Surana Charitable Clinic. The clinic was built on 1200 sq ft area. It had 2 permanent doctors, who were provided residence in the clinic so there could be 24/7 service for the people and 5 staff members to take care of the daily activities. There were only 3 to 4 beds available with 80 to 90 patients treated daily, who came from 25kms of the radius to visit the clinic and avail the services. There were weekly camps held such as eye care, dental care and various vaccinations for children and even skin diseases were taken care of.

Current activities in G.M. Surana Charitable Hospital:-

With 28 years of services for the people, G.M. Surana Charitable Clinic has immensely grown. In 2011, G.M. Surana Charitable Clinic was changed to G.M. Surana Charitable Hospital. Presently the hospital has grown to 6000 sq ft area with 5 doctors and 10 staff members. The small steps have taken a large leap in the foundation and the passion to serve people has emerged and is increasing. The general clinic has even added a physiotherapy centre and weekly camps now even include thyroid checkup, heart care tips, blood grouping, glucose provision and much more. The only thing that remains constant in all these years is the trust of the people towards the foundation and till date 9 lakhs plus patients are treated here.

Future Years:-

G.M. Surana Charitable Hospital still yearns to grow more and by providing every possible services under one roof to its people with the best quality. Future plans of the hospital includes – opening an eye care centre and a thyroid centre by providing daily services rather than weekly camps. It even desires to include specialised doctors in various fields so the rural community has an access to it in the right means.

MANAGEMENT DISCUSSION & ANALYSIS

Surana Solar Limited (Formerly known as Surana Ventures Limited) was incorporated in the year 2006, a flagship Company of Surana Group. During the year 2009-2010, a scheme of arrangement was entered by the Company with M/s Surana Telecom and Power Limited which was sanctioned by Hon'ble High Court of A.P. on 28.06.2010 and became effective on 28.07.2010, pursuant to which the "Solar Undertaking" of Surana Telecom and Power Limited was merged with the Company. The shares of the Company were listed on Stock Exchanges w.e.f 7th January, 2011. The Company has steadily grown over the years with a continued focus on customer satisfaction, evolving itself into country's one of the most promising mid cap Companies.

1. SOLAR PV MODULES:

1.1 INTRODUCTION:

Photovoltaic (PV) energy is one of the most promising emerging technologies. Photovoltaic (PV) systems use solar panels, either on rooftops or in ground-mounted solar farms, converting sunlight directly into electric power. Solar Photovoltaics power generation has long been seen as a clean energy technology which draws upon the planet's most plentiful and widely distributed renewable energy source - the Sun. More than 100 countries use solar PV. China, followed by Japan and the United States is now the fastest growing market, while Germany remains the world's largest producer, contributing more than 7% to its national electricity demands. Photovoltaics is now, after hydro and wind power, the third most important renewable energy source in terms of globally installed capacity. Solar Photovoltaic (PV) electricity continued its remarkable growth trend in 2015, even in the midst of a financial and economic crisis and even as the PV industry was enduring a period of consolidation. As they have for the past decade, PV markets again grew faster than anyone had expected both in Europe and around the world. The spectacular global growth of solar PV is one of the big energy stories of today and it may well become the energy story of the 21st Century. The International Energy Agency (IEA) issued a report claiming that solar PV could be the biggest single source of electricity in 2050 and it believes the price of solar PV could become as low as 4 dollar cents per kWh.

1.2 INDUSTRY ANALYSIS:

The solar PV market in 2015 was up 25% over 2014 to a record 50 GW, lifting the global total to 227 GW. The annual market in 2015 was nearly 10 times the world's cumulative solar PV capacity of a decade earlier. China, Japan and the United States again accounted for the majority of capacity added, but emerging markets on all continents contributed significantly to global growth, driven largely by the increasing cost-competitiveness of solar PV. An estimated 22 countries had enough capacity at end-2015 to meet more than 1% of their electricity demand, with far higher shares in some

countries (e.g., Italy 7.8%, Greece 6.5% and Germany 6.4%). China achieved 100% electrification, in part because of significant off-grid solar PV installed since 2012; on-grid, however, curtailment of solar generation started to become a serious challenge for China's solar PV sector.

Source: REN21's Renewables Global Status Report

The industry recovery of recent years strengthened further due to the rise of new markets and strong global demand, and most top-tier companies were back on their feet in 2015. Record-low bids for large-scale solar PV projects were seen in tenders from Latin America to the Middle East to India. Distributed rooftop solar PV remains more expensive than large-scale projects but has followed similar price trajectories and is competitive with retail prices in many locations.

1.3 BUSINESS OUTLOOK:

The Government's vision of providing power 24x7 to each household has ignited new optimism in the power industry, especially with the exploration of renewable energy sources which offer excellent opportunities amid challenges for the industry and it has launched a massive RE initiative of adding 175 GW till 2022. This includes Solar 100 GW, Wind 50 GW, Biomass 10 GW, and Small Hydro 5 GW. The Government encourages setting up of solar power projects by offering various incentives, such as GBIs and tax holidays to the Clean Energy. In view of the huge demand for solar product and Company having considerable market in this line of activity, the company expects to benefit by the same.

2. NON CONVENTIONAL ENERGY:

2.1 INTRODUCTION:

With increasing demand for energy and with fast depleting conventional sources of energy such as coal, petroleum, natural gas, etc. the non-conventional sources of energy such as energy from sun, wind, biomass, tidal energy, geo-thermal energy and even energy from waste material are gaining importance. This energy is abundant, renewable, pollution free and eco-friendly. India is endowed with vast solar energy potential. About 5,000 trillion kWh per year energy is

incident over India's land area with most parts receiving 4-7 kWh per sq. m per day. Hence both technology routes for conversion of solar radiation into heat and electricity, namely, solar thermal and solar photovoltaics, can effectively be harnessed providing huge scalability for solar in India. Solar also provides the ability to generate power on a distributed basis and enables rapid capacity addition with short lead times.

2.2 INDIAN INDUSTRY ANALYSIS

The country offers unlimited growth potential for the solar PV industry. India has the fifth largest power generation portfolio worldwide with a power generation capacity of 271.722 GW. Current renewable energy contribution stands at 77 GW of the total installed capacity of 271.722 GW in the country as on 31.03.2015. The Government has set a mammoth new goal to build a solar power capacity of 100 GW in an energy-starved-but-hungry country, permitting 100% foreign investment and offering a series of tax breaks for the fledgling sector. Government is considering to bring long term policies and scheme for installing solar power plants with 1 lakh MW capacity in the country. It has announced revision of the target of renewable energy capacity of the MNRE to 1,75,000 MW by 2022. The revised target of 1,75,000 MW comprises of capacity addition of 1,00,000 MW Solar, 60,000 MW Wind, 10,000 MW Biomass and 5,000 MW Small Hydro Power. The Government has rolled out a scheme for setting up and development of at least 25 Solar Parks and Ultra Mega Solar Power Projects targeting over 20,000 MW of solar power installed capacity within a span of 5 years starting from 2014-15 at various locations in the country with a view to create required infrastructure for setting up of Solar Power Projects besides CFA and grants concessional customs duty/ excise duty exemption for setting up of solar power plants, Accelerated Depreciation and Tax Holidays. The government has created a liberal environment for foreign investment in renewable energy projects. The establishment of a dedicated financial institution- the Indian Renewable Energy Development Agency makes for renewed impetus on the promotion, development and extension of financial assistance for renewable energy and energy efficiency/conservation projects. Foreign Direct Investment (FDI) up to 100% is permitted under the automatic route for renewable energy generation and distribution projects.

Green Energy Corridor project is under implementation for evacuation of renewable energy from generation points to the load centres by creating intra-state and inter-state transmission infrastructure RE-INVEST 2015 Concludes with 2,66,000 MW Commitments of Green Energy. The Government has launched various schemes to set up grid-connected solar power plants. The Reserve Bank of India (RBI) added renewable energy under priority lending but with a cap of INR150 million (US\$2.5 million) for renewable energy generators and INR1 million (US\$16,393) per borrower for residential customers.

2.3 BUSINESS OUTLOOK:

The Government of India's focus to attain '**Power For All**' has accelerated capacity addition in the country and it has identified the power sector as a key sector of focus to promote sustained industrial growth. The RE-INVEST 2015 concluded that the green energy commitments worth 2,66,000 MW. GoI has announced a massive renewable power production target of 175,000 MW by 2022, comprising 100,000 MW from solar power, 60,000 MW from wind energy, 10,000 MW from biomass and 5,000 MW from small hydro power projects. Sustained economic growth continues to drive power demand in India.

Your company has great opportunities as the power sector is seen as a key driver supporting the growth of the nation at large, the new Government at the Centre has been pursuing reforms which is expected to ease some of the known constraints.

Green Initiative in Corporate Governance: Go Paper Less

The Ministry of Corporate Affairs has come up with a Green Initiative of permitting the service of documents including Annual Reports to the Shareholders through e-mail or other permissible electronic modes instead of physical mode vide its Circular No. 17/2011 dated 21 April 2011. This is certainly a welcome move for the society at large as this will reduce paper consumption to a great extent and allow all stakeholders to contribute towards a Greener Environment. To support this green initiative, members who have not registered their e-mail addresses, so far, are requested to register their e-mail addresses, in respect of electronic holdings with the Depository through their concerned Depository Participants. Members who hold shares in physical form are requested to fill the appropriate column in the members e-mail registration form and register the same with Karvy Computershare Private Limited.
