024—secured loans for purchase of new and used commercial vehicles, construction equipment and tractors, all of which are income generating assets for our customers; and
- *Consumer Finance*, accounting for 22.79% of our Total Gross Loans as at September 30, 2024—secured and unsecured loans for purchase of consumer durables, digital and lifestyle products, two-wheelers, automobiles and other unsecured personal loans.

We also offer business process outsourcing (“**BPO**”) services such as back-office support services, collection and sales support services to our Promoter as well as fee-based products such as distribution of insurance products primarily to our lending customers.

Our omni-channel “phygital” distribution model combines a large branch network, in-house tele-calling teams and various external distribution networks and channel partners. As at September 30, 2024, we had a pan-India network of 1,772 branches in 1,162 towns across 31 States and Union Territories, with over 80% of our branches located outside the 20 largest cities in India. We operate an organised and verticalised branch structure with separate sales, credit and collections teams for each of our verticals with a common operations team. This allows us to tailor our operations based on the product and customer segments that we cater to. Our network of branches is complemented by our external distribution channel partnerships with over 80 brands and original equipment manufacturers (“**OEMs**”) and external distribution networks with over 140,000 retailers and dealer touchpoints as at September 30, 2024. Our diversified loan book is distributed across states with a deep understanding of micro-markets across India for each of our business verticals.

We have a hybrid underwriting structure depending on the product, customer segment and ticket size. We have implemented a hybrid credit approach with a centralised credit assessment and underwriting unit for Consumer Finance products (where ticket size is small and tenure is short) and decentralised regional and branch-level credit assessment and local underwriting teams that have a more nuanced and contextual understanding of the customer's profile for Enterprise Lending and Asset Finance products (where ticket size is bigger and tenure is longer). Our loan book is well seasoned as it has weathered multiple credit cycles in India since our inception. Our tech-enabled operating processes have contributed to maintaining a strong asset quality and low Credit Costs despite our fast-growing customer base and distribution network. This is evidenced by our GNPA and NNPA ratios of 2.10% and 0.83%, respectively, as at September 30, 2024 and Credit Costs Ratio (annualised) of 1.79% for the six-month period ended September 30, 2024. We remain focused on ensuring that we employ highly conservative policies for provisioning, with 66.82% of Provisioning Coverage Ratio as at March 31, 2024, one of the highest amongst the peers according to the CRISIL Report and a 3.88% provisioning on our Total Gross Loans, as at March 31, 2024.

We have complimented our deep on-ground lending expertise with strong digital capabilities. We have instituted tech-enabled sourcing, credit assessment, risk management and collections capabilities as well as customer engagement tools. We have implemented a digitally assisted sales process for our field officers (“**FOS**”), direct

selling agents (“DSAs”), dealers and OEMs, improving their decision matrix, productivity and customer engagement. We also leverage automated credit decisioning through rule- and scorecard-based evaluations to enhance our underwriting capabilities and have digitalised our collection operations. As at September 30, 2024, over 95% of our customers were sourced and onboarded digitally with assistance from our sales team or channel partners and over 95% of our collections were done through digital and banking channels. This helps us streamline our operations, reducing our turnaround time and improving our cost to income ratio.

We have a diversified liability franchise supported by a strong credit rating of AAA stable by CRISIL and CARE, which is the highest rating that can be assigned on the credit rating scale for any NBFC in India, according to the CRISIL Report. This has allowed us to fund our operations at competitive rates and tenors across fixed and floating-rate debt instruments. Our Average Cost of Borrowings stood at 7.53% as at March 31, 2024, which is one of the lowest amongst our competitors, according to the CRISIL Report. We have maintained a prudent and sustainable level of leverage in our business, with a debt-to-equity ratio of 5.93x as at September 30, 2024, while ensuring adequate capitalisation with a capital to risk assets ratio (“CRAR”) (including Tier II Capital) of 19.30% as at September 30, 2024. We continue to be prudent on our asset-liability management (“ALM”) strategy which aims at managing risk and providing a comprehensive and dynamic framework for measuring, monitoring and managing liquidity and interest rate risks. This strategy helps to minimize the liquidity risk by mitigating the mismatches in the maturity pattern of assets and liabilities. We have not raised any equity capital in the last seven years, and during this period, we have continued to grow our business, and our Total Gross Loans increased from ₹340.7 billion as at April 1, 2017 to ₹986.2 billion as at September 30, 2024, representing an increase of ₹645.5 billion during this period.

We benefit from a distinguished Board of Directors offering invaluable guidance in our operating framework as well as risk management practices. 9 out of 11 of our Board members are independent directors. In addition, our Key Managerial Personnel and members of Senior Management have a deep understanding of the Indian lending market. Most of our Key Managerial Personnel and most of the members of our Senior Management have been with the Company for more than 11 years and they bring diverse experience in various financial services and functions related to our business.

The following table sets forth certain financial and operational metrics for our Company. Unless marked with an asterisk (\*), the information is presented with respect to our lending business, which comprises our three business verticals: Enterprise Lending, Asset Finance and Consumer Finance.

## Our Strengths

### **Highly granular retail loan book, bolstered by a large and rapidly growing customer base with a focus on serving the underbanked customer segments**

We are one of India's largest and fastest growing customer franchises according to the CRISIL Report, and we have served 17.5 million customers as at September 30, 2024, which grew at a CAGR of 28.22% between March 31, 2022 and September 30, 2024. The growth of our customer base is supported by the government's policies aiming to promote financial inclusion for the middle-class.

Our customers are primarily composed of middle-class salaried and self-employed individuals, as well as small business owners and entrepreneurs. This customer base has contributed to a loan book that is expected to have the potential of delivering competitive risk-adjusted returns. Our low customer concentration reduces our dependence on any particular set of customers. Our 20 largest customers contributed to less than 0.36% of our Total Gross Loan book as at September 30, 2024. A key customer segment for our strategy is the underbanked but bankable

population of India, and we believe this market segment features favourable customer characteristics and profitable economics with only a few lenders of scale operating in the same market segment. According to the CRISIL Report, only 12% of India's population borrowed money from formal sources in the 2021 calendar year. Further, while rural India accounts for 47% of GDP, it accounts for only 10% of total banking deposits and 8% of credit, as of March 2024 per the CRISIL Report. Our ability to serve the underbanked is backed by our capabilities to underwrite customers with minimal or no credit history. As at September 30, 2024, 12.02% of our Total Gross Loans were to customers who are classified as "new to credit".

We have been able to sustainably deliver strong loan book growth over our 17 years of operations. This has been supported by our long-term strategic vision and initiatives across customer sourcing, product quality, credit underwriting quality, robust collections and controlled costs of operations and financing. As at September 30, 2024, the average ticket sizes of our loan book in Enterprise Lending, Asset Finance and Consumer Finance were approximately ₹0.57 million, ₹0.84 million and ₹0.04 million, respectively, with average loan tenures of 6, 4 and 2 years, respectively.

The graph below illustrates the growth in our number of customers from Fiscal 2022 to September 30, 2024.

#### ***Large, diversified and seasoned product portfolio with a sustainable track record of diversification, growth and profitability through the cycles***

We have built a balanced and diversified portfolio of lending products that seek to fulfil a wide range of needs and aspirations for our customers, including our underbanked customers. As at September 30, 2024, our product portfolio consisted of 13 lending products spanning across our three business verticals of Enterprise Lending, Asset Finance and Consumer Finance. Our product suite varies by type of loan, type of customer, tenure and interest rate. We believe that our products offering is capable of addressing the key borrowing needs of our customers that span from business loans (for working capital and business expansion purposes) to loans for the purchase of new and used vehicles and equipment (for income-generating purposes) to loans for the purchase of consumer, digital and lifestyle durables and personal vehicles (for personal needs). We also offer business process outsourcing ("BPO") services to our Promoter and fee-based products such as distribution of insurance products primarily to our lending customers.

Our product portfolio has delivered resilient performance and profitability, seasoned through multiple economic and credit cycles as well as events such as the 2008 global financial crisis, the 2013-2014 liquidity crisis in India, the NBFC liquidity crisis of 2018 and the COVID-19 nation-wide lockdowns in 2020 and 2021.

We have created and structured our business verticals to operate as independent businesses within our wider organizational structure, with dedicated senior management oversight backed by teams of experienced industry professionals. Our business verticals have developed customised strategies including tailored customer sourcing channels and distribution models and dedicated underwriting and product development teams to drive growth and profitability. Our operating structure has been a key enabler of our diversification and growth across cycles.

Since our inception, we have been able to develop, refine and enhance a strategy for launching relevant, cost-effective and scalable new products. Through deep understanding of our customer segments, we have been able to diversify our three business verticals by adding new products that address specific needs of our customers. As illustrated in the map below, our deep understanding of local nuances across India has enabled us to ensure that we are targeting the right customers with the right products in each region.

As at September 30, 2024, our loan book is well diversified and granular across products with no single product accounting for more than 25% of our Total Gross Loan book. We had ₹986.2 billion of loans outstanding as at September 30, 2024, as compared to ₹613.3 billion as at March 31, 2022, reflecting a growth at a CAGR of 20.93%. The average tenure of our Total Gross Loan book was around 4 years as at September 30, 2024 and 71.08% of our Total Gross Loan book was secured by asset-backed collateral as at September 30, 2024.

Our diversified product portfolio also contributes to driving increased cross- and up-selling across our products from our existing customers. Our deep understanding of customer behaviour also creates opportunities for deepening our customer engagement.

The below image provides an overview of our main products in each of our verticals as of September 30, 2024.

### ***Tailored sourcing supported by an omni-channel and digitally powered pan-India distribution network***

Our phygital sourcing network is composed of our own internal distribution network, our external distribution network as well as our digital capabilities. We have a pan-India presence with no region accounting for more than 35% of our Total Gross Loans for the six-month period ended on September 30, 2024. Given the highly fragmented geographic dispersion of India's underbanked population beyond the metropolitan cities, we have further tailored our distribution presence to strengthen our visibility beyond metropolitan cities and towns in India. We have customized different sourcing strategies for each of our business verticals to optimise distribution. We

have strived to ensure that we are present wherever our customers are by following a dispersed branch-led distribution strategy across India combined with a scaled and growing omni-channel presence through our partnerships with OEMs, network of dealers and distribution points, point of sales at retail stores and direct selling agents. Our distribution strategy is complemented by a variety of digital channels, including in partnership with fintechs, our website and our own customized and user-friendly application.

Our omni-channel presence allows us to gain access to customer segments across all products within our business verticals. Our branch network creates opportunities for our on-the-ground sales team to engage with and effectively service small, medium and large business customers, serving as a backbone for our Enterprise Lending vertical. Our multiple, tenured partnerships with leading Indian and global OEMs and their dealers supports our customer acquisition for our Asset Finance vertical. Our pan-India touchpoint distribution network is well positioned for our Consumer Finance vertical.

#### *Internal Distribution Network: Branch distribution and Direct Selling*

We have established a strong presence across India with a country-wide network of 1,772 physical branches spreading across over 1,162 towns and cities spread across 31 States and Union Territories as at September 30, 2024. Our branches have grown from 1,374 branches as at March 31, 2022 to 1,772 branches as at September 30, 2024. Our branch network is well diversified across India's geography, with no one region in India accounting for more than 35% of our branches as at September 30, 2024. Further, as at September 30, 2024, over 80% of our branches are located outside India's 20 largest cities by population and over 70% are located in Tier 4+ towns, highlighting our strong focus on maximising our reach towards our underbanked target customer segment. Our branch network is supported by direct sales through our in-house tele-calling team, which is the primary distribution channel for our personal loan products. Our tele-sales teams are based in regional hubs and are trained to interact with the various cultures across India's regions.

The following map shows our pan-India branch distribution network as of September 30, 2024.

The below graphs illustrate our presence in India beyond metro markets as well as across the country as of September 30, 2024.

### Strong Presence Beyond Metro Markets <sup>(1)</sup>

### Balanced Presence Across Geographies <sup>(1)</sup>

#### External distribution

Our internal distribution network is highly complemented by our external distribution networks and channels of third-party partners which include leading Indian and global auto OEMs, consumer and digital durable brands, dealers for auto, two-wheelers, cars, tractors and construction equipment, point-of-sales locations (such as malls, supermarket and retail stores), lifestyle goods and direct selling agents. As at September 30, 2024, we had partnerships with over 80 brands and OEMs. Similarly, our external distribution network has grown to over 140,000 retailers and dealer touchpoints as of September 30, 2024.

#### Digital Distribution

We are growing our external digital distribution channels, such as by partnering with fintechs. We also built and are expanding our own digital distribution channels. Our HDB On-The-Go application allows our customers to access most of our products. It had around 6.9 million downloads as of September 30, 2024. Further, our FOS, OEMs, dealers and DSAs are equipped with digitally assisted sales tools that aim to improve their decision matrix, productivity and customer engagement. The graph below provides an overview of our digital distribution which includes sales, customer support and collections as of September 30, 2024.

#### Comprehensive systems and processes contributing to robust credit underwriting and strong collections

A key focus of our credit risk management framework has been to establish strong credit underwriting and collections capabilities which has ensured our sustainable growth. We have instituted a robust and comprehensive underwriting and collections process led by our Chief Credit Officer and supported by a dedicated and experienced team of professionals.

#### Underwriting

We have built an in-house, experienced and dedicated underwriting team of around 4,500 members as at September 30, 2024 that operates independently of our sales team. We have ensured that there are no overlap of responsibilities between our credit and sales teams in terms of targets, key responsibility areas and outcomes.

The diversity of our portfolio of products allows us to consider many different credit profiles and enables us to cater to various segments of customers with highly diverse backgrounds in India's fragmented borrower market. As a result, we have implemented a hybrid credit approach with a centralised credit assessment and underwriting unit for Consumer Finance products (where ticket size is small and tenure is short) and decentralised regional and branch-level credit assessment and local underwriting teams that have a more nuanced and contextual understanding of the customer's profile for Enterprise Lending and Asset Finance products (where ticket size is bigger and tenure is longer). Furthermore, keeping pace with the evolution of technology in credit underwriting, we have built capabilities to be able to deliver a rapid decision for customers, including for our new-to-credit customers. Our digital capabilities have also allowed us to onboard customers and complete their credit assessment entirely through our online channels in some of our product categories. We have also been able to underwrite over 95% of loans digitally end-to-end as of September 30, 2024.

Our approach to credit is highly data-driven. We use multiple external and internal sources of customer data to perform our underwriting. We have developed sophisticated and customised credit scorecards enabling us to apply rule-based decisioning systems and automate the underwriting of loans through the use of rule engines, CRM bureau integration and 360 credit assessment. Our scorecards generally include metrics that are relevant to evaluate customer creditworthiness such as demographics, loan exposures and delinquencies, if any. We regularly re-evaluate the credit decisioning variables in our scorecards to keep them updated to deliver a high level of precision in our credit decisions. Furthermore, we monitor the behaviour of our existing customers by analysing their credit scores monthly to ensure that we remain fully cognizant of their credit behaviour across all their loans and receive early warning signs of any delinquent behaviour.

The strength of our underwriting is well evidenced by the amount of our Gross Stage 3 Loans and Credit Cost. As at March 31, 2024, our GNPA and NNPA stood at 1.90% and 0.63%, respectively, which is one of the lowest amongst our NBFC competitors according to the CRISIL Report and our Credit Cost Ratio was 1.33% for Fiscal 2024.

### *Collections*

As at September 30, 2024, our overall collections team consisted of over 12,000 employees. Our collection teams operate at the central, regional and branch level and act in tandem with our sales and credit underwriting teams to ensure robustness of collections with low delinquencies. We have an in-house dedicated team of approximately 170 specialists in legal and regulatory compliance for handling cases of recovery and enforcement of collections. While a vast majority of our collections are handled in-house, we also employ collections agents after thorough reviews and vetting to handle a small portion of our collections for certain products within our Consumer Finance vertical. A majority of our loan repayments are received through the National Automated Clearing House ("NACH") mandate, but to the extent repayments are not received through NACH, they are collected through an in-house tele-calling and collections team. As at September 30, 2024, we had a team of over 3,500 employees for making tele-calls to customers for collections. Given the level of linguistic variety in India, this team is split by regions and operates out of call centres across the country. We also have a dedicated centralised collections team for training our collections employees. Our centralised collection team also ensures that a high level of quality and conformity is maintained in the collections process.

Our portfolio monitoring and tracking on a regular basis entails evaluation of the performance of each product based on the early book behaviour, tracking of portfolio bounce rates at the 30, 60 and 90 Days Past Due (DPD) and analysing our portfolio on an overall basis as well as by bureau, state and regional composition. Such monitoring and tracking is completed through a dedicated, in-house developed collections application that has multiple in-built features including monitoring, validation of collections, provision of SMS-based receipts to customers and use of checks. Further, we have on-the-ground collection agents who manage physical collections from customers. Our collections through digital and banking channels constituted over 95% of our collections for the six-month period ended September 30, 2024.

The image below illustrates our comprehensive collections scorecard system as of September 30, 2024, which allows us to maintain high collection efficiency.

In addition to our own collections, we also provide loan collection services for our Promoter. Our multi-year operating history of collections both for our in-house originated loan book and for our Promoter, have created insights on customer behaviour and portfolio behaviour and have played a meaningful role towards developing our in-house robust analytics and collection strategies across collection life cycles.

### Advanced technology tools driving enhanced customer experience and efficiency across each stage of the customer lifecycle

We have an advanced technology and data analytics platform that covers all key areas and stages of our business, including customer sourcing, onboarding and underwriting as well as operations and collections. As such, our technology capabilities are benefiting our customers, our third-party partners as well as our sales teams. We believe our technology platform provides us with a competitive advantage by increasing our efficiency in sourcing and retaining revenue, increasing employee productivity and optimising our cost of operations. Our advanced technology and data analytics are also an important part of maintaining our credit quality. The graph below illustrates our technology capabilities in the various areas of our business as of September 30, 2024.

### Sourcing

Our in-house and third-party technology and analytics professionals have strengthened our digital capabilities over and above our branch-led distribution network to accelerate the pace of customer acquisition. We effectively use search engine optimisation and marketing along with digital third-party origination channels like lending and aggregation-focused fintech partners to originate new loans digitally for consumer durables and digital products. Our FOS, OEMs, dealers and DSAs are equipped with digitally assisted sales tools that aim to improve their decision matrix, productivity and customer engagement. We do business with our partners through multiple online tools that are delivered through full-stack application programming interfaces ("APIs"). Our on-the-ground sales

teams are equipped with digitally assisted tools to improve coverage of customers in their dedicated region and their ability to effectively engage with them.

### Customer Experience

Our 'HDB On-the-Go' mobile application enables our customers to access the majority of our products and services online and get personalised assistance on the application. Customers are able to improve their experience through the self-service options on the application. We have built seamless, digital journeys across various areas, including availing new loans, onboarding, locating nearby branches, servicing existing loans and accessing loan documentation online to enable customers to transact and engage with us remotely. Further, we have developed a full digitalised paperless, onboarding for many of our Consumer Finance products. We have also developed digital onboarding capabilities for our Loan Against Property and Auto Loans products, which typically require significant physical processing. We also provide digital customer support over our online channels, which have resulted in 138,199 customer queries being resolved fully online in the six months period ended September 30, 2024 compared to 139,319 queries in Fiscal 2022.

Our ability to digitally onboard customers and disburse loans has resulted in improved performance of our loan underwriting process. Furthermore, our quick and efficient decisioning process has also resulted in the increase in our customer franchise as we are able to source and retain more customers.

### Cross-Selling

We have data-analytics driven cross-sell capabilities, maximising the lifetime value of our customers with minimal customer retention cost. Our deep understanding of customer behaviour across the borrowing lifecycle combined with our data analytics repository allows us to recommend personalised loan products for our existing customers. We have provided pre-approved loan limits to our existing high-quality customers for increase conversion or to apply for unsecured loans. Such customers can obtain new loans directly in a very short timeframe through our digital channels such as our DIY journey platforms. These capabilities have been a key driver of the continued growth in our cross-sell and up-sell rates to our existing customer base.

### Underwriting and Collections

We have employed several automation tools in our credit underwriting and collections process. We have developed several in-house automated customer rating scorecards using artificial intelligence and machine learning models which are based on risk parameters for rapid and rule-based decisioning. At the time of customer KYC and onboarding, we have advanced mechanisms for fully digitising the documentation verification process, resulting in quicker and more accurate processing and reducing turnaround time. During the collections process, we have instituted numerous tie-ups with external service providers such as payment service providers, payment gateways and financial services institutions to further customers' ability to transfer collections from a variety of sources.

We have successfully digitalised the onboarding process in products, such as Auto Loans and Commercial Vehicle Loans. We have also been able to underwrite over 95% loans digitally or through an assisted digital journey for the six-month period ended September 30, 2024, further highlighting our multi-disciplinary strength in combining digital customer sourcing with strong credit evaluation and underwriting practices.

### Employees

We have deployed tools and applications within our organisation that aim to enhance the productivity of our employees. We have invested in API integration that is expected to provide us with the ability to handle peak time API calls. We have set up real-time dashboards and management information systems that make data available to our employees. Thus, our branch-based teams are fully plugged into our wider centralised servers and get access to the relevant data at the branch level. Generally, our technology is product-agnostic and highly scalable and proprietary, resulting in a seamless experience for our employees.

## **Our Strategies**

### ***Diversify and expand our addressable customer segments by widening and enhancing our product offering***

We have created a highly diversified portfolio of lending products for our target customer segments. Our products are designed to address demands across the lifecycle of our customer segments. Product innovation has been a key focus area and driver of our diversified and sustainable growth in the past and we will continue to keep adding new products to our portfolio while enhancing our existing products to improve our value proposition to customers. For example, our Two Wheeler Loans largely entailed a manual underwriting process. To improve our customer journey, we deployed an automated underwriting process that involved the creation of real time customer scorecards, leading to quick credit decisions. This enabled us to cater to and address a larger customer segment across geographies in a consistent manner. Such diversification and expansion of products will also allow us to increase our cross-selling capabilities across our various existing and new business verticals.

### ***Continue to expand our pan-India omni-channel distribution network***

We have established a pan-India hybrid presence, with a physical branch country-wide network of over 1,772 physical branches spread across over 1,162 Indian towns and cities located in 31 States and Union Territories as at September 30, 2024, combined with a digitally powered distribution network composed of in-house and third-party channels. In addition, we had over 80 OEM and brand partnerships and a network of over 140,000 retailers and dealer touchpoints as at September 30, 2024. We intend to continue to grow and diversify our distribution network by opening additional new branches to expand our coverage across the entirety of India while also deepening our relationships with OEMs, dealers, brands, points of sales distribution and DSAs, and continuing to add more partners, with the goal of ensuring that we are present in all channels wherever our existing and target customers are located.

### ***Continue to invest in technology, data analytics and artificial intelligence to further improve customer experience, increase organisational productivity and decrease costs***

Our technology platform has been a core enabler of our success and it will continue to have a key role in driving up our efficiency across our operations. Our technology investments are expected to continue to improve various aspects of our business from the experience of our customers to the lending lifecycle from origination to repayment. Our technological solutions also have an important role in our ability to increase cross-sell and up-sell opportunities, increase underwriting and collections efficiency and enhance employee productivity. We expect to continue to increase the scope of usage of new and emerging technologies such as data analytics, machine learning and generative AI models to further improve our capabilities and efficiency. We will also focus on ensuring that our data security platforms are positioned to handle all emerging digital threats.

### ***Continue to diversify our borrowing profile to optimise borrowings costs***

We aim to continue to further diversify our funding sources by enlarging and deepening our lender base to optimise both our leverage level and our Average Cost of Borrowings. For example, we increased our external commercial borrowings ("ECBs") in Fiscal 2024 to a total of USD 1 billion as of September 30, 2024. Our other diversified funding sources include public sector, private sector, foreign banks, mutual funds, insurance companies, pension funds and financial institutions. We raise funds through term loans, non-convertible debentures ("NCDs"), subordinated bonds, ECBs, perpetual bonds and commercial papers instruments. See "—Treasury Operations and Financing" on page 258.

**Further strengthen and improve our robust risk management framework as well as underwriting and collections capabilities to minimise the risk of credit losses**

As we plan to grow our customer franchise, we intend to focus on enhancing our robust risk-management framework to ensure we are able to retain our high credit quality. Through our history of operations over the last 17 years, we have leveraged our deep understanding of customer behaviour and our distinguished risk assessment, pricing and underwriting capability to develop a suite of lending products that fulfil the diverse needs of customers, covering segments across our three business verticals. We continue to upgrade our credit underwriting, collections and risk management policies and strategies by training our employees in our customised credit assessment processes, using technology and improving the speed of our decisioning process.

**Continue to attract, upskill and retain talented employees by strengthening our organizational culture**

Our employees have been key to our sustainable growth and performance and will continue to be instrumental in our future growth. We have instituted strong processes for ensuring that we continue to recruit the right people while retaining and training our existing workforce. We also train our new employees and provide continuous training to boost the skills of our existing employees, ensuring that they are kept up to date with new technologies. Further, we have created a holistic organisational culture to instil a strong sense of togetherness in our employees. Our culture is focused on driving growth while ensuring prudence and sustainability, so that our growth does not compromise our customer experience. We intend to continue to deepen and embed this culture in our organisation and create a valuable consumer lending franchise that will last for generations and benefit our customers, partners, employees and communities.

## **Asset Finance**

We launched our Asset Finance vertical in 2010. We offer financing options to customers for acquiring new and used commercial vehicles, construction equipment and tractors, all of which are income generating assets for our customers. While we operate in both new and used vehicle markets, we have employed different distribution approaches for each market. While the new vehicle market is more focused on OEM partnerships and their strong nationwide dealership network, our strong customer base for the used vehicle market has been built through our in-house sales teams which is spread out across the country. The used vehicle market has higher yields and is more profitable but we see the new vehicle market as an important source of high-rated customers as well and we have an equal focus on both markets.

Demand for the underlying industries of these vehicles such as logistics and construction is impacted, among other things, by the specific needs and infrastructure of the relevant geographical area and government policies. Consequently, we have tailored our credit assessment and collections strategy accordingly, with decentralised credit and underwriting teams in different regions that have the flexibility to underwrite loans based on the specifics of the asset and the credit behaviour in each region. Furthermore, we have diversified our product offerings to de-risk from cyclicalities to the extent possible.

As an example, in certain drought prone-regions of Maharashtra, we identified a profitable opportunity for a niche equipment, wherein certain specialised equipment promoted by few OEMs could be used for ground water harvesting. We were able to partner with these OEMs and provide financing for the purchase of the equipment to enable farmers to generate higher income. This helped create a new segment of equipment hirers who own and operate such specialised equipment.

Asset Finance products are backed by the relevant assets acquired, *i.e.*, commercial vehicles, construction equipment or tractors.

This vertical which involves relatively larger ticket sizes leverages our physical footprint. Additionally, the role of third parties like dealers and agents results in long sales cycles and therefore business development is a critical function in each local market.

As at September 30, 2024, this vertical had a loan book of ₹368.5 billion.

- ***Commercial Vehicle Loans***

### **Consumer Finance**

We launched our Consumer Finance vertical in 2016. We offer loans to individuals seeking to fulfil their personal or household needs. Our typical customer profile in this segment includes salaried persons and self-employed individuals looking for financing to purchase household assets, luxury goods or similar such lifestyle choices. Consumer loans are provided to individuals for personal or household purposes to meet their short to medium term requirements.

Two-wheelers and auto-loans are the only Consumer Finance products that are secured. We employ an omni-channel digital-first approach to distribution in this vertical with a focus on dealers and partnerships. Our branches serve as a local hub from which our tele-calling teams can operate and get an understanding of the local micro-market, while enabling better portfolio monitoring. Our strong partnerships with marquee brands and OEMs and their respective retail networks and dealers have been key to our growth in Consumer Finance. Our digital onboarding and automated credit underwriting capabilities has enabled us to grow our consumer franchise while maintaining strong asset quality.

Consumer Finance products generally have small ticket sizes and short tenors, resulting in churning of the loan book at rapid pace. This enables us to widen our customer funnel by onboarding and underwriting a larger base of customers in a relatively short period of time. This allows us to cross-sell and up-sell multiple products to an expanded base of customers across different uses, thus increasing customer life-time value. For example, the Consumer Durable loan product is a mass product that serves as our primary sourcing channel for retail customers. Continuous monitoring of credit behaviour helps us identify customers to whom we can cross-sell and up-sell our wider suite of Consumer Finance products such as lifestyle loans, unsecured personal loans and vehicle loans. As at September 30, 2024, this vertical had a loan book of ₹224.7 billion.

For further details, see “*Selected Statistical Information*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 313 and 387, respectively.

### **Track Record of Product Innovation**

We have demonstrated a track record of product innovation, having piloted multiple new products across our three business verticals. These products have gone on to scale up and achieve profitability after being introduced on a wider scale.

For example, we introduced the Enterprise Business Loan product in our Enterprise Lending vertical as a variant of the LAP product in 2014. We were able to identify customers seeking business loans with a strong repayment ability but with collateral that would typically be outside municipal limits, as opposed to LAP. We have been able to underwrite such customers and provide them with a variant of our secured loan product with an attractive pricing model, given the nature of the underlying collateral. We have also been able to up-sell other business loans to such customers after they had established a strong track record of repayment. For example, we have provided pre-approved loan limits to our existing high quality customers to increase conversion or to apply for unsecured loans. Such customers can obtain new loans directly in a very short timeframe through our digital channels such as our through the DIY journey platforms.

This has created an opportunity for us, and we have now created a dedicated distribution network for sourcing such customers through our dedicated FOS and have been able to demonstrate strong traction of selling personal lending products to them.

## Sourcing and Distribution

### Branches

We have established a pan-India network of 1,772 branches in 1,162 towns across 31 States and Union Territories, with over 80% of our branches located outside the 20 largest cities in India.

Our branches are our primary source of customer acquisition and engagement for many of our products, including for our Enterprise Lending products, some of our Asset Finance products, such as Commercial Vehicle Loans and Tractors Loans and some of our Consumer Loan products, such as Two-Wheeler Loans and Auto Loans. Our branches have an average size of 960 square feet. Each branch has a pre-defined target market coverage area of a pre-defined radius. The branch sales team visit potential customers in the relevant coverage area to generate sale leads. A high-touch and offline customer engagement model is important as it ensures that there is data and insights available for real-time decision making. Our branches also have employees for credit, collections and operations. Each branch houses an independent credit manager who is responsible for the credit decisioning and a branch operations team which processes the documentation requirements. This enables the branch to serve as an independent hub for all our operations including credit underwriting, portfolio monitoring and collections. The growth and profitability of our business is deeply linked to our branches and we intend to continue to invest significantly in them in the future.

Our branches offer different products depending on their location and customer base. In the larger cities like metropolises and Tier 1 cities, our branches are often specialised to handle a specific product. For example, we have branches that manage each of the Asset Finance and Enterprise Lending verticals separately, such as in New Delhi. In contrast, in smaller towns and cities, one branch generally caters to multiple business verticals.

The graph below provides an overview of our branch structure as of September 30, 2024.

### Direct Sales through Tele-Calling

Our in-house tele-calling team consisted of over 650 employees as at September 30, 2024. Our tele-calling teams sit out of regional hubs and are provided with contextualised training for interacting with potential customers in the right manner for their specific region. The tele-calling team serves as our primary acquisition channel for personal loan products in Consumer Finance.

### Brand and OEM Channels and Dealer Networks

We have established partnerships with over 80 brands and OEMs and have developed a network of over 140,000 retailers and dealer touchpoints as at September 30, 2024. These brands and OEMs spans across a large number of industries including two-wheelers, automobiles, consumer, digital and lifestyle products (in Consumer Finance), as well as new and used commercial vehicles, construction equipment and tractors (in Asset Finance).

We have been able to forge deep and meaningful sourcing relationships with multiple marquee OEMs and brands on account of our ability to offer a value proposition to our brand and OEM partners. We believe that our partnerships create opportunities for our partners to grow their presence in newer markets while also deepening their lending tie-ups in their existing markets.

### ***Direct Selling Agents (DSAs)***

As part of our distribution strategy, we have a DSA network of over 7,500 agents as at September 30, 2024. We work with DSAs on a fee basis with periodic incentives aligned towards meeting certain metrics.

### ***Diversified Distribution Strategy for “Bharat”***

In April 2023, we piloted a new distribution model, with the primary aim to expand our presence in rural locations with a population of 50,000 people or less, where we are already established in one or two products, and where there is expected to be significant potential to enhance our offering and product suite. We have converted 103 existing branches in 9 States into this distribution model as at September 30, 2024.

To achieve product diversification, we are training our existing FOS employees in these rural branches to drive multi-product sales in their branch radius. This serves multiple purposes including deepening penetration of our products in those geographies while also ensuring that our employees are upskilled and their earning potential is increased. This in turn also contributes to higher employee loyalty and retention.

We continuously monitor our penetration levels in each product category, to identify any potential underpenetrated areas, as well as areas with high potential. We also obtain local-level sourcing data through our partnerships with OEMs to supplement our industry data provided by credit bureaus.

### ***Digital Sourcing and Distribution***

We have created digital, customized journeys for our customers across our product suite. We have created end-to-end customer journeys for certain products in our Consumer Finance and Enterprise Lending verticals, ensuring that each step in the origination, underwriting, sanction and disbursement is entirely digital. This has enabled us to expand our customer franchise from 9.4 million customers as at March 31, 2022 to 17.5 million customers as at September 30, 2024.

Across our broader product suite, we have created hybrid “phygital” paperless journeys for our customers which have a mix of digital and assisted channels, with varied levels of automation in underwriting. Certain products like Loans Against Property require us to ensure that there is physical verification at the time of legal, technical checks carried out on the property.

We have Generative AI-based techniques in various areas, for example to provide localized language support for our customers on chat bots, improving our customers’ do-it-yourself (DIY) journeys by enabling them to undertake various functions by themselves. We are also driving personalization to improve customer experience via a campaign manager that aims to address customer requirements at the right time, right place and with the right mode of communication.

We have also recently started partnering with multiple channel partners via an API integration which feeds into our underwriting engine. In line with our business model, we ensure that these partnerships are first carried out on a pilot basis and in select geographies and that we have a reasonable amount of credit behaviour data gathered before we expand into broader geographies.

### ***Credit and Collections***

## Credit

We have built a robust and 360-degree credit assessment operation headed by our Chief Credit Officer and supported by a strong and established credit team for each vertical, with over 4,500 employees as at September 30, 2024. The credit teams work as independent units that report into an overall wider credit structure that is parallel to sales. Our credit teams do not have disbursement targets and are judged on portfolio quality. Each vertical has a separate credit team. Credit teams are staffed at the branch, regional and central level.

Our credit teams are tasked with independent verification of customers, evaluation of their business and financing needs and analysing their ability to repay loans. We employ a hybrid credit underwriting approach. For smaller ticket loans with short tenor products, credit decisioning is carried out using a centralised automated system that employs scorecards and rule-based decisioning. For larger ticket loans, an independent assessment is carried out by the credit manager at the branch closest to the customer, including via physical evaluation supported by a scorecard and rule-based decision-making process. Given our entire credit evaluation process is conducted in-house, we are able to minimise the risk of frauds at the time of loan issuance with the assistance of our risk control unit, which is a separate vertical that specialises in detecting and resolving frauds. Additionally, we engage with third parties to avail anti-fraud solutions for the identification of fraudulent and suspicious borrowers.

We have successfully migrated our credit decisioning process to a digital interface and have applications in place to onboard customers entirely online in certain products such as Consumer Finance and Enterprise Lending. In fact, we have digitalised the onboarding process in products which are typically high-touch and offline, such as Auto Loans and Commercial Vehicle Loans.

As part of the credit underwriting process, we also utilise multiple external sources of information such as credit information companies and depositories. We undertake independent verification of our customers' business and residence and employ competent external vendors to undertake legal and technical checks on the underlying collateral for secured products. Our rich history of transactions with our large customer base has given us access to data which is hosted in a data repository and which allows us to carry out analytics that enable faster credit decisions.

We also deploy customised scorecards for each product to accelerate and automate the credit decisioning process. For this purpose, a dedicated policy team works to build out a customised credit program for each product. They work with the in-house team of data analysts to develop, deploy and monitor the performance of such scorecards. We have enforced separate underwriting rules and scorecards for new-to-credit customers and credit bureau-tested customers. Scorecards include metrics that are relevant to evaluate customer creditworthiness such as demographics, loan exposures and delinquencies.

## Collections

Our collection function has been part of our operating model since our inception as we have been providing collection services for our Promoter, HDFC Bank since 2008.

Our collections are operated as an independent function under the oversight of our Chief Credit Officer with an in-house team of over 12,000 employees as at September 30, 2024. Collection employees are located at branch, regional and national levels. We have dedicated legal and compliance employees as part of the collections team to provide support for each product. We also employ certain external collection agents for small ticket collections in certain Consumer Finance products and for limited collections in certain products of other verticals.

Most of our loan repayments are received through the NACH mandate. The remainder of our loan repayments are collected through an in-house tele-calling and collections team. Given the high level of ethnic and linguistic diversity in India, we employ local tele-calling collections teams in each region rather than through a centralised hub, to ensure that communications to customers regarding collections are in the local language and tailored to the local customs of the region rather than in a standardised manner.

Our collections process is monitored and tracked through a dedicated collections application. Collections are done entirely through a mobile application with an e-receipt issued to every customer using an OTP-based validation process. The application has been developed in-house and is feature-rich, with functionalities built to conduct all legally permissible checks to ensure the digital process of collections is complete and comprehensive.

The collections team uses multiple scorecards to monitor collections across early, mid and late buckets. The scorecards use updated credit information as well as product, prior performance and specific local nuances. The below picture illustrates our collection strategy based on the various types of scorecards.

## Score Card Matrix

- **Wide range of variables used to arrive at scores**
- **10+ different score card constructs deployed across business by product, DPD stage and employee type**

| Bucket Type | Risk Score Bands | Actions               |
|-------------|------------------|-----------------------|
| Current     | Extreme Low      | No intervention       |
|             | Low              | Tactical              |
|             | Medium           | Phone                 |
|             | High             | Door knock (In-house) |
| Mid Bucket  | Low              | Tactical              |
|             | High             | Door knock (In-house) |
| Recoveries  | Low              | Phone                 |
|             | Medium           | External Vendors      |
|             | High             | Door knock (In-house) |

We utilise a number of mechanisms to enforce recoveries such as repossession of collateral and disposals via arbitration and recourse to the Indian SARFAESI Act, Negotiable Instruments Act, 1881, Payments and Settlement Act, 2007, among others. We also have a legal portal for providing an update on pending legal cases on a real-time basis. Repossession and settlements are carried out using both in-house teams and external vendors. The process for the initiation of repossession and validation in case of vehicle loans has been digitised and is undertaken on a mobile application which enables tracking and monitoring. Our collateral disposal process is also digital and completed through an online auction process.

We have set up a Centre of Excellence in the form of a dedicated central collections team which monitors the level of training for all collections employees, conducts quality checks for all tele-calling personnel, tracks and monitors the quality of external collections vendors and undertakes centralised billing and auctions for asset disposals.

## Customer Service

Our customer service channels are both centralised and decentralised. In addition to providing customer service in our branches and call centres, we have established several digital customer service channels to enhance customer service and provide a seamless experience for our customers. Such channels include:

- *HDB On-the-Go-App*, which enables our customers to access the majority of our products and services online and get personalised assistance on the application;
- *WhatsApp Account Management*, where customers can receive real-time information about their loan account;
- *Customer Service Bot*, where the Company's virtual assistant and chatbot, #AskPriya, assists customers with loan-related information and the latest offers;
- *Missed Call Service*, which enables the customers to receive all their loan-related information via SMS; and
- *Customer Portal*, which is a self-service portal allowing customers to perform various account management tasks, such as checking loan status, making payments, and updating personal information, at their convenience.

Our mobile app, 'HDB On-the-Go' had around 6.9 million downloads as of September 30, 2024. We have also undertaken an initiative called the 'Customer Service Week' to raise awareness among our walk-in customers about the Company's self-service tools for managing loan accounts, digital payment options and grievance redressal mechanisms. We also take customer feedback to gauge the quality of service provided and expected, in order to continuously improve and update our customer service.

We have Generative AI-based techniques in various areas, for example to provide localized language support for our customers on chat bots, improving our customers' do-it-yourself (DIY) journeys by providing right assistance and augmenting outbound sales capabilities. We are also driving personalization to improve customer experience via a campaign manager that aims to address customer requirements at the right time, right place and with the right mode of communication.

When we receive a customer complaint, we first verify the customer's details (ID&V) and subsequently assign a unique service request number. We determine the nature of the customer communication (request, query or complaint) and endeavour to provide a prompt resolution. If necessary, we escalate the matter to senior management and may engage our legal team in the response process. Our customer service managers coordinate with the relevant team members for resolution of complaints.

## Treasury Operations and Financing

We have an independent Treasury department that is responsible for fundraising and liquidity management. It is also primarily responsible for minimising the cost of our borrowings, managing our liquidity, diversifying funding sources, managing interest rate risk, currency risk and investing any temporary surplus.

We have diversified funding sources from various sources including public sector, private sector, foreign banks, mutual funds, insurance companies, pension funds and financial institutions. Funds are raised in line with Company's Resource Planning Policy through term loans, non-convertible debentures ("NCDs"), assignment/securitization of assets, external commercial borrowings, refinance facilities, subordinated bonds, perpetual bonds and commercial papers instruments. The table below sets out our different funding sources with respect to our outstanding principal, and their outstanding contribution as a percentage of our total borrowings as at September 30, 2024:

A credit rating is not a recommendation to buy, sell or hold securities or other financial instruments. Ratings are subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

Our high credit ratings and experienced treasury management have also helped us maintain a low Average Cost of Borrowings at 7.88% as at September 30, 2024. By diversifying our borrowing mix and exploring alternative

funding sources, we aim to minimise impacts on interest margins while maintaining a healthy capital adequacy ratio. We have a mix of fixed and floating rate borrowings. As at September 30, 2024, 71.44% of our Total Borrowings were subject to fixed interest rates, with 28.56% of our Total Borrowings subject to floating interest rates.

Our treasury operations are monitored by the ALCO, which oversees our liquidity, interest rate and currency risks. Our Advances Book and Funding strategy is structured to counterbalance the repricing of borrowings with the repricing of loans. See “—Strengths—High-quality liability franchise with access to lowest cost, diversified borrowing sources and the highest credit rating” on page 245.

## Information Technology and Digital Vision

We have invested and built an advanced technology and data analytics platform that covers all key areas and stages of our business, including customer sourcing, onboarding and underwriting as well as operations and collections. We strive to elevate customer experience and operational efficiency through the use of technology. Our digital vision is to adopt new technologies to enable us to further develop and grow our business within the regulatory environment we operate in. When investing in technological solutions, we aim to ensure that our systems are built with customer centric propositions that allow us to combine different services and improve the customer experience. Our digital investments also allow us to operate at higher efficiencies and scale our business with a strong security underpinning. In addition, as part of our digital transformation, our digital investments aim to drive continuous innovations in our services to deliver to our customers.

Digitalisation is a key part of our omnichannel customer experience that is designed to combine both digital and physical worlds. We have invested and plan to continue to invest in digitalising our lending services and solutions in order to connect and serve our customers in a personalised manner. For example, we have introduced a digital sales application where a customer can get instant loan approval and quick disbursements. Furthermore, our 'HDB On-the-Go' application aims to deliver a seamless and personalised customer experience and implement our robust customer relationship management systems to efficiently meet customer requirements. Our virtual assistant and chatbot provide quick responses to customer queries, further enhancing customer service efficiency.

Our digital vision also aims to ensure that our various systems are able to engage with our other systems. For example, our various digital systems need to be able to interact with our repository of customer data that we collect in connection with our business. Our digital information assets are deployed on external data management such

as cloud services providers. Our cloud-based infrastructure provides scalability, reliability, reduction of administrative effort, global best practices and cost benefit, ability to track optimal performance and security, along with high availability. Our Company deploys the cloud vendors (through private, public and hybrid models of application) for the data handling, data storage and data purging depending on their functionality, business needs and requirements. These cloud vendors are regularly tested and scrutinized with the help of the penetration tests and other forensic methods to ensure compliance with the cloud security checklist of our Company.

Our governance structure includes the Information Technology Strategy Committee at the board level, which oversees our IT strategy and cybersecurity environment to ensure that our IT and information security governance structure is effective and efficient, has adequate resources, well-defined objectives and responsibilities for each level of organization. We regularly assess our application security and conduct annual cybersecurity and compliance training and periodic simulation exercises.

### *Regulation of Excessive Interest Charged by NBFCs*

- (i) The board of directors of each Applicable NBFC is required to adopt an interest rate model taking into account relevant factors such as cost of funds, margin and risk premium and determine the rate of interest to be charged for loans and advances. The rate of interest, the approach for gradations of risk and rationale for charging different rate of interest to different categories of borrowers are required to be disclosed to the borrower or customer in the application form and communicated explicitly in the sanction letter.
- (ii) The rates of interest and the approach for gradation of risks are also required to be made available on the website of the Applicable NBFCs or published in the relevant newspapers. The information published in the website or otherwise published is required to be updated whenever there is a change in the rates of interest.
- (iii) The rate of interest must be annualized rate so that the borrower is aware of the exact rates that would be charged to the account.

Although rates of interest charged by NBFCs are not regulated by the RBI, rates of interest beyond a certain level may be seen to be excessive. The board of directors of Applicable NBFCs are required to layout appropriate internal principles and procedures in determining interest rates and processing and other charges.

### *Accounting Standards*

Accounting Standards and guidance notes issued by the Institute of Chartered Accountants of India are required to be followed by NBFCs insofar as they are not inconsistent with any of the provisions of the Scale Based Regulations. NBFCs that are required to implement Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 shall prepare their financial statements in accordance with Ind AS notified by the Government of India and shall comply with the regulatory guidance specified in annexure II of the NBFC Scale Based Regulations. No further interest shall be computed on such penal charges. The NBFC Scale Based Regulations prohibit regulated entities, which include NBFCs, from introducing any additional component to the rate of interest and stipulate that all NBFCs shall formulate a Board approved policy on penal charges or similar charges on loans. The quantum of penal charges shall be reasonable without being discriminatory within a particular loan or product category.

The notification requires the instructions enumerated therein to be extended to existing and new loans suitably by December 31, 2023, and for

existing borrowers to be sent a communication through appropriate channels, intimating the options available to them.

The Restated Consolidated Financial Information have been prepared on a historical cost basis, except for certain financial instruments that are measured at fair value.

The HDB Group generally reports financial assets and financial liabilities on a gross basis in the Balance Sheet. They are offset and reported net only where it has legally enforceable right to offset the recognised amounts and the HDB Group intends to either settle on a net basis or to realise the asset and settle the liability simultaneously as permitted by Ind AS. Similarly, the HDB Group offsets income and expenses and reports the same on a net basis where the netting off reflects the substance of the transaction or other events as permitted by Ind AS.

Accounting estimates, judgements and assumptions

The preparation of the HDB Group's Restated Consolidated Financial Information requires Management to make use of estimates and judgements. In view of the inherent uncertainties and a level of subjectivity involved in measurement of items, it is possible that the outcomes in the subsequent financial years could differ from those on which the Management's estimates are based. Accounting estimates and judgements are used in various line items in the financial information for e.g:

- Business model assessment
- Impairment of financial assets
- Provisions and other contingent liabilities
- Provision for tax expenses.

Summary of material accounting policies

This note provides a list of material accounting policies adopted in the preparation of these Restated Consolidated Financial Information. These policies have been consistently applied to all the years and periods presented, unless otherwise stated.

Basis of consolidation

The Restated Consolidated Financial Information comprise the financial statements of the HDB Group as at 30 September 2024, 31 March 2024, 30 September 2023, 31 March 2023 and 31 March 2022. The HDB Group consolidates an entity when it controls it. Control is achieved when the HDB Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Consolidation of the entity begins when the HDB Group obtains control over the entity and ceases when the HDB Group loses control of the entity.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the HDB Group has less than a majority of the voting or similar rights of an investee, the HDB Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The HDB Group’s voting rights and potential voting rights
- The size of the HDB Group’s holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

Restated Consolidated Financial Information are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the HDB Group uses accounting policies other than those adopted in the Restated Consolidated Financial Information for like transactions and events in similar circumstances, appropriate adjustments are made to that HDB Group member’s Restated Consolidated Financial Information in preparing the Restated Consolidated Financial Information to ensure conformity with the HDB Group’s accounting policies.

Profit or loss and each component of OCI are attributed to the equity holders of the parent of the HDB Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the Special Purpose financial statements of structured entities to bring their accounting policies in line with the HDB Group’s accounting policies. All intra-HDB Group assets, liabilities, equity, income, expenses and cash flows relating to transactions between members of the HDB Group are eliminated in full on consolidation.

The financial statement of the following controlled structured trusts (all incorporated in India) have been consolidated as per Ind-AS 110 - Consolidated Financial Statements.

These Restated Consolidated Financial Information examined by the Statutory Auditors of the HDB Group have been reviewed by the Audit Committee and approved by the Board of Directors on 16th October, 2024.

(D) Functional and presentation currency

These Restated Consolidated Financial Information are presented in Indian Rupees ('INR' or 'Rs.') which is also the HDB Group's functional currency. All amounts are rounded-off to the nearest millions, unless otherwise indicated.

(E) Use of estimates and judgements

The preparation of Restated Consolidated Financial Information in conformity with Ind AS requires management to make estimates, judgements and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities (including contingent liabilities) and disclosures as of the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from these estimates. Accounting estimates and underlying assumptions are reviewed on an ongoing basis and could change from period to period. Appropriate changes in estimates are recognised in the periods in which the HDB Group becomes aware of the changes in circumstances surrounding the estimates. Any revisions to accounting estimates are recognized prospectively in the period in which the estimate is revised and future periods. The estimates and judgements that have significant impact on the carrying amount of assets and liabilities at each balance sheet date are discussed at Note 3.

2.2 Financial Instruments

(A) Date of recognition

Financial assets and financial liabilities are recognised in the HDB Group’s balance sheet when the HDB Group becomes a party to the contractual provisions of the instrument.

(B) Initial measurement

Recognised financial instruments are initially measured at fair value.

Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit and loss are recognised immediately in statement of profit and loss.

Trade receivable are initially measured at transaction price.

(C) Classification and subsequent measurement

(i) Financial assets

Based on the business model, the contractual characteristics of the financial assets and specific elections where appropriate, the HDB Group classifies and measures financial assets in the following categories:

- Amortised cost
- Fair value through other comprehensive income ('FVOCI')
- Fair value through profit and loss ('FVTPL')

(a) Financial assets carried at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows ('Asset held to collect contractual cash flows'); and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ('SPPI') on the principal amount outstanding.

After initial measurement and based on the assessment of the business model as asset held to collect contractual cash flows and SPPI, such financial assets are subsequently measured at amortised cost using Effective Interest Rate ('EIR') method. Interest income and impairment expenses are recognised in statement of profit and loss. Interest income from these financial assets is included in finance income using the EIR method. Any gain and loss on derecognition is also recognised in statement of profit and loss.

The EIR method is a method of calculating the amortised cost of a financial instrument and of allocating interest over the relevant period. The EIR is the rate that exactly discounts estimated future cash flows (including all fees paid or received that form an integral part of the EIR, transaction costs and other premiums or discounts) through the expected life of the instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

The HDB Group records loans and government securities (classified as held to maturity) at amortised cost.

**(b) Financial assets at fair value through other comprehensive income ('FVOCI')**

Financial assets that are held within a business model whose objective is both to collect the contractual cash flows and to sell the assets, ('Contractual cash flows of assets collected through hold and sell model') and contractual cash flows that are SPPI, are subsequently measured at FVOCI. Movements in the carrying amount of such financial assets are recognised in Other Comprehensive Income ('OCI'), except dividend income which is recognised in statement of profit and loss. Amounts recorded in OCI are not subsequently transferred to the statement of profit and loss. Equity instruments at FVOCI are not subject to an impairment assessment.

**(c) Financial assets at fair value through profit and loss ('FVTPL')**

Financial assets, which do not meet the criteria for categorization as at amortized cost or as FVOCI, are measured at FVTPL. Subsequent changes in fair value are recognised in statement of profit and loss.

The HDB Group records investments in equity instruments and mutual funds at FVTPL.

**(ii) Financial liabilities and equity instrument**

Debt and equity instruments issued by the HDB Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

**(a) Equity instrument**

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the HDB Group is recognised at the proceeds received, net of directly attributable transaction costs.

**(b) Financial liabilities**

Financial liabilities are measured at amortised cost. The carrying amounts are determined based on the EIR method. Interest expense is recognised in statement of profit and loss.

Any gain or loss on de-recognition of financial liabilities is also recognised in statement of profit and loss.

Undrawn loan commitments are not recorded in the balance sheet. However, these financial instruments are in the scope of expected credit loss ('ECL') calculation.

**(D) Reclassification**

Financial assets are not reclassified subsequent to their initial recognition, apart from the exceptional circumstances in which the HDB Group acquires, disposes of, or terminates a business line or in the period the HDB Group changes its business model for managing financial assets. Financial liabilities are not reclassified.

**(E) Offsetting**

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, the HDB Group has a legally enforceable right to offset the recognised amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

**(F) Derecognition**

**(i) Financial assets**

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The contractual rights to receive cash flows from the financial asset have expired, or
- The HDB Group has transferred its rights to receive cash flows from the asset and the HDB Group has transferred substantially all the risks and rewards of the asset, or the HDB Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

If the HDB Group neither transfers nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the HDB Group recognises its retained interest in the asset and an associated liability for the amount it may have to pay.

If the HDB Group enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not de-recognised and the proceeds received are recognised as a collateralised borrowing.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in OCI is recognised in statement of profit and loss.

**(ii) Financial liabilities**

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying value of the original financial liability and the new financial liability with modified terms is recognised in statement of profit and loss.

**(G) Impairment of financial assets**

The HDB Group applies the expected credit loss ('ECL') model in accordance with Ind AS 109 for recognising impairment loss on financial assets. The ECL allowance is based on the credit losses expected to arise from all possible default events over the expected life of the financial asset ('lifetime ECL'), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12-month ECL. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is calculated on a collective basis, considering the retail nature of the underlying portfolio of financial assets.

The impairment methodology applied depends on whether there has been a significant increase in credit risk. When determining whether the risk of default on a financial asset has increased significantly since initial recognition, the HDB Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on a provision matrix which takes into account the HDB Group's historical credit loss experience, current economic conditions, forward looking information and scenario analysis.

The expected credit loss is a product of exposure at default ('EAD'), probability of default ('PD') and loss given default ('LGD'). The HDB Group has devised an internal model to evaluate the PD and LGD based on the parameters set out in Ind AS 109. Accordingly, the financial assets have been segmented into three stages based on the risk profiles. The three stages reflect the general pattern of credit deterioration of a financial asset. The HDB Group categorises financial assets at the reporting date into stages based on the days past due ('DPD') status as under:

- Stage 1: 0 to 30 days past due
- Stage 2: 31 to 90 days past due
- Stage 3: more than 90 days past due

Loan accounts where principal and/or interest are past due for more than 90 days continue to be classified as stage 3 till overdues across all loans are cleared.

LGD is an estimate of loss from a transaction given that a default occurs. PD is defined as the probability of whether the borrowers will default on their obligations in the future. For assets which are in Stage 1, a 12-month PD is required. For Stage 2 assets a lifetime PD is required while Stage 3 assets are considered to have a 100% PD. EAD represents the expected exposure in the event of a default and is the gross carrying amount in case of the financial assets held by the HDB Group.

The HDB Group incorporates forward looking information into both assessments of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. Based on the consideration of external actual and forecast information, the HDB Group forms a ‘base case’ view of the future direction of relevant economic variables. This process involves developing two or more additional economic scenarios and considering the relative probabilities of each outcome. The base case represents a most likely outcome while the other scenarios represent more optimistic and more pessimistic outcomes.

The measurement of impairment losses across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The HDB Group’s ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. The HDB Group regularly reviews its models in the context of actual loss experience and makes adjustments when such differences are significantly material. Adjustments including reversal of ECL is recognised through statement of profit and loss.

After initial recognition, trade receivables are subsequently measured at amortised cost using the effective interest method, less provision for impairment. The HDB Group follows the simplified approach required by Ind AS 109 for recognition of impairment loss allowance on trade receivables, which requires lifetime ECL to be recognised at each reporting date, right from initial recognition of the receivables.

**(H) Write offs**

The gross carrying amount of a financial asset is written-off (either partially or in full) to the extent that there is no reasonable expectation of recovering the asset in its entirety or a portion thereof. This is generally the case when the HDB Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written-off could still be subject to enforcement activities under the HDB Group’s recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in statement of profit and loss.

**2.3 Impairment of non-financial assets**

The HDB Group assesses at each balance sheet date whether there is any indication that an asset may be impaired due to events or changes in circumstances indicating that their carrying amounts may not be realised. If any such indication exists, the HDB Group estimates the recoverable amount of the asset or the cash generating unit ('CGU'). If such recoverable amount of the asset or the recoverable amount of the CGU to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the revised recoverable amount, subject to maximum of the depreciated historical cost.

**2.4 Foreign exchange transactions and translations**

**(A) Initial recognition**

Transactions in foreign currencies are recognized at prevailing exchange rates between reporting currency and foreign currency on transaction date.

**(B) Conversion**

Transactions in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at period end exchange rates are generally recognized in Statement of profit and loss. Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the Statement of profit and loss on a net basis.

**2.5 Derivative financial instruments**

The HDB Group enters into derivative financial instruments to manage its exposure to interest rate risk and foreign exchange rate risk. Derivatives held include foreign exchange forward contracts, interest rate swaps and cross currency interest rate swaps.

Derivatives are initially recognised at fair value at the date of a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. The resulting gain/loss is recognised in the statement of profit and loss immediately unless the derivative is designated and is effective as a hedging instrument, in which event the timing of the recognition in the statement of profit and loss depends on the nature of the hedge relationship. The HDB Group designates certain derivatives as hedges of highly probable forecast transactions (cash flow hedges). A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability.

**Hedge accounting policy**

The HDB Group makes use of derivative instruments to manage exposures to interest rate and foreign currency. In order to manage particular risks, the HDB Group applies hedge accounting for transactions that meet specific criteria. At the inception of a hedge relationship, the HDB Group formally designates and documents the hedge relationship to which the HDB Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the HDB Group's risk management objective and strategy for undertaking hedge, the hedging / economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the HDB Group would assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an on-going basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

**Cash Flow Hedges**

A cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability (such as all or some future interest payments on variable rate debt) or a highly probable forecast transaction and could affect profit and loss. For designated and qualifying cash flow hedges, the effective portion of the cumulative gain or loss on the hedging instrument is initially recognised directly in OCI within equity (cash flow hedge reserve). The ineffective portion of the gain or loss on the hedging instrument is recognised immediately in Finance Cost in the statement of profit and loss. When the hedged cash flow affects the statement of profit and loss, the effective portion of the gain or loss on the hedging instrument is recorded in the corresponding income or expense line of the statement of profit and loss. When a hedging instrument expires, is sold, terminated, exercised, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss that has been recognised in OCI at that time remains in OCI and is recognised when the hedged forecast transaction is ultimately recognised in the statement of profit and loss. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in OCI is immediately transferred to the statement of profit and loss.

The HDB Group's hedging policy only allows for effective hedging relationships to be considered as hedges as per the relevant Ind-AS. Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments to ensure that an economic relationships exists between the hedged item and hedging instrument. The HDB Group enters into hedge relationships where the critical terms of the hedging instrument match with the terms of the hedged item, and so a qualitative and quantitative assessment of effectiveness is performed.

2.6 Cash and cash equivalents

Cash and cash equivalents includes cash at banks and on hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

The HDB Group follows the policy of crediting the customer's account only on receipt of amount in the bank and as such no cheques in hand are taken into consideration.

2.7 Upfront servicers fees booked on direct assignment

Servicer fees receivable for servicing loan contracts under direct assignment are discounted at the applicable rate entered into with the assignee and recognised upfront in the balance sheet and amortised on a straight line basis over the remaining contractual maturity of the underlying loans.

2.8 Property, plant and equipment

(A) Recognition and measurement

Tangible property, plant and equipment are stated at cost less accumulated depreciation and impairment, if any. The cost of property, plant and equipment comprise purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

Advances paid towards acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-financial assets and cost of assets not put to use before such date are disclosed under Capital work-in-progress.

(B) Subsequent expenditure

Subsequent expenditure incurred on assets put to use is capitalized only when it increases the future economic benefits / functioning capability from / of such assets.

(C) Depreciation, estimated useful lives and residual value

Depreciation is calculated using the straight-line method to write down the cost of property and equipment to their residual values over their estimated useful lives in the manner prescribed in Schedule II of the Act. The estimated lives used and differences from the lives prescribed under Schedule II are noted in the table below:-

| Type of Assets                  | Estimated useful life as assessed by the HDB Group | Estimated useful life under Schedule II of the Act |
|---------------------------------|----------------------------------------------------|----------------------------------------------------|
| Computers                       | 2-5 years                                          | 3 years                                            |
| Software and system development | 3 years                                            | 3 years                                            |
| Office equipment                | 3-5 years                                          | 5 years                                            |
| Motor cars                      | 4 years                                            | 8 years                                            |
| Furniture and fixtures          | 3-7 years                                          | 10 years                                           |
| Building                        | 60 years                                           | 60 years                                           |
| Leasehold improvements          | Tenure of lease agreements                         | Tenure of lease agreements                         |

The HDB Group uniformly estimates a zero residual value for all these assets. Items costing less than Rs. 5,000 are fully depreciated in the year of purchase. Depreciation is pro-rated in the year of acquisition as well as in the year of disposal.

The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used. Consequently, the useful life of certain computer-related assets, furniture and fixtures, office equipment and motor cars differ from the life prescribed in Schedule II of the Act.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Changes in the expected useful life are accounted for by changing the depreciation period or methodology, as appropriate, and treated as changes in accounting estimates.

Property, plant and equipment is de-recognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in other income/expense in the statement of profit and loss in the period the asset is de-recognised.

2.9 Other intangible assets

Software and system development expenditure are capitalised at cost of acquisition including cost attributable to readying the asset for use. Such intangible assets are subsequently measured at cost less accumulated amortisation and any accumulated impairment losses. The useful life of these intangible assets is estimated at 3 years with zero residual value. Any expenses on such software for support and maintenance payable annually are charged to the statement of profit and loss.

2.10 Dividends

Provision is made for the amount of any dividend declared on or before the end of the reporting period but not distributed at the end of the reporting period, being appropriately authorised and no longer at the discretion of the HDB Group. The final dividend on shares is recorded as a liability on the date of approval by the shareholders, and interim dividends are recorded as a liability on the date of declaration by the HDB Group's Board of Directors.

2.11 Revenue recognition

Revenue (other than for those items to which Ind AS 109 Financial Instruments is applicable) is measured at the amount of transaction price. Amounts disclosed as revenue are net of goods and services tax ('GST') and amounts collected on behalf of third parties. Ind AS 115 Revenue from Contracts with Customers outlines a single comprehensive model of accounting for revenue arising from contracts with customers.

The HDB Group recognises revenue from contracts with customers based on a five-step model as set out in Ind 115:

Step 1: Identify contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2: Identify performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

Step 3: Determine the transaction price: The transaction price is the amount of consideration to which the HDB Group expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the HDB Group allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the HDB Group expects to be entitled in exchange for satisfying each performance obligation.

Step 5: Recognise revenue when (or as) the HDB Group satisfies a performance obligation.

Specific policies for the HDB Group’s different sources of revenue are explained below:

(A) Income from lending business

**Interest income**

Interest income on a financial asset at amortised cost is recognised on a time proportion basis taking into account the amount outstanding and the Effective Interest Rate (‘EIR’). The EIR is the rate that exactly discounts estimated future cash flows of the financial asset through the expected life of the financial asset or, where appropriate, a shorter period, to the net carrying amount of the financial instrument. The internal rate of return on financial asset after netting off the fees received and cost incurred approximates the effective interest rate method of return for the financial asset. The future cash flows are estimated taking into account all the contractual terms of the instrument.

The interest income is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). For credit-impaired financial assets the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets (i.e. the gross carrying amount less the allowance for ECLs).

**Other financial charges**

Cheque bouncing charges, late payment charges, foreclosure charges and application money are recognised on a point-in-time basis, and are recorded when realised since the probability of collecting such monies is established when the customer pays.

(B) Income from BPO services and other financial charges

Income from BPO services comprise of sales support services, back office, operations, processing support, running collection call centres and collecting overdue amounts from borrowers. Performance obligations are satisfied over time and revenue is recorded on a monthly basis.

(C) Income from direct assignment

Gains arising out of direct assignment transactions comprise the difference between the interest on the loan portfolio and the applicable rate at which the direct assignment is entered into with the assignee, also known as the right of excess interest spread (EIS). The future EIS basis the scheduled cash flows on execution of the transaction, discounted at the applicable rate entered into with the assignee is recorded upfront in the statement of profit and loss. EIS evaluated and adjusted for ECL and expected prepayment.

2.12 Finance costs

Finance costs include interest expense computed by applying the effective interest rate on respective financial instruments measured at amortized cost. Financial instruments include bank term loans, non-convertible debentures, commercial papers, subordinated debts and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Finance costs are charged to the Statement of profit and loss.

2.13 Employee benefits

(A) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the HDB Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(B) Provident fund

Retirement benefit in the form of provident fund, is a defined contribution scheme. The HDB Group has no obligation, other than the contribution payable to the provident fund. The HDB Group recognises contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

(C) ESIC and Labour welfare fund

The HDB Group's contribution paid/payable during the period to ESIC and Labour welfare fund are recognised in the statement of profit and loss.

(D) Gratuity

The HDB Group operates a defined benefit gratuity plan that provides for gratuity benefit to all employees. The HDB Group makes annual contributions to a fund administered by trustees and managed by insurance companies for amounts notified by the said insurance companies. The benefit is in the form of lump sum payments to vested employees on resignation, retirement, or death while in employment or on termination of employment of an amount equivalent to 15 days basic salary payable for each completed year of service. Vesting occurs upon completion of five years of service.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to statement of profit and loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The HDB Group recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non- routine settlements; and
- Net interest expense or income

(E) Share-based payments

The HDB Group recognizes compensation expense relating to share-based payments in net profit using fair value in accordance with Ind AS 102 - Share-based Payment. The estimated fair value of awards is charged to income on a straight-line basis over the requisite service period for each separately vesting portion of the award as if the award was in-substance, multiple awards with a corresponding increase to share options outstanding amount.

2.14 Provisions and contingences

The HDB Group recognises a provision when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

In cases where the available information indicates that the loss on the contingency is reasonably possible but the amount of loss cannot be reasonably estimated, a disclosure is made in the financial statements.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimates. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the HDB Group or a present obligation that may arises from past events but probably will not require an outflow of resources to settle the obligation.

When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resource is remote, no provision or disclosure is made.

Contingent assets are neither recognised nor disclosed in the financial statements.

2.15 Leases

Effective 01 April 2019, the HDB Group has adopted Ind AS 116 - Leases and applied it to all lease contracts existing on 01 April 2019 using the modified retrospective method. Based on the same and as permitted under the specific transitional provisions in the standard, the HDB Group is not required to restate the comparative figures.

All leases are accounted for by recognising a right-of-use asset and a lease liability except for:

- Leases of low value assets; and
- Leases with a duration of 12 months or less.

The following policies apply subsequent to the date of initial application, 1 April 2019.

Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by reference to the rate inherent in the lease unless (as is typically the case) this is not readily determinable, in which case the HDB Group’s incremental borrowing rate on commencement of the lease is used. Variable lease payments are only included in the measurement of the lease liability if they depend on an index or rate. In such cases, the initial measurement of the lease liability assumes the variable element will remain unchanged throughout the lease term. Other variable lease payments are expensed in the period to which they relate.

On initial recognition, the carrying value of the lease liability also includes:

- amounts expected to be payable under any residual value guarantee;
- the exercise price of any purchase option granted in favour of the HDB Group if it is reasonably certain to assess that option;
- any penalties payable for terminating the lease, if the term of the lease has been estimated on the basis of termination option being exercised.

Right of use assets are initially measured at the amount of the lease liability, reduced for any lease incentives received, and increased for:

- lease payments made at or before commencement of the lease;
- initial direct costs incurred; and
- the amount of any provision recognised where the HDB Group is contractually required to dismantle, remove or restore the leased asset.

Subsequent to initial measurement lease liabilities increase as a result of interest charged at a constant rate on the balance outstanding and are reduced for lease payments made. Right-of-use assets are amortised on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if, rarely, this is judged to be shorter than the lease term.

When the HDB Group revises its estimate of the term of any lease, it adjusts the carrying amount of the lease liability to reflect the payments to make over the revised term, which are discounted using a revised discount rate. The carrying value of lease liabilities is similarly revised when the variable element of future lease payments dependent on a rate or index is revised, except the discount rate remains unchanged. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining (revised) lease term. If the carrying amount of the right-of-use asset is adjusted to zero, any further reduction is recognised in statement of profit and loss.

For contracts that both convey a right to the HDB Group to use an identified asset and require services to be provided to the HDB Group by the lessor, the HDB Group has elected to account for the entire contract as a lease, i.e. it does allocate any amount of the contractual payments to, and account separately for, any services provided by the supplier as part of the contract.

2.16 Goods and services tax paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the goods and services tax paid, except when the tax incurred on a purchase of assets or services is not recoverable from the tax authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

The net amount of tax recoverable from, or payable to, the tax authority is included as part of receivables or payables, respectively, in the balance sheet.

2.17 Income tax

(A) Current tax

Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961 in respect of taxable income for the year and any adjustment to the tax payable or receivable in respect of previous years.

(B) Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit and loss.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit and loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same tax authority.

2.18 Earnings per share

The HDB Group reports basic and diluted earnings per equity share. Basic earnings per equity share have been computed by dividing net profit / loss attributable to the equity share holders for the year by the weighted average number of equity shares outstanding during the year. Diluted earnings per equity share have been computed by dividing the net profit attributable to the equity share holders after giving impact of dilutive potential equity shares for the year by the weighted average number of equity shares and dilutive potential equity shares outstanding during the year, except where the results are anti-dilutive.

2.19 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). The Managing Director & CEO of the HDB Group has been identified as the CODM as defined by Ind AS 108 Operating Segments, who assesses the financial performance and position of the HDB Group and makes strategic decisions.

Operating segments identified by the HDB Group comprises as under:

- Lending services
- BPO services

The accounting policies consistently used in the preparation of the financial statements are also applied to item of revenue and expenditure in individual segments. Revenue and expenses have been identified to a segment on the basis of relationship to operating activities of the segment. Revenue and expenses which relate to enterprises as a whole and are not allocable to a segment on a reasonable basis have been disclosed as 'Unallocated'. Segment assets and segment liabilities represent assets and liabilities in respective segments. Tax related assets and other assets and liabilities that cannot be allocated to a segment on reasonable basis have been disclosed as 'Unallocated'.

2.20 Repossession and Collateral

To mitigate its credit risks on financial assets, the HDB Group seeks to use collateral, where possible. The collateral comes in various forms, such as securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements.

To the extent possible, the HDB Group uses active market data and external valuers for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models or through external valuers. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, or based on housing price indices.

The HDB Group physically repossess and take into custody properties or other assets and also engages external agents to recover funds, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. The HDB Group does not use the assets repossessed for the internal operations. Assets held under legal repossession processes are not recorded on the balance sheet as it does not meet the recognition criteria in other standards. Value of the repossessed asset is not netted off from the exposure at default for calculation of expected credit loss.

2.21 Statement of cash flows

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the HDB Group are segregated.

3 Critical accounting estimates and judgements

In the process of applying the HDB Group’s accounting policies, management has made the following estimates and judgements, which have a significant impact on the carrying amounts of assets and liabilities at each balance sheet date.

(A) Fair value of financial instruments

Some of the HDB Group’s assets and liabilities are measured at fair value for financial reporting purposes. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date regardless of whether that price is directly observable or estimated using another valuation technique.

Fair value measurements under Ind AS are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the HDB Group can access at measurement date
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs) that the HDB Group can access at measurement date

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in Note 43.

(B) Expected credit loss

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the HDB Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the HDB Group’s historical experience and credit assessment and including forward looking information.

The component used by the HDB Group in determining the ECL have been depicted in Note 45.

(C) Effective interest rate

The ‘effective interest rate’ is the rate that exactly discounts estimated future cash payments or receipts through the expected behavioural life of the financial asset to the gross carrying amount of the financial asset.

This estimation, by nature, requires an element of judgement regarding the expected behaviour and life-cycle of the instruments, the effect of potentially different interest rates at various stages and other characteristics of the product life cycle (including prepayments and penalty interest and charges) as well expected changes to the base rate and other transaction costs and fees paid or received that are integral parts of the instrument.

(D) Business model assessment

Classification and measurement of financial assets depends on the results of the business model test. The HDB Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. Monitoring is part of the HDB Group’s continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

(E) Useful life and expected residual value of assets

Depreciation and amortisation is derived after determining an estimate of an asset’s expected useful life and the expected residual value at the end of its life. The useful lives and residual values of HDB Group's assets are determined by management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

(F) Leases

- The determination of lease term for some lease contracts in which the HDB Group is a lessee, including whether the HDB Group is reasonably certain to exercise lessee options.
- The determination of the incremental borrowing rate used to measure lease liabilities.

(G) Deferred Tax

Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realisation of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences become deductible. The HDB Group considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of the deferred tax assets considered realisable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

(H) Defined benefit plans

The cost of the defined benefit plans and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

(I) Provisions and contingences

The HDB Group operates in a regulatory and legal environment that, by nature, has a heightened element of litigation risk inherent to its operations. As a result, it is involved in statutory litigation in the ordinary course of the HDB Group’s business. Given the subjectivity and uncertainty of determining the probability and amount of losses, the HDB Group takes into account a number of factors including legal advice, the stage of the matter and historical evidence from similar incidents. Significant judgement is required to conclude on these estimates.

The HDB Group's gratuity plan obligation is determined by actuarial valuation and is funded by investments in government securities. As such, the valuation and the funding are exposed to certain risks, including mainly salary increments, attrition levels, interest rates and investment yields. If salaries and interest rates rise faster than assumed or if the attrition rates are lower than assumed, then the HDB Group's gratuity obligation would rise faster in future periods and an increase in market yields of government securities would reduce the value of the plan's investments, leading to higher future funding requirements. The HDB Group monitors plan obligations and investments regularly with a view to ensuring that there is adequate funding on an ongoing basis, thus mitigating any potential adverse consequences of the risks described.

**C) Compensated absences**

The HDB Group neither has a policy of encashment of unavailed leaves for its employees nor allow the leaves to be carry forward to next year.

- D)** The Parliament has approved the Code on Social Security, 2020 ('Code') which may impact the contribution by the HDB Group towards Provident Fund and Gratuity. The effective date from which the Code and its provisions would be applicable is yet to be notified and the rules which would provide the details based on which financial impact can be determined are yet to be framed after which the financial impact can be ascertained. The HDB Group will complete its evaluation and will give appropriate impact, if any, in the financial result following the Code becoming effective and the related rules being framed and notified.

**a) Provident Fund matter**

The HDB Group has received a notice of demand from the Provident Fund department amounting to Rs. 501.4 million. The HDB Group had filed an appeal challenging the Provident Fund Commissioner's order before the Provident Fund Appellate Tribunal, wherein the HDB Group had received a favourable outcome. However, a sum of Rs. 10 million has been deposited under protest with the Provident Fund Appellate Authority. This amount is shown under Other financial assets.

The Provident Fund department has challenged order of the appellate authority in the High Court. The management of the HDB Group is of the view that no material losses will arise in respect of the legal claim and accordingly the same has been disclosed as a contingent liability. In the eventuality of any claim arising out of this case, the same will be billed to the customer in the year the claim is final and accordingly no provision has been made.

**b) Payment of Bonus (Amendment) Act, 2015**

As per the amendment to the Payment of Bonus (Amendment) Act, 2015 vide notification number DL-(N)04/70007/2003-16 issued on 1 January 2016 by Government of India, the HDB Group would be required to pay statutory bonus to all eligible employees as per the amendments specified thereunder, with effect from 1 April 2014. However, various High Courts have granted a stay on retrospective effect of Payment of Bonus (Amendment) Act, 2015 from financial year 2014-15. In light of the above, the HDB Group has decided to disclose such bonus amounting to Rs. 348.8 million as a contingent liability.

- 39.2** The HDB Group's pending litigations comprise of claims against the HDB Group by the customers and proceedings pending with other authorities. The HDB Group has reviewed all its pending litigations and proceedings and has adequately provided for where provisions are required and disclosed the contingent liabilities where applicable, in the financial statements. The HDB Group does not expect the outcome of these proceedings to have a materially adverse effect on its financial results.

- 39.3** The HDB Group has a process whereby periodically all long term contracts are assessed for material foreseeable losses. At the year end, the HDB Group has reviewed and ensured that adequate provision as required under any law / accounting standards for material foreseeable losses on such long term contracts has been made in the books of account.

43 Fair value measurement

a) Valuation principles

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price), regardless of whether that price is directly observable or estimated using a valuation technique. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as explained below:

b) Total financial assets measured at fair value on a recurring basis :

The following tables show an analysis of the fair value of financial assets by level of the fair value hierarchy.

Level 1:

Units held in mutual funds are measured based on their published net asset value (NAV), taking into account redemption and/or other restrictions.  
Treasury bills are valued based on market quotes.

Level 2:

Fair value of debt securities, borrowings other than debt securities and subordinated liabilities have estimated by discounting expected future cash flows discounting rate near to report date based on comparable rate / market observable data. Fair valuation of cross currency swaps is achieved by estimating forward exchange rates to calculate the present value of future net cash flows, adjusted for currency-specific risks. The fair value of INR interest rate swaps is determined by discounting future fixed and floating rate payments using the appropriate floating rates, reflecting the current market conditions and interest rate expectations.

Level 3:

Fair value of loans have estimated by discounting expected future cash flows using discount rate equal to the rate near to the reporting date of the comparable product.  
Unquoted equity shares are measured at fair value using suitable valuation models viz., net asset value technique.

(i) Short-term and other financial assets and liabilities

For financial assets and financial liabilities that have a short-term maturity (less than twelve months) and for other financial assets and other financial liabilities that are insignificant in value, the carrying amounts, net of impairment, if any, are a reasonable approximation of their fair value. Such instruments include cash and cash equivalents, bank balances other than cash and cash equivalents, trade receivables, trade payables, other financial assets and other financial liabilities.

(ii) Loans

These financial assets are recorded at amortised cost, the fair values of which are estimated at portfolio level using a discounted cash flow model based on contractual cash flows discounted using market rates incorporating the counterparties' credit risk.

(iii) Debt securities, borrowings and subordinated liabilities

Fair value is estimated at portfolio level by a discounted cash flow model incorporating market interest rates and the HDB Group's own credit risk or based on market-observable data such as secondary market prices for its traded debt, as relevant.

#### 44 Capital Management

The primary objective of the HDB Group's capital management policy is to ensure compliance with regulatory capital requirements. In line with this objective, the HDB Group ensures adequate capital at all times and manages its business in a way in which capital is protected, satisfactory business growth is ensured, cash flows are monitored, borrowing covenants are honoured and ratings are maintained.

Regulatory capital-related information is presented as part of the RBI mandated disclosures. The RBI norms require capital to be maintained at prescribed levels. In accordance with such norms, Tier I capital of the HDB Group comprises of share capital, share premium, reserves and perpetual debt, Tier II capital comprises of subordinated debt and provision on loans that are not credit-impaired. There were no changes in the capital management process during the periods presented.

#### 45 Risk Management

While risk is inherent in the HDB Group's activities, it is managed through an integrated risk management framework, including ongoing identification, measurement and monitoring, subject to risk limits and other controls.

The Board of Directors are responsible for the overall risk management approach and for approving the risk management strategies and principles.

The Risk Committee has the overall responsibility for the development of the risk strategy and implementing principles, frameworks, policies and limits. The Risk Committee is responsible for managing risk decisions and monitoring risk levels and reports to the Supervisory Board.

The HDB Group's Treasury is responsible for managing its assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the HDB Group.

##### a) Credit risk

The HDB Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and industry concentrations, and by monitoring exposures in relation to such limits.

##### Financial assets measured on a collective basis

The HDB Group splits its exposure into smaller homogeneous portfolios, based on shared credit risk characteristics, as described below in the following order:

- Secured / unsecured i.e. based on whether the loans are secured
- Nature of security i.e. the nature of the security if the loans are determined to be secured
- Nature of loan i.e. based on the nature of loan

##### Significant increase in credit risk

The HDB Group considers an exposure to have significantly increased in credit risk when the borrower crosses 30 DPD but is within 90 DPD.

##### Impairment assessment

The HDB Group considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower crosses 90 days past due on its contractual payments. Further, the borrower is retained in Stage 3 (credit-impaired) till all the overdue amounts are repaid i.e. borrower becomes 0 days past due on its contractual payments.

##### Exposure at default

The exposure at default (EAD) represents the gross carrying amount of the financial instruments subject to the impairment calculation.

##### Loss given default

The credit risk assessment is based on a standardised LGD assessment framework that incorporates the probability of default and subsequent recoveries, discounted.

Current economic data and forward-looking economic forecasts and scenarios are used in order to determine the Ind AS 109 LGD rate. The HDB Group uses data obtained from third party sources and combines such data with inputs to the HDB Group's ECL models including determining the weights attributable to the multiple scenarios.

c) Modified financial assets

The HDB Group renegotiates loans given to customers in financial difficulties (referred to as forbearance activities, restructuring or rescheduling) to maximise collection opportunities and minimise the risk of default. Under the Companies forbearance policy, loan forbearance is granted on a selective basis if the customer is currently in default on its debt or if there is a high risk of default, there is evidence that the customer made all reasonable efforts to pay under the original contractual terms and the customer is expected to be able to meet the revised terms. The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both retail and corporate loans are subject to the forbearance policy. The Risk Management Committee regularly reviews reports on forbearance activities.

Upon renegotiation, such accounts are classified as Stage 3. Such accounts are upgraded to Stage 1 only upon observation of satisfactory repayments of one year from the date of such down-gradation and accordingly loss allowance is measured using 12 month PD.

**Collateral and other credit enhancements**

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are in place covering the acceptability and valuation of each type of collateral.

The main types of collateral obtained are, as follows:

- For corporate and small business lending, charges over real estate properties, inventory and trade receivables and, in special circumstances, government guarantees

- For retail lending, mortgages over residential properties

The HDB Group also obtains guarantees from parent companies for loans to their subsidiaries.

Management monitors the market value of collateral and will request additional collateral in accordance with the underlying agreement.

b) Liquidity risk and funding management

Liquidity risk arises because of the possibility that the HDB Group might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. To limit this risk, management has arranged for diversified funding sources, and adopted a policy of managing assets with liquidity in mind and monitoring future cash flows and liquidity on a daily basis.

**Maturity profile of financial liabilities**

The table below summarises the maturity profile of the undiscounted cash flows of the HDB Group's financial assets and liabilities.

**50 Transfer of Financial Assets**

**50.1 Transferred financial assets that are not derecognised in their entirety**

The following details provide a summary of financial assets that have been transferred in such a way that part or all of the transferred financial assets do not qualify for derecognition, together with the associated liabilities:

**A) Securitisation**

The HDB Group has transferred certain pools of fixed rate loan receivables backed by underlying assets by entering into securitisation transactions with the Special Purpose Vehicle Trusts (SPV Trust) sponsored by commercial banks for consideration received in cash at the inception of the transaction.

The HDB Group, being Originator of these loan receivables, also acts as Servicer with a responsibility of collection of receivables from its borrowers and depositing the same in Collection and Payout Account maintained by the SPV Trust for making scheduled payouts to the investors in Pass Through Certificates (PTCs) issued by the SPV Trust. These securitisation transactions also requires the HDB Group to provide for first loss credit enhancement in various forms, such as corporate guarantee, cash collateral, subscription to subordinated PTCs etc. as credit support in the event of shortfall in collections from underlying loan contracts. By virtue of existence of credit enhancement, the HDB Group is exposed to credit risk, being the expected losses that will be incurred on the transferred loan receivables to the extent of the credit enhancement provided.

In view of the above, the HDB Group has retained substantially all the risks and rewards of ownership of the financial asset and thereby does not meet the derecognition criteria as set out in Ind AS 109. Consideration received in this transaction is presented as 'Borrowing under Securitisation' under Note 18.

**B) Assignment**

The HDB Group has sold some loans (measured at amortised cost) by way of direct bilateral assignment, as a source of finance.

The table below summarises the carrying amount of the derecognised financial assets measured at amortised cost and the gain/(loss) on derecognition, per type of asset.

### Overview

We are one of the leading, diversified retail-focused non-banking financial companies ("**NBFCs**") in India in terms of Total Gross Loan book size, according to the CRISIL Report. Our Company is categorized as an Upper Layer NBFC (NBFC-UL) by the RBI. We offer a large portfolio of lending products that cater to a growing and diverse customer base through a wide omni-channel distribution network. Our lending products are offered through our three business verticals: Enterprise Lending, Asset Finance and Consumer Finance. We believe that the success of our business model and operating philosophy is evidenced by our strong and sustained growth and profitability metrics. Our Total Gross Loans stood at ₹986.2 billion as at September 30, 2024, reflecting a CAGR of 20.93% between March 31, 2022 to September 30, 2024. Our assets under management stood at ₹902.3 billion as at March 31, 2024 reflecting a CAGR of 21.18% between Fiscal 2022 and Fiscal 2024. In Fiscal 2024, we generated a profit after tax of ₹24.6 billion, which reflected a CAGR of 55.98% between Fiscal 2022 and Fiscal 2024. Our Total Gross Loans growth, operating efficiencies and strong asset quality helped us deliver Return on Average Assets of 3.03% and

Return on Average Equity of 19.55% for Fiscal 2024, which is one of the highest amongst our NBFC peers, according to the CRISIL Report.

We began our journey in 2007 as a subsidiary of HDFC Bank Limited (“**HDFC Bank**”), which is the largest private sector bank in India in terms of total assets of ₹36,880.7 billion as at September 30, 2024, with businesses (including those of its subsidiaries) spanning across retail and commercial banking, asset management, life insurance, general insurance and broking, as per the CRISIL Report. Under HDFC Bank’s parentage, we have embedded a philosophy of balancing between delivering long-term sustainable growth and profitability. We have derived benefits from HDFC Bank’s parentage, including its brand recognition, while still establishing a set-up independent from HDFC Bank across our various functions including sourcing, underwriting, operations and risk management functions.

We are one of India’s largest and fastest growing customer franchises, according to the CRISIL Report, and we served 17.5 million customers as at September 30, 2024, which grew at a CAGR of 28.22% between March 31, 2022 and September 30, 2024. We primarily cater to underserved and underbanked customers in low to middle-income households with minimal or no credit history. Our customers mainly comprise of salaried and self-employed individuals, as well as business owners and entrepreneurs. We aim to meet the demands of our various customer categories with our diversified product offerings, strong geographical presence across India, technology backed rapid turnaround times and strong customer service. Our focus has remained on building a highly granular loan book with our 20 largest customers accounting for less than 0.36% of our Total Gross Loans as at September 30, 2024. Our aggregated average ticket size stood at approximately ₹145,000 as at September 30, 2024.

We are a diversified NBFC, with a goal of having an optimal mix across products, while maintaining a balanced approach to secured and unsecured loans in our loan book. We believe that our strategy of portfolio diversification across both products and geographies creates a strong and sustainable franchise. Secured loans represented 71.08% of our Total Gross Loans and unsecured loans represented 28.92% of our Total Gross Loans as at September 30, 2024. Our diversified product portfolio serves multiple credit needs of customers across three business verticals:

- *Enterprise Lending*, accounting for 39.85% of our Total Gross Loans as at September 30, 2024—secured and unsecured loans primarily to micro, small and medium enterprises (“**MSMEs**”) to meet their varied and evolving business needs;
- *Asset Finance*, accounting for 37.36% of our Total Gross Loans as at September 30, 2024—secured loans for purchase of new and used commercial vehicles, construction equipment and tractors, all of which are income generating assets for our customers; and
- *Consumer Finance*, accounting for 22.79% of our Total Gross Loans as at September 30, 2024—secured and unsecured loans for purchase of consumer durables, digital and lifestyle products, two-wheelers, automobiles and other unsecured personal loans.

We also offer business process outsourcing (“**BPO**”) services such as back-office support services, collection and sales support services to our Promoter as well as fee-based products such as distribution of insurance products primarily to our lending customers.

Our omni-channel “phygital” distribution model combines a large branch network, in-house tele-calling teams and various external distribution networks and channel partners. As at September 30, 2024, we had a pan-India network of 1,772 branches in 1,162 towns across 31 States and Union Territories, with over 80% of our branches located outside the 20 largest cities in India. We operate an organised and verticalised branch structure with separate sales, credit and collections teams for each of our verticals with a common operations team. This allows us to tailor our operations based on the product and customer segments that we cater to. Our network of branches is complemented by our external distribution channel partnerships with over 80 brands and original equipment manufacturers (“**OEMs**”) and external distribution networks with over 140,000 retailers and dealer touchpoints as at September 30, 2024. Our diversified loan book is distributed across states with a deep understanding of micro-markets across India for each of our business verticals.

We have a hybrid underwriting structure depending on the product, customer segment and ticket size. We have implemented a hybrid credit approach with a centralised credit assessment and underwriting unit for Consumer Finance products (where ticket size is small and tenure is short) and decentralised regional and branch-level credit assessment and local underwriting teams that have a more nuanced and contextual understanding of the customer’s profile for Enterprise Lending and Asset Finance products (where ticket size is bigger and tenure is longer). Our loan book is well seasoned as it has weathered multiple credit cycles in India since our inception. Our tech-enabled operating processes have contributed to maintaining a strong asset quality and low Credit Costs despite our fast-growing customer base and distribution network. This is evidenced by our GNPA and NNPA ratios of 2.10% and 0.83%, respectively, as at September 30, 2024 and Credit Costs Ratio (annualised) of 1.79% for the six-month period ended September 30, 2024. We remain focused on ensuring that we employ highly conservative policies for provisioning, with 66.82% of Provisioning Coverage Ratio as at March 31, 2024, one of the highest amongst the peers according to the CRISIL Report and a 3.88% provisioning on our Total Gross Loans, as at March 31, 2024.

We have complimented our deep on-ground lending expertise with strong digital capabilities. We have instituted tech-enabled sourcing, credit assessment, risk management and collections capabilities as well as customer engagement tools. We have

implemented a digitally assisted sales process for our field officers (“FOS”), direct selling agents (“DSAs”), dealers and OEMs, improving their decision matrix, productivity and customer engagement. We also leverage automated credit decisioning through rule- and scorecard-based evaluations to enhance our underwriting capabilities and have digitalised our collection operations. As at September 30, 2024, over 95% of our customers were sourced and onboarded digitally with assistance from our sales team or channel partners and over 95% of our collections were done through digital and banking channels. This helps us streamline our operations, reducing our turnaround time and improving our cost to income ratio.

We have a diversified liability franchise supported by a strong credit rating of AAA stable by CRISIL and CARE, which is the highest rating that can be assigned on the credit rating scale for any NBFC in India, according to the CRISIL Report. This has allowed us to fund our operations at competitive rates and tenors across fixed and floating-rate debt instruments. Our Average Cost of Borrowings stood at 7.53% as at March 31, 2024, which is one of the lowest amongst our competitors, according to the CRISIL Report. We have maintained a prudent and sustainable level of leverage in our business, with a debt-to-equity ratio of 5.93x as at September 30, 2024, while ensuring adequate capitalisation with a capital to risk assets ratio (“CRAR”) (including Tier II Capital) of 19.30% as at September 30, 2024. We continue to be prudent on our asset-liability management (“ALM”) strategy which aims at managing risk and providing a comprehensive and dynamic framework for measuring, monitoring and managing liquidity and interest rate risks. This strategy helps to minimize the liquidity risk by mitigating the mismatches in the maturity pattern of assets and liabilities. We have not raised any equity capital in the last seven years, and during this period, we have continued to grow our business, and our Total Gross Loans increased from ₹340.7 billion as at April 1, 2017 to ₹986.2 billion as at September 30, 2024, representing an increase of ₹645.5 billion during this period.

We benefit from a distinguished Board of Directors offering invaluable guidance in our operating framework as well as risk management practices. 9 out of 11 of our Board members are independent directors. In addition, our Key Managerial Personnel and members of Senior Management have a deep understanding of the Indian lending market. Most of our Key Managerial Personnel and most of the members of our Senior Management have been with the Company for more than 11 years and they bring diverse experience in various financial services and functions related to our business.

## **Principal Factors Affecting Our Results of Operations**

### ***Ability to sustain growth and execute our growth strategies effectively***

Revenue from our lending business includes interest income and processing fees, net of loan origination costs, collection-related charges, such as cheque-bouncing charges, late-payment charges, prepayment charges, foreclosure charges and commission on sale of third-party products. Interest income earned on loans and advances to customers is our principal revenue stream in our lending business. Interest income is the interest-earning component of loans and advances to customers and the yield that we earn on them.

Growth in our Total Gross Loans is affected by various factors, including the timely and cost-effective allocation of resources, our ability to select, retain and train personnel, our ability to manage and improve our operations, underwriting, collections, recoveries, as well as our ability to maintain strict risk management policies to minimize credit risks. Our growth also depends on our ability to expand our addressable customer segments by widening our product offering.

The Number of Customers grew to 17.5 million customers as at September 30, 2024 from 13.9 million customers as at September 30, 2023. The Number of Total Customers was 15.8 million, 12.2 million and 9.4 million as at March 31, 2024, 2023 and 2022, respectively. We have created a highly diversified portfolio of lending products for our target customer segments as our products are designed to address demands across the lifecycle of our customer segments. We aim to continue to grow our customer franchise by further widening our product offering. Product innovation and expansion have been key drivers of our growth in the past. We also leverage our large and growing customer base to cross-sell different products to our customers. Our ability to offer products to our target customer segments and to grow our customer base affect our interest income and other revenue streams arising from our lending business.

We distribute our lending products to a diverse pool of customers across various income levels, livelihoods, geographic regions and credit histories throughout India through our distribution network, as well as through digital channels. Our network of branches spreads across 31 States and Union Territories in India. As of September 30, 2024, we had 1,772 branches across India in 1,162 towns, with over 80% of our branches located outside the 20 largest cities in India. We also have established partnerships with over 80 brands and OEMs, as well as with more than 140,000 retailers and dealer touchpoints across their networks in India as of September 30, 2024. Our ability to increase distribution of our loan products through our branches, partnerships and other channels to existing customers and effectively utilize website, application and digital marketing will be instrumental to our ability to grow our customer base and our revenue from our lending business.

In addition, we provide BPO services to HDFC Bank, our Promoter, including sales support services, back office, operations, processing support and running collection call centres. Our revenue from sale of services is generated from the BPO services that we provide to our Promoter and our ability to continue to provide these services affects our financial results. For further details on risks relating to our ability to implement our growth strategy, see “Risk Factors—Internal Risk Factors—We may not be successful in implementing our growth strategies or sustaining our growth and financial performance at similar rates as experienced in recent years” on page 34.

### ***Ability to maintain Net Interest Income and Net Interest Margin (“NIM”)***

Our financial results depend significantly on our interest income, which is the largest contributor to our revenue from operations. The magnitude and timing of interest rate changes in the asset and liability market have a significant impact on our financial results and NIM, which is the difference between our total interest income earned during the specified period and the interest expended on our borrowings. In the periods ended September 30, 2024 and 2023 and in Fiscals 2024, 2023 and 2022, our interest income amounted to 84.86%, 75.97%, 78.73%, 71.98% and 73.97% of our total revenue from operations, respectively. On the other hand, our finance cost amounted to 49.06%, 41.83%, 44.76%, 35.93% and 33.39% of our total expenses in the six-month periods ended September 30, 2024 and 2023 and in Fiscals 2024, 2023 and 2022, respectively. The following table sets forth our Net Interest Income and Net Interest Margin for the six-month periods ended September 30, 2024 and 2023 and Fiscals 2024, 2023 and 2022:

| Particulars                            | Six-month period ended September 30, 2024 | Six-month period ended September 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
|----------------------------------------|-------------------------------------------|-------------------------------------------|-------------|-------------|-------------|
| Net Interest Income<br>(₹ in million)  | 36,007.2                                  | 30,122.6                                  | 62,924.0    | 54,158.6    | 50,374.7    |
| Net Interest Margin <sup>(1)</sup> (%) | 7.63%                                     | 8.15%                                     | 7.85%       | 8.25%       | 8.21%       |

**Notes:**

(1) Net Interest Margin: Ratio of Net Interest Income to the Average Total Gross Loans during the specified period.

Movements in short- and long-term interest rates affect our interest earned and interest expended. Such changes in interest rates could be a result of many factors beyond our control, including the monetary policies of the Reserve Bank of India (the “RBI”), domestic and international economic and political conditions, as well as competition among various lending institutions in India.

We extend loans to our customers and avail borrowings at both fixed as well as floating interest rates. As there are varying maturity periods applicable to our interest-bearing assets and interest-bearing liabilities, a change in interest rates may result in an increase in our interest expense relative to our interest income that would lead to a reduction in our NIM. Our ability to continue to grow our business and to meet the customer demand for new loans will depend heavily on our ability to raise funds on competitive interest rates and terms.

The finance industry in India is highly competitive as we face competition from, among others, NBFCs, banks, micro finance companies, digital lending platforms, small finance banks and private unorganised and informal financiers in the geographies in which we operate. Our ability to compete effectively will depend, in part, on our ability to maintain or increase our interest margins as a highly competitive market environment may increase the pressure to lower interest rates and fees on our loans. Such changes could affect our interest and fee income and would result in a reduction in our NIM. For further details, see “*Risk Factors—Internal Risk Factors—We may be impacted by volatility in interest rates, which could cause our Net Interest Income and our Net Interest Margins to decline and adversely affect our business, results of operations, cash flows and financial condition*” on page 32.

### ***Availability of cost-effective sources of funding***

The liquidity and financial results of our business depends, in large part, on our timely access to, and the costs associated with, raising funds. Our credit rating, monetary policies of the RBI, domestic and international economic and political conditions, as well as other external interventions, among other factors, impact our cost of interest-bearing liabilities. We are also subject to capital adequacy requirements prescribed by the RBI under the NBFC Scale-Based Regulations and our ability to maintain our capital adequacy ratio impacts our cost of funding, see “—*Capital Adequacy*”.

Adverse conditions in the global and Indian economy resulting from economic dislocations or liquidity disruptions may adversely affect availability of credit and decreased liquidity may lead to an increase in interest rates. Any downgrade in our credit ratings may increase interest rates for refinancing our outstanding debt and adversely affect our future issuances of debt and our ability to raise new capital on a competitive basis.

We have leveraged our high credit ratings to raise funds from diverse sources within the capital markets, including secured and unsecured non-convertible debentures (“NCDs”), commercial papers, term loans and external commercial borrowings (“ECBs”) from financial institutions and borrowed from various lenders at competitive rates. Our borrowing costs have also been benefitted from our relationship with our Promoter, which may change in the future for various reasons, including due to potential new regulatory requirements by the RBI. For further details, see “*Risk Factors—Internal Risk Factors— We rely on the parentage of our Promoter. However, the interests of the Promoter as our controlling shareholder may conflict with our interests or the interests of our other shareholders. Our Promoter may also be required to significantly reduce its ownership in our Company, which may have a material impact on our business operations and share price.*” on page 31. Our Total

Borrowings were ₹826,811.0 million as of September 30, 2024, of which term loans from banks and financial institutions were ₹289,027.2 million, the ECB was ₹83,390.1 million, outstanding debt securities were ₹394,931.3 million and sub-ordinated liabilities were ₹59,462.4 million. Our diverse sources of funding, together with our high credit ratings, have resulted in Average Cost of Borrowings of 7.88% and 7.65% for the six-month period ended September 30, 2024 and 2023, respectively and 7.53%, 6.76% and 6.70% in Fiscal 2024, 2023 and 2022, respectively. Our ability to meet the demand for new loans will depend on our ability to obtain financing on acceptable terms. In particular, our margins are affected by our ability to continue to secure cost-effective funding at rates lower than the interest rates at which we lend to our borrowers.

Additionally, we may assign loans to banks and financial institutions. The consideration we derive from the assignment of our loan portfolios in these transactions depends on a number of factors, including the term of the loans and yield of the loan portfolio assigned. For further details, see “*Risk Factors—Internal Risk Factors—If we are unable to secure funding on acceptable terms and at competitive rates when needed, it could have a material adverse effect on our business, results of operations, cash flows and financial condition*” on page 35.

### **Credit quality and provisioning**

Our ability to manage and improve the credit quality is a key driver of our results of operations. We measure our credit quality in part through NPA. With the growth of our business, our ability to manage the credit quality of our loans will be a key driver to our financial results. If our credit quality deteriorates, we will be required to increase our ECL provisions, which would adversely impact our profitability and financial conditions.

The following table illustrates our credit quality ratios as at the dates indicated:

| Particulars                             | For the six-month period ended /<br>As at September 30, |           | For the Fiscals ended / As at March 31, |           |           |

Our credit-risk framework and other stringent underwriting standards support our credit quality and play a pivotal role in our business. Advanced risk assessment models as part of our underwriting process guide our lending decisions. Further, our recovery efforts are driven by analytics embedded into our collection strategies. We remain committed to sustaining robust asset quality by improving our credit-risk framework and fostering a culture of responsible lending and risk management practices. Our ability to control and reduce our level of Stage 3 loans is also dependent on a number of factors beyond our control, such as macro-economic factors and regulatory changes, as well as customer-specific factors such as their inability to service their debt. For further details, see “*Risk Factors—Internal Risk Factors—Gross Stage 3 Loans amounted to 2.10%, 2.38%, 1.90%, 2.73% and 4.99% of Total Gross Loans as at September 30, 2024 and September 30, 2023, and as at March 31, 2024, March 31, 2023 and March 31, 2022, respectively. Non-payment or default by our customers, our inability to provide adequate provisioning coverage for non-performing assets or change in regulatorily mandated provisioning requirements may adversely affect our financial condition and results of operations*” on page 29.

### ***Ability to manage operating expenses***

Our ability to continue to control our operating expenses will directly impact our financial results. In the six-month periods ended September 30, 2024 and 2023 and in Fiscals 2024, 2023 and 2022, our total expenses were ₹63,078.3 million, ₹53,352.1 million, ₹108,664.5 million, ₹97,754.8 million and ₹99,587.3 million, respectively and our Cost to Income Ratio for our lending business was 42.96%, 42.16%, 42.72%, 39.00% and 34.51%, respectively, for the six-month period ended September 30, 2024 and 2023 and for March 31, 2024, 2023 and 2022. Our employee benefit expenses comprised 28.30%, 38.34%, 35.44%, 41.51% and 35.15% of our total expenses, respectively for the six-month period ended September 30, 2024 and 2023 and in Fiscal 2024, 2023 and 2022. Our financial results are thus dependent on our ability to manage our operating expenses and further improve our productivity.

We intend to continue to grow and diversify our pan-India omni-channel distribution network by opening further new branches to expand our coverage across the entirety of India while also deepening our relationships with OEMs, dealers and DSAs, and continuing to add more partners, with the goal of ensuring that we are present in all channels where our existing and target customers are. As we expand our business into new geographies and distribution channels, we expect to incur additional costs that may affect our financial results.

We continue to develop our robust and 360-degree credit assessment and collections operations, as well as utilise digitalisation by embracing a multi-channel approach and aiming to stay abreast of emerging technologies. We plan to further invest in our technology platform and technology-enabled operating procedures to increase operational and management efficiencies. As we target to develop and expand our operations, we expect to derive benefits from economies of scale to support our goal to optimise our operating expenses. We also expect to incur additional costs as we expand and develop our processes and digital tools which may affect our ability to manage our operating expenses.

### ***General economic conditions in India***

Our business, financial condition, financial results and prospects are significantly affected by general economic conditions and particularly conditions in India, where we conduct our business and generate all of our income. Any slowdown in economic growth in India could adversely affect our ability to grow our asset portfolio, the quality of our assets and our ability to implement our strategies. See also “*Industry Overview—Macroeconomic Scenario in India*” on page 163 and “*Risk Factors—Internal Risk Factors—Our business may be adversely affected by seasonal trends in the Indian economy*” on page 37.

### ***Government policy and regulations of NBFCs, as well as political and social conditions***

The Government’s fiscal policy is influenced by the condition of the Indian economy, as the RBI responds to fluctuating levels of economic growth, liquidity concerns and inflationary pressures in the economy by adjusting monetary policy, and changes in the monetary policy affect the interest rates of our advances and borrowings. While declining interest rates may lead to greater demand for additional borrowings, as borrowers seek to take advantage of lower interest rates, when interest rates conversely rise, there are typically fewer prepayments and less demand for new loans. In a rising interest rate environment, our profit margin is primarily dependent on our ability to attract new business, either through existing customers or new customers.

Furthermore, the Government’s policies that aim to promote financial inclusion have supported the rise of the middle class in India. We primarily cater to underserved and underbanked customers in low to middle-income households with minimal or no credit history. Generally, changes in the behavior of our customer segments resulting from shifts in the Government’s policies or otherwise may affect the demand of our products and services and financial results.

We also operate in a highly regulated industry and are required to adhere to various laws, rules and regulations. We are regulated principally by the RBI, and the RBI exercises a supervisory role over our business. We are also subject to regulatory oversight by the SEBI and IRDAI, as well as the corporate, taxation and other laws in effect in India. Changes and the related uncertainties with respect to the implementation of new regulations may have an adverse effect on our business, financial results, cash flows and financial condition and, as a result, our financial condition, financial results and growth also depend on stable government policies and regulations. As of the date of this Draft Red Herring Prospectus, our Company is categorized in the “Upper Layer” under the SBR Regulations, and accordingly we are subject to certain additional capital, prudential guidelines, regulatory changes, and governance requirements based on the bracket that we fall within. Further, the SBR Regulations also require all NBFC-ULs to mandatorily be listed within three years of identification as NBFC-UL. For further information on regulations applicable to our operations, see “*Key Regulations and Policies*” on page 264.

### ***Key Performance Indicators***

In evaluating our business, we consider and use certain key performance indicators “**KPIs**”) that are presented below as supplemental measures to review and assess our operating performance. The presentation of these KPIs is not intended to be considered in isolation or as a substitute for the Restated Consolidated Financial Information included in this Draft Red Herring Prospectus. We present these KPIs because they are used by our management to evaluate our operating performance. These KPIs are not defined under Ind AS and are not presented in accordance with Ind AS. These KPIs have limitations as analytical tools. Further, these KPIs may differ from the similar information used by other companies, including peer companies, and

hence their comparability may be limited. Therefore, these metrics should not be considered in isolation or construed as an alternative to Ind AS measures of performance or as an indicator of our operating performance, liquidity or financial results. Although these KPIs are not a measure of performance calculated in accordance with applicable accounting standards, our Company's management believes that they provide an additional tool for investors to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because they provide consistency and comparability with past financial performance when taken collectively with financial measures prepared in accordance with Ind AS.

## Critical Accounting Policies

A full description of our critical accounting policies adopted in the preparation of our Restated Consolidated Financial Information is provided in Note 2 to our Restated Consolidated Financial Information. Please see “—Restated Consolidated Financial Information Notes forming part of the Restated Consolidated Financial Information—Annexure 2: Accounting Policies” on page 336. The critical accounting policies that our management believes to be the most significant are summarized below.

### Financial instruments

#### Initial recognition and measurement

Financial assets and financial liabilities are recognised in our balance sheet when we become a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit and loss are recognised immediately in statement of profit and loss.

#### Financial assets—Classification

Based on the business model, the contractual characteristics of the financial assets and specific elections, where appropriate, we classify and measures financial assets in the following categories:

- amortised cost,
- fair value through other comprehensive income (“FVOCI”), and
- fair value through profit and loss (“FVTPL”).

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows (“Asset held to collect contractual cash flows”); and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (“SPPI”) on the principal amount outstanding.

After initial measurement and based on the assessment of the business model as asset held to collect contractual cash flows and SPPI, such financial assets are subsequently measured at amortised cost using Effective Interest Rate (“EIR”) method. Interest income and impairment expenses are recognised in statement of profit and loss. Interest income from these financial assets is included in finance income using the EIR method. Any gain and loss on derecognition is also recognised in statement of profit and loss.

The EIR method is a method of calculating the amortised cost of a financial instrument and of allocating interest over the relevant period. The EIR is the rate that exactly discounts estimated future cash flows (including all fees paid or received that form an integral part of the EIR, transaction costs and other premiums or discounts) through the expected life of the instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

We record loans and government securities (classified as held to maturity) at amortised cost.

Financial assets that are held within a business model whose objective is both to collect the contractual cash flows and to sell the assets (“Contractual cash flows of assets collected through hold and sell model”), and contractual cash flows that are SPPI, are subsequently measured at FVOCI. Movements in the carrying amount of such financial assets are recognised in Other Comprehensive Income (“OCI”), except dividend income which is recognised in statement of profit and loss. Amounts recorded in OCI are not subsequently transferred to the statement of profit and loss. Equity instruments at FVOCI are not subject to an impairment assessment.

Financial assets, which do not meet the criteria for categorization as at amortized cost or as FVOCI, are measured at FVTPL. Subsequent changes in fair value are recognised in statement of profit and loss.

We record investments in equity instruments and mutual funds at FVTPL.

#### *Financial liabilities and equity instruments*

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

#### Equity instrument

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by us are recognised at the proceeds received, net of directly attributable transaction costs.

#### Financial liabilities

Financial liabilities are measured at amortised cost. The carrying amounts are determined based on the EIR method. Interest expense is recognised in statement of profit and loss. Any gain or loss on de-recognition of financial liabilities is also recognised in statement of profit and loss. Undrawn loan commitments are not recorded in the balance sheet. However, these financial instruments are in the scope of expected credit loss (“ECL”) calculation.

#### *Derecognition*

#### Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the contractual rights to receive cash flows from the financial asset have expired, or
- we have transferred our rights to receive cash flows from the asset and we have transferred substantially all the risks and rewards of the asset, or we have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

If we neither transfer nor retain substantially all of the risks and rewards of ownership and continue to control the transferred asset, we recognise our retained interest in the asset and an associated liability for the amount we may have to pay. If we enter into transactions whereby we transfer assets recognised on its balance sheet, but retain either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised and the proceeds received are recognised as a collateralised borrowing. On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in OCI is recognised in statement of profit and loss.

#### Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying value of the original financial liability and the new financial liability with modified terms is recognised in statement of profit and loss.

#### *Impairment of financial assets*

We apply the expected credit loss (“ECL”) model in accordance with Ind AS 109 for recognising impairment loss on financial assets. The ECL allowance is based on the credit losses expected to arise from all possible default events over the expected life of the financial asset (“lifetime ECL”), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12-month ECL. The 12-month ECL is a portion of the lifetime ECL which results from

default events that are possible within 12 months after the reporting date. ECL is calculated on a collective basis, considering the retail nature of the underlying portfolio of financial assets.

The impairment methodology applied depends on whether there has been a significant increase in credit risk. When determining whether the risk of default on a financial asset has increased significantly since initial recognition, we consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on a provision matrix which takes into account our historical credit loss experience, current economic conditions, forward looking information and scenario analysis.

The expected credit loss is a product of exposure at default (“**EAD**”), probability of default (“**PD**”) and loss given default (“**LGD**”). The Group has devised an internal model to evaluate the PD and LGD based on the parameters set out in Ind AS 109. Accordingly, the financial assets have been segmented into three stages based on the risk profiles. The three stages reflect the general pattern of credit deterioration of a financial asset. The Group categorises financial assets at the reporting date into stages based on the days past due (“**DPD**”) status as under:

- Stage 1: 0 to 30 days past due,
- Stage 2: 31 to 90 days past due, and
- Stage 3: more than 90 days past due.

Loan accounts where principal and/or interest are past due for more than 90 days continue to be classified as stage 3 till overdues across all loans are cleared.

LGD is an estimate of loss from a transaction given that a default occurs. PD is defined as the probability of whether the borrowers will default on their obligations in the future. For assets which are in Stage 1, a 12-month PD is required. For Stage 2 assets, a lifetime PD is required while Stage 3 assets are considered to have a 100% PD. EAD represents the expected exposure in the event of a default and is the gross carrying amount in case of the financial assets held by us.

We incorporate forward-looking information into both assessments of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. Based on the consideration of external actual and forecast information, we form a ‘base case’ view of the future direction of relevant economic variables. This process involves developing two or more additional economic scenarios and considering the relative probabilities of each outcome. The base case represents a most likely outcome while the other scenarios represent more optimistic and more pessimistic outcomes.

The measurement of impairment losses across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. Our ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. We regularly review its models in the context of actual loss experience and makes adjustments when such differences are significantly material. Adjustments including reversal of ECL is recognised through statement of profit and loss.

After initial recognition, trade receivables are subsequently measured at amortised cost using the effective interest method, less provision for impairment. We follow the simplified approach required by Ind AS 109 for recognition of impairment loss allowance on trade receivables, which requires lifetime ECL to be recognised at each reporting date, right from initial recognition of the receivables.

#### *Write offs*

The gross carrying amount of a financial asset is written-off (either partially or in full) to the extent that there is no reasonable expectation of recovering the asset in its entirety or a portion thereof. This is generally the case when we determine that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written-off could still be subject to enforcement activities under our recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in statement of profit and loss.

#### **Revenue recognition**

Revenue (other than for those items to which Ind AS 109 Financial Instruments is applicable) is measured at the amount of transaction price. Amounts disclosed as revenue are net of goods and services tax (“**GST**”) and amounts collected on behalf of third parties. Ind AS 115 Revenue from Contracts with Customers outlines a single comprehensive model of accounting for revenue arising from contracts with customers.

We recognise revenue from contracts with customers based on a five-step model as set out in Ind 115:

- **Step 1:** Identify contract(s) with a customer. A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.
- **Step 2:** Identify performance obligations in the contract. A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.
- **Step 3:** Determine the transaction price. The transaction price is the amount of consideration to which we expect to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.
- **Step 4:** Allocate the transaction price to the performance obligations in the contract. For a contract that has more than one performance obligation, we allocate the transaction price to each performance obligation in an amount that depicts the amount of consideration to which we expect to be entitled in exchange for satisfying each performance obligation.
- **Step 5:** Recognise revenue when (or as) we satisfy a performance obligation.

Specific policies for our different sources of revenue are explained below:

#### *Income from lending business*

##### Interest income

Interest income on a financial asset at amortised cost is recognised on a time proportion basis taking into account the amount outstanding and the Effective Interest Rate (“**EIR**”). The EIR is the rate that exactly discounts estimated future cash flows of the financial asset through the expected life of the financial asset or, where appropriate, a shorter period, to the net carrying amount of the financial instrument. The internal rate of return on financial asset after netting off the fees received and cost incurred approximates the effective interest rate method of return for the financial asset. The future cash flows are estimated taking into account all the contractual terms of the instrument.

The interest income is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e., at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). For credit-impaired financial assets, the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets (i.e., the gross carrying amount less the allowance for ECLs).

##### Other financial charges

Cheque bouncing charges, late payment charges, foreclosure charges and application money are recognised on a point-in-time basis, and are recorded when realised since the probability of collecting such monies is established when the customer pays.

#### *Income from BPO services*

Income from BPO services comprise of sales support services, back office, operations, processing support, running collection call centres and collecting overdue amounts from borrowers. Performance obligations are satisfied over time and revenue is recorded on a monthly basis.

#### *Income from direct assignment*

Gains arising out of direct assignment transactions comprise the difference between the interest on the loan portfolio and the applicable rate at which the direct assignment is entered into with the assignee, also known as the right of excess interest spread (EIS). The future EIS basis of the scheduled cash flows on execution of the transaction, discounted at the applicable rate and entered into with the assignee is recorded upfront in the statement of profit and loss. EIS is evaluated and adjusted for ECL and expected prepayment.

#### **Employee benefits**

##### *Short-term employee benefits*

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if we have a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

##### *Provident fund*

Retirement benefit in the form of provident fund, is a defined contribution scheme. We have no obligation, other than the contribution payable to the provident fund. We recognise contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

#### *ESIC and labour welfare fund*

Our contribution paid/payable during the period to ESIC and Labour welfare fund are recognised in the statement of profit and loss.

#### *Gratuity*

We operate a defined benefit gratuity plan that provide for gratuity benefit to all employees. We make annual contributions to a fund administered by trustees and managed by insurance companies for amounts notified by the said insurance companies. The benefit is in the form of lump sum payments to vested employees on resignation, retirement, or death while in employment or on termination of employment of an amount equivalent to 15 days basic salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to statement of profit and loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. We recognise the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income.

### **Principal Components of Income and Expenditure**

#### ***Income***

Our total income comprises revenue from operations.

#### *Revenue from operations*

Our revenue from operations comprises (i) interest income, (ii) income from sale of services, (iii) other financial charges, (iv) net gain on fair value changes and (v) net gain on derecognition of financial instruments under amortised cost category.

#### Interest income

Interest income is the largest contributor to our revenue from operations. We derive interest income from interest on loans, interest on investments and interest on deposits with banks. In the six-month periods ended September 30, 2024 and 2023, interest income comprised 84.86% and 75.97% of our total revenue from operations, respectively. In Fiscals 2024, 2023 and 2022, interest income amounted to 78.73%, 71.98% and 73.97% of our total revenue from operations, respectively.

Interest on loans comprises interest income on our (1) Enterprise Lending, including unsecured business loans, loans against property, enterprise business loans and gold loans, (2) Asset Finance loans, including commercial vehicle loans, construction equipment loans and tractor loans and (3) Consumer Finance, including consumer durable / digital product / lifestyle product loans, relationship loans, salaried personal loans, auto loans, two-wheeler loans and micro loans. We recognise interest income on loans by applying the effective interest rate (“EIR”) to the gross carrying amount of non-credit-impaired financial assets. For credit-impaired financial assets, the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets (i.e., the gross carrying amount less the allowance for expected credit loss).

#### Sale of services

Income from sale of services comprises income from our BPO services to HDFC Bank, our Promoter, including sales support services, back office, operations, processing support, running collection call centres and collecting overdue amounts from borrowers. In the six-month periods ended September 30, 2024 and 2023, income from sale of services comprised 7.71% and 17.03% of our total revenue from operations, respectively. In Fiscals 2024, 2023 and 2022, income from sale of services amounted to 13.76%, 21.24% and 20.90% of our total revenue from operations, respectively.

#### Other financial charges

We receive income from charges on loans to customers, such as cheque bouncing charges, late payment charges, foreclosure charges and application money on loans, as well as commissions on insurance distribution. In the six-month periods ended September 30, 2024 and 2023, income from other financial charges comprised 6.91% and 6.11% of our total revenue from operations, respectively. In Fiscals 2024, 2023 and 2022, income from other financial charges amounted to 6.73%, 6.10% and 5.03% of our total revenue from operations, respectively.

### Expenses

Our total expenses comprise finance costs, impairment on financial instruments, employee benefits expenses, depreciation and amortisation and other expenses.

#### Finance costs

Our finance costs comprise interest expense on financial liabilities primarily consisting of (i) interest on borrowings (other than debt securities), (ii) interest on debt securities, (iii) interest on subordinated liabilities, (iv) discount on commercial paper and (iv) other borrowing costs. #### Impairment on financial instruments

Impairment on financial instruments includes impairment allowance on loans measured at amortised cost and settlement loss and bad debts written off (net of recoveries from bad debt written off). Impairment allowance on loans is calculated based on ECL on Stage 1, Stage 2, Stage 3 Loans and loan commitments. ECL is calculated based on exposure of default, probability of default and loss given default. Impairment on financial instruments represented 13.37%, 10.18%, 9.82%, 13.61% and 24.76% of our total expenses in the six-month periods ended September 30, 2024 and 2023 and in Fiscals 2024, 2023 and 2022, respectively. #### **Income**

##### *Revenue from operations*

Our income from operations increased by 14.32% to ₹78,906.3 million for the six-month period ended September 30, 2024, from ₹69,024.7 million for the six-month period ended September 30, 2023, primarily due to an increase in our interest income by 27.69%. The primary reasons for this are discussed below.

##### Interest income

Our interest income increased by 27.69% to ₹66,956.2 million for the six-month period ended September 30, 2024, from ₹52,438.5 million for the six-month period ended September 30, 2023, primarily due to an increase in interest on loans (at amortised cost) by 27.10% to ₹66,128.5 million for the six-month period ended September 30, 2024, from ₹52,028.7 million for the six-month period ended September 30, 2023. The following table sets forth the breakdown of our interest income:

| Particulars                            | For the six-month period ended September 30, 2024<br>(₹ in million) | For the six-month period ended September 30, 2023<br>(₹ in million) | % increase / (decrease) |
|----------------------------------------|---------------------------------------------------------------------|---------------------------------------------------------------------|-------------------------|
| Interest income on loans               | 66,128.5                                                            | 52,028.7                                                            | 27.10%                  |

| Interest income on investments         | 704.4                                                               | 315.5                                                               | 123.26%                 |

The increase in interest on loans was primarily attributable to the growth in our Average Gross Loans by 27.69% to ₹944,210.7 million for the six-month period ended September 30, 2024 from ₹739,436.7 million for the six-month period ended September 30, 2023. ##### Other financial charges

Our income from other financial charges increased by 29.38% to ₹5,454.7 million for the six-month period ended September 30, 2024 from ₹4,215.9 million for the six-month period ended September 30, 2023, primarily due to an increase in commissions on insurance distribution and other charges related to collections.

##### Net gain on fair value changes

Our net gain on fair value changes decreased by 37.86% to ₹391.2 million for the six-month period ended September 30, 2024, from ₹629.5 million for the six-month period ended September 30, 2023, primarily due to a decrease in unrealised gain on investments at FVTPL from ₹212.1 million for the six-month period ended September 30, 2023 as against an unrealized loss of ₹32.9 million for the six-month period ended September 30, 2024.

### **Liquidity and Capital Resources**

Historically, our primary liquidity requirements have been to finance our working capital needs for our operations. We have met these requirements through cash flows from operations and borrowings.

Our Asset Liability Committee oversees liquidity risk management and ensures sufficient levels of liquidity and effective interest rate risk management. We monitor various metrics such as Net Interest Margins (NIM), maturity profiles, stock ratios, and asset-liability mix when assessing our liquidity position.

## Qualitative and Quantitative Disclosure about Market Risks

Market risk is the risk that the fair value or future cash flow of financial instrument will fluctuate due to changes in market variables such as interest rates, foreign exchange rates (among others). The objective of market risk management is to manage and control market risk exposure within acceptable parameters while maximizing the return. Cash and cash equivalents, bank balance other than cash and cash equivalents, trade receivables, and other financial assets do not have any interest and market risk exposure due to the nature of balances.

### Interest rate risk

As at September 30, 2024, 71.44% of our Total Borrowings were subject to fixed interest rates, with 28.56% of our Total Borrowings subject to floating interest rates. The following table demonstrates the sensitivity to a reasonably possible change in interest rates (all other variables being constant) of the Company's statement of profit and loss.

### Foreign currency management

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Our foreign currency risk arises primarily from foreign currency borrowings. We manage this foreign currency risk by entering into cross-currency swaps and forward contracts. When a derivative is entered into for hedging purposes, we negotiate the terms of those derivatives to match with the terms of the hedge exposure. Our policy is to fully hedge foreign currency borrowings at the time of drawdown and remain so until repayment.

We hold derivative financial instruments such as cross-currency interest-rate swap to mitigate the risk of changes in exchange rate in foreign currency and the floating interest rate. The counterparty for these contracts is generally a bank. These derivative financial instruments are valued based on quoted prices for similar assets and liabilities in active markets or inputs that are directly or indirectly observable in the marketplace.

### Unusual or Infrequent Events or Transactions

Except as described in this Draft Red Herring Prospectus, there have been no unusual or infrequent events or transactions that have in the past or may in the future affect our business operations or future financial performance.

### Known Trends or Uncertainties

Our business has been subject, and we expect it to continue to be subject, to significant economic changes arising from the trends identified above in “*Significant Factors affecting our Results of Operations and Financial Condition*” and the uncertainties described in “*Risk Factors*” on page 28. ### Significant Dependence on a Single or Few Customers or Suppliers

Given the nature of our business operations, we do not believe our business is dependent on any single or a few customers or suppliers.

### Competitive Conditions

We operate in a competitive environment. See sections “*Risk Factors—Internal Risk Factors—The lending services industry in India is highly competitive and our inability to compete effectively could adversely affect our business, results of operations, cash flows and financial condition*”, “*Industry Overview*” and “*Our Business—Competition*” on pages 34, 163 and 261, respectively.

#### **Seasonality/Cyclicalities of Business**

Our operations and demand for our products are affected by seasonal trends in the Indian economy, which may affect our results of operations. For example, during the festive seasons in India (primarily October and November), while the demand for our Asset Finance products generally decrease, the demand for our Consumer Finance products tends to increase. By contrast, the demand for our Asset Finance products generally increase during the Fiscal fourth quarter, while the demand for our Consumer Finance products tends to decrease. Furthermore, other events, such as weather changes like heatwaves and election periods at both state and national levels, may have an impact on our operations and results of operations.

#### **Significant Developments after September 30, 2024 That May Affect Our Future Results of Operations**

Other than as disclosed below and elsewhere in this Draft Red Herring Prospectus, no circumstances have arisen since September 30, 2024 that could materially and adversely affect, or are likely to affect, our operations or profitability, or the value of our assets or our ability to pay our material liabilities within the next 12 months.

For further details on the Basis of Allotment, see “*Offer Procedure*” beginning on page 510.

### **Period of subscription list of the Offer**

### **Nomination facility to Bidders**

In accordance with Section 72 of the Companies Act read with the Companies (Share Capital and Debentures) Rules, 2014, as amended, the Sole Bidder, or the First Bidder along with other joint Bidders, may nominate any one person in whom, in the event of the death of Sole Bidder or in case of joint Bidders, death of all the Bidders, as the case may be, the Equity Shares Allotted, if any, shall vest to the exclusion of all other persons, unless the nomination is modified or cancelled in the prescribed manner. A person, being a nominee, entitled to the Equity Shares by reason of the death of the original holder(s), shall be entitled to the same advantages to which he or she would be entitled if he or she were the registered holder of the Equity Share(s). Where the nominee is a minor, the holder(s) may make a nomination to appoint, in the prescribed manner, any person to become entitled to Equity Share(s) in the event of his or her death during the minority. A nomination shall stand rescinded upon a sale, transfer or alienation of Equity Share(s) by the person nominating. A nomination may be cancelled or modified by nominating any other person in place of the present nominee, by the holder of the Equity Shares who made the nomination, by giving a notice of such cancellation or variation to our Company. A buyer will be entitled to make a fresh nomination in the manner prescribed. Fresh nomination can be made only on the prescribed form available on request at our Registered Office or Corporate Office or to the registrar and transfer agents of our Company.

Any person who becomes a nominee by virtue of the provisions of Section 72 of the Companies Act shall upon the production of such evidence as may be required by our Board, elect either:

- a) to register himself or herself as the holder of the Equity Shares; or
- b) to make such transfer of the Equity Shares, as the deceased holder could have made.

Further, our Board may at any time give notice requiring any nominee to choose either to be registered himself or herself or to transfer the Equity Shares, and if the notice is not complied with within a period of 90 days, our Board may thereafter withhold payment of all dividends, interests, bonuses or other monies payable in respect of the Equity Shares, until the requirements of the notice have been complied with.

Since the Allotment of Equity Shares in the Offer will be made only in dematerialised mode, there is no need to make a separate nomination with our Company. Nominations registered with respective Depository Participant of the Bidder would prevail. If the Bidder wants to change their nomination, they are requested to inform their respective Depository Participant.

### Withdrawal of the Offer

Our Company and the Promoter Selling Shareholder, in consultation with the BRLMs, reserves the right not to proceed with the Offer, after the Bid/ Offer Opening Date but before the Allotment. Our Company shall also inform the same to the Stock Exchanges on which Equity Shares are proposed to be listed. The notice of withdrawal will be issued in the same newspapers where the pre-Offer advertisements have appeared, and the Stock Exchanges will also be informed promptly.

If our Company, in consultation with the BRLMs, withdraw the Offer after the Bid/ Offer Closing Date and thereafter determines that it will proceed with an issue of the Equity Shares, our Company shall file a fresh draft red herring prospectus with SEBI. Notwithstanding the foregoing, the Offer is also subject to (i) the filing of the Prospectus with the RoC; and (ii) obtaining the final listing and trading approvals of the Stock Exchanges, which our Company shall apply for after Allotment.

## **Phased implementation of Unified Payments Interface**

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, *inter alia*, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

**Phase III:** This phase was applicable on a voluntary basis for all issues opening on or after September 1, 2023 and has become on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**T+3 Notification**”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the BRLMs.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (the “**UPI Streamlining Circular**”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post-Offer BRLM will be required to compensate the concerned investor.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 and SEBI circular no. With effect from the April 1, 2020, the aggregate limit shall be the sectoral caps applicable to the Indian company as prescribed in the FEMA Rules with respect to its paid-up equity capital on a fully diluted basis. While the aggregate limit as provided above could have been decreased by the concerned Indian companies to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its board of directors and its shareholders through a resolution and a special resolution, respectively before March 31, 2020, our Company has not decreased such limit and accordingly the applicable limit with respect to our Company is 100%.

- (c) prior consent of the FPI is obtained for such transfer, except when the persons to whom the offshore derivative instruments are to be transferred to are pre-approved by the FPI.

Participation of FPIs in the Offer shall be subject to the FEMA Rules.

Please note that in terms of the General Information Document, the maximum Bid by any Bidder including QIB Bidder should not exceed the investment limits prescribed for them under applicable laws. Further, MIM Bids by an FPI Bidder utilising the MIM Structure shall be aggregated for determining the permissible maximum Bid. Further, please note that as disclosed in the Draft Red Herring Prospectus read with the General Information Document, Bid Cum Application Forms are liable to be rejected in the event that the Bid in the Bid cum Application Form "*exceeds the Issue size and/or investment limit or maximum number of the Equity Shares that can be held under applicable laws or regulations or maximum amount permissible under applicable laws or regulations, or under the terms of the Red Herring Prospectus.*"

For example, an FPI must ensure that any Bid by a single FPI and/ or an investor group (which means the same multiple entities having common ownership directly or indirectly of more than 50% or common control) (collective, the "**FPI Group**") shall be below 10% of the total paid-up Equity Share capital of our Company on a fully diluted basis. ## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. Further, the FDI Policy issued by the DPIIT consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

In terms of Press Note 3 of 2020, dated April 17, 2020 (“**Press Note**”), issued by the DPIIT, the FDI Policy and the FEMA Rules has been amended to state that all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares, as applicable. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the FEMA Rules and FDI Policy read with Press Note, up to 100% foreign investment under the automatic route is currently permitted in NBFCs. However, investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

For details of the aggregate limit for investments by NRIs and FPIs in our Company, see “*Offer Procedure*” beginning on page 510.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.

**The Equity Shares offered in the Offer have not been and will not be registered under the U.S. Securities Act or any other applicable law of the United States (or any state or other jurisdiction therein), and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act and referred to in this Red Herring Prospectus as “U.S. QIBs”, for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Red Herring Prospectus as “QIBs”) in transactions exempt from or not subject to, the registration requirements of the U.S. Securities Act, and (ii) outside the United States in offshore transactions as defined in and in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.**

**The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.**

The above information is given for the benefit of the Bidders. Our Company, the Promoter Selling Shareholder, and the Book Running Lead Managers are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Red Herring Prospectus.
