This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Ltd. Unless otherwise indicated, all financial, operational, industry and other related information derived from the Infomerics Report and included herein with respect to any particular year refers to such information for the relevant calendar year.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 20 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 245 of this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

INTERNAL RISK FACTORS

- 1. We outsource the manufacturing of all our products to third-party manufacturers and do not own any manufacturing facilities. Our reliance on such third-party manufacturers exposes us to several operational, regulatory and business risks that may adversely affect our operations, financial condition and results of operations.*

Our Company does not operate any manufacturing facilities of its own and is entirely dependent on a diversified network of third-party manufacturers located across various states in India—including Gujarat, Himachal Pradesh, Delhi, Uttarakhand,

Jammu & Kashmir and others—as well as overseas manufacturers in Germany, Taiwan, China and Thailand. The continuity of our supply chain, product availability, quality consistency and delivery timelines is therefore significantly dependent on these third-party manufacturing parties. Any disruption, deterioration of relationships, operational constraints, or inability of these manufacturers to meet our requirements may adversely impact our business operations.

Our reliance on outsourced manufacturing exposes us to various risks, including fluctuations in procurement costs, dependence on the quality control systems and processes of third-party manufacturers, and operational risks such as equipment breakdowns, labour issues, power outages, shortages of consumables, regulatory non-compliance, natural calamities and geopolitical developments affecting overseas suppliers. In the event of disruption, deterioration in relationships or inability of such manufacturers to meet our requirements, we may be required to identify and onboard alternative manufacturing partners, which may not be possible on short notice or on comparable commercial terms and may result in delays or supply disruptions.

Additionally, since these manufacturers do not operate exclusively for us, they may supply products to other parties, including competitors, which may lead to conflicts of interest. There is also a risk of misappropriation of our formulations, trade secrets, or confidential product information, especially in the absence of robust intellectual property safeguards, both domestically and overseas. Moreover, any failure by these manufacturers to comply with applicable regulations related to product safety, ingredient standards, labelling, environmental norms and waste management—either in India or in their respective countries—may expose us to regulatory scrutiny, penalties, product recalls, reputational harm, or an inability to sell the affected products. While the Company has entered into written manufacturing and supply agreements with certain of its domestic manufacturing partners, which set out commercial terms, quality requirements and other obligations, such arrangements do not eliminate the risks associated with outsourced manufacturing. Any of these risks may materially and adversely affect our business, results of operations, cash flows and financial condition.

2. *Our business is dependent on the recognition, perception and acceptance of the “Recode” brand, and any damage to our brand reputation could adversely affect our business, results of operations and financial condition.*

Our business is significantly dependent on the recognition, reputation and perceived value of the “Recode” brand among consumers, distributors, franchise partners and other stakeholders. Our brand plays a critical role in influencing purchasing decisions across our product portfolio and distribution channels. Any deterioration in the reputation or market perception of our brand could adversely affect demand for our products and our competitive position in the beauty, cosmetics and personal care segment.

Brand perception may be adversely affected by factors such as adverse publicity, negative customer feedback, allegations relating to product quality, safety or authenticity, inconsistencies in customer experience, pricing perceptions, or issues arising from the conduct or performance of franchise partners, third-party manufacturers, logistics providers or other third parties associated with our brand. As our products are marketed and sold under a single brand identity, any adverse incident relating to the “Recode” brand may have a broader impact across our product portfolio.

Further, certain risks relating to misuse of our brand, including counterfeit products, impersonation, fraudulent communications or unauthorised listings by third parties on digital platforms, may create confusion among consumers and adversely affect brand trust. In addition, delays or adverse outcomes in relation to the protection or enforcement of our intellectual property rights may weaken our ability to safeguard our brand.

Our growth strategy involves expanding our product portfolio and geographic presence under the “Recode” brand. There can be no assurance that new products or market expansions will be perceived positively or will reinforce existing brand perception. Any failure to maintain brand consistency, trust and recognition may result in reduced sales, increased marketing expenditure, loss of market share and pressure on margins. Any impairment of the “Recode” brand, loss of consumer confidence or dilution of brand equity could materially and adversely affect our business, results of operations, financial condition and cash flows.

3. *We operate in the beauty, cosmetics and personal care segment in India, which is subject to rapidly changing consumer preferences, and any failure to respond effectively to such changes could adversely affect our business, results of operations and financial condition.*

We operate in the beauty, cosmetics and personal care (“BPC”) segment in India, which is characterised by frequent changes in consumer preferences, evolving beauty and wellness trends, continuous product innovation and high competitive intensity. Demand for products in this segment is influenced by several factors, including changing fashion and beauty trends, perceived product efficacy and safety, seasonal demand patterns, pricing dynamics, brand perception, social media influence and the introduction of new products by competitors.

Our business performance depends on our ability to identify and respond effectively to changing consumer preferences, develop and introduce products that align with prevailing market trends, and maintain a relevant and competitive product portfolio

across our distribution channels. Consumer preferences in the BPC segment are difficult to predict and may change rapidly. If we fail to anticipate or respond in a timely and effective manner to such changes, or if our products do not gain consumer acceptance, demand for our products may decline.

Further, our operations involve maintaining inventory across physical retail outlets, franchise stores and online channels. Any misjudgment in demand forecasting or product planning may result in excess or obsolete inventory, increased discounting or promotional expenses, pressure on margins, or write-offs, which could adversely affect our financial performance.

Our growth is also dependent on sustained consumer engagement across offline and digital platforms. Increasing reliance on social media, online reviews and influencer-led trends have amplified the speed at which consumer preferences evolve. If we are unable to adapt our product offerings, marketing strategies or customer engagement initiatives in line with such shifts in consumer behaviour, our brand visibility, customer acquisition and retention may be adversely impacted.

Any decline in demand for our products or inability to effectively respond to changes in consumer preferences and market trends could materially and adversely affect our business, results of operations, financial condition and cash flows.

4. Our reliance on online retail channels and third-party e-commerce platforms exposes us to risks relating to platform policies, pricing pressures, customer reviews and rapid amplification of adverse publicity, which could adversely affect our business, results of operations and financial condition.

A significant portion of our sales, customer engagement and brand visibility is driven through online retail channels, including our own website and mobile application, as well as third-party e-commerce marketplaces such as Amazon, Flipkart, Myntra and other digital platforms.

Online retail is highly sensitive to customer feedback and digital visibility. Any adverse customer reviews, complaints relating to product quality, delivery delays, returns, customer service or other issues may negatively affect product rankings, visibility and conversion rates. Digital and social media platforms also enable rapid dissemination of information, and any negative publicity or commentary—whether substantiated or not—may be amplified quickly and disproportionately influence consumer purchasing decisions and brand perception.

The online beauty and personal care market is intensely competitive and characterised by frequent promotional campaigns, discount-led sales events and price-based competition. Participation in platform-driven discounting and promotional activities may place pressure on our margins, while any inability or decision not to match competitor pricing or promotional intensity may reduce product visibility and sales traction. Such pricing dynamics may adversely affect our profitability and long-term pricing discipline.

Third-party e-commerce platforms exercise significant control over listing policies, commission structures, search algorithms, fulfilment requirements, return and refund mechanisms and seller performance metrics. These platforms may modify their policies, fee structures or algorithms, or impose additional compliance requirements, often without advance notice. Any such changes could increase our cost of selling, reduce product visibility, compress margins or adversely affect customer experience. Thus, our performance on such platforms is influenced by factors beyond our control, including platform policies, product-ranking algorithms, customer reviews and ratings, promotional eligibility and fulfilment standards.

Further, such platforms may suspend, restrict or delist sellers due to alleged policy breaches, customer complaints, intellectual property disputes, algorithmic reviews or regulatory developments. Any restriction or suspension affecting our listings may materially reduce our ability to sell products through these platforms and adversely impact our revenues. In addition, increased regulatory scrutiny of e-commerce marketplaces in India may result in changes to platform operations, seller obligations or commercial terms, indirectly affecting third-party sellers such as us.

Any sustained adverse impact on our online retail performance, pricing discipline, platform visibility or digital brand perception could materially and adversely affect our business, results of operations, financial condition and cash flows.

5. *Our limited control over franchise-operated stores may result in inconsistent service quality, regulatory non-compliance and adverse impact on our brand and business.*

As of the date of this Red Herring Prospectus, a substantial portion of our physical retail presence is operated through Franchisee-Owned Franchisee-Operated (“FOFO”) stores. Out of a total of 22 retail stores, 19 stores are operated by franchise partners. These franchise-operated outlets are independently owned and managed, and their day-to-day operations, including staffing, customer interactions, hygiene standards, store maintenance and inventory handling are under the control of the respective franchise partners.

As franchise partners are independent parties, our ability to directly supervise or control their daily operations is very limited. Any failure by franchise partners to adhere to prescribed standard operating procedures, service protocols or training requirements may result in inconsistent customer experience across locations. Even isolated lapses at a single franchise-operated store may be perceived by customers as reflective of our overall brand, which could adversely affect customer trust, brand positioning and repeat business.

Further, franchise partners are responsible for complying with applicable statutory, regulatory and legal requirements, including labour laws, shop and establishment registrations, tax compliances, health and safety norms and local licensing requirements. Any non-compliance, operational lapse, hygiene issue or safety incident at a franchise-operated outlet may expose us to reputational harm, customer complaints, adverse publicity or regulatory scrutiny, notwithstanding that such non-compliance arises at the franchisee level.

Given the scale of our franchise-operated network, any widespread or repeated operational deficiencies, compliance failures or deterioration in service quality at FOFO stores may materially and adversely affect our brand reputation, business operations, results of operations and future growth prospects.

6. *Our dependence on a limited number of third-party manufacturers, and adverse changes in commercial terms, regulatory compliance or operational continuity at such manufacturers, may adversely affect our business, financial condition and results of operations.*

Our operations depend on a limited number of third-party manufacturers for the manufacture and supply of our beauty, cosmetics and personal care products. These manufacturers are responsible for producing finished goods in accordance with our specifications, formulations and quality requirements. Any deterioration in our commercial relationships with such third-party manufacturers, delays in supply, capacity constraints, failure to meet agreed specifications or timelines, or inability to scale production in line with demand may adversely affect product availability, inventory planning and order fulfilment.

The tables setting forth details of our top ten third-party manufacturers for the relevant periods, along with their contribution to our total procurement, are included below. Any adverse developments relating to such manufacturers, individually or collectively, may materially and adversely affect our business operations, financial condition, results of operations and cash flows.

As certified by R M S G & Associates, Chartered Accountant, Statutory Auditor of our Company, by way of their certificate dated April 16, 2026.

Any disruption, slowdown or shutdown in the operations of our manufacturing partners — whether due to raw material shortages, machinery breakdowns, labour disputes, regulatory inspections, power outages, pandemics, geopolitical tensions, adverse weather events or other factors — could delay production and delivery of finished goods. Such delays may result in stock shortages, order cancellations, loss of sales opportunities, increased logistics costs or customer dissatisfaction, which could adversely affect our business operations and financial performance.

Our commercial arrangements with third-party manufacturers are subject to changes in manufacturing costs, conversion charges, minimum order quantities, credit terms and pricing. Such costs may be affected by fluctuations in raw material prices, labour costs, utilities, transportation expenses, foreign exchange movements (particularly in case of imported inputs), inflationary trends and changes in government policies. Any increase in manufacturing or conversion costs, or adverse changes in commercial terms, which we are unable to pass on to customers in a timely manner, may adversely affect our margins, cash flows and results of operations.

Our reliance on a limited number of third-party manufacturers also increases our exposure to concentration risk. In the event that one or more such manufacturers are unable or unwilling to continue supplying products, we may be required to identify and onboard alternative manufacturers. There can be no assurance that suitable alternate manufacturers will be available on

short notice or on comparable commercial terms, or that they will be able to meet our quality, regulatory and capacity requirements without delays or additional costs.

7. We do not have long-term agreements with our customers, and our revenues are significantly dependent on recurring orders from our B2B and online customers. Any loss or reduction of business from such customers could adversely affect our results of operations and financial condition.

Our sales are driven by recurring purchase orders from our B2B customers, franchise partners, as well as direct-to-consumer (D2C) sales through online marketplaces and our own website. We do not have long-term commitments or contractual arrangements that guarantee fixed volumes or assured revenue streams. Consequently, our ability to sustain and grow our business depends on the frequency, size and continuity of orders from these customers. There can be no assurance that such customers will continue to place orders with us at similar levels, on the same terms, or at all. Any reduction, modification, delay, or cancellation of orders by such customers may adversely impact our revenues and cash flows.

The beauty and personal care industry is characterised by dynamic consumer behavior, evolving brand preferences, seasonal demand fluctuations and competitive pricing pressures. Our customers may alter their sourcing or procurement strategies, engage with other suppliers offering more favourable commercial terms, or shift to emerging brands and private labels. Additionally, external factors such as overall economic conditions, discretionary spending patterns, or changes in digital marketplace policies could affect the frequency and volume of orders placed by our customers and channel partners.

Further, our B2B business is concentrated, with a significant portion of revenue derived from a limited number of repeat customers and distributors. Any loss of one or more of these key customers, reduction in repeat orders, or changes in procurement or stocking policies by such customers could materially and adversely affect our business operations, financial performance and cash flows. Our top ten customers for the period April 2025 to December 2025 and for Fiscal 2025, Fiscal 2024, Fiscal 2023, along with their respective percentage contribution to total revenue from operations (sale of products), are as follows:

Note:

**Above Top 10 data pertain to Net Sale of Products only and not total Revenue from Operations.*

***As certified by R M S G & Associates, Chartered Accountant, Statutory Auditor of our Company, vide certificate dated April 16, 2026.*

Accordingly, our dependence on recurring purchase orders without the security of long-term contracts, coupled with revenue concentration among a limited number of B2B customers, exposes us to significant risks. Any inability to retain existing customers or secure new ones on similar terms may materially and adversely impact our business, results of operations and financial condition.

8. Our business is significantly dependent on sales from the Face Make-Up category, and any decline in demand for products in this category could adversely affect our business, financial condition and cash flows.

A significant portion of our revenue is derived from the Face Make-Up category, which includes products such as foundations, primers, concealers and related face cosmetics. Over recent periods, revenue from the Face Make-Up category has increased as a proportion of our overall revenue from operations, contributing **19.04% in FY 2022-23, 44.94% in FY 2023-24, 52.32% in FY 2024-25 and 69.97% during the period April 2025 to December 2025**. As a result, our financial performance is materially dependent on sustained demand for products in this category.

The beauty and personal care industry is characterized by rapidly evolving consumer preferences, fashion and beauty trends, seasonal variations, influencer-driven demand patterns and intense competition from domestic and international brands. Any adverse shift in consumer preferences away from face make-up products, reduced usage of colour cosmetics, increased preference for alternative product categories such as skincare, natural or minimalist beauty trends, pricing pressures, or inability to effectively refresh, position or price our Face Make-Up portfolio could adversely affect sales volumes and revenue.

The revenue distribution of our product offerings across cosmetics, skincare, body care and accessories (including brushes, sponges and similar tools) is as follows:

Further, demand for face make-up products is closely linked to discretionary consumer spending, lifestyle trends and broader economic conditions. Any economic slowdown, inflationary pressures or reduction in discretionary expenditure may disproportionately affect demand for colour cosmetics, including face make-up products.

We cannot assure you that demand for Face Make-Up products will continue at current levels, or that we will be able to offset any decline through increased sales in other categories. Any material reduction in demand for products in this category, or failure to adapt our product mix to evolving consumer preferences, may materially and adversely affect our business, results of operations, financial condition and cash flows.

9. *Certain trademarks used by our Company, including trademarks under Class 3 that are central to our cosmetics and personal care business, are subject to objections, oppositions or pending ownership record updates, and any adverse outcome may restrict our ability to use such trademarks and adversely affect our business.*

Our business operations rely significantly on the continued use of trademarks such as “Recode”, “Recode Studios” and related marks across our products, retail formats and digital platforms. Trademarks under Class 3 of the Trade Marks Act, 1999, which covers cosmetics and personal care products and constitutes the core of our product portfolio, are particularly critical to our business and brand identity. While several of our trademarks are registered, a number of trademark applications filed by us remain pending, objected or opposed before the Trade Marks Registry, including applications under Class 3 and certain other classes. For details, please refer to section “***Our Business – Intellectual Property Rights***” beginning on page 145 of this RHP.

As of the date of this Red Herring Prospectus, certain Class 3 trademark applications are marked as “Objected”, “Opposed” or “Formalities Check Passed” and have not yet attained final registration. In addition, certain trademarks currently in use were originally registered in the name of M/s Lush Looks or a third party, and have been transferred in favour of our Company; however, the updated ownership records in respect of such trademarks are not yet reflected on the Trade Marks Registry portal.

Until pending objections, oppositions and ownership record updates are resolved and registrations are granted or reflected in our favour, we do not enjoy the full statutory rights and protections available to registered proprietors under the Trade Marks Act, 1999. We continue to use these trademarks in the ordinary course of business; however, if any objection or opposition is decided adversely or if any injunction or restriction is imposed against us, we may be required to restrict, modify or discontinue the use of certain trademarks. This could result in disruption to branding, packaging, labelling, marketing materials, digital listings, franchise operations or inventory already in circulation, and may require us to incur additional costs to rebrand or relaunch affected products.

Further, the absence of final registration or updated ownership records may weaken our ability to prevent unauthorised use, imitation or infringement by third parties, which could dilute brand value, cause consumer confusion and adversely affect goodwill. Any inability to obtain, protect or enforce trademark rights—particularly in respect of Class 3 trademarks that are central to our cosmetics and personal care business—may adversely affect our brand recognition, customer perception, franchise relationships, business operations, financial condition, results of operations and cash flows. While we intend to continue pursuing appropriate legal remedies, rectifications and procedural actions to secure registrations and update ownership records, there can be no assurance that such matters will be resolved in our favour or within a reasonable timeframe.

10. *We operate in a highly competitive beauty and personal care industry, and increased competition may lead to a reduction in our revenues, reduced profit margins or a loss of market share.*

The beauty, cosmetics and personal care (“BPC”) industry in India is highly competitive and fragmented, with the presence of a large number of domestic and international brands, organised and unorganised players, digital-first companies, private labels

of e-commerce marketplaces and emerging direct-to-consumer brands. Competition in this industry is based on several factors, including brand recognition, product quality, pricing, promotional intensity, innovation, distribution reach, digital visibility, customer engagement and speed of product launches.

We face competition from established listed and unlisted companies as well as global brands operating in India, including FSN E-Commerce Ventures Limited (Nykaa), Honasa Consumer Limited (Mamaearth), Sugar Cosmetics, Ravel, Faces Canada, Swiss Beauty, Insight Cosmetics, Lakmé (a brand of Hindustan Unilever Limited), Maybelline and L'Oréal India, in addition to various regional, local and unorganised players. Many of these competitors have longer operating histories, stronger brand recall, wider distribution networks, greater financial resources and higher marketing budgets than us.

Certain competitors may also benefit from economies of scale, integrated manufacturing capabilities, exclusive supplier arrangements or preferential access to e-commerce platforms, enabling them to offer products at lower prices, launch products more frequently or undertake aggressive promotional and discounting strategies. Increased promotional intensity, price competition or discount-led sales by competitors may require us to adjust our pricing or increase marketing expenditure, which could adversely affect our margins and profitability.

The competitive intensity in the BPC industry has further increased due to rapid growth in online retail, influencer-led marketing, celebrity-backed brands and relatively low entry barriers for new product launches. New entrants, private-label brands promoted by e-commerce marketplaces and niche players focused on specific product categories may compete directly with our offerings and intensify competition across both offline and online channels.

Further, competitors may be able to respond more quickly to emerging consumer trends, introduce differentiated formulations or packaging, or invest more aggressively in digital marketing and influencer collaborations. If we are unable to effectively compete with such players in terms of pricing, innovation, marketing visibility or distribution reach, our sales volumes, brand visibility and market share may be adversely affected.

Competition also extends to securing franchise partners, distributors, influencer associations and digital shelf space on third-party e-commerce platforms. Any loss of visibility, reduced access to promotional opportunities or inability to secure favourable commercial terms compared to competitors may adversely impact our ability to attract and retain customers.

Any increase in competitive pressure or failure to effectively compete with existing or new competitors may result in reduced revenues, lower profit margins, loss of market share and may materially and adversely affect our business, results of operations, financial condition and cash flows.

11. Our registered office, warehouses and company-owned retail stores are located on leased premises, and any inability to renew such leases, manage increasing rental costs or continue operations from such premises may adversely affect our business, operations and financial condition.

Our Company operates its registered office, warehouses and Company-Owned Company-Operated retail stores from premises taken on lease or rent and does not own the immovable properties used for such operations. These leased premises include, inter alia, warehouses located in Ludhiana, New Delhi and Mumbai and Company-owned retail stores located in Ludhiana, Mumbai and Delhi. Our business operations are therefore dependent on the continued availability of these leased premises on acceptable commercial terms.

Lease or leave and license agreements have been executed in respect of such premises, which are generally for limited tenures and require periodic renewal. There can be no assurance that such lease arrangements will be renewed upon expiry or that renewals, if granted, will be on commercially acceptable terms. In the event of expiry, termination or non-renewal of any of these arrangements, we may be required to vacate the relevant premises.

Any such event may disrupt our warehousing, storage, dispatch, retail or administrative operations until alternative premises are identified and made operational. There can be no assurance that suitable alternative premises will be available in the same locations or on comparable commercial terms, or at all, particularly in locations that are strategically important to our supply chain, fulfilment operations or retail presence. Relocation may result in additional costs, operational inefficiencies, temporary suspension of activities or loss of customers.

Additionally, rental rates in certain urban locations where we operate are subject to market-driven increases. Any significant increase in rental costs upon renewal or renegotiation of lease arrangements may adversely affect our operating expenses and profitability. Our leased premises are also subject to compliance with applicable municipal, zoning, fire safety and other local regulatory requirements, and any adverse regulatory action in respect of such premises could restrict our ability to operate from these locations.

Although we have not experienced any material disruption to our operations due to non-renewal or termination of lease arrangements in the past, there can be no assurance that similar circumstances will not arise in the future. Any inability to retain, renew or replace our leased premises in a timely and cost-effective manner may materially and adversely affect our business operations, financial condition, results of operations and cash flows. Certain of the leased premises disclosed starting on page 149 of the Red Herring Prospectus have been taken on lease from related parties. Such lease arrangements have been entered into on an arm's length basis and on terms comparable to prevailing market conditions.

12. *We require various statutory and regulatory approvals, licenses, registrations and permits to operate our business, and any failure to obtain, maintain or renew such approvals, or to comply with applicable laws and regulations, may adversely affect our business, financial condition and results of operations.*

Our Company is required to obtain and maintain various statutory and regulatory approvals, licenses, registrations and permits under applicable laws for the conduct of its business, including, inter alia, registrations under the Goods and Services Tax Act, 2017, an Importer-Exporter Code ("IEC"), registrations under the Shops and Establishments Acts and other approvals applicable to the marketing, sale, distribution, storage and import of beauty, cosmetics and personal care products. For details, see the chapter titled "**Government and Other Approvals**" on page 270 of this Red Herring Prospectus.

As of the date of this Red Herring Prospectus, our Company has applied for a trade license with the Municipal Corporation, Ludhiana, in respect of its premises located at B-30, R-89-90, Phase V, Focal Point, Ludhiana, Punjab, and has paid the applicable fee. The application is pending approval, and the trade license has not yet been issued. There can be no assurance that such license will be granted within the expected timelines or at all, and any delay or adverse outcome may adversely affect our operations at such location.

Except as disclosed in the chapter titled "Government and Other Approvals", we believe that we have obtained the approvals, licenses, registrations and permits that are material for the conduct of our business as of the date of this Red Herring Prospectus. However, certain approvals are granted for limited periods and are subject to renewal, and there can be no assurance that such approvals will be granted, renewed or maintained in a timely manner or at all. Any delay, suspension, cancellation or non-renewal of such approvals may result in disruption of our operations, penalties or other regulatory actions.

Further, our Company has recently been converted into a public limited company and is in the process of applying for changes in name and related details in certain statutory licenses, registrations and approvals previously issued in the name of Recode Studios Private Limited. There can be no assurance that such changes will be effected within the expected timelines or at all, and any delay may result in temporary compliance gaps or operational disruption.

While our Company does not undertake manufacturing activities and is not required to obtain manufacturing licenses under the Drugs and Cosmetics Act, 1940, the manufacture of our products is carried out by third-party manufacturers who are required to comply with applicable regulatory requirements. Any failure by such manufacturers to obtain, maintain or comply with applicable licenses, approvals or statutory standards may result in regulatory action, product recalls, restrictions on sale or disruption in the supply of products to us. As these manufacturing facilities are not owned or controlled by us, our ability to ensure continuous compliance is limited.

In addition, a portion of our retail operations are carried out through franchise-operated stores, and compliance with applicable legal and regulatory requirements at such locations is the responsibility of the respective franchise partners. Any failure by franchise partners to comply with applicable laws, including labour laws, shop and establishment regulations, tax laws or other statutory requirements, may expose us to regulatory scrutiny, penalties or other legal consequences, and could adversely affect our business, financial condition and results of operations.

Any future non-compliance with applicable laws, changes in regulatory requirements or adverse actions by regulatory authorities may restrict our ability to carry on our business and could materially and adversely affect our business, financial condition, results of operations and prospects.

13. *Our Company has experienced negative operating cash flows in the past. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.*

Our Company has, in the past, experienced negative cash flows from operating, investing and financing activities. The details of the net cash inflows/outflows from operating, investing and financing activities for the periods indicated, as per the Restated Financial Statements of our Company, are set forth below:

Particulars	Fiscals			
	April 25' – Dec. 25'	2025	2024	2023

Net cash flows generated from / (used in) operating activities	597.30	313.97	(163.62)	(526.67)
Net cash flows generated from / (used in) investing activities	(167.33)	(99.86)	(183.75)	(81.42)
Net cash flows generated from / (used in) financing activities	(467.34)	(148.42)	319.18	612.11
Net increase / (decrease) in cash and cash equivalents at the end of the year	(37.36)	65.69	(28.19)	4.02

Cash flows are an important indicator of our Company's ability to generate cash from operations to meet working capital requirements, fund capital expenditure, service debt obligations and undertake investments without reliance on external sources of financing. Any operating losses or negative cash flows in the future may require our Company to raise funds through additional borrowings or equity issuances and may adversely affect our business, results of operations, financial condition and cash flows. There can be no assurance that our Company will be able to generate positive cash flows in the future.

Cash flow from operating activities has varied over the periods due to changes in working capital, even though our Company reported operating profits. For the year ended March 31, 2023, net cash flow from operating activities was negative mainly due to an increase in inventories, trades receivables and short-term loans and advances. The increase in trade payables during the year was not sufficient to offset the cash outflow arising from these working capital movements. For the year ended March 31, 2024, net cash flow from operating activities was negative due to an increase in inventories and trade receivables and settlement of trade payables. Although operating profit before working capital changes were positive, funds were deployed towards working capital, resulting in negative cash outflow from operations. For the year ended March 31, 2025, net cash flow from operating activities turned positive due to changes in working capital and surge in operating profit. While inventories and trade receivables increased, the impact was offset by an increase in trade payables and other current liabilities, resulting in cash generation from operations. For the period ended December 31, 2025, net cash flow from operating activities remained positive, supported by operating profit and changes in working capital, including an increase in trade payables. Accordingly, negative cash flow from operating activities in certain periods arose due to deployment of funds in working capital components in line with business growth and timing differences between accounting profits and cash movements.

There can be no assurance that our operations will generate positive cash flows in the future. Any such events may materially and adversely affect our business, financial condition, results of operations and prospects. For further details, see the sections titled "**Financial Information**" and "**Management's Discussion and Analysis of Financial Condition and Results of Operations**" beginning on pages 186 and 245 of this Red Herring Prospectus.

14. There have been instances of delays in payment of certain statutory dues, including Employees' State Insurance ("ESIC"), Provident Fund ("PF"), Professional Tax ("PT"), Tax Deducted at Source ("TDS"), Tax Collected at Source ("TCS"), Labour Welfare Fund ("LWF") and Goods and Services Tax ("GST"). Any cognizance taken by the respective authorities, or future delays or non-compliance, may result in penalties, interest liabilities or regulatory actions, which could adversely affect our business, financial condition, results of operations and cash flows.

Our Company is subject to various labour, employment and tax-related laws and is required to make timely payments of statutory dues, including contributions towards Employees' State Insurance ("ESIC"), Provident Fund ("PF"), payment of Professional Tax ("PT"), Tax Collected at Source ("TCS"), Labour Welfare Fund ("LWF"), Goods and Services Tax ("GST") and deduction and remittance of Tax Deducted at Source ("TDS") under the Income-tax Act, 1961. During Fiscal Year 2024, Provident Fund contributions were delayed for 22 employees. ESIC contribution delays impacted 76 employees in Fiscal Year 2024 and 1 employee in Fiscal Year 2025.

Notwithstanding the above payments, there have been certain instances of delays in the remittance of ESIC, PF, PT, TCS, GST, LWF and TDS during the relevant periods. While such delays have subsequently been regularised or are in the process of being addressed and the Company continues to make statutory payments, there can be no assurance that similar delays or defaults will not occur in the future.

Any delay, short payment, non-payment or non-compliance with applicable statutory requirements may result in the levy of interest, penalties, damages, prosecution or other regulatory actions by the relevant authorities. Such events may also lead to reputational harm, increased regulatory scrutiny, diversion of management time and resources and additional financial liabilities, which could have a material adverse effect on our business operations, financial condition, results of operations and cash flows.

All applicable late fees, interest and penalties in relation to such delays and short payments have been paid. Further, any action that may be taken in the future resulting in the imposition of penalties, interest or any other fines shall not be paid out of the Issue Proceeds, including the General Corporate Purposes (GCP).

15. There are certain discrepancies noticed in some of our corporate records, including forms filed with the Registrar of Companies ("ROC") and other provisions under the Companies Act, 2013. Any penalty or action that may be taken by the regulatory authorities in the future for such non-compliances could adversely impact the reputation and financial position of our Company to that extent.

Certain discrepancies and non-compliances were identified in some of our corporate records and statutory filings under the Companies Act, 2013, including delays and procedural deviations in filings made with the Registrar of Companies ("ROC"). This includes non-compliances under Section 42 of the Companies Act, 2013 in relation to a preferential issue of equity shares undertaken on February 4, 2023, including delay in filing Form PAS-3.

Accordingly, our Company filed e-Form GNL-1 dated October 16, 2025, and November 24, 2025 (vide SRN AB8377183 and AB9267408, respectively) with the ROC for Suo motu adjudication of penalties pertaining to non-compliances under Sections 42(4) and 42(8) of the Companies Act, 2013.

The non-compliances primarily relate to:

(i) **Utilization of share subscription money** received from applicants without effecting a corresponding allotment of shares through a duly convened meeting of the Board of Directors, as required under the proviso to sub-section (4) of Section 42 of the Companies Act, 2013. The subscription funds were appropriated prior to the formal approval and recording of the share allotment by the Board, which constitutes a deviation from the statutory procedure prescribed for private placement;

(ii) **Subscription payment mismatch**, where on January 20, 2023, a sum of ₹25,00,000 was remitted by Mr. Rahul Sridhar towards share subscription, of which 50% was paid on behalf of Ms. Ritu Bhansali. Consequently, both were allotted 13 equity shares each for a consideration of ₹12,44,100 per applicant, with the surplus ₹5,900 refunded to each. However, the shares allotted to Ms. Ritu Bhansali were based on subscription money remitted by Mr. Rahul Sridhar, which is inconsistent with Section 42(4) of the Act requiring that subscription money be paid directly by the person to whom shares are proposed to be allotted; and

(iii) **Delay in filing Form PAS-3** under sub-section (8) of Section 42 of the Companies Act, 2013.

However, the penalty w.r.t. above non compliances has been adjudicated by the ROC, Chandigarh in the following manner:

1. ROC order no. PO/ADJ/12-2025/CH/01265 dated December 18, 2025:

The details of penalty imposed on the company, officers in default and others are shown in the table below:

3.	Dheeraj Bansal, Director	0.23

All such penalties have been duly paid, and no proceedings in relation thereto remain pending and no further action has been taken by statutory authorities with regards to this matter as on the date of this Red Herring Prospectus.

Any failure by our Company to comply with applicable provisions of the Companies Act, 2013 or other statutory requirements in the future may result in penalties, regulatory action, reputational impact and diversion of management time and attention, which could adversely affect our business, results of operations and financial condition.

16. There are outstanding legal, tax and regulatory proceedings involving our Company, Directors and Promoters. Any adverse decisions could impact on our cash flows and profit or loss to the extent of demand amount, interest and penalty, divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.

There are outstanding legal and tax-related proceedings involving our Company, Directors and Promoters. While we believe that these matters are not material to our operations, any adverse orders may require us to pay substantial amounts, including interest, penalties or other charges, which could result in increased expenses, outflow of financial resources and diversion of management time and attention. This may adversely affect our business, prospects, financial condition, cash flows and results of operations. For details, see “**Outstanding Litigation and Material Developments**” beginning on page 266 of this Red Herring Prospectus.

The amount may be subject to additional interest/other charges being levied by the authorities concerned, which are unascertainable as on date of this Red Herring Prospectus. For further details, please refer to the chapter titled “**Outstanding Litigations and Material Developments**” on page 266 of this Red Herring Prospectus.*

Any adverse decisions in the above cases could impact on our cashflows and profit or loss to the extent of demand amount, interest and penalty, divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.

17. We outsource the manufacturing of our products and do not directly procure or control the sourcing of raw materials, which may expose us to operational, quality, compliance and supply-chain risks.

We do not own or operate manufacturing facilities and have outsourced the manufacturing of our products to third-party contract manufacturers. Further, we do not procure, specify or directly source the raw materials used in the manufacture of our products. Raw materials are procured by the contract manufacturers from vendors approved by them, in accordance with their internal procurement policies, applicable regulatory requirements and quality standards.

The selection of raw material vendors, quality inspection of raw materials, manufacturing processes and compliance verification are carried out by the respective contract manufacturers, and not by us. Accordingly, we rely on the manufacturing capabilities, quality control systems, certifications and compliance frameworks of our contract manufacturers to ensure that the products manufactured for us meet applicable quality, safety and regulatory requirements.

Any failure by our contract manufacturers or their raw material vendors to adhere to applicable standards, regulatory requirements or contractual obligations, or any disruption in their operations, may result in manufacturing delays, supply disruptions, product quality issues, regulatory non-compliances or reputational harm to us. While customer complaints, if any, are addressed through our grievance redressal mechanism, liabilities arising from manufacturing defects, product quality issues or related matters may be determined in accordance with applicable laws and the nature of the issue. Any such events may have an adverse effect on our business, results of operations, financial condition and reputation

18. *We do not have an in-house information technology team and rely on third-party service providers for the development, operation and maintenance of our website, mobile application and related technology systems, which expose us to operational and business risks.*

Our Company does not maintain an in-house information technology (“IT”) development or support team and relies on third-party service providers for the development, operation, maintenance and management of its website, mobile application and related digital infrastructure. These third-party vendors are responsible for various aspects of our digital operations, including platform functionality, system upgrades, bug fixes, cybersecurity measures, data hosting and technical support.

Our dependence on third-party IT service providers exposes us to certain risks, including delays or deficiencies in development, maintenance or upgrades, system outages, performance issues, data security vulnerabilities, cybersecurity incidents or failure of such vendors to meet service-level expectations. Any disruption, malfunction, security breach or prolonged downtime of our website, mobile application or related systems could adversely affect customer experience, online sales, brand perception and operational efficiency.

Further, our ability to customise, scale or rapidly modify our digital platforms in response to changing business requirements, consumer behaviour or regulatory developments may be constrained by the availability, responsiveness and capabilities of such third-party service providers. In addition, termination, non-renewal or deterioration of relationships with such vendors may require us to identify and transition to alternate service providers, which may involve additional costs, delays or operational risks.

Any failure or disruption in the services provided by third-party IT vendors, or our inability to effectively manage such third-party relationships, could materially and adversely affect our business operations, financial condition, results of operations and cash flows.

19. *Our Company has made an advance payment towards the purchase of land for its proposed warehousing facility, and failure to complete the balance payment within time may result in loss of the advance and adversely impact our expansion plans.*

Our Company has proposed to set up a new warehouse facility on an industrial land parcel admeasuring 1,111 square yards (approximately 929 square metres) situated at Plot No. 09, Neechi Mangali, Sub-Tehsil Sahnewal, Tehsil and District Ludhiana, Punjab. In this regard, our Company has entered into a Memorandum of Understanding dated December 5, 2025 with Foodplex Ingredients Private Limited, pursuant to which the total consideration for the purchase of such land has been agreed at ₹240.00 lakhs. Our Company has paid an advance amount of ₹25.00 lakhs from its internal accruals towards such purchase. Possession of the land is subject to payment of the balance consideration of ₹215.00 lakhs (excluding stamp duty and related charges) on or before May 25, 2026.

In the event the Company is unable to arrange the required funds or otherwise fails to make the balance payment within the stipulated period, the Company may not obtain possession of the land and may also be exposed to the risk of forfeiture of the advance paid. Further, there can be no assurance that the transaction will be completed as presently contemplated, including due to factors beyond the control of the Company such as delays in documentation, regulatory approvals, or disputes with the landowner.

Any failure or delay in acquiring possession of the land may require the Company to identify, negotiate, and acquire an alternative parcel of land for the proposed warehousing facility. Such a process may be time-consuming and may involve additional costs, changes in project location or scale, and execution uncertainties. Further, any delay in setting up the proposed warehousing facility may adversely impact the Company’s logistics efficiency, inventory management, and planned capacity augmentation. Consequently, such delays or inability to implement the proposed project as envisaged could have an adverse effect on our business operations, growth strategy, financial condition, and results of operations.

20. *Any actual or perceived product quality issues, defects or safety concerns relating to our products may adversely affect our brand reputation, business, financial condition and results of operations.*

Our business is dependent on consumer trust in the quality, safety and performance of products sold under our brand. Any actual or perceived product quality issues, defects, contamination, inconsistencies in formulation, packaging defects, labelling errors, or adverse consumer reactions relating to our products may adversely affect our brand reputation and consumer confidence. Given that our products are positioned in the beauty, cosmetics and personal care segment, consumer perception of quality and safety plays a critical role in purchasing decisions and repeat demand.

We do not manufacture our products in-house and rely on third-party manufacturers for the production of our products in accordance with our specifications. While we seek to ensure that such manufacturers adhere to applicable quality standards and

regulatory requirements, we have limited control over their manufacturing processes, sourcing of raw materials, storage conditions and quality control systems. Any failure by third-party manufacturers to maintain consistent quality standards, comply with applicable laws or detect defects in a timely manner may result in sub-standard products being supplied to us.

Product quality issues may result in consumer complaints, adverse reviews, regulatory scrutiny, product recalls, returns, write-offs of inventory, litigation or claims, increased costs relating to remediation, replacement or corrective action, and damage to our brand image. In addition, negative publicity or rapid dissemination of adverse information through social media or digital platforms—whether substantiated or not—may disproportionately impact consumer perception and demand for our products.

Further, as our products are marketed and sold under a single brand identity across multiple channels, including company-owned stores, franchise outlets and online platforms, any quality-related incident affecting one or more products may have a broader impact on our overall product portfolio. Any inability to prevent, identify or effectively address product quality issues in a timely manner may materially and adversely affect our business, results of operations, financial condition and cash flows.

21. Inventories and trade receivables constitute a significant portion of our current assets, and ineffective management of the same could adversely affect our business, cash flows, profitability and liquidity.

Inventories and trade receivables constitute a significant portion of our current assets. Our operations require us to maintain inventory across multiple product categories and variants. Effective inventory planning and demand forecasting are critical to our business. Any inability to accurately forecast demand or manage stock levels may result in excess, slow-moving or obsolete inventory, increased discounting, write-downs or inventory losses, which could adversely affect our margins and profitability.

The beauty, cosmetics and personal care segment is characterized by rapidly changing consumer preferences, short product life cycles and trend-driven demand. As a result, certain products or variants may lose relevance over time. If we are unable to liquidate such inventory in a timely manner, we may incur additional storage, handling and promotional costs or be required to write off such inventory, adversely impacting our financial performance.

In addition, a portion of our sales is made on credit to B2B customers and franchise partners, resulting in trade receivables. Our ability to realize such receivables in a timely manner depends on the creditworthiness, financial condition and payment discipline of our customers. Any delay, default or non-recovery of receivables may adversely affect our cash flows and working capital position and may require us to make provisions or write-offs.

The details of inventories and trade receivables for the periods indicated below are as follows:

<i>(₹ in lakhs)</i>				
Particulars	Fiscal 2023	Fiscal 2024	Fiscal 2025	9 months ended December 31, 2025
Inventories	562.12	671.27	907.80	1,046.50
Trade receivables	333.06	593.92	808.96	997.94
Total current assets	1,162.78	1,439.34	2,033.34	2,440.34
Inventories as % of current assets	48.34	46.64	44.65	42.88
Trade receivables as % of current assets	28.64	41.26	39.79	40.89

As the above table indicates, inventories and trade receivables form a material component of our current assets. Any adverse market conditions, changes in customer procurement behaviour, operational challenges at customer locations or disputes relating to pricing, delivery or product quality may elongate inventory holding periods or collection cycles.

Any failure to effectively manage inventory turnover or recover trade receivables in a timely manner may result in working capital constraints and could materially and adversely affect our business operations, liquidity, cash flows, results of operations and financial condition.

22. We rely on third-party logistics and courier service providers for order fulfilment, and any disruption, deficiency or termination of such services could adversely affect our business, brand reputation, results of operations and financial condition.

Our Company relies on third-party logistics and courier service providers, including Blue Dart, Delhivery and DTDC, for the transportation, delivery, reverse logistics and cash-on-delivery (“COD”) collection of our products across India. These service providers play a critical role in the fulfilment of orders placed through our online channels as well as replenishment of inventory at retail locations. Our ability to meet delivery timelines, maintain service quality and ensure customer satisfaction is therefore significantly dependent on the performance of such third-party logistics partners.

The agreements entered into with our logistics partners are non-exclusive in nature and may be terminated by either party

subject to contractual terms. There can be no assurance that these service providers will continue to provide services to us on the same commercial terms, service levels or timelines, or at all. Any termination, non-renewal, suspension or deterioration in the relationship with one or more of our logistics partners may require us to identify and onboard alternative service providers, which may not be possible on short notice or on comparable commercial terms.

Further, our logistics partners are responsible for critical aspects of delivery operations, including last-mile delivery, handling of shipments, cash collection in COD orders, return management and reconciliation. Any failure, delay or error by such partners—whether due to capacity constraints, operational inefficiencies, labour issues, network disruptions, strikes, regulatory restrictions, adverse weather conditions, fuel price volatility or system failures—may result in delayed deliveries, higher return rates, loss or damage to products, delayed remittance of COD collections, customer dissatisfaction or adverse reviews, any of which could adversely affect our brand perception and revenues.

Our logistics service providers also impose service-level requirements, volumetric weight calculations, penalty clauses and liability limitations. Any increase in freight charges, changes in pricing structure, reduction in credit periods, tightening of service-level norms or imposition of penalties for delivery-related issues may increase our logistics costs and adversely impact our margins. In addition, our ability to recover losses arising from damaged, lost or delayed shipments may be contractually limited.

As our logistics operations are substantially outsourced, we have limited control over the day-to-day functioning of these service providers. Any prolonged disruption or degradation in logistics services, particularly during peak sales periods or promotional campaigns, may materially and adversely affect our order fulfilment capabilities, customer experience, cash flows, business operations and financial condition.

23. *Any delay, default or failure by logistics partners in remitting COD collections, or inefficiencies in receivables reconciliation, could adversely affect our cash flows, working capital and financial condition.*

A portion of our online sales is fulfilled through cash-on-delivery (“COD”) mode, under which payments are collected from customers by third-party logistics and courier service providers at the time of delivery and subsequently remitted to us after settlement and reconciliation. Our ability to realise such receivables in a timely manner is therefore dependent on the efficiency, accuracy and integrity of our logistics partners’ COD collection, reconciliation and remittance processes.

Delays in remittance of COD collections, discrepancies in reconciliation, disputes relating to delivery status, returns, cancellations or customer refusals may result in extended receivable cycles, temporary cash flow mismatches or loss of revenue. Further, any operational lapses, system failures, fraud, pilferage, misappropriation or accounting errors at the level of logistics service providers may adversely affect the recoverability of COD amounts. Our contractual arrangements with such service providers may also limit our ability to recover losses arising from disputed or unreconciled COD transactions.

COD transactions are also subject to higher return rates, delivery refusals and failed delivery attempts as compared to prepaid orders. Increased return-to-origin (“RTO”) volumes may result in higher logistics costs, inventory blockages, damage or obsolescence of returned products and delays in re-stocking, all of which may adversely impact our working capital efficiency and margins.

In addition, COD collections are typically remitted after deduction of freight charges, penalties, service fees and other adjustments by logistics partners, which may vary across service providers and geographies. Any adverse changes in settlement timelines, credit periods, deduction practices or reconciliation standards may further impact our cash flows and receivable management.

As our COD collections and related receivables are substantially dependent on third-party logistics partners and their internal controls, we have limited visibility and control over the end-to-end collection process. Any material delay, failure or dispute in COD remittances, or inefficiencies in receivables reconciliation, could adversely affect our liquidity, cash flows, financial condition and results of operations.

24. *Any failure in handling, storage or transportation of our products, or any real or perceived product quality or contamination issue, could result in regulatory action, reputational harm and adversely affect our business.*

Our beauty and personal care products are manufactured by third-party manufacturers and are subsequently stored, transported and distributed through our warehouses, logistics partners, retail outlets and e-commerce channels. Improper handling, storage or transportation of products at any stage of the supply chain may result in damage, deterioration or quality issues, including contamination or non-compliance with applicable safety and hygiene standards.

As our products are subject to consumer safety and quality expectations, any actual or perceived quality failure, contamination,

spoilage or deviation from prescribed standards, whether attributable to third-party manufacturers, warehouse operators, logistics partners or retail handling—may expose us to regulatory scrutiny, product recalls, penalties, contractual claims or litigation. Even isolated incidents may adversely impact consumer trust and brand perception.

Further, we do not exercise direct control over all third-party facilities involved in manufacturing, storage or logistics. While we have quality control processes and contractual arrangements in place, there can be no assurance that such measures will prevent all instances of improper handling or quality lapses.

Any adverse publicity, customer complaints or loss of confidence arising from real or perceived product quality or contamination issues could materially and adversely affect our brand reputation, demand for our products, business operations, financial condition and results of operations.

25. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

A significant portion of our operations, including procurement, manufacturing, warehousing, distribution and sales through our retail and online channels, as well as our customer base, are concentrated in certain geographical regions in India. Consequently, we are exposed to risks arising from localized factors such as adverse economic conditions, regulatory changes, political or social instability, labour-related issues, natural calamities, public health events, and disruptions in logistics and infrastructure in these regions.

Any such adverse developments could disrupt our operations, delay order fulfilment, increase operating costs, or adversely affect our sales and customer service. Further, our limited operational presence outside these regions may restrict our ability to mitigate the impact of such disruptions in a timely manner. Accordingly, any significant disruption in the regions where our operations are concentrated may materially and adversely affect our revenue, profitability, business operations and financial condition.

The following table sets forth the bifurcation of revenue (geography-wise) for the Fiscal Years 2023, 2024 and 2025, and for the stub period from April 1, 2025, to December 31, 2025:

5. Central Zone includes Madhya Pradesh, Chhattisgarh.

** "For the purposes of this disclosure, North-Eastern states have been included under the Eastern region."*

As we expand into new geographical markets, we may face competition from established national and local players who may have stronger brand recognition, deeper understanding of local market conditions, established customer and supplier relationships, and greater financial or operational resources, which could place us at a competitive disadvantage. Any inability to successfully enter or compete in new regions may limit our growth and could materially and adversely affect our business

prospects, results of operations and financial condition, and investors should not rely on our historical performance as an indicator of our future performance.

26. *High merchandise returns or interruption in our shipping operations could negatively impact on our business.*

Our sales through e-commerce channels and mobile application, is subject to merchandise returns arising from customer dissatisfaction, product damage, delay in delivery, incorrect shipments or other reasons. High return rates may result in additional logistics and handling costs, increased working capital requirements, write-downs of inventory and reduced margins. Returned goods may not always be resalable due to damage, tampering, regulatory constraints or expiry-related issues, resulting in inventory losses.

Our shipping and order fulfilment operations rely on third-party logistics service providers for timely and accurate delivery of products. Such operations may be disrupted due to factors including operational inefficiencies, capacity constraints, labour shortages, fuel cost volatility, transportation delays, regulatory restrictions or adverse weather conditions. Any interruption or deterioration in delivery performance may adversely affect customer experience, increase return rates and result in loss of sales.

If we are unable to effectively manage merchandise returns or mitigate disruptions in our shipping and fulfilment processes, our revenues, margins, customer retention and overall financial performance could be materially and adversely affected.

27. *Any actual or perceived cybersecurity, data or privacy breach could interrupt our operations and adversely affect our reputation, brand, business, financial condition, cash flows and results of operations.*

We rely on digital systems and technology infrastructure for our platform operations, consumer interactions and internal processes. Despite our security controls, our systems may be susceptible to cyberattacks, unauthorised access, data leaks or other security incidents. Any such event could lead to operational disruptions, loss or compromise of sensitive information, increased remediation costs and reputational harm, any of which could materially impact our business.

We also rely on third-party service providers, including cloud service providers, payment processors and logistics partners, that may collect or process data on our behalf. We cannot assure you that these parties will maintain adequate security safeguards or comply with applicable data protection requirements. Any breach, failure or perceived vulnerability involving such third parties could be attributed to us and impact consumer trust, stakeholder confidence or result in regulatory scrutiny. Even allegations of insufficient data protection, regardless of their accuracy, may adversely affect our brand and business.

Further, regulatory, legislative and industry standards relating to data protection, privacy and cybersecurity continue to evolve in India. Compliance with these requirements may require us to incur additional costs, modify our operations or limit certain data-driven activities. Any failure, or perceived failure, to comply with applicable obligations could result in investigations, penalties, legal claims or reputational damage. Such developments may adversely affect our ability to conduct our business and could materially impact our financial condition, cash flows and results of operations.

28. *Our business operations are significantly concentrated in Ludhiana, Punjab, and any adverse developments affecting this region could materially and adversely affect our business, revenue and results of operations.*

A significant portion of our key business operations, including warehousing, administrative functions and certain retail operations, is concentrated in Ludhiana, Punjab. Our registered office and a majority of our warehousing infrastructure are located in Ludhiana. As a result, our operational continuity and efficiency are substantially dependent on the stability, infrastructure and regulatory environment of this region.

Any adverse developments affecting Ludhiana, such as disruptions in transportation or logistics networks, regional economic slowdowns, labour availability issues, local regulatory or municipal actions, natural calamities, political or social disturbances, or public health emergencies, could adversely affect our ability to store, process, dispatch and manage inventory and orders. Disruptions impacting our warehousing or administrative operations in this region may result in delays in fulfilment, increased operating costs, supply chain inefficiencies or loss of sales.

While we operate through an omni-channel model and have a presence in other regions through franchise-operated stores and digital platforms, our operational concentration in Ludhiana increases our exposure to location-specific risks. Any prolonged, recurring or significant disruption in this region could materially and adversely affect our business operations, revenue, financial condition and results of operations.

29. *Setting up a new warehouse in Ludhiana will require significant capital expenditure and management resources, and any delay, cost overrun or failure to realise the intended operational benefits may adversely affect our business and financial performance.*

In order to support our growing scale of operations, improve logistics efficiency and cater to future business requirements, we propose to set up a new warehouse facility in Ludhiana, Punjab. The proposed warehouse is intended to support storage, packaging, inventory management and dispatch of products across our distribution channels. Our Company proposes to utilise an amount of up to ₹ 574.20 lakhs from the Net Proceeds of the Offer towards setup of new warehouse in Ludhiana. For further details, please refer to the chapter titled “*Objects of the Offer*” on page 93 of this Red Herring Prospectus.

The establishment of a new warehouse involves substantial capital expenditure and pre-operative costs, including costs relating to construction or fit-outs, material handling equipment, racking systems, technology integration, utilities, manpower deployment and related infrastructure. This expenditure will be incurred before we are able to derive any operational efficiencies or financial returns from the proposed warehouse. There can be no assurance that the expected benefits, including improved turnaround times, cost efficiencies or scalability, will be realised within the anticipated timelines or at all.

Our proposed warehouse project is subject to risks typically associated with infrastructure and logistics expansion projects, including delays in construction or readiness, cost overruns, labour availability issues, delays in procurement or installation of equipment, supply chain disruptions, defects in design or execution, and unforeseen site-specific challenges. Further, the project may be affected by delays in obtaining or renewing statutory and municipal approvals, permissions relating to fire safety clearances or other local authority approvals. Any delay or failure in obtaining such approvals may result in postponement or modification of the project.

Additionally, upon commencement of operations, the new warehouse will result in an increase in our fixed operating costs, including depreciation, utilities, manpower, maintenance and other overheads. If the utilization levels of the proposed warehouse are lower than anticipated, or if our business growth does not materialize as expected, such fixed costs may adversely affect our margins, profitability and cash flows.

The proposed expansion may also place additional demands on our management, operational and financial resources. Our ability to successfully implement and integrate the new warehouse into our existing supply chain will depend on effective planning, execution, coordination with logistics partners and the availability of skilled personnel. Any inability to manage this expansion efficiently may lead to operational inefficiencies, increased costs or disruptions to our existing operations.

Further, the return on investment from the proposed warehouse will depend on several external factors, including overall demand for our products, competitive intensity, changes in consumer purchasing behaviour, logistics costs, regulatory developments and general economic conditions. There can be no assurance that the actual returns from the proposed warehouse will meet our expectations or justify the capital deployed.

Any delay, cost overrun, under-utilisation or failure to achieve the intended benefits from the proposed warehouse facility in Ludhiana could materially and adversely affect our business operations, financial condition, results of operations and cash flows.

30. Our business depends on our ability to ensure timely supply and delivery of products to customers, and any failure or delay in fulfilling customer orders may adversely affect our business, reputation and financial performance.

Our operations require coordinated execution across contract manufacturers, warehousing facilities, logistics service providers and distribution partners to ensure timely supply and delivery of products to customers. Any disruption, delay or inefficiency in manufacturing schedules, storage, order processing, transportation or last-mile delivery, including delays caused by third-party service providers, infrastructure constraints, labour issues, transportation disruptions, regulatory restrictions or force majeure events, may result in our inability to meet committed delivery timelines.

Failure to ensure timely delivery may lead to order cancellations, loss of customers, contractual claims, adverse customer feedback and reputational harm. Prolonged or repeated delivery delays may also result in increased logistics and operating costs, strain relationships with key distributors, e-commerce platforms and channel partners, and adversely affect customer retention and brand perception. Any such events could materially and adversely affect our business, results of operations, financial condition and cash flows.

31. We may be subject to customer complaints, claims, returns and product-related disputes, and any adverse outcomes arising therefrom may harm our reputation and adversely affect our business, financial condition and results of operations.

We may be subject to customer complaints, claims, returns or litigation arising- from various factors, including perceived or actual product quality issues, manufacturing defects, labelling or regulatory non-compliance, delayed delivery, improper storage, handling or transportation of products, or dissatisfaction with customer service. Although customer grievances are addressed through our established grievance redressal mechanism, we cannot assure that such complaints or claims will not arise, or that they will be resolved in a timely or satisfactory manner. The occurrence of such complaints or claims may result in refunds, replacements, financial liabilities, regulatory scrutiny or adverse publicity.

Any increase in the frequency or severity of customer complaints, or adverse outcomes in claims, litigation or regulatory proceedings, may adversely impact our reputation, brand value and customer confidence. Such events may also result in increased compliance costs, diversion of management time and resources, imposition of penalties or restrictions, and loss of business opportunities. Consequently, these factors could materially and adversely affect our business, results of operations, financial condition and cash flows.

32. *Our business depends on timely payments to contract manufacturers, suppliers and logistics service providers, and any delay or inability to make such payments may disrupt our operations and adversely affect our business, financial condition and cash flows.*

Our business operations depend on timely payments to contract manufacturers, suppliers and logistics service providers to ensure uninterrupted manufacturing, procurement, storage and distribution of products. Our ability to make such payments is dependent on effective working capital management, cash flow generation, timely collection of receivables and overall liquidity position. Any delay or inability to make timely payments due to liquidity constraints, operational inefficiencies, disputes, delays in collections or unforeseen events may adversely affect our relationships with these parties.

Delays in payments may result in suspension or disruption of supplies or logistics services, imposition of adverse credit terms, loss of preferred vendor status, requirement of advance payments or increase in procurement and logistics costs. Such disruptions may adversely impact product availability, delivery timelines and operational efficiency, and may require us to source alternate vendors at higher costs or on less favourable terms. Consequently, these factors could materially and adversely affect our business, results of operations, financial condition and cash flows.

33. *Our Company has entered into lease arrangements with related parties, and any adverse changes in the terms of such arrangements or disputes may adversely affect our business operations.*

Certain of the premises used by our Company have been taken on lease from related parties. Although such lease arrangements have been entered into on an arm's length basis and the commercial terms are comparable to prevailing market terms, we cannot assure that these arrangements will continue on the same terms or be renewed upon expiry. Any termination, non-renewal or modification of such lease arrangements may require us to identify and shift to alternative premises, which may not be available on comparable terms or within a reasonable timeframe.

Any disruption arising from changes in such lease arrangements, including disputes with related parties, increase in lease rentals, or relocation of operations, may result in additional costs, interruption of business activities and diversion of management time and resources. Consequently, any such events could materially and adversely affect our business operations, results of operations, financial condition and cash flows.

34. *Our business requires continued investment in marketing, advertising and brand-building activities, and such expenditure may not result in proportionate increases in revenue, profitability or brand recognition, which could adversely affect our business and financial performance.*

Our business and growth prospects are dependent, in part, on sustained investments in marketing, advertising and promotional activities to enhance brand awareness, expand consumer reach and support the sale of our products across online and offline channels. To sustain and build upon the growth momentum of our brand, we propose to continue making strategic investments in digital marketing, advertising and promotional initiatives. Our Company proposes to utilise an amount of up to ₹540.90 lakhs from the Net Proceeds of the Offer towards marketing and advertisement expenses.

Our marketing initiatives primarily include performance marketing, influencer-led campaigns, social media promotions, content creation, professional make-up artist engagements, participation in exhibitions and brand campaigns executed through third-party marketing agencies. While such initiatives are intended to support brand visibility and customer acquisition, there can be no assurance that these expenditures will result in immediate or proportionate increases in sales, customer conversion or repeat purchases. Marketing and promotional expenses may, at times, be incurred ahead of revenue generation or may not yield the anticipated returns.

Further, the cost of customer acquisition may increase due to factors beyond our control, including intensified competition for digital advertising inventory, rising media and platform costs, changes in algorithms or policies of digital platforms, evolving consumer behaviour and broader market dynamics. If conversion rates, customer retention or repeat purchase behaviour do not align with our marketing investments, our margins and profitability may be adversely affected.

Pursuant to a Board resolution dated December 27, 2025, our Company has approved marketing, advertising and promotional expenditure aggregating to ₹540.90 lakhs to be met from net proceeds for the period from April 2026 to March 2027. Such

expenditure includes costs towards digital campaigns, influencer and make-up artist engagements, exhibitions and participation in trade expos. Any requirement to further increase marketing expenditure to remain competitive, address declining brand visibility or counter competitive actions may exert additional pressure on our cost structure.

If we are unable to effectively plan, execute or optimise our marketing and promotional initiatives, or if the benefits of such expenditure do not materialise as expected, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

35. *We propose to utilize a portion of the Net Proceeds towards capital expenditure for the proposed setting up of a new warehouse, and any delay, cost overrun or inability to implement such capital expenditure as planned may adversely affect our business, financial condition and results of operations.*

We propose to utilize Rs. 574.20 lakhs out of the Net Proceeds of the Offer towards funding capital expenditure requirements for the proposed setting up of a new warehouse at Ludhiana, Punjab, as more particularly described in the section titled “Objects of the Offer” of this Red Herring Prospectus. While we have identified the proposed location and assessed the broad scope of such capital expenditure, we are yet to place firm orders or enter into definitive agreements with vendors and contractors in relation to certain components of such capital expenditure.

Although we have obtained quotations from vendors and contractors, such quotations are generally valid for limited periods and may be subject to revisions based on commercial terms, availability of materials, changes in specifications, inflationary pressures or other technical considerations. Accordingly, the actual cost of such capital expenditure may differ from our current estimates.

Further, the timing and amount of our capital expenditure may vary due to factors beyond our control, including delays in finalising vendors, availability of contractors, supply chain constraints, labour shortages, escalation in construction or equipment costs, changes in regulatory or statutory requirements, delays in obtaining approvals, or unforeseen site-related or operational issues. There is also a possibility that vendors or contractors may not be able to deliver equipment, services or complete works within the expected timelines, which could result in time and cost overruns.

Any delay in completion or commissioning of the proposed warehouse, or any significant increase in capital expenditure beyond the amounts currently estimated, may require us to defer or modify our expansion plans, arrange additional funding from internal accruals or other sources, or operate at sub-optimal capacity for a prolonged period. Further, the anticipated operational efficiencies, cost savings or scalability benefits from the proposed warehouse may not be realized within the expected timeframe, or at all.

If we are unable to implement the proposed capital expenditure for the new warehouse in a timely and cost-effective manner, or if the actual benefits derived from such investment differ materially from our expectations, our business operations, financial condition, cash flows and results of operations may be materially and adversely affected.

36. *Our failure to identify and adapt to evolving industry trends, technological developments and customer preferences may materially and adversely affect our business, financial condition and results of operations.*

The beauty, cosmetics and personal care (“BPC”) industry is characterized by rapid changes in consumer behaviour, product innovation, ingredient awareness and marketing trends driven by digital media and influencer engagement. Our success depends on our ability to anticipate and respond effectively to such shifts — including evolving formulations, packaging preferences, sustainability requirements and new product categories such as clean beauty, vegan, or gender-neutral products. Failure to anticipate or quickly adapt to these changes may result in reduced relevance of our product offerings, loss of market share, or decline in customer engagement.

Further, technological developments such as AI-driven marketing, data analytics, augmented-reality try-on tools and digital customer experience platforms are increasingly shaping consumer expectations in the BPC segment. Our inability to adopt or integrate such emerging technologies in a timely and cost-effective manner could place us at a competitive disadvantage. Additionally, rapid changes in social media algorithms, platform advertising policies, or influencer marketing regulations may affect the visibility and effectiveness of our promotional activities.

If we are unable to effectively monitor market trends, leverage technology, or align our product development and marketing strategies with changing consumer preferences, our brand appeal, sales performance and profitability could be materially and adversely affected.

37. *Our Company has entered into related party transactions in the past and may continue to do so in the future, which may adversely affect our business, results of operations and financial condition.*

In the ordinary course of business, our Company has entered into transactions with related parties, including our Directors, Promoter and key managerial personnel, and may continue to enter into such transactions in the future. These transactions, inter alia, include sale of goods, purchase of services, payment of remuneration, salary paid, rent security deposit given, loans and advances taken and repaid, and reimbursement of expenses.

While such related party transactions have been entered into in compliance with applicable laws and accounting standards, there can be no assurance that our Company could not have achieved more favorable commercial terms if such transactions had been entered into with unrelated third parties. Accordingly, such transactions may affect our Company's competitive position, bargaining power and operational flexibility.

Further, transactions with related parties may give rise to actual or potential conflicts of interest. There can be no assurance that such conflicts will not adversely affect our Company's business decisions or that any existing or future related party transactions, whether individually or in the aggregate, will not have an adverse effect on our Company's business, results of operations, financial condition and prospects.

For details of related party transactions entered into by our Company, please refer to "**Annexure 32 – Related Party Transactions**" under the section titled "**Financial Information of the Company**" beginning on page 220 of this Red Herring Prospectus.

38. *Our Company will not receive any proceeds from the Offer for Sale portion amounting to ₹ [●] lakhs, and the Selling Shareholders shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale.*

The Offer includes an offer for sale of such number of Equity Shares aggregating up to 3,19,200 Equity Shares amounting to ₹ [●] lakhs by Rahul Sachdeva, Karan Bansal and Preeti Trehan, Promoter Selling Shareholders. The Offer for Sale as a percentage of the Offer is 11.31% and amounts to ₹ [●] lakhs out of the total Offer of ₹ [●] lakhs. The Selling Shareholders are, therefore, interested in the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. As on the date of this RHP, our Promoters hold 64.48% of our pre-Offer paid-up Equity Share capital. The entire proceeds (net of applicable offer-related expenses) from the Offer for Sale will be paid to the Selling Shareholders in proportion to their respective portions of the Offered Shares transferred pursuant to the Offer for Sale, and our Company will not receive any such proceeds. See "**Objects of the Offer**" on page 93.

39. *Our digital marketing activities may be subject to advertising and consumer protection regulations, and any non-compliance could adversely affect our business and reputation.*

Our marketing and promotional activities are primarily conducted through digital channels, including our website, mobile applications, social media platforms and third-party e-commerce marketplaces. Certain product listings, descriptions, endorsements, influencer collaborations and promotional content may be construed as advertisements under applicable laws and regulations, including those relating to consumer protection and advertising standards in India.

We are subject to regulations and guidelines governing advertising, fair trade practices and consumer disclosures, including those issued by the Advertising Standards Council of India and under the Consumer Protection Act, 2019. Any non-compliance, whether arising from inaccurate, misleading or unsubstantiated claims, inadequate disclosures, or actions of third-party agencies, influencers or platform partners, may result in regulatory scrutiny, take-down directions, penalties or reputational harm.

Further, user-generated reviews, marketplace listings and third-party promotional content are not always within our direct control. Any adverse action, allegation or enforcement relating to our digital marketing activities or online listings could affect our brand perception, consumer trust and ability to market our products effectively, which may have a material adverse effect on our business, financial condition and results of operations.

40. *We are exposed to payment-related risks, including those associated with cash-on-delivery transactions and reliance on third-party payment processing systems, which may adversely affect our cash flows and business operations.*

Our online sales is conducted through multiple payment modes, including cash-on-delivery ("COD") and online payment mechanisms such as credit and debit cards, UPI and digital wallets. Each of these payment methods involves inherent risks that may impact timely collection and settlement of sale proceeds. COD transactions, in particular, expose us to risks such as order refusal at the time of delivery, delays in remittance of collected amounts by logistics partners, reconciliation challenges and higher working capital requirements due to longer cash conversion cycles.

For non-COD transactions, we rely on third-party payment gateways, banks and financial intermediaries for the secure processing and settlement of customer payments. Any disruption, technical failure, delay in settlement, chargebacks, disputes or failure by such service providers to perform their obligations may result in delayed receipt of funds, financial losses or increased administrative costs. Our ability to directly control or influence the operations of such third-party payment service providers is limited.

Further, payment systems and practices are subject to evolving regulatory requirements, including those relating to digital payments, merchant compliance and settlement norms. Any changes in such requirements, or non-compliance by us or our service providers, may increase our compliance burden or restrict certain payment options, which could adversely affect customer convenience and sales conversion. Any inability to effectively manage payment collection, ensure timely settlement of proceeds or mitigate payment-related disruptions may adversely affect our liquidity, cash flows and overall business operations and could have a material adverse effect on our business, financial condition and results of operations.

41. *There may be potential conflicts of interest if our Promoters or Directors get involved in any business activities that compete with or are in the same line of activity as our business operations.*

There may be potential conflicts of interest if our Promoters or Directors are involved in business activities that compete with or are similar to our business operations. Recode Studios Limited was incorporated in 2021 and was previously operated under the name and style of Lush Looks, a partnership firm established in 2018. Certain of our Promoters continue to be partners in the firm M/s Lush Looks, which is engaged in a business that is similar to or overlaps with our line of operations. However, M/s Lush Looks has not actively carried out its business operations in last two financial years, i.e. F.Y. 2023-24 and 2024-25.

Details of Sales and PAT of Lush Looks as per the ITR filed is given below: -

Particulars	(Rs. in Lakhs)		
	F.Y. 2022-23	F.Y. 2023-24	F.Y. 2024-25
Sales	55.07	0.59	1.43
Profit/(-Loss) after tax	-18.14	-25.45	-10.34

While our Promoters and Directors are subject to fiduciary duties under applicable laws and are required to act in the best interests of the Company, there can be no assurance that potential conflicts of interest will not arise in the future. Such conflicts may include allocation of management time, diversion of business opportunities, use of proprietary information, or prioritisation of competing business interests. To mitigate risk of conflict, non-compete agreement has been executed between our Company and Lush Looks dated February 09, 2026, for safeguarding the business interest.

Any actual or perceived conflict of interest involving our Promoters or Directors could adversely affect our business operations, strategic decision-making and governance standards. Further, if such competing interests result in loss of business opportunities or adversely impact our competitive position, it could have a material adverse effect on our business, results of operations, financial condition and cash flows.

To mitigate the risk of any conflict of interest, a non-compete agreement has been executed between our Company and Lush Looks dated February 09, 2026, for safeguarding the business interests of our Company.

42. *If we are unable to successfully manage our growth and expansion, our business, results of operations and financial condition may be adversely affected.*

Our Company has experienced growth in recent years and intends to continue expanding its operations, product portfolio, distribution channels and geographic presence in the beauty, cosmetics and personal care segment. Such growth places significant demands on our management bandwidth, operational systems, warehousing and logistics infrastructure, third-party manufacturing network, technology platforms and internal controls. Any inability to effectively plan, implement and manage this growth could result in operational inefficiencies, supply chain disruptions, delays in order fulfilment, increased costs or inconsistencies in customer experience, which may adversely affect our brand reputation and financial performance.

Our growth strategy involves, among other things, expansion of our product offerings, increased marketing and brand-building expenditure, scaling of warehouse and logistics capabilities, addition of retail outlets, and higher dependence on digital platforms and third-party service providers. If demand growth does not materialise as anticipated, or if consumer preferences change, such investments may lead to sub-optimal utilisation of resources, higher fixed costs or pressure on margins. Conversely, if demand grows faster than our ability to scale operations, we may face challenges in maintaining adequate inventory levels, service quality and delivery timelines, which could result in lost sales opportunities or customer dissatisfaction.

Further, rapid growth may increase the complexity of our operations and expose us to challenges in maintaining consistent product quality, regulatory compliance, data integrity, internal controls and effective coordination across multiple third-party manufacturers, logistics partners, franchisees and service providers. As our operations expand, any failure to strengthen our systems, processes and oversight mechanisms in line with business growth may adversely affect our operational efficiency and financial discipline.

Accordingly, our inability to effectively manage growth, scale operations in a controlled manner, or align investments with actual business performance could materially and adversely affect our business, results of operations, cash flows and future prospects.

43. Our operations are subject to high working capital requirements, and any inability to maintain adequate working capital may adversely affect our business, financial condition and results of operations. Our operations are subject to high working capital requirements.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards trade receivables, inventories and payment to creditors. The working capital requirements of our Company (based on restated financial statements) is as under: -

(Rs. in Lakhs)				
Particulars	March 31, 2023	March 31, 2024	March 31, 2025	April'25-December'25
Current Assets (excluding cash and cash equivalents)	1,118.11	1,422.86	1,951.18	2,395.53
Current Liabilities (excluding short-term borrowings)	344.44	319.54	649.79	675.65
Working Capital	773.66	1,103.33	1,301.39	1,719.88

For further details, please refer to this section “Objects of the Offer- Funding for Working Capital Requirements” on page 100 of this RHP.

Our growing scale and expansion may result in increase in the quantum of current assets, leading to higher working capital requirements. Our inability to maintain adequate cash flow, secure credit facilities, or arrange other sources of funding in a timely manner, or at all, could adversely impact our financial condition and business operations.

However, we intend to utilize net proceeds of Rs. 1,950 lakhs towards working capital requirements, which will support our operational needs and help sustain our growth. For further details regarding the utilization of funds, please refer to the section “Objects of the Offer – Working Capital Requirements” on page 100 of this Red Herring Prospectus. However, there can be no assurance that our estimated working capital requirements will not increase in the future or that we will not require additional financing and any inability to secure such financing on commercially acceptable terms, or at all, may adversely impact our business, financial condition and results of operations.

44. Fluctuations in foreign currency exchange rates could adversely affect our Company’s business, results of operations and financial condition.

Our Company imports certain raw materials and products from overseas suppliers, and payments for such imports are denominated in U.S. Dollars and other foreign currencies. Consequently, our Company is exposed to risks arising from fluctuations in foreign currency exchange rates. Any depreciation of the Indian Rupee against such foreign currencies may increase the cost of imports, which could adversely affect our gross margins, profitability and cash flows.

During the stub period April’25 to December’25, and the financial years ended March 31, 2025, 2024 and 2023, the value of imports undertaken by our Company amounted to approximately ₹ 333.20 lakhs, ₹562.53 lakhs, ₹446.79 lakhs and ₹232.51 lakhs, respectively. The exchange rates between the Indian Rupee and foreign currencies have been volatile in recent years and may continue to fluctuate significantly in the future.

Further, the foreign exchange gain/(loss) recorded by our Company during the stub period ended December 31, 2025, and the financial years ended March 31, 2025, 2024 and 2023 amounted to ₹ 1.98 lakhs, ₹12.95 lakhs, ₹10.78 lakhs and ₹5.69 lakhs, respectively. Our Company does not have any assurance that it will be able to effectively manage or mitigate foreign currency exchange rate risks in the future. Any adverse movements in foreign currency exchange rates could have a material adverse effect on our Company’s business, results of operations, financial condition and cash flows.

45. We are exposed to risks relating to imports of goods, including foreign currency exchange rate fluctuations, which may adversely affect our costs, margins and financial condition.

A portion of our products and product components are sourced from overseas suppliers, including finished goods and accessories imported into India. As a result, our business is exposed to risks associated with imports, including foreign currency exchange rate fluctuations, changes in import duties, customs regulations, shipping costs, international logistics constraints and geopolitical developments affecting global trade.

Our import purchases are denominated in foreign currencies, primarily United States Dollars and other foreign currencies. Any adverse movement in exchange rates between the Indian Rupee and such foreign currencies may increase our landed cost of imported goods. In the event that we are unable to pass on such increased costs to customers due to competitive pressures or pricing constraints, our gross margins and profitability may be adversely affected.

The value of imported purchases made by our Company for FY 2022-23, FY 2023-24 and FY 2024-25 and for the nine-month period ended December 31, 2025 was ₹ 232.51 lakhs, ₹ 446.79 lakhs, ₹ 562.53 lakhs and ₹ 333.20 lakhs, respectively, which constituted approximately 15.83%, 23.40%, 25.51% and 15.31% of our total purchases during the respective periods.

**(This value is derived by dividing CIF value of Import and Total Purchases).*

Further, import operations are subject to risks such as delays in customs clearance, changes in import licensing or registration requirements, revisions in tariff structures, port congestion, shipping disruptions, or restrictions arising from international trade policies. Any such disruptions may result in delays in product availability, increased working capital requirements, inventory shortages or higher logistics costs.

Additionally, geopolitical tensions, global supply chain disruptions, pandemics or trade restrictions may adversely affect the availability, pricing or timely delivery of imported goods. Any prolonged disruption in import supplies or sustained adverse movement in foreign exchange rates could materially and adversely affect our business operations, cost structure, results of operations, cash flows and financial condition.

46. Our Company has incurred indebtedness, and any inability to service or manage such indebtedness may adversely affect our business, results of operations and financial condition.

Our Company has incurred indebtedness in the past and may continue to incur additional indebtedness in the future. The ability of our Company to borrow funds and the terms of such borrowings depend on various factors, including its financial condition, cash flows, debt servicing capacity, prevailing interest rates, and general economic, industry and market conditions. As of December 31, 2025, the total outstanding indebtedness of our Company was ₹ 342.76 lakhs.

Our existing and future indebtedness may result in substantial debt servicing obligations and may, among other things: (i) increase our Company's vulnerability to adverse economic, industry and competitive conditions; (ii) limit our Company's flexibility in planning for, or responding to, changes in its business and industry conditions; (iii) adversely affect our Company's credit profile; (iv) restrict our Company's ability to obtain additional financing on favorable terms, or at all; and (v) increase interest costs, which may adversely affect our Company's profitability and cash flows.

There can be no assurance that our Company will be able to service its existing or future indebtedness on favorable terms or at all. Any failure to comply with the terms of financing arrangements, including repayment obligations and financial covenants, or any increase in borrowing costs, may have a material adverse effect on our Company's business, results of operations, financial condition and cash flows.

The Company has availed secured loan from Axis Bank for which NOC has been obtained. Also, the Company has availed secured loan (Vehicle Loan) from HDFC Bank, ICICI Bank and Kotak Mahindra Prime Limited. It is hereby declared that, based on the due diligence carried out and the information and confirmations provided by the Company, there are no restrictive covenants stipulated under the secured loan (Vehicle Loan) availed from lenders which would have a material adverse impact on the Company or its ability to undertake the proposed capital raising activity. Although there is no requirement to obtain the NOC from the aforesaid secured lender and unsecured lenders respectively, the inability to obtain these NOCs may be perceived as a procedural risk, which could potentially impact the perception of our creditworthiness or compliance status among stakeholders. However, we affirm that all such loans are duly serviced and are not in default. To the best of our knowledge and belief, the absence of these NOCs does not, in any manner, hinder or restrict the Company from proceeding with the proposed Issue.

47. We are dependent upon the experience and skill of our Promoters, Key Managerial Personnel and Senior Management Personnel for conducting our business and undertaking our day to day operations. The loss of or our inability to retain, such persons could materially and adversely affect our business performance. In addition, excess rate of attrition amongst the personnel engaged by our Company may have an adverse impact on our business operations.

Our business operations and strategic initiatives rely significantly on the experience, decision-making and industry knowledge of our Promoters, Key Managerial Personnel ("KMPs") and Senior Management Personnel. These individuals oversee critical functions including brand management, retail operations, marketing, finance, supply chain and expansion activities. Their continued involvement is essential for implementing our business plans and managing day-to-day operations. Any departure, prolonged absence, or reduced involvement of one or more of these personnel, without adequate and timely succession planning, may disrupt our operations, delay strategic initiatives and adversely impact our business performance.

The beauty, cosmetics and personal care industry is talent-intensive and requires personnel with skills in areas such as product development, sourcing, digital marketing, e-commerce management and retail operations. Competition for qualified and experienced employees in these areas is high. We may not always be able to attract or retain talent at desired levels or on commercially reasonable

terms. An increase in attrition, particularly among specialised or experienced employees, may result in loss of domain knowledge, additional recruitment and training expenditure and operational inefficiencies.

If we are unable to retain our Promoters, KMPs, Senior Management or other key employees, or if we are unable to attract suitably qualified personnel to support our growth plans, our business operations, financial condition and future prospects may be adversely affected.

48. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Offer price.*

Our Promoters have acquired Equity Shares of our Company in the past at prices which may be lower than the Offer Price. Accordingly, investors participating in this Offer may invest at a price which is higher than the average cost of acquisition of Equity Shares by our Promoters. As a result, our Promoters may realize returns on their investment that are comparatively higher than the returns that may be earned by investors subscribing to Equity Shares in this Offer.

There can be no assurance that the Offer Price will correspond to the market price of our Equity Shares after listing. Any sale of Equity Shares by our Promoters, or perception of such potential sale, may adversely affect the trading price of our Equity Shares and could impact the interest of the investors subscribing in this Offer.

49. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our operations are exposed to various risks and hazards inherent in the nature of our business, including risks arising from fire, earthquake, flood, storm, burglary, theft, equipment failure, accidents, force majeure events and other unforeseen occurrences that may result in injury, loss of life, damage to property, plant and machinery, inventory and disruption of operations.

As on the date of this Red Herring Prospectus, our Company has obtained insurance coverage, inter alia, comprising:

- (i) fire insurance coverage under an MSME Suraksha Kavach (Complete Fire Insurance) policy for our premises and other assets; and
- (ii) burglary insurance and stock insurance, including floater policies, covering inventory, furniture, fixtures and fittings at certain locations.

These insurance policies are subject to customary exclusions, deductibles, conditions and sub-limits and are valid only for the period specified therein. For further details of our insurance arrangements, please refer to “**Our Business – Insurance**” on page 151 of this Red Herring Prospectus.

While we believe that the insurance coverage obtained by us is generally in line with industry practice for businesses of similar size and nature, our insurance coverage does not extend to all risks to which our business may be exposed. In particular, as on the date of this Red Herring Prospectus, we do not have insurance coverage for certain risks, including but not limited to goods in transit, product liability, third-party liability, cyber security and data breaches and certain business interruption risks. Further, The Company has obtained fire and burglary insurance coverage for all immovable properties disclosed in this Red Herring Prospectus, except for its COCO store located at Mumbai, its COCO store and warehouse located at New Delhi, and its warehouse located at Mumbai. Any loss or liability arising from such uninsured or under-insured risks may have to be borne entirely by us.

Further, there can be no assurance that the insurance coverage maintained by us will be sufficient to cover all losses or liabilities that we may incur, or that such insurance coverage will continue to be available on commercially reasonable terms in the future. Our insurance policies may also be subject to denial, repudiation or delay in settlement of claims by insurers due to disputes regarding interpretation of policy terms, exclusions, compliance with policy conditions or otherwise. In the event that we suffer a significant uninsured or under-insured loss, or if an insurance claim is rejected or the compensation received is materially lower than the loss incurred, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

50. *Our business is dependent on the availability of skilled personnel, and any labour shortages, work stoppages or increase in employee-related costs may adversely affect our operations, customer relationships and financial performance.*

Our operations require the availability of skilled and semi-skilled personnel across various functions, including sales, marketing, inventory management, warehousing etc. Our workforce plays a critical role in maintaining service quality, operational efficiency, timely order fulfilment and overall customer experience. Any inability to attract, recruit, train or retain suitably qualified personnel, whether due to competition for talent, higher wage expectations or limited availability of skilled labour in certain regions, may adversely affect our operational capabilities and service levels.

Our business may also be exposed to risks arising from labour-related disruptions, including absenteeism, work slowdowns, strikes or other forms of employee unrest. Any such disruption at our warehouses, retail operations or support functions may impact inventory movement, order processing, fulfilment timelines and customer satisfaction, and could result in operational inefficiencies or loss of business.

Further, employee-related costs constitute a significant component of our operating expenses. Any increase in labour costs due to statutory changes, revisions in labour laws, minimum wage requirements, market-driven wage escalation or social security obligations may adversely affect our cost structure and margins. In addition, our reliance on personnel across multiple operational locations may increase our exposure to region-specific labour issues.

Any inability to maintain a stable and adequately skilled workforce, or any material labour-related disruption or escalation in employment costs, could adversely affect our operations, customer relationships, financial condition, results of operations and future growth prospects.

51. *We are dependent upon our Promoters, Key Managerial Personnel and Senior Management Personnel and high employee attrition may adversely affect our business operations.*

Our business operations and performance are significantly dependent on the experience, knowledge and skill of our Promoters, Key Managerial Personnel and Senior Management Personnel. The loss of any of these individuals, or our inability to attract and retain experienced personnel, could adversely impact our business, results of operations and financial condition.

Further, our Company has experienced a relatively high level of attrition in recent years. Our attrition rate as per the certificate issued by our Statutory Auditors (R M S G & Associates) vide certificate dated April 16, 2025 is as below:

The following table outlines the attrition rate of employees for the specified periods:

Particulars	F.Y. 2022-23	F.Y. 2023-24	F.Y. 2024-25	April' 2025 to December' 2025
Attrition rate*	109.92%	143.10%	56.41%	71.43%

**Calculated as the number of employees who left during the period divided by the average of the opening and closing number of employees for the respective financial year/period.*

Although we were able to achieve a net addition in employee strength during these periods, we cannot assure you that we will be able to retain skilled employees or recruit replacements in a timely and cost-effective manner. High levels of attrition may result in increased hiring and training costs, loss of organizational knowledge and disruption of our operations, which may materially and adversely affect our business, financial condition and results of operations.

52. *Loans availed by our Company have been secured on personal guarantees of our Promoters. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Promoters.*

Certain credit facilities availed by our Company are secured, inter alia, by personal guarantees provided by our Promoters. In particular, personal guarantees have been provided by our Promoters in respect of the cash credit facilities availed by our Company from Axis Bank Limited. Our Promoters may continue to provide personal guarantees and/or other security in connection with the borrowings of our Company in the future, including after listing.

In the event of any default by our Company under its financing arrangements, the personal guarantees provided by our Promoters may be invoked, which could adversely affect their personal net worth and reputation. Further, if such personal guarantees are withdrawn or cease to be available for any reason, our Company may be required to provide alternate security or guarantees acceptable to lenders or repay the outstanding borrowings. There can be no assurance that our Company will be able to provide such alternate security or arrange substitute guarantees on acceptable terms, or at all.

Any requirement to repay borrowings prematurely, provide additional security, or raise alternate sources of funds could adversely affect our Company's business, financial condition, results of operations, cash flows and prospects.

For further details regarding the borrowings of our Company, please refer to "**Statement of Financial Indebtedness**" on page 242 of this Red Herring Prospectus.

53. *Fraud, theft, employee misconduct, negligence or similar incidents, whether physical or digital, may adversely affect our business, results of operations, financial condition and reputation.*

Our business operations involve the handling, storage and movement of a wide range of beauty, cosmetics and personal care products, packaging materials and accessories across multiple stages, including procurement, warehousing, retail operations and distribution. Given the nature and scale of our operations, we are exposed to risks of fraud, theft, pilferage, misappropriation, wilful misconduct or negligence by employees, suppliers, franchise partners, logistics service providers or other third parties. Any such incident, whether occurring at warehouses, retail outlets, during transportation or within back-office functions, may result in financial losses, inventory shrinkage, supply chain disruptions or adverse impact on margins.

Our operations are also dependent on the integrity, competence and diligence of our employees across functions such as procurement, inventory management, product handling, marketing, finance, compliance, customer service and information technology. Misconduct or errors by employees, whether intentional or inadvertent, may be difficult to detect and could include misappropriation of assets, unauthorised transactions, manipulation of records, breach of confidentiality, non-compliance with internal policies or failure to adhere to standard operating procedures. Even isolated lapses may lead to incorrect pricing, order fulfilment errors, product misplacement, compliance failures or customer dissatisfaction, resulting in reputational harm or increased operational costs.

In addition, as our Company increasingly relies on digital platforms, ERP systems, online sales channels and electronic payment mechanisms, we are exposed to risks of cyber-enabled fraud, unauthorised access, data manipulation or misuse of business and customer information. Any such incident may disrupt operations, compromise sensitive data and result in financial or reputational losses. Losses arising from fraud, theft or misconduct may not always be fully recoverable or covered by insurance.

Further, any non-compliance or errors by employees in areas such as statutory filings, taxation, product labelling, consumer protection or regulatory requirements may expose us to penalties, litigation or regulatory action. There can be no assurance that our internal controls and processes will be sufficient to prevent, detect or mitigate all such incidents in a timely manner. Accordingly, any fraud, theft, employee misconduct or negligence, whether physical or digital in nature, could materially and adversely affect our business operations, results of operations, financial condition and reputation.

54. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule.*

Our proposed expansion and growth plans, as set out in the section titled “*Objects of the Offer*” of this Red Herring Prospectus, are expected to be financed primarily from the Net Proceeds of the Offer. Our Company has not identified any alternate source of financing for the stated objects of the Offer. Accordingly, any shortfall in raising the required funds, or delay in the receipt of the Net Proceeds, may result in postponement or delay in the implementation of our proposed plans.

Further, any increase in project costs due to inflation, changes in input prices, delays in execution, or underestimation of expenses may require our Company to arrange for additional funds through borrowings or internal accruals. In the absence of identified alternate funding arrangements, our Company may not be able to mobilize such funds in a timely manner or on commercially favourable terms. This could adversely affect our ability to execute the proposed plans within the estimated timelines and budgets, thereby impacting our growth strategy.

Additionally, the beauty and personal care industry is working-capital intensive, requiring continuous investment in procurement, marketing, inventory management and customer engagement. Any shortfall in the Offer proceeds or delay in funding may strain our working capital resources, affect our operating cycle and disrupt normal business operations. Accordingly, any failure or delay in mobilising the required resources, or any shortfall in the Net Proceeds of the Offer, may materially and adversely affect our Company’s business operations, growth prospects, financial condition and results of operations.

55. *The Objects of the Offer for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.*

The deployment of the Net Proceeds of the Fresh Issue towards the Objects of the Offer is based on internal management estimates, market conditions, cost assumptions and implementation schedules formulated by our Company. These estimates have not been appraised by any bank, financial institution, or independent agency. Consequently, there can be no assurance that the actual costs or schedule of deployment will not vary from the estimates provided in this Red Herring Prospectus. Any such variations may require us to reallocate funds to different purposes, which may affect the intended use of proceeds.

Further, if the actual costs incurred in relation to the Objects of the Offer are higher than estimated, we may be required to arrange additional funds through internal accruals or external borrowings, which may increase our financing costs and adversely impact our profitability. Conversely, if the actual utilisation of funds is lower than estimated, the surplus funds may be deployed for general corporate purposes, which may not yield the same return as originally envisaged.

Accordingly, since the Objects of the Offer have not been independently appraised, investors will need to rely on the judgement of our management with respect to fund utilisation. Any inability to effectively deploy the Net Proceeds for the purposes stated may adversely affect our business operations, financial condition and prospects.

56. *Any variation in the utilization of Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.*

We intend to utilise the Net Proceeds of the Offer for the purposes described in the section titled “*Objects of the Offer*” on page 93 of this Red Herring Prospectus. However, in the event of any variation in the use of funds, we would be required to comply with applicable provisions of the Companies Act, 2013 and SEBI ICDR Regulations, including seeking the prior approval of our shareholders by way of a special resolution. Obtaining such approvals may cause delays in deployment of funds and there can be no assurance that shareholders will approve the proposed variations.

Further, any reallocation of funds for purposes other than those specified may be viewed unfavorably by investors and could affect investor confidence. Delays in obtaining approvals or inability to utilise the Net Proceeds as proposed could result in our Company not deriving the expected benefits from the Offer within the envisaged timelines. This may adversely impact our growth plans, business operations and financial condition.

Accordingly, any variation in the utilization of Net Proceeds and the associated compliance requirements including prior shareholders' approval, may materially and adversely affect our ability to implement the Objects of the Offer as intended.

57. *Our Company has not paid dividends during Fiscals 2025, 2024 and 2023 and from April 1, 2025, until the filing of this Red Herring Prospectus and may not be able to pay dividends in the future.*

Our Company has not declared or paid any dividends during Fiscals 2025, 2024 and 2023 and from April 1, 2025, until the date of filing of this Red Herring Prospectus. The form, frequency and amount of future dividend payments, if any, will depend on various factors including our financial performance, profitability, cash flows, working capital requirements, capital expenditure plans, debt servicing obligations, applicable regulatory restrictions and approval of our shareholders. There can be no assurance that we will declare dividends in the future or at levels comparable to those declared by other companies in the industry. These requirements may constrain our ability to distribute profits by way of dividends, even if we earn adequate profits in future periods. Investors should note that returns on their investment in Equity Shares will depend entirely on capital appreciation, if any, of such shares and not from dividend distributions. Accordingly, the absence of dividend payments in the past and uncertainty regarding future distributions may adversely affect the return on investment for shareholders.

58. *Our Equity Shares may be delayed in listing or may not be listed at all on the SME Platform of the Stock Exchange.*

Pursuant to this Issue, our Equity Shares are proposed to be listed on the SME platform of the stock exchange. However, there can be no assurance that the listing and trading approval will be granted by the stock exchange within the expected timelines or at all. The grant of listing and trading permission is subject to, inter alia, compliance with the applicable eligibility criteria, regulatory requirements and satisfaction of the conditions prescribed by the stock exchange.

Any delay in, or failure to obtain, listing and trading approvals may adversely affect the liquidity of our Equity Shares. In such an event, investors may not be able to trade their Equity Shares on the stock exchange and may face difficulties in exiting their investment or realising the value of their investment.

59. *Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

Our promoters along with the promoter group will continue to hold collectively 65.01% of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters and promoter group will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

60. *Certain data mentioned in this Red Herring Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject

to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

61. *Certain sections of this Red Herring Prospectus disclose information from “Infomerics Analytics & Research” cosmetics industry report and any reliance on such information for making an investment decision in the Issue is subject to inherent risks.*

This Red Herring Prospectus includes industry-related information that has been extracted or derived from the Cosmetics Industry Report issued by Infomerics Analytics & Research (“the Infomerics Report”) dated October 17, 2025. Certain sections of this Red Herring Prospectus, including those relating to the Industry Overview, contain information sourced from the Infomerics Report.

While we believe such information to be reliable, our Company has not independently verified the accuracy or completeness of the data contained therein. The Infomerics Report was not commissioned or prepared by or on behalf of our Company, the Book Running Lead Manager (“BRLM”), or any of their respective affiliates for the purposes of this Red Herring Prospectus.

Although the industry and market data used in this Red Herring Prospectus is believed to be reliable, it has not been independently verified by us, the BRLM, or any of their respective affiliates. Certain data may have been reclassified or adjusted by our Company for presentation purposes and may not be directly comparable with data published by the respective source.

Therefore, investors are cautioned not to place undue reliance on such industry information and should not base their investment decision solely on this data. The relevance and accuracy of the information depend on the reader’s familiarity with and understanding of the methodologies used in compiling such data. There are no standard data gathering or classification methodologies in the cosmetics and personal care industry and such methodologies and assumptions may vary widely among different industry sources.

62. *We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.*

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “*Statement of Financial Indebtedness*” on page 242 of the Red Herring Prospectus.

63. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required.

As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

EXTERNAL RISK FACTORS

64. *Adverse economic conditions in India or globally could negatively affect our business, financial condition and results of operations.*

Our business and results of operations are influenced by prevailing economic conditions in India and globally. Any slowdown in economic growth, inflationary pressures, tightening of credit availability, volatility in interest rates, or decline in consumer discretionary spending may adversely affect demand for beauty, cosmetics and personal care products. As our products are discretionary in nature, periods of economic uncertainty may lead consumers to reduce or defer spending, which could adversely impact our revenues, margins and cash flows.

Global economic disruptions, financial instability in international markets, or adverse developments in major economies may also affect investor confidence, capital flows into emerging markets such as India, foreign exchange rates and overall market liquidity. Any such developments could adversely affect our access to capital, increase our cost of funding and materially and adversely affect our business, financial condition and results of operations.

65. *Geopolitical events, natural disasters, pandemics or other force majeure events may disrupt our operations and adversely affect our business and profitability.*

Our business may be adversely affected by events beyond our control, including natural disasters, pandemics, epidemics, civil unrest, terrorist attacks, political instability, or acts of war and armed conflict. Such events may disrupt supply chains, logistics and transportation networks, increase freight and operating costs, restrict the movement of goods and personnel, or adversely impact consumer demand.

Recent global conflicts and geopolitical tensions have resulted in volatility in commodity prices, supply chain disruptions, increased logistics costs and inflationary pressures, which may continue to affect business operations in India. Any prolonged or severe disruption arising from such events may adversely affect our warehousing operations, third-party manufacturing partners, logistics service providers or retail and online sales channels, and could materially and adversely affect our business, financial condition, results of operations and cash flows.

66. *Any future issuance of Equity Shares or sale of Equity Shares by existing shareholders may dilute your shareholding and adversely affect the market price of our Equity Shares.*

Any future issuance of Equity Shares or equity-linked securities by our Company may dilute the shareholding of existing investors. In addition, any sale of a substantial number of Equity Shares by our Promoters or other significant shareholders after the completion of the Offer, or the perception that such sales may occur, could adversely affect the market price of our Equity Shares.

We cannot predict the effect, if any, that future issuances of Equity Shares or sales by existing shareholders may have on the market price or liquidity of our Equity Shares.

67. *The Equity Shares have not been previously traded publicly and may experience price and volume volatility after listing.*

There has been no public market for our Equity Shares prior to the Offer, and an active trading market may not develop or be sustained after listing. The Offer Price may not be indicative of the market price of our Equity Shares after listing, and the market price may fluctuate significantly due to various factors, including changes in our operating results, fluctuations in consumer demand, competitive developments in the beauty and personal care industry, changes in regulatory or economic conditions, and volatility in domestic and global capital markets.

As a result, investors may be unable to sell their Equity Shares at or above the Offer Price, or at all.

68. *Changes in laws, regulations, government policies or their interpretation in India may adversely affect our business and financial performance.*

Our operations are subject to various laws, regulations and policies in India relating to taxation, import and export, consumer protection, advertising standards, e-commerce, data protection, labour laws and other regulatory requirements applicable to the beauty, cosmetics and personal care industry. Any adverse changes in existing laws or regulations, changes in their interpretation, or the introduction of new laws or compliance requirements may increase our costs, restrict our operations or adversely affect our business model.

In addition, increased regulatory scrutiny, changes in enforcement practices or delays in obtaining approvals or registrations may require us to modify our operations or incur additional compliance costs. Any failure to comply with applicable laws or regulations

could result in penalties, litigation or reputational harm, which could materially and adversely affect our business, financial condition and results of operations.

69. Inflation, interest rate fluctuations and cost escalation may adversely affect our profitability and financial condition.

Inflationary pressures in India may result in an increase in operating costs, including costs relating to logistics, warehousing, packaging materials, marketing and advertising expenditure, employee costs and third-party service fees. If such cost increases cannot be passed on to consumers due to competitive pressures or demand sensitivity, our margins and profitability may be adversely affected.

Further, increases in interest rates may raise our cost of borrowing and reduce overall consumer spending. Volatility in inflation or interest rates could also adversely affect capital availability and overall economic conditions, which may materially and adversely affect our business, financial condition, cash flows and results of operations.

70. Volatility in Indian and global securities markets may adversely affect the market price and liquidity of our Equity Shares.

The Indian securities markets have experienced significant volatility in the past and may continue to do so in the future due to domestic and global factors, including economic conditions, geopolitical developments, changes in interest rates, inflation, and investor sentiment. Adverse developments in global financial markets or emerging economies may result in increased volatility in Indian capital markets.

Such volatility may adversely affect the trading price, liquidity and market perception of our Equity Shares, irrespective of our operating performance, and may limit the ability of investors to sell their Equity Shares at desirable prices.

For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. Assumptions for working capital requirements the following table sets forth the details of the holding period (with days rounded to the nearest whole number) considered for the period ended April–December 2025 and the financial years ended March 31, 2025, March 31, 2024, and March 31, 2023, along with the provisional figures and projections for the financial years ending March 31, 2026, March 31, 2027, and March 31, 2028.

Particulars	F.Y 2022-23	F.Y 2023-24	F.Y 2024-25	Period Apr'25- December '25	F.Y 2025-26	F.Y 2026- 27	F.Y 2027- 28
Trade Receivables days	54	59	62	48	63	60	60
Trade Payables days	70	29	68	46	32	45	45
Inventory days	92	67	69	50	49	65	65

Justification:

Trade Receivables	Trade receivable days stood at 54 days as at March 31, 2023, 59 days in FY 2023-24 and 62 days in FY 2024-25, and were at approximately 63 days in FY 2025-26 (Provisional). For the projected periods, trade receivable days of 60 days have been considered for FY 2026-27 and FY 2027-28. The assumptions are based on the Company's prevailing credit policy of up to two months, historical collection trends and expected increase in B2B and marketplace-led sales, which typically operate on standard credit cycles.
Trade Payable	Trade payable days stood at 70 days in FY 2022-23, 29 days in FY 2023-24 and 68 days in FY 2024-25, and were at approximately 32 days in FY 2025-26 (Provisional). For the projected periods, trade payable days of 45 days have been considered for FY 2026-27 and FY 2027-28. The lower payable days in FY 2025-26 (Provisional) reflect a relatively accelerated payment cycle during the period. For the projected periods, the Company expects normalisation of payable days to approximately 45 days in line with industry practices and anticipated scale of operations. As the business expands, the Company is expected to benefit from improved vendor relationships and enhanced procurement volumes, which may enable it to avail standard credit terms from suppliers.
Inventories	Inventory holding days were 92 days as at March 31, 2023, 67 days in FY 2023-24 and 69 days in FY 2024-25, and were at approximately 49 days in FY 2025-26 (Provisional). For the projected periods, inventory holding days of 65 days have been considered for FY 2026-27 and FY 2027-28. The lower inventory days in FY 2025-26 (Provisional) reflect relatively efficient inventory management during the period. For the projected periods, inventory levels are expected to normalise to support the anticipated scale-up in operations, expansion of product portfolio and wider geographic reach. The projected increase also factors in the need to maintain adequate safety stock levels to ensure uninterrupted supply, manage procurement lead times and support timely order fulfilment.
Loans and Advances	Loans and advances primarily comprise advances to suppliers, balances with government authorities and advances to employees. The movement in short-term loans and advances over the years reflects the timing of advance payments and settlements in the normal course of business, rather than a linear growth trend. The projected levels are aligned with the anticipated scale of operations and are expected to support procurement requirements and operational efficiencies, including advance payments to suppliers where commercially required.
Other Current Liabilities	Other current liabilities comprise statutory dues payable, advances from customers, salary payable and expenses payable. The movement in these liabilities is primarily attributable to the timing of statutory payments, customer advances and accrual of expenses in the normal course of business. The projected levels are consistent with the anticipated scale of operations and reflect corresponding increases in operational expenses and business activity, while continuing to be influenced by the timing of payments and accruals.
Short-term provisions	Short-term provisions consist primarily of provisions for income tax and employee-related benefits such as gratuity. The movement in provisions is largely driven by changes in profitability and statutory requirements. The projected increase in short-term provisions is in line with the anticipated growth in the Company's operations and profitability, and reflects the corresponding increase in tax liabilities and employee benefit obligations.

The global economy is projected to experience a moderate slowdown, with world output expected to grow by 3.0% in CY 2025, down from 3.3% in CY 2024, and marginally rising to 3.1% in CY 2026. This deceleration reflects lingering trade tensions, policy uncertainties, and structural challenges. Global inflation is expected to ease to 4.2% in CY 2025 and 3.6% in CY 2026, supported by tighter monetary policies, improving labour markets, and easing supply disruptions. Global trade growth is projected to moderate to 2.6% in CY 2025 and 1.9% in CY 2026, impacted by elevated trade barriers and geopolitical instability.

Advanced Economies are projected to expand modestly, with GDP growth of 1.5% in CY 2025 and 1.6% in CY 2026. The United States is expected to grow by 1.9% in CY 2025 and 2.0% in CY 2026, supported by resilient consumption. The Euro Area remains subdued at 1.0% in CY 2025, with Germany (0.1%) and France (0.6%) affected by trade disruptions. Japan and the United Kingdom are forecast to grow at 0.7% and 1.2%, respectively. Emerging Markets and Developing Economies are expected to maintain moderate momentum, growing 4.1% in CY 2025 and 4.0% in CY 2026. Global GDP Growth

The global economy began to recover from its lowest levels following the lifting of lockdowns in 2020–2021. The pandemic-induced lockdowns were a key factor that severely disrupted economic activities, leading to a global GDP contraction of –2.7% in CY 2020.

In CY 2021, supply chain disruptions significantly impacted both advanced economies and low-income developing economies. The rapid spread of the Delta variant and the threat of new variants in mid-2021 further heightened uncertainty.

Global economic activity slowed sharply in CY 2022. The highest inflation in decades forced central banks to tighten monetary policy, while Russia’s invasion of Ukraine further increased global food and energy prices.

Despite some rebound in CY 2023 and CY 2024, global growth moderated from 3.6% in CY 2022 to 3.5% in CY 2023 and then 3.3% in CY 2024. Advanced economies such as the U.S. benefited from strong labour markets and consumption recovery, while emerging markets faced tighter financial conditions. Inflation declined faster than expected in many regions, allowing some central banks to begin cautious monetary easing.

HISTORICAL GDP GROWTH TRENDS

In the current scenario, global GDP growth is projected to decelerate to 3.0% in CY 2025, reflecting mounting economic pressures across both advanced and emerging markets. This marks a significant slowdown driven by intensifying trade fragmentation, the impact of new U.S. tariffs, and elevated geopolitical tensions. Structural weaknesses such as the ongoing real estate crisis in China, minimal growth in the Eurozone, and tight financial conditions in major economies are expected to weigh heavily on global output. Additionally, stress in housing and banking sectors, coupled with subdued industrial activity, is contributing to a muted growth outlook. On the inflation front, the IMF projects global headline inflation to decline to 4.2% in CY 2025, continuing a disinflationary trend as energy prices stabilize and supply-side disruptions ease. The softening of labour markets—reflected in lower job vacancy

rates and modest increases in unemployment—is also expected to help reduce core inflation. This provides room for some central banks to initiate cautious interest rate cuts, although the broader economic outlook remains uncertain due to persistent global risks.

GDP GROWTH ACROSS MAJOR REGIONS

GDP growth across major regions—including Europe, Latin America & the Caribbean, Middle East & Central Asia, and Sub-Saharan Africa—shows varied trajectories. Emerging economies continue to outperform advanced economies.

In Emerging and Developing Asia, growth is projected to moderate from 5.3% in CY 2024 to 5.1% in CY 2025, before slightly declining to 4.7% in CY 2026. India is expected to grow at 6.4% in CY 2025, supported by resilient rural consumption and sustained infrastructure investments, though lower than 6.5% growth recorded in CY 2024. In contrast, China's growth is likely to decelerate to 4.8% in CY 2025, amid persistent real estate concerns and weak domestic demand.

Sub-Saharan Africa is projected to grow at 4.0% in CY 2025, maintaining the same pace as CY 2024, with growth expected to accelerate slightly to 4.3% in CY 2026. This gradual improvement is being supported by better weather conditions and more efficient supply chain operations.

In the Middle East and Central Asia, the economy is forecasted to expand at 3.4% in CY 2025, up from 2.4% in CY 2024, and further strengthen to 3.5% in CY 2026, driven by stabilization in oil production and ongoing economic reforms. For Latin America and the Caribbean, modest growth of 2.2% is forecast for CY 2025, slightly below 2.4% in CY 2024, with expectations of a rebound to 2.4% in CY 2026, helped by stronger macroeconomic management across key economies.

Emerging and Developing Europe remains subdued, with growth estimated at 1.8% in CY 2025, down from 3.5% in CY 2024, expected to rise modestly to 2.2% in CY 2026. The region continues to face structural manufacturing challenges, particularly in major economies like Germany.

Overall, while global growth is expected to remain steady at 3.0% in CY 2025, regional disparities persist, influenced by a combination of domestic challenges, external geopolitical tensions, and fluctuating commodity prices.

COMPETITIVE STRATEGIES

In the rapidly evolving Indian cosmetics landscape, companies are adopting a mix of digital-first, consumer-centric, and sustainability-aligned strategies to build competitive advantage. Unlike traditional FMCG-driven models that relied on mass marketing and broad retail distribution, today's market is shaped by technological innovation, brand authenticity, and agile go-to-market approaches. The following are key competitive strategies adopted by leading and emerging players in the cosmetics sector:

• **Differentiation through niche positioning and brand storytelling** - Cosmetics brands are increasingly positioning themselves around unique identities such as clean beauty, Ayurvedic heritage, gender-neutral cosmetics, or dermatologist-approved formulations. This specialization enables players to cater to specific consumer segments and build strong brand narratives. Storytelling—centered around ingredients, founder journeys, or sustainability commitments—has become a core marketing tool to engage emotionally with customers and create long-term brand loyalty.

• **Digital-First Go-to-market strategy** - Direct-to-consumer (D2C) models have gained significant traction, enabling brands to bypass traditional retail barriers and establish stronger consumer relationships. E-commerce platforms, owned websites, and social commerce channels are being used to test new SKUs, gather consumer insights, and rapidly scale. Digital brands like Mama earth, Sugar Cosmetics, and Minimalist have demonstrated the success of launching and scaling predominantly through online-first strategies.

• **Technology integration for personalization and experience** - Cosmetics companies are leveraging AI, AR/VR, and big data analytics to offer hyper-personalized consumer experiences. This includes tools like virtual try-ons, skin assessment algorithms, and personalized product recommendations. These technologies not only enhance consumer confidence and reduce product returns but also build competitive differentiation by replicating the in-store advisory experience online.

• **Product innovation and agile launch cycles** - Fast product innovation, driven by social media trends and real-time feedback, is a key competitive strategy. Brands are increasingly adopting agile development cycles to launch limited-edition, influencer-led, or occasion-specific products. This rapid innovation model helps maintain consumer interest and capitalize on viral beauty trends, while also enabling A/B testing of new formats and ingredients before committing to large-scale production.

• **Exclusive retail partnerships and omnichannel presence** - While digital channels drive discovery, offline retail remains crucial for trial and trust, especially for categories like makeup and fragrance. Many brands are now pursuing exclusive tie-ups with beauty retail chains (e.g., Nykaa Luxe, Shoppers Stop, Lifestyle) or launching branded kiosks and pop-up stores. A growing number of brands are also adopting omnichannel strategies, ensuring consistent product availability and experience across online and offline touchpoints.

• **Sustainable and ethical value propositions** - Sustainability is increasingly used as a strategic differentiator, particularly among urban and premium consumers. Brands are investing in eco-friendly packaging, recyclable containers, biodegradable formulations, and ethical sourcing practices. Transparency around cruelty-free, vegan, and clean-label credentials is being integrated into branding and communication strategies. This aligns with global ESG expectations and enhances export readiness.

• **Strategic collaborations and influencer marketing** - Collaboration with influencers, celebrities, and content creators has become central to brand visibility and consumer trust. Strategic partnerships—such as co-branded collections or influencer-curated kits—help create buzz and drive social proof. Additionally, tie-ups with salons, dermatologists, and skincare clinics are helping brands establish authority in the professional beauty and skincare segment.

• **Regional expansion and Tier II/III market penetration** - As beauty consumption grows beyond metros, brands are expanding into tier II and III cities through regional distribution partners, vernacular marketing, and hyperlocal influencer networks. Product ranges are also being tailored to suit local preferences, climates, and price sensitivities. Companies are establishing regional fulfilment hubs to support faster delivery and optimize logistics in emerging consumption zones.

• **Compliance, certifications, and regulatory alignment** - With increasing scrutiny over product safety and labelling, companies are proactively obtaining certifications such as FDA (India/US), BIS, ECOCERT, and PETA cruelty-free. Compliance with the Drugs and Cosmetics Act and adherence to BIS standards for labelling, ingredients, and testing is no longer just mandatory but a competitive imperative, especially for export-oriented players and those operating in the “clean beauty” space.

TRENDS IN COSMETICS INDUSTRY

The cosmetics industry, traditionally marked by numerous fragmented players ranging from local brands to small distributors, is undergoing a steady wave of consolidation. This shift is driven by increasing regulatory complexities, evolving consumer preferences, and the need for scale to invest in innovation and distribution infrastructure. Several factors are reshaping the competitive dynamics and market structure in this sector:

1. **Increasing regulatory pressure and compliance costs** - Tighter regulations on product safety, ingredient transparency, labelling, and environmental standards (such as those enforced by the FDA, EU regulations, and India's CDSCO) have raised compliance costs. Smaller, unorganized cosmetic manufacturers and distributors often struggle to keep up with evolving norms, leading to market exits or acquisition by larger, more compliant players.
2. **Capital requirements for R&D, manufacturing, and digital infrastructure** - Innovation in product formulations, sustainable packaging, and digital marketing tools demands substantial capital investment. Advanced manufacturing facilities with quality assurance systems and technology-enabled inventory and supply chain management systems are expensive to establish and maintain. Larger companies, supported by deep pockets or investor backing, are acquiring smaller players to expand their portfolios and operational capabilities.
3. **Strategic partnerships and acquisitions** - Multinational beauty conglomerates and major retail chains prefer dealing with large, pan-regional suppliers and distributors capable of ensuring consistent supply, quality, and compliance. In response, mid-sized brands and distributors consolidate through mergers and acquisitions to scale up, improve service levels, and broaden their product range.
4. **Entry of corporate and PE-backed entities** - The growing attractiveness of the cosmetics sector, driven by rising consumer demand for premium and innovative products, has drawn interest from corporate investors and private equity firms. These financial players pursue inorganic growth by investing in or acquiring smaller brands and distributors, thereby accelerating industry formalization and professionalization.
5. **Rise of integrated distribution and marketing platforms** - There is an increasing trend toward integrated platforms that combine product distribution with digital marketing, influencer collaborations, consumer analytics, and direct-to-consumer (D2C) engagement. These platforms often absorb smaller distributors or niche brands to create end-to-end solutions spanning product development, sales, and customer engagement.
6. **Operational efficiency and margin optimization** - Consolidation enables better purchasing power, streamlined supply chains, centralized warehousing, and improved logistics. These efficiencies help companies manage costs and margins better amid fierce competition and rising raw material prices. Scale also enables higher investments in branding and innovation, critical to sustaining growth in the cosmetics sector.

FUTURE OUTLOOK

The Indian cosmetics industry, valued at USD 15.19 billion in 2024, continues to demonstrate strong momentum and resilience, driven by structural growth factors such as rising disposable incomes, rapid urbanization, changing lifestyle patterns, and heightened beauty and grooming awareness. With increasing participation of both domestic and global brands, the market is projected to expand at a CAGR of 6.21%, reaching approximately USD 27.75 billion by 2034. The ongoing digital revolution, widespread use of e-commerce platforms, and growing influence of social media have significantly altered consumer purchasing behaviour, leading to deeper penetration across urban, semi-urban, and rural markets.

Over the next decade, several opportunity areas are expected to shape the sector's growth trajectory. First, exports represent a major growth driver as India strengthens its presence in global markets for herbal, ayurvedic, and organic cosmetics. With competitive pricing, abundant natural resources, and expertise in traditional formulations, India is increasingly exporting to the Middle East, Africa, Europe, and Southeast Asia. The global shift toward clean beauty, sustainable sourcing, and natural ingredients further enhances India's export competitiveness.

Second, rural and semi-urban markets offer untapped potential, driven by improving income levels, increased awareness of personal grooming, and enhanced retail and digital connectivity. As organized retail formats and direct-to-consumer (D2C) brands expand their reach, rural demand for affordable skincare, personal hygiene, and beauty products is expected to surge. Companies are introducing smaller pack sizes, region-specific products, and vernacular marketing campaigns to effectively cater to these emerging markets.

Third, the male grooming segment has evolved from a niche category into a mainstream growth avenue. Modern male consumers are becoming increasingly conscious of appearance, hygiene, and skincare, driving demand for specialized products such as beard oils, face washes, anti-aging creams, and hair styling solutions. With growing acceptance of male-centric beauty and wellness, this segment is projected to witness double-digit growth in the coming years.

PRODUCT DISTRIBUTION MODEL

Our Company's distribution framework comprises the following two models:

1. **Offline Distribution Model** - Under this model, the Company markets its cosmetics and personal care products through a combination of Company-Owned Company-Operated ("COCO") stores and Franchisee-Owned Franchisee-Operated ("FOFO") stores. Under the COCO model, the Company directly operates retail outlets and is responsible for all aspects of store operations, including procurement, inventory management, staffing and sales. Whereas, under the FOFO model, retail outlets are operated by independent franchise partners, who invest in the setup and day-to-day operations of the stores. The Company supplies products to such franchise partners and provides onboarding support and product-related training through its sales team.
2. **Online Distribution Model** - Under this model, the Company sells its products through its own website and mobile application, as well as through third-party e-commerce marketplaces, including Amazon, Myntra, Flipkart and others. The Company manages its e-commerce operations using the Shopify platform, while Uniware software is deployed for order processing, inventory management and billing-related functions.

TECHNOLOGY

The Company's distribution operations are supported by an integrated technology infrastructure comprising third-party software platforms used for managing online and offline sales operations. For online sales, the Company uses Shopify as its primary e-commerce platform for operating its website and mobile application, including customer interface and payment processing. Order management, inventory tracking and billing functions for online orders, including orders received through third-party e-commerce marketplaces such as Amazon and Flipkart, are managed through Uniware, a third-party order management system ("OMS"). For offline sales, the Company uses M-Assist, a sales enablement application, to facilitate order placement and transaction processing by the sales & support team operating in the offline channel.

LOGISTICS AND FULFILMENT FRAMEWORK

The Company has established a logistics and fulfilment framework to support the distribution of its products across offline and online channels. As of the date of this Red Herring Prospectus, the Company operates six warehouses across India, which are used for storage, packaging, and dispatch of products to Company-Owned Company-Operated ("COCO") stores, Franchisee-Owned Franchisee-Operated ("FOFO") outlets, and customers purchasing through digital channels.

For online orders, the Company undertakes order processing through third-party technology platforms, while physical delivery and last-mile logistics are carried out through third-party logistics service providers. The use of multiple logistics partners enables the Company to service customers across a wide geographic area and manage order fulfillment across different delivery locations.

For offline operations, products are supplied from warehouses to COCO and FOFO stores based on inventory requirements and replenishment cycles. Under the FOFO model, franchise partners are supplied products by the Company, and inventory movement is monitored through standardized processes.

The Company's logistics and fulfilment framework supports its omnichannel distribution model by enabling timely availability of products across retail stores and digital platforms, while allowing the Company to focus on procurement, branding, marketing, and distribution activities.

Business Model, Product Development and Warehousing:

We follow an asset-light business model and do not undertake any in-house manufacturing or formulation. All manufacturing activities are outsourced to third-party contract manufacturers with the necessary infrastructure, technical expertise and statutory approvals. Product development is carried out by these contract manufacturers and includes product conceptualisation, formulation R&D, quality and regulatory testing, packaging finalisation and commercial production. Upon completion of manufacturing, we are responsible for branding, marketing, distribution and sale of the finished products.

We do not procure, specify or directly source raw materials. All raw materials are procured by our contract manufacturers from their approved vendors in accordance with their internal procurement policies, applicable regulatory requirements and prescribed quality standards. Vendor selection, quality inspection and compliance verification are undertaken by the respective contract manufacturers. We rely on the quality control systems, certifications and compliance frameworks of our contract manufacturers to ensure that products manufactured for us meet applicable quality and regulatory standards. Customer complaints, if any, are handled through our grievance redressal mechanism, and any liability arising from manufacturing defects or product quality issues is determined in accordance with applicable laws and the nature of the matter.

While we operate under an asset-light model, we propose to establish an owned warehousing facility to enhance operational efficiency and control. The proposed warehouse will consolidate storage, packaging, order processing and dispatch functions at a single location, improving coordination, turnaround time and supply chain efficiency. Ownership of the facility is expected to mitigate risks associated with leased premises, including lease renewals, rent escalations and potential loss of premises, while providing long-term cost stability. The proposed investment remains aligned with our business model focused on branding, marketing and distribution, without undertaking manufacturing capital expenditure.

NOTE: The Company owns a land parcel situated in Ludhiana; however, the same is not suitable for the proposed warehousing requirements in terms of location, layout and operational scalability. Accordingly, the Company proposes to acquire a new land parcel that is better aligned with its operational and future expansion requirements.

Cosmetics Rules, 2020 under the Drugs & Cosmetics Act, 1940

As a cosmetics brand/marketer, Recode must ensure that all products manufactured in India are made under valid state licenses by compliant facilities following good manufacturing practices, and that any imported cosmetics are duly registered with the Central Drugs Standard Control Organisation (CDSCO) before sale. Formulation compliance with the positive/negative lists, colorant restrictions, heavy-metal limits, and preservative limits is essential. India bans animal testing for cosmetics and the import of cosmetics tested on animals; supplier declarations and supply-chain warranties should reflect this. Labelling must comply with the Cosmetics Rules (name, net contents, batch number, manufacturing/expiry dates or PAO where applicable, full ingredients list in descending order, manufacturer/marketer name and address, warnings/cautions such as hair-dye disclaimers, and special claims like SPF or "dermatologically tested" supported by evidence). Any quasi-therapeutic claims (e.g., "treats acne/eczema") can misclassify the product as a drug—marketing should be carefully vetted.

Legal Metrology (Packaged Commodities) Rules, 2011

All pre-packaged cosmetics sold online or offline must carry mandatory declarations including maximum retail price (MRP), net quantity, month and year of manufacture/import, customer care details, and name and address of the manufacturer/marketer/importer. The Company must also display country of origin and accurate product information. Further, influencer and celebrity endorsements must comply with the Central Consumer Protection Authority's Guidelines, 2022, and all claims relating to product performance or efficacy must be adequately substantiated to avoid misleading advertisement exposure.

Further, any claims relating to recyclability or biodegradability of packaging materials must be duly certified by authorised agencies to ensure compliance with applicable regulations.

The Shops and Establishments Act, being a State-specific legislation (for instance, the Punjab Shops and Commercial Establishments Act, 1958 or the Delhi Shops and Establishments Act, 1954), applies to Recode Studios in respect of its retail outlets, offices, and warehouses. Under the provisions of the applicable State Act, Recode is required to secure registration of each commercial establishment within the stipulated period from commencement of operations and to ensure compliance with statutory norms governing working hours, opening and closing times, rest intervals, weekly holidays, annual leave with wages, payment of wages, and conditions for employment of women and young persons. The Act further obliges the maintenance of registers and records in the prescribed form and subjects establishments to inspection by the Labour Department authorities. Non-compliance attracts penalties under the Act, making adherence mandatory for the lawful operation of Recode's physical stores and corporate premises.

Bureau of Indian Standards Act, 2016

The Bureau of Indian Standards Act, 2016 and the regulations framed thereunder apply to Recode Studios insofar as cosmetics and their raw materials fall within the scope of mandatory certification schemes notified by the Bureau of Indian Standards. While not all cosmetic products are subject to compulsory BIS certification, certain colourants, raw materials, and formulations must conform

to the prescribed Indian Standards as referenced under the Cosmetics Rules, 2020. In such cases, Recode is legally obliged to obtain BIS certification before manufacturing, importing, or marketing such products in India. For all other cosmetic goods where BIS certification is voluntary, adherence to the relevant Indian Standards remains advisable as evidence of quality and safety, particularly in regulatory inspections and consumer disputes.

Costs relating to assets not ready for intended use are capitalized as Capital Work-in-Progress. Assets included in Capital Work-in-Progress are not depreciated.

6. Inventories

Traded goods are valued at lower of cost and net realisable value. Cost includes cost of purchase and other costs included in bringing the inventories to their present location and condition.

7. Foreign currency transactions

(i) Initial Recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) Conversion

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date.

(iii) Exchange difference

Exchange differences arising on the settlement of monetary items or on reporting Company monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

8. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

9. Borrowing Cost

Borrowing costs include interest, amortization of ancillary cost incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

10. Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Deferred Tax is calculated at the rates and laws that have been enacted or substantively enacted as at the Balance Sheet date and is recognized on timing difference that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets, subject to consideration of prudence, are recognized and carried forward only to the extent that they can be realized.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

11. Earnings Per Share

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

12. Provisions and Contingent Liabilities

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

13. Cash and cash equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

14. Investment

Investments that are readily realizable and intended to be held for not more than one year from the date of acquisition are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary nature in value of investment.

15. Government Grants and Subsidies

Government grants and subsidies are recognised when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidy will be received. Government grants whose primary condition is that the Company should purchase, construct or otherwise acquire capital assets are presented by deducting them from the carrying value of the assets. The grant is recognised as income over the life of a depreciable asset by way of a reduced depreciation charge.

When the grant or subsidy relates to an expense item, it is recognized as income over the periods necessary to match them on a systematic basis to the costs, which it is intended to compensate.

16. Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

17. Contingencies and events occurring after the Balance Sheet date

Events that occur between balance sheet date and date on which these are approved, might suggest the requirement for an adjustment(s) to the assets and the liabilities as at balance sheet date or might need disclosure. Adjustments are required to assets and liabilities for events which occur after balance sheet date which offer added information substantially affecting the determination of the amounts which relates to the conditions that existed at balance sheet date.

18. Related Party Transactions

Related parties as defined under Accounting Standard - 18 'Related Party Disclosures' have been identified based on representations made by management and information available with the Company. All transactions with related parties are in the ordinary course of business and on arms' length basis.

19. Segment Reporting

As per AS -17 Segment Reporting is not applicable to the company for the reporting period.

20. Employee Benefits

(i) Short Term Employee Benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services. These benefits include performance incentives and compensated absences.

(ii) Post-Employment Benefit

Defined Contribution Plans

A defined contribution plan is a post-employment benefit plan under which the Company pays specified contributions to a separate entity. The Company makes specified monthly contributions towards Provident Fund. The Company's contribution is recognised as an expense in the Profit and Loss Statement during the period in which the employee renders the related services.

Defined Benefit Plans

Gratuity liability valuation on projected unit credit (PUC) method at the end of each year. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. Accumulated gratuity, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit and which is expected to be carried forward beyond 12 months, as long term employees benefit for measurement purpose.

Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;

d) Depreciation on fixed assets is calculated using the Written Down Value (WDV) method, which involves applying depreciation rates prescribed under Schedule II to the Companies Act 2013 to the carrying amount of the asset. The carrying amount is reduced each year by the amount of depreciation charged.

e) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

12. Provisions and Contingent Liabilities

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

13. Cash and Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

14. Investments

Investments that are readily realizable and intended to be held for not more than one year from the date of acquisition are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary nature in value of investment.

15. Government Grants and Subsidies

Government grants and subsidies are recognised when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidy will be received. Government grants whose primary condition is that the Company should purchase, construct or otherwise acquire capital assets are presented by deducting them from the carrying value of the assets. The grant is recognised as income over the life of a depreciable asset by way of a reduced depreciation charge.

When the grant or subsidy relates to an expense item, it is recognized as income over the periods necessary to match them on a systematic basis to the costs, which it is intended to compensate.

16. Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

17. Contingencies and events occurring after the Balance Sheet date

Events that occur between balance sheet date and date on which these are approved, might suggest the requirement for an adjustment(s) to the assets and the liabilities as at balance sheet date or might need disclosure. Adjustments are required to assets and liabilities for events which occur after balance sheet date which offer added information substantially affecting the determination of the amounts which relates to the conditions that existed at balance sheet date.

18. Related Party Transactions

Related parties as defined under Accounting Standard - 18 'Related Party Disclosures' have been identified based on representations made by management and information available with the Company. All transactions with related parties are in the ordinary course of business and on arms' length basis.

19. Segment Reporting

As per AS -17 Segment Reporting is not applicable to the company for the reporting period.

20. Employee Benefits

(i) Short Term Employee Benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services. These benefits include performance incentive and compensated absences.

(ii) Post-Employment Benefit

Defined Contribution Plans

A defined contribution plan is a post-employment benefit plan under which the Company pays specified contributions to a separate entity. The Company makes specified monthly contributions towards Provident Fund. The Company's contribution is recognised as an expense in the Profit and Loss Statement during the period in which the employee renders the related services.

Defined Benefit Plans

Gratuity liability valuation on projected unit credit (PUC) method at the end of each year. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. Accumulated gratuity which is expected to be utilized within the next 12 months, is treated as short-term employee benefit and which is expected to be carried forward beyond 12 months, as long term employees benefit for measurement purpose.

Rationale for increase/ decrease in Revenue, EBITDA and PAT from F.Y 2022-23 to F.Y 2023-24 to F.Y 2024-25:

- EBITDA increased from Rs. 167.05 lakhs in FY 2023–24 to Rs. 612.99 lakhs in FY 2024–25, and the EBITDA margin improved to 12.82% from 4.54%, primarily due to growth in Revenue from Operations and a reduction in costs.

Cost as a % of Revenue from Operations	35.51%	40.61%	49.64%	51.84%

Rationale for changes in Purchase of Stock-in-Trade as a percentage of Revenue from Operations from FY 2022-23 to FY 2023-24 and FY 2024-25 to nine-month period ended December 31, 2025: -

Cost as a percentage of revenue has declined overall YoY from 1,160.13 lakhs in FY 2022-23 to 1,827.84 lakhs in FY 2023-24 to Rs. 1,941.24 lakhs and further to Rs. 2038.16 lakhs for the nine months period ended December 31, 2025, indicating improving cost efficiency is attributable to increased order volumes, better pricing negotiations with suppliers, economies of scale, and optimisation of procurement.

FY 2023 vs FY 2024

PAT decreased from ₹69.28 lakhs in FY23 to ₹27.44 lakhs in FY24 primarily due to an increase in finance costs from ₹35.00 lakhs to ₹86.62 lakhs (from 1.56% to 2.36% of revenue from operations) on account of higher borrowings during the year. Further, depreciation and amortisation expenses increased from ₹21.48 lakhs to ₹53.42 lakhs (from 0.96% to 1.45% of revenue from operations) mainly due to additions to fixed assets. Other expenses increased significantly from ₹547.13 lakhs to ₹1,108.30 lakhs (from 24.45% to 30.10% of revenue from operations), largely driven by higher advertisement and marketing expenses, which increased from ₹253.88 lakhs to ₹546.49 lakhs (from 11.34% to 14.84% of revenue from operations). The cumulative impact of higher

finance costs, increased depreciation, and elevated operating expenses outweighed the growth in revenue from operations during the year, resulting in a decline in PAT.

EBITDA increased from ₹143.78 lakhs in FY23 to ₹167.05 lakhs in FY24 primarily due to a significant increase in revenue from operations driven by higher sales volumes and improved scale of operations. However, the EBITDA margin declined from 6.43% to 4.54% mainly on account of increased operating expenses. Employee benefit expenses increased from ₹386.80 lakhs in FY23 to ₹578.76 lakhs in FY24 due to manpower addition to support business growth. Further, other expenses increased from ₹547.13 lakhs in FY23 to ₹1,108.30 lakhs in FY24, primarily driven by higher advertisement and marketing expenses, which increased from ₹253.88 lakhs to ₹546.49 lakhs during the year. The increase in these operating costs outweighed the benefit of higher revenues, resulting in a contraction in EBITDA margin.

FY 2024 vs FY 2025

PAT increased from ₹27.44 lakhs in FY24 to ₹330.29 lakhs in FY25 primarily due to a significant improvement in operating profitability driven by higher revenue from operations, which increased from ₹3,681.95 lakhs in FY24 to ₹4,779.81 lakhs in FY25, reflecting a growth of approximately 30%. The increase in revenue was attributable to higher sales volumes, expansion across sales channels, and improved pricing of the Company's products. Further, the cost of goods sold, as a percentage of revenue from operations, declined during the year due to improved procurement efficiencies, including purchases made at lower rates owing to bulk ordering, which contributed to margin expansion. Employee benefit expenses decreased from 15.72% of revenue in FY24 to 11.17% in FY25, primarily due to optimisation of manpower following a rationalisation of sales promotion personnel, as the Company did not observe a commensurate impact on revenue. The number of employees dropped from 139 to 95 during the year. As a result of the above factors, the Company's overall margins improved by approximately 6.16% during FY25, leading to a substantial increase in PAT.

EBITDA increased from ₹167.05 lakhs in FY24 to ₹612.99 lakhs in FY25 primarily due to a significant improvement in operating performance driven by higher revenue from operations, which increased from ₹3,681.95 lakhs in FY24 to ₹4,779.81 lakhs in FY25, reflecting a growth of approximately 30%. The increase in revenue was attributable to higher sales volumes, expansion across sales channels, and improved pricing of the Company's products. Further, EBITDA margins improved due to a reduction in cost of goods sold as a percentage of revenue from operations, supported by improved procurement efficiencies, including bulk purchases at lower rates. Additionally, employee benefit expenses declined from 15.72% of revenue in FY24 to 11.17% in FY25 due to manpower optimisation, particularly in sales promotion functions. However, finance costs increased from ₹86.82 lakhs in FY24 to ₹119.57 lakhs in FY25 on account of higher borrowings, and depreciation and amortisation expenses increased from ₹53.42 lakhs to ₹64.04 lakhs due to additions to fixed assets. Despite these increases, the overall improvement in operating margins resulted in a significant expansion in EBITDA during FY25.

December 31st, 2025 is due to timely payment to creditor. The increase in FY 2025 was primarily attributable to higher procurement of stock-in-trade and components in line with increased production and sales volumes, along with extended credit terms from suppliers and timing differences in payments at the year end. Purchases increased from ₹1,909.36 lakhs in FY 2024 to ₹2,205.40 lakhs in FY 2025, supporting the higher outstanding balance. Purchases for the nine months period ended December 31st, 2025 stood at 2,176.86 lakhs. Trade payables turnover days also increased from 29 days in FY 2024 to 68 days in FY 2025, resulting in elevated year-end payables.

Inventories:

Our inventories increased from ₹562.12 lakhs in FY 2023 to ₹671.27 lakhs in FY 2024 and further to ₹907.80 lakhs in FY 2025 and stood at ₹1,046.50 lakhs as on December 31, 2025. The increase was primarily driven by higher stocking of inventory to support and anticipated demand in line with the growth in operations. Revenue from operations increased from ₹2,237.85 lakhs in FY 2023 to ₹3,681.95 lakhs in FY 2024 and ₹4,779.81 lakhs in FY 2025, and inventory as a percentage of revenue declined from 25% in FY 2023 to 18% in FY 2024 and 19% in FY 2025 remained at 18% for the period ended December 31st, 2025, indicating improved inventory management. Further, inventory holding days reduced from 92 days in FY 2023 to 67 days in FY 2024 and remained stable at 69 days in FY 2025 and decreased to 50 days for the nine months period ended December 31, 2025.

Short Term Loans and Advances:

Our short-term loans and advances stood at Rs. 351.09 lakhs as on December 31, 2025, compared to Rs. 234.41 lakhs as on March 31, 2025, Rs. 157.67 lakhs in FY 2023–24, and Rs. 222.93 lakhs in FY 2022–23. The significant increase in FY 2024–25 was primarily due to higher advances to suppliers amounting to Rs. 184.49 lakhs in FY 2024–25, reflecting the procurement requirements for increased production. In FY 2023–24, the balance declined to Rs. 157.67 lakhs mainly due to a reduction in advances to suppliers to Rs. 108.38 lakhs in FY 2023–24. The subsequent rise to Rs. 351.09 lakhs as of December 31, 2025, was largely attributable to higher advances to suppliers of Rs. 280.20 lakhs, loans and advances to employees amounting to Rs. 35.90 lakhs and prepaid expenses of Rs. 9.11 lakhs and preliminary expenses for IPO amounting 17.74 lakhs.

Property, Plant and Equipment:

Property, Plant and Equipment increased from ₹50.40 lakhs in FY 2023 to ₹203.20 lakhs in FY 2024 mainly due to capital expenditure incurred during the year. Additions include vehicles amounting to ₹45.80 lakhs, land amounting to ₹52.09 lakhs, office equipment and furniture amounting to Rs. 68.94 lakhs and addition of a building amounting to ₹23.74 lakhs. These additions resulted in an increase in the closing balance of Property, Plant and Equipment as at the end of FY 2024. It increased from ₹203.20 lakhs in FY 2024 to ₹245.34 lakhs in FY 2025 due to addition of PPE of ₹106.14 lakhs which mainly includes furniture and fixtures of ₹40.30 lakhs and vehicles of ₹36.18 lakhs. It further increased from ₹245.34 lakhs to ₹323.31 lakhs mainly due to addition of furniture and fixtures worth ₹60.59 lakhs and vehicles amounting to ₹67.43 lakhs.

Employee Benefit Expenses:

Employee benefit expenses increased from ₹386.80 lakhs in FY 2022–23 to ₹578.76 lakhs in FY 2023–24 due to an increase in employee strength from 93 to 139, including engagement of beauty advisors as part of business expansion, which raised salaries from ₹289.71 lakhs to ₹486.15 lakhs. As this model did not yield commensurate benefits, it was discontinued, and pursuant to workforce rationalisation and attrition, employee strength reduced to 95 as at March 31, 2025, resulting in a decline in salaries to ₹403.36 lakhs and employee benefit expenses to ₹533.88 lakhs in FY 2024–25. The reduction in employees covered under PF and LWF during FY 2024–25 was primarily due to the decrease in overall employee strength and eligible employees.

Finance Cost:

Finance costs increased from ₹86.82 lakhs in FY 2024 to ₹119.57 lakhs in FY 2025, due to increase in borrowings to support expanded operations. The rise reflects the company's additional working capital and operational financing requirements during the period.

Other Expenses:

Other expenses increased from ₹547.13 lakhs in FY 2023 to ₹1,108.30 lakhs in FY 2024, reaching ₹1,691.70 lakhs in FY 2025, driven primarily by the company's business expansion and revenue growth from ₹2,237.85 lakhs in FY 2023 to ₹4,779.81 lakhs in FY 2025. A significant contributor to this increase was advertisement expenses, which rose from ₹253.88 lakhs in FY 2023 to ₹546.49 lakhs in FY 2024 and ₹886.18 lakhs in FY 2025. The increase reflects the company's focus on marketing initiatives to drive sales, enhance brand visibility, and support higher revenue. Travelling expenses also increased from ₹44.41 lakhs in FY 2023 to ₹117.40 lakhs in FY 2024 and ₹118.92 lakhs in FY 2025, mainly on account of sales and marketing activities, including field operations and business development efforts to expand the company's reach. Freight and courier expenses grew from ₹98.95 lakhs in FY 2023 to ₹182.81 lakhs in FY 2024 and ₹280.77 lakhs in FY 2025, reflecting higher shipment volumes for goods sold through online channels, aligned with the company's e-commerce and distribution expansion. Finally, commission expenses increased from ₹31.81 lakhs in FY 2023 to ₹54.39 lakhs in FY 2024 and ₹156.55 lakhs in FY 2025, primarily because commissions are revenue-linked and revenue increased substantially over the period. This demonstrates the direct correlation between sales growth and performance-linked expenses. Overall, the rise in other expenses mirrors the company's scaling operations, enhanced sales and marketing efforts, and expanding e-commerce distribution, all contributing to sustained revenue growth.

For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for Equity Shares of

the Offer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.
