Mr. B R Preetham
Executive Director & CEO

Commenting on the performance Mr. B R Preetham Executive Director & CEO, Sansera Engineering Limited said,

"In line with our expectations, we closed FY24 with a 20% growth in the topline and 25% growth in the EBITDA. Our results reflect disciplined execution of our strategic initiatives across legacy, Auto-ICE business as well as Emerging Businesses which include Non-Auto and Tech-Agnostic & xEV segments.

After years of experience working in the critical precision engineering industry, we continue to invest in high-growth areas to further diversify our revenue streams across segments, geographies and customers. Our dedicated team works closely with the customers to understand their evolving product requirements and develop products around the same. As a result, momentum with the customers is building, underscoring the value that Sansera is offering.

The orderbook for new business stands at Rs. 15.9 Bn after taking the annual reset where we exclude orders which have moved into mass production. This orderbook which is expected to mature in the next three years, is well spread across business segments aligned to our long-term vision. Overall, the outlook for FY25 is promising as we are able to pivot and evolve continuously to meet evolving market demands."
