INTERNAL RISK FACTORS

Risk Relating to the Company's Business

- 1. Our business is capital intensive, and our inability to raise funds on acceptable terms when required could materially and adversely affect our business, financial condition and results of operations.***

We require significant amount of capital for property, plant and equipment and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow our business and increase/maintain our future profitability. As of March 31, 2026, 2025 and 2024, our net fixed assets were ₹ 581.95 lakhs, ₹ 420.18 lakhs and ₹ 222.15 lakhs, respectively. Further our capital work – in – progress as of March 31, 2026, 2025 and 2024 amounted to ₹ 3,619.54 lakhs, ₹ 355.59 lakhs, ₹ 179.76 lakhs and Nil. For details of fixed assets please refer ***Annexure XIV in the section titled “Restated Financial Statements”*** on page 172 of this Red Herring Prospectus. Our ability to obtain such financing on acceptable terms is dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, levels of our existing indebtedness, future financial condition, results of operations and cash flows and other factors beyond our control. There can be no assurance that we will be able to raise additional financing on favorable terms in a timely manner or at all. If we are unable to raise additional funds whenever required, or on terms favorable/acceptable to us, we may be required to scale down our expansion & growth plans and/or reduce capital expenditures and the size of our operations, any of which could materially and adversely affect our business, financial position and results of operations. However, there were no instances in the past where we were unable to raise additional funds whenever required.

Our capital expenditure requirements and growth strategy require continued access to significant amounts of capital on acceptable terms, as our continuous cash flows are the source for purchase of new equipment, which is directly responsible for our business growth. We cannot assure you that market conditions and other factors will permit financing through debt or equity, on terms acceptable to us or at all. We strive to maintain strong relationships with banks to increase our financing flexibility. However, we cannot assure you that our relationships with lenders will not change or that lenders will continue lending practices we are familiar with. Our lenders may implement new credit policies, adopt new pre-qualification criteria or procedures, raise interest rates or add restrictive covenants in loan agreements, some or all of which may significantly increase our financing costs, or prevent us from obtaining financings totally. As a result, our revenue growth may reduce, and our business, financial condition and results of operations may be materially and adversely affected. All of these factors may result in an increase in the amount of our borrowings and the continued increase in capital requirements may have an adverse effect on our financial condition and results of operations.

- 2. Our business is working capital intensive. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations***

A significant portion of the working capital funds of our Company is blocked due to inventories, trade receivables and advances to vendors. As on March 31, 2026, our Company's net working capital consisted of ₹ 1074.00 lakhs. Further, as on March 31, 2025, our Company's net working capital consisted of ₹ 871.11 lakhs as against ₹ ₹ 272.21 lakhs as on March 31, 2024. As on the date of this Red Herring Prospectus, we meet our working capital requirements in the ordinary course of its business from our loans and from our internal accruals. This requires us to obtain financing through various means. For the period ended on March 31, 2026, our borrowings to meet working capital requirement stood at ₹ ₹ 1074.00 lakhs and as on March 31, 2025, our borrowings to meet working capital requirement at ₹ 871.11 lakhs. In the last three (3) financial years, we have generated sufficient cash flows to make the required payments. We may incur additional indebtedness in the future. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and investors interest in the Company and could adversely impact our Equity Share price.

Furthermore, the objects of the Issue include funding working capital requirements of our Company. For more information in relation to such management estimates and assumptions, please see “Objects of the Issue” on page 82. Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

In the last three (3) financial years, our Company has been able to raise funding from bank as and when the need has arisen and has not defaulted its financial commitments. However, any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credits which may adversely affect our ability to conduct our business and have a material adverse effect on our financial condition and results of operations. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to obtain additional financing on acceptable terms and in a timely manner could adversely impact our business, results of operations and financial condition.

The table set forth below presents the working capital requirement for the financial year 2024, 2025 and 2026. The working capital gap (WCG) has been met with bank borrowing and Internal cash Accruals of the Company.

3. We primarily operate on a purchase order-based model and does not have long-term contractual arrangements with our customers, which may adversely affect the stability and predictability of our revenues.

Our business is dependent on purchase orders received from our customers, and we generally do not enter into long-term contracts with our customers. As a result, there is no guarantee that our customers will continue to purchase our products, and they may choose to reduce or discontinue their orders at any time. This lack of long-term commitments exposes us to uncertainties in demand and revenue, making it challenging to predict future sales and plan our operations effectively. If our customers decide to source their requirements from other suppliers or reduce their reliance on our products, it could have a material adverse effect on our business, financial condition, and results of operations. Consequently, there is no commitment on the part of the customer to continue to place new orders with us and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences and we may be unable to procure repeat orders from our customers.

4. Our Company is dependent on external suppliers for our raw material requirements.

Our Company is dependent on third-party suppliers for the procurement of raw materials required for our manufacturing operations. We do not manufacture such raw materials in-house and rely on external suppliers for their timely availability, quality, and pricing.

Any disruption in the supply of raw materials - whether due to supplier related constraints, delays in delivery, price volatility, transportation bottlenecks, regulatory changes, or force majeure events—could adversely affect our changes in commercial terms production schedules and operational efficiency. Further, our suppliers may be unable or unwilling to continue supplying such raw materials on acceptable commercial terms, or at all.

We may not always be able to identify or qualify alternative suppliers within a short period or on comparable terms. Any delay in procurement, inability to replace suppliers, or increase in procurement costs may lead to interruptions in manufacturing, increased operating expenses, and reduced margins. In addition, dependence on a limited number of suppliers for certain raw materials may increase our exposure to supply-side risks.

While our Company has not historically experienced any material disruption in the supply of raw materials, there can be no assurance that such events will not occur in the future. Any of the foregoing factors could materially and adversely affect our business, financial condition, results of operations, cash flows, and prospects.

5. Our business is dependent on our manufacturing facility, and any disruption in manufacturing operations could adversely affect our business.

Our business is dependent on our manufacturing facility located at Roorkee, Haridwar District, Uttarakhand, and any disruption, slowdown or shutdown of operations at our facility could have a material adverse effect on our business, financial condition and results of operations.

While most of our manufacturing processes is automated and our labour requirements are comparatively limited, our operations remain exposed to risks such as machinery breakdowns, equipment failure, power supply disruptions, industrial accidents, fire incidents, natural calamities, supply chain interruptions, regulatory actions, or any other unforeseen events affecting the manufacturing facility. In particular, our manufacturing operations involve the handling and processing of rubber, which is a combustible material, and any fire, explosion or industrial accident at our manufacturing facility could result in loss of life, personal injury, damage to property, interruption of operations and potential claims for compensation, insurance claims or litigation.

Any significant malfunction, breakdown or failure of our machinery, utilities or supporting infrastructure may require substantial repair or replacement, involve significant costs, and may result in partial or complete suspension of manufacturing operations until such issues are resolved. Further, delays in procuring critical spare parts or replacement equipment could prolong operational disruptions. Although automation reduces dependence on manual labour, availability of technical personnel for operation, supervision and maintenance of automated systems remains critical, and any shortage or attrition of such personnel could also adversely impact our operations.

In addition, we may be required to undertake planned shutdowns for maintenance, safety inspections and equipment upgrades, during which production may be temporarily halted or reduced. Since our manufacturing operations are currently concentrated at a single operational location, any prolonged disruption could lead to loss of revenue, under-utilization of capacity, delays in customer deliveries and potential loss of customers. However, we have completed construction of additional manufacturing facility, which is expected to commence operations in the near future.

Further, our manufacturing operations are subject to state-specific regulations, policies, taxes, duties and incentives applicable in Uttarakhand. Any adverse changes in state or local government policies, or political, economic, environmental or demographic developments in the region, could negatively impact our operations.

Although we have not experienced any significant disruption in our manufacturing operations in the past, we cannot assure you that such events will not occur in the future. Our inability to effectively manage, mitigate or recover from such disruptions, including those arising from industrial accidents or fire-related incidents, in a timely and cost-effective manner could materially and adversely affect our business, financial condition, results of operations and future prospects.

6. *We rely on third-party transportation providers for all of our input materials and product distribution. Failure by any of our transportation providers to deliver our input materials and products on time or at all, could result in loss in sales.*

We depend on third-party transportation to receive input materials required for our products and to deliver our finished products to our customers. We do not own any trucks or commercial vehicles and typically use third-party logistics providers for our product distribution and input materials procurement. This makes us dependent on such third-party transportation providers. Weather-related problems, strikes, or other events which affects third-party transportation could impair our ability to receive the raw materials and/or deliver the requisite quantities of products in time to our customers, which may result in cancellation or non-renewal of purchase orders, and could adversely affect the performance of our business, results of operations and cash flows. However, during the last three Financial Years, we have not experienced any material loss of sales on account of failure by any of our transportation providers to deliver input materials or finished products. Further, as we have not entered into any long-term or exclusive agreements with our transportation providers, if we lose one or more of our existing service providers or are required to engage alternative logistics providers, we may not be able to obtain transportation services on terms as favourable as those currently available to us. Any increase in transportation or logistics costs, or reduced availability of such services, could adversely affect our margins, operating results and financial condition.

7. *Rapid technological changes and advancements in manufacturing processes may render our existing technologies obsolete or require us to incur significant capital expenditure to remain competitive.*

Our business operations are dependent on the effective functioning and continuous modernization of our manufacturing technologies and equipment. Ongoing technological advancements in the industry may result in existing machinery, processes or production methods becoming obsolete or less competitive over time. In order to maintain operational efficiency, product quality and cost competitiveness, we may be required to upgrade, replace or invest in new technologies, machinery and equipment on a periodic basis.

The adoption of new technologies or modernization of existing facilities may involve substantial capital expenditure, increased operating costs, temporary disruptions to production and additional training requirements for our workforce. There can be no assurance that such investments will result in commensurate improvements in productivity, cost efficiency or profitability. Further, any delay or inability to adopt new technologies in a timely manner may adversely affect our operational efficiency, product quality and competitive position.

If we are unable to anticipate or respond effectively to technological developments or if the cost of upgrading our manufacturing capabilities is higher than anticipated, our business operations, financial condition, results of operations and future prospects may be materially and adversely affected.

8. *The price, at which we are able to obtain the raw material for manufacture of our finished products depend largely on prevailing market prices. Increase in costs of our raw materials could have a material adverse effect on our Company's business, profitability and results of operations and cash flows.*

We source raw material such as for our manufacturing operations from a combination of domestic and foreign suppliers.

The table below shows the cost of materials consumed during the past three financial years:

(₹ in lakhs)

Particulars	Fiscal Year 2026		Fiscal Year 2025		Fiscal Year 2024	
	Amount	As a % of Revenue from Operations	Amount	As a % of Revenue from Operations	Amount	As a % of Revenue from Operations
Total cost of materials consumed	2,855.05	57.77	2,058.44	56.84	1,603.46	78.88

Our inability to procure raw materials on terms more favourable, or at all, may constrain our production capabilities, may adverse effect on our business, financial condition and results of operations. Any increase in price of cost of inputs as well as limitations and/ or disruptions in the supply of such inputs, will adversely affect our business and financial condition. We cannot assure you that we will be able to timely or adequately implement price increases to offset any escalation in input costs.

Further, any substantial delay in supply or non-conformance to quality requirements by our suppliers can impact our ability to meet our customer requirements and thus impact our business and results of operations. We generally procure raw materials based on orders in hand and anticipated price trends.

In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, environmental factors and changes in government policies and regulations. There can be no assurance that we will always be able to procure required raw materials at acceptable prices or quantities, or that we will be able to pass on any increase in raw material costs to our customers.

While historically, we have not experienced a shortfall or limited availability of raw materials that has affected our operations, there can be no assurance that significant or prolonged supply interruptions or shortages will not occur in the future. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins and adversely affect our results of operations. Further, the absence of long-term supply contracts may expose us to price volatility and supply risks, which could adversely impact our ability to meet customer demand in both the short and long term.

For further risks related to our suppliers, see *“We depend on a limited number of suppliers for raw materials. Any interruption in the availability of raw materials could adversely impact our operations. Further, any failure by our suppliers to provide raw materials to us on time or at all, or as per our specifications and quality standards could have an adverse impact on our ability to meet our manufacturing and delivery schedules”* on page 23.

9. *Our Company and our Director are party to certain tax proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.*

Our Company and Director are party to certain tax proceedings. These proceedings are pending at different levels of adjudication before various legal forums. If such claims are determined against Company, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. Our business heavily relies on our customer base, and the potential loss of any of our customers could have a negative impact on our sales and, consequently, our overall business and financial performance. If we were to lose one or more of our significant or key customers or experience a reduction in the volume of business they provide, it could result in adverse consequences for our business, financial health, and cash flow. We do not enter into long-term or binding contracts with our customers, and our business relationships are primarily based on purchase orders or ongoing commercial arrangements, which exposes us to the risk of sudden reduction or discontinuation of business without prior notice. As a result, we cannot guarantee that we will be able to maintain the same levels of business as we have historically or secure continued business from our major customers on mutually beneficial terms.

Additionally, reducing our dependence on a few key customers may pose challenges in the future. Furthermore, factors such as a decline in our product or service quality, increased competition, or shifts in market demand could jeopardize our ability to retain these valuable customers. There is no assurance that we will continue to generate the same amount of business, or any business at all, from these customers, and any loss of their business could significantly impact our revenue and overall financial performance. While our customer mix and revenue streams may naturally evolve with the addition of new clients in the ordinary course of operations, we maintain confidence in our ability to sustain existing business relationships and attract new customers. Nonetheless, it is essential to acknowledge that the continuity of long-term customer relationships and the timely acquisition of new clients are not guaranteed, and uncertainties exist in this regard. Our long-term relationships with customers are indicative of our quality consciousness and timely execution.

13. *We depend on a limited number of suppliers for raw materials. Any interruption in the availability of raw materials could adversely impact our operations. Further, any failure by our suppliers to provide raw materials to us on time or at all, or as per our specifications and quality standards could have an adverse impact on our ability to meet our manufacturing and delivery schedules.*

The table below sets forth the contribution of our top 10 suppliers to the total Cost of Raw Materials Consumed for the Financial Years ended March 31, 2026, 2025 and 2024.

We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

We source our raw materials from a limited number of third-party suppliers from various geographies including United States, United Arab Emirates. We do not have long-term contracts with our suppliers for such raw materials. Our dependence on foreign suppliers subjects us to certain risks and uncertainties which include political and economic instability in the countries in which such suppliers are located, disruptions in transportation, currency exchange rates and transport costs, amongst others. If we fail to (i) receive the quality of raw materials that we require; (ii) negotiate appropriate financial terms; (iii) obtain adequate supply of raw materials in a timely manner, or if our principal suppliers discontinue the supply of such raw materials, or were to experience business disruptions or become insolvent, we cannot assure you that we will be able to find alternate sources for the procurement of raw materials in a timely manner. Moreover, in the event that either our demand increases, or our suppliers experience a scarcity of resources, our suppliers may be unable to meet our demand for raw materials.

While other than in the ordinary course of business, there has not been any reduction or interruption in the supply of raw materials to our Company for the Financial year ended 2026, 2025 and 2024, any reductions, or interruptions in the supply of raw materials, and any inability on our part to find alternate sources in a timely manner for the procurement of such raw materials, may have an adverse effect on our ability to manufacture our products in a timely or cost-effective manner. The occurrence of any such event may adversely affect our business, results of operations, cash flows and financial condition.

14. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights*

Our Company has made application dated April 22, 2025, for its logo '

Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely

affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

Further, if we do not maintain our brand name and identity, which we believe is one of the factors that differentiates us from our competitors, we may not be able to maintain our competitive edge in India and abroad. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad.

For further details see “**Our Business - Intellectual Property**” and “**Government and Other Statutory Approvals**” on pages 120 and 200, respectively.

15. Our Company has negative cash flows from its investing activities as well as financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our investing activities as well as financing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(in lakhs)

Particulars	As on March 31		
	2026	2025	2024
Net Cash Flow from / (used in) Investing Activities.	(3,464.81)	(1,174.02)	(171.90)
Net Cash Flow from / (used in) Financing Activities	2,460.06	983.86	(0.11)

Negative cash flows from investing activities reflect expenditures towards capital assets, investments, and other long-term initiatives, while negative cash flows from financing activities primarily indicate repayment of borrowings and related financing obligations.

Sustained negative cash flows may adversely affect our liquidity position and could limit our ability to fund our capital expenditure requirements, pursue growth opportunities, or meet our financial obligations in a timely manner. If we are unable to generate sufficient positive cash flows from our operating activities or raise additional funds on acceptable terms, our business operations, financial condition, and future growth prospects could be materially and adversely affected.

16. We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.

Our Company is engaged in the business of manufacturing and supplying reclaimed rubber. Given the nature of our products and the industry in which we operate, our customers maintain stringent quality standards and delivery timelines. Adherence to prescribed quality specifications and technical requirements is critical to our manufacturing process, and any deviation or defect in our products may result in rejection or cancellation of orders by our customers.

Further, any failure to deliver products within the agreed timelines or in the required quantities may adversely affect customer relationships and result in order cancellations. Such events may also adversely impact our reputation, goodwill and future business prospects. In addition, our customers may seek price reductions, set-offs against outstanding payments, indemnification, or may modify their procurement strategies by insourcing production or substituting our products with alternative materials. Any such actions could have an adverse effect on our business operations, cash flows, results of operations and financial condition.

17. We may not be successful in effectively implementing our business and growth strategies, which could adversely affect our business and financial performance.

The success of our business is dependent, in significant part, on our ability to effectively implement our business plans and growth strategies in a timely and cost-efficient manner. While we have historically executed our strategies successfully, there can be no assurance that we will be able to do so in the future or that such strategies will achieve the intended results. Our ability to implement these strategies may be affected by various factors, including changes in market conditions, customer demand, competitive dynamics, regulatory requirements, and macroeconomic developments.

Further, the execution of our growth strategies may require substantial investments in infrastructure, technology, manpower and working capital, and may place additional demands on our management, operational systems and internal controls. Any inability to scale our operations, integrate new processes, or enhance our systems and controls in line with our growth objectives

could adversely affect our efficiency and performance.

Additionally, changes in applicable laws, regulations or government policies may increase compliance requirements or restrict our operations, thereby impacting our ability to execute our strategic initiatives as planned. Failure to successfully implement our business and growth strategies could have a material adverse effect on our business operations, financial condition, results of operations and future prospects.

18. *Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*

Our ability to effectively utilize our manufacturing capacity is dependent on several factors, including uninterrupted operations at our manufacturing facility, availability of raw materials, consistency of power and water supply, efficiency of machinery and equipment, labour availability, market demand, and the procurement patterns and requirements of our customers. As on the date of this Red Herring Prospectus, we operate one manufacturing facility located at Roorkee, Haridwar District.

Our manufacturing operations may be adversely affected by factors such as equipment breakdowns, scheduled or unscheduled maintenance shutdowns, disruption in supply of utilities, labour-related issues, regulatory or environmental compliances, or constraints in sourcing adequate raw materials. Any such disruptions may lead to partial or complete shutdowns of our manufacturing operations, thereby resulting in under-utilization of our installed capacity. Further, fluctuations in demand for our products, changes in customer preferences, competitive pressures, adverse industry conditions, or lack of demand may result in lower order volumes, which could negatively impact our capacity utilization levels. Persistent under-utilization of manufacturing capacity may lead to higher per-unit fixed costs, reduced operating efficiencies and margins, and may adversely affect our profitability, cash flows, and financial condition.

Any future expansion or capital investment undertaken by us to enhance manufacturing capacity may not yield the expected returns if we are unable to achieve optimal utilization levels. There can be no assurance that we will be able to operate our manufacturing facilities at or near optimal capacity levels on a sustained basis, which could have a material adverse effect on our business, results of operations, financial condition, and future prospects.

Information relating to our capacity utilization of our manufacturing facility included in this Red Herring Prospectus is based on various assumptions and estimates of our management and independent chartered engineer, namely, Mr. Vineet Chauhan, SAM Technology and Calibration, including proposed operations, assumptions relating to availability and quality of raw materials, potential utilization levels, and operational efficiencies. Actual manufacturing volumes and capacity utilization rates may differ significantly from the estimated production capacities of our manufacturing facility. Undue reliance should therefore not be placed on the information relating to our installed capacities or historical capacity utilization included in this Red Herring Prospectus.

Set forth below are the details of the installed capacity and capacity utilization of Manufacturing Unit -I, located at Plot No. 59–62, Shiv Ganga Lakeshri, Roorkee, Haridwar, Uttarakhand – 247667, for the financial years ended March 31, 2026, March 31, 2025 and March 31, 2024.

Particulars	Fiscal Year 2026	Fiscal Year 2025	Fiscal Year 2024
Installed Capacity (MT)	14,100	14,100	14,100
Actual Production (MT)	12,690	9,015.54	5,348.13
Capacity Utilization	90.00%	63.94%	37.93%

**As certified by Mr. Vineet Chauhan, Chartered Engineer (AM1803827), SAM Technology and Calibration by their certificate dated 21-05-2026.*

Further, there is no guarantee that our future production or capacity utilization levels will match or exceed our historical levels. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could increase our cost of production and operating costs and adversely impact our business, growth prospects, and future financial performance. The relatively lower utilisation in Fiscal 2024 was primarily due to the Company operating under its existing production setup. The increase in utilisation in Fiscal 2025 and Fiscal 2026 reflects improved operational efficiencies, higher production volumes and better utilisation of the installed manufacturing capacity, which enabled the Company to achieve higher production levels. Our expected return on capital invested is subject to, among other factors, our ability to ensure satisfactory performance of personnel to further grow our business, our ability to absorb additional infrastructure costs, and utilize the expanded capacities as anticipated.

19. *We operate in a competitive industry, and increased competition may adversely affect our business, financial performance and market position.*

The industry in which we operate is competitive and comprises organized and unorganized players, both domestic and international. Competition is based on several factors, including product quality, pricing, technical capabilities, delivery timelines, customer relationships and service reliability. Certain competitors may have greater financial strength, broader customer bases, superior technological capabilities or longer operating histories, enabling them to respond more effectively to changing market conditions.

Additionally, unorganized players may offer products at lower prices, which may exert downward pressure on pricing and margins. Increased competition could result in loss of market share, reduced pricing power, and pressure on operating margins. If we are unable to compete effectively in terms of quality, pricing or service delivery, our business operations, growth prospects and financial performance may be adversely affected.

20. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory/stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we are unable to sell the inventory manufactured by us in a timely manner, we may be required to write down the value of such inventory and may still be obligated to make payments to our suppliers, resulting in increased working capital requirements or the need for additional vendor financing. This could adversely affect our income, cash flows, and liquidity.

21. *Our success is dependent on our Promoters, management team and skilled manpower. Our inability to attract and retain key personnel or the loss of services of our Promoter or Managing Director, Whole time Directors and Executive Directors may have an adverse effect on our business prospects.*

Our performance and its success largely depend on the efforts and abilities of our Promoters. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business. We believe that our relation with our promoters, who have experience in the rubber industry sector, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our Promoters and directors have been actively involved in the day-to-day operations and management of the Company. Our procurement of business orders also has high dependence on our Promoters relationship with customers and industry experiences of our Promoters. We believe that the inputs and experience of our Promoters and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We also depend significantly on the expertise, experience and continued efforts of our employees; hence, our performance and success substantially depend on the ability to attract and retain our key employees, including our experienced personnel. There can be no assurance that any member of our management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could impair our ability to manage and expand our business.

For further details of our Promoters and Management, please refer chapter titled “Our Promoters and Promoter Group” and “Our Management” beginning on Page 164 & 152 of this Red Herring Prospectus.

22. *Delays or defaults in client payments could affect our operations.*

Our business operations are exposed to working capital risks arising from delays or defaults in payments by our customers. We may experience delays in receiving payments for products supplied, which could adversely affect our ability to meet our financial obligations, including procurement of raw materials, payment to suppliers, employees and statutory authorities.

Further, any delay or failure on our part to deliver products in the required quantity, quality or within agreed timelines may result in payment delays, deductions, disputes or refusal of payment by customers. Prolonged delays or defaults in customer payments could adversely impact our liquidity, cash flows, operational efficiency and overall financial condition.

23. *Certain of our properties, including our Registered Office and some of our manufacturing units, are not owned by us.*

Our Registered Office, located at Saharanpur, Uttar Pradesh, is not owned by the Company and has been taken on a leave and license basis from our promoter group entity, M/s Horizon Infracon Private Limited. In addition, certain portions of our Manufacturing Unit III are also held on lease arrangements from group entities.

Since these premises are not owned by the Company, we do not have ownership rights over such properties. Any termination, non-renewal, or adverse modification of the relevant lease or leave and license arrangements, whether due to disputes, changes in commercial terms, or otherwise, may require us to vacate such premises and relocate our operations.

In the event that we are unable to continue to use such premises or secure alternative arrangements on commercially acceptable terms in a timely manner, our operations, including administrative and manufacturing activities, may be disrupted, and we may incur additional costs.

24. Certain historical share allotments made against cash consideration are not supported by bank statements

In the past, certain share allotments were made against share application money received in cash. Accordingly, corresponding bank statement records are not available for such transactions by their nature. The Company has relied on alternative supporting documents, including entries in its books of accounts (Tally ledger) and a certificate issued by a Chartered Accountant, to evidence such transactions.

The details of such allotments made against cash consideration are as follows:

Date of Allotment	No. of Shares Allotted	Allottee Name(s)
31-03-2007	5,570	Praveen Kumar
	7,000	Lovkesh Madan
	5,570	Pradeep Kumar

	5,100	Ashok Kumar Bajaj

In respect of all other allotments where consideration was received through banking channels, the Company possesses the relevant bank statements evidencing such receipts.

Any inability to independently verify the aforesaid cash-based transactions to the satisfaction of stakeholders may impact the perceived reliability of such historical transaction records.

25. We may be adversely affected by employee misconduct, errors or omissions, which could expose us to operational, financial and reputational risks.

Our business operations are subject to various risks arising from potential misconduct, negligence or errors committed by our employees, consultants or agents. Such acts or omissions may result in operational inefficiencies, financial losses, regulatory actions, litigation, or reputational harm. While we have not experienced any material instances of employee misconduct, negligence or operational errors in the past, there can be no assurance that such incidents will not occur in the future.

Despite the implementation of internal controls, policies and procedures designed to prevent and detect such misconduct or errors, there can be no assurance that these measures will be effective in all circumstances.

Employee misconduct or errors may include, among others, non-compliance with internal policies or regulatory requirements, operational lapses, data mishandling, or failure to adhere to safety and quality standards. Any such incidents could expose us to claims, penalties or regulatory scrutiny, and may adversely affect our business operations, financial condition, results of operations and reputation.

26. If the price of energy sources increases, our operating expenses could increase significantly and our results of operations and cash flows could be materially and adversely affected.

Our manufacturing facility relies principally on electrical power. High demand and limited availability of electrical power can

result in significant increases in energy costs, which could materially increase our operating expenses at our manufacturing facilities. Increased oil costs would also increase our costs to transport our products from our manufacturing facilities to our distribution network. There is no assurance that we will be able to secure stable supplies of energy at favourable terms, or at all, to maintain our manufacturing operations or sustain our future expansion. Moreover, increases in energy costs could impact consumer and industrial behaviour. General increases in energy costs could also cause businesses to decrease investment and slow down overall economic activity. The occurrence of any of the foregoing could negatively impact demand for our rubber products.

27. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event, we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

28. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.

We have entered into several related party transactions with our Promoters, relative of promoter, and entities forming a part of our promoter group in the ordinary course of our business. For further details, please refer to “Annexure of Related Party Transactions” under Section titled — “Restated Financial Information” at page 172. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

29. Our contingent liabilities as stated in our Restated Financial Statements could adversely affect our financial condition.

30. *Loans availed by our Company has been secured on personal guarantees of our directors. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.*

Certain loans and credit facilities availed by our Company have been secured, inter alia, by personal guarantees provided by our Promoter and Directors, Mr. Mohit Bajaj and Mrs. Malika Bajaj. These personal guarantees have been furnished as a condition precedent for the sanction and continuation of such borrowings by our lenders. Accordingly, the availability, terms, and continued access to these borrowings are, to a significant extent, dependent upon the willingness and financial capacity of our Directors to provide and maintain such personal guarantees.

In the event of any default by our Company in meeting its repayment obligations, or in the event of breach of any financial or non-financial covenants under the relevant financing agreements, the lenders may invoke the personal guarantees provided by our Directors. Invocation of such personal guarantees may have several adverse consequences for our Company. These may include, without limitation, strained relationships with our Directors, potential disputes or litigation, reputational risks, and diversion of the time and attention of our Directors away from the management of the Company's business and operations.

Further, if any personal guarantee is invoked, our Directors may be required to discharge the obligations owed to lenders from their personal assets. Any such action could impair the personal financial position of our Directors and may reduce their ability or willingness to continue providing strategic, financial, or managerial support to the Company. In certain circumstances, invocation of personal guarantees could also lead to changes in the management or ownership structure of the Company, which may adversely affect business continuity.

Additionally, the reliance on personal guarantees may limit our ability to restructure or refinance our existing borrowings on favorable terms, particularly if our directors are unwilling or unable to extend or renew such guarantees in the future. There can be no assurance that alternative security or financing arrangements would be available on comparable terms, or at all.

Any of the foregoing events could materially and adversely affect our business, financial condition, results of operations, cash flows, and prospects.

For further details regarding loans availed by our Company, please refer chapter titled "**Financial Indebtedness**" beginning on page 176 of this Red Herring Prospectus.

31. *One of our Directors is unable to trace her educational qualification documents*

Our Director, namely Ms. Harpreet Kaur, is currently unable to trace the documents evidencing her educational qualifications. Accordingly, the details relating to her educational qualifications have not been disclosed in this Red Herring Prospectus. Further, an application has been made to the concerned university for issuance of the relevant documents; however, the same have not been received as of the date of this Red Herring Prospectus. Further, there can be no assurances that she will be able to trace or obtain the relevant documents pertaining to her educational qualifications in future or at all. For details of her profile, see section "**Our Management – Brief Biographies of our Directors**" on page 152.

32. *An inability to comply with repayment and other covenants in the financing agreements or otherwise meet our debt servicing obligations could adversely affect our business, financial condition, cash flows and credit rating.*

Our Company has entered into financing arrangements with banks for term loan and working capital facilities. As of March 31, 2026, our total secured borrowings amounted to ₹ 3,575.66 lakhs. The agreements with respect to our borrowings contain restrictive covenants, including, but not limited to, requirements that we obtain consent from the lenders prior to undertaking certain matters including, among others, effecting a merger, amalgamation or scheme of arrangement, change in capital structure of our Company subject to the threshold prescribed for the shareholding of certain shareholders of our Company and effecting change in the constitutional documents or management of our Company. For further details, see "**Financial Indebtedness**" beginning on page 176. Under the terms of our secured borrowings, we are required to create a charge by way of hypothecation on the assets of our Company, together with cash in hand and bank accounts. As these assets are hypothecated in favour of lenders, our rights in respect of transferring or disposing of these assets are restricted. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others, change in the capital structure, availing additional borrowings, change in ownership or management control, changes in shareholding pattern and management set-up including its constitution and composition, amalgamation, demerger, merger, acquisition, corporate or debt restructuring or similar action. If we fail to meet our debt service obligations or covenants (or do not receive approvals from our lenders to undertake certain transactions) under the financing agreements, the relevant lenders could declare us to be in default of our agreements, accelerate the maturity of our obligations, enforce security, take possession of the assets. As a result, we may be forced to sell some or all of our assets if we do not have sufficient cash or credit facilities to make these repayments.

33. In addition to normal remuneration, other benefits and reimbursement of expenses, some of our Directors (Promoters) are interested in our Company through their shareholding and dividend entitlement, and have also provided personal guarantees in respect of certain borrowings of the Company.

In addition to receiving remuneration, other benefits and reimbursement of expenses, our Promoter Directors are interested in our Company to the extent of their shareholding and dividend entitlement in the Company. As a result of their shareholding, our Promoter Directors are able to exercise significant influence and control over the management and affairs of our Company, including the composition of our Board of Directors and matters requiring approval of shareholders by ordinary or special resolution.

Such concentration of ownership and control may limit the ability of our other shareholders to influence corporate decisions and may result in actions being taken that may not be in the best interests of all shareholders.

Further, certain of our Promoter Directors have provided personal guarantees in respect of loans availed by the Company. While these guarantees have been provided to support the Company's borrowings, any invocation, modification, withdrawal, or termination of such guarantees, or any dispute in relation thereto, could adversely impact the Company's financing arrangements, liquidity, and operations.

Any actual or perceived conflict of interest involving our Promoter Directors, including their financial interests in the Company, may adversely affect our business, financial condition, results of operations, and prospects.

34. Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

After the issue our promoters along with the promoter group will continue to hold collectively [●] % of the post Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

35. Any non-compliance or delays in ESIC, EPF and GST Return Filings may expose us to penalties from the regulators.

As a Company, we are required to file GST returns and make payments in respect of Employee Provident Fund and Employee State Insurance with the respectively authorities. However, there are certain inadvertent delays in relation to filling of various returns in the past for which the Company have paid the penalties and taken the steps to improve the internal system to mitigate the difficulties. Such non-compliances/delays were primarily inadvertent and administrative in nature. In certain instances, the Company also experienced technical or portal-related issues which resulted in delays in filing the relevant returns within the prescribed timelines.

To address these issues and prevent future delays, we have taken several corrective actions, including:

Increasing Manpower: We have augmented our team to ensure that there is sufficient coverage to manage the GST filing process efficiently, even in cases of unforeseen technical issues.

Enhanced Monitoring and Vendor Follow-up: We have implemented stricter monitoring and internal tracking systems to ensure that all filing deadlines are met without exception. Additionally, we have instituted a more rigorous follow-up process with our vendors to ensure they adhere to filing deadlines, thereby preventing delays caused by external parties.

Backup Procedures: We have established backup procedures to handle technical difficulties, including ensuring that alternative systems or personnel are available to complete filings on time.

Training and Accountability: Additional training has been provided to our staff to reinforce the importance of meeting compliance deadlines, and accountability measures have been introduced to prevent recurrences.

However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our filings or payment in future, which may adversely affect our business, financial condition, and reputation. Any regulatory penalty, if imposed, shall be paid from the internal accruals of the Company, and no proceeds from the Issue (including amounts allocated towards General Corporate Purposes) shall be utilized for such purposes.

36. *We have not commissioned an industry report for the disclosures made in the section titled ‘Our Industry’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have not commissioned an independent industry report for the disclosures made in the section titled “Our Industry” in this Red Herring Prospectus. The information contained therein has been derived from publicly available sources, industry publications and online data, and has not been independently verified by us. While we believe such information to be reliable, we cannot assure its accuracy, completeness or continued relevance.

Certain assumptions have been made in presenting industry-related data, and actual industry conditions or our competitive position may differ materially from those described. Further, the sources of such data do not constitute endorsements of our Company or our securities. Accordingly, investors should not place undue reliance on the industry data contained in this Red Herring Prospectus while making an investment decision.

37. *None of the Executive Directors of the Company have experience of being a director of a public listed company.*

The Directors of the Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, the company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. The company will also be subject to the SEBI Listing

Regulations, which will require it to file audited annual and unaudited quarterly reports with respect to its business and financial condition. If the company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, the company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of the company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of the company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

38. *Our future funding requirements, whether met through issuance of equity shares or other securities and/or through borrowings, may be prejudicial to the interests of our shareholders depending on the terms on which such funds are raised.*

We may require additional capital from time to time to meet our business and growth requirements. Any further issuance of equity shares or convertible securities may result in dilution of the shareholding of existing shareholders and may be undertaken on terms that may not be favourable to them. Alternatively, if such funds are raised through loans, debt instruments or preference shares, it may increase our interest or dividend obligations and fixed financial commitments, reduce our cash flows, and adversely affect our profitability, results of operations, financial condition and ability to pay dividends to our shareholders.

39. *Our Company is yet to place orders for the plant and machinery. Any delay in placing orders or procurement of such plant and machinery may delay the schedule of implementation and possibly increase the cost of commissioning the manufacturing unit.*

We intend to utilize a portion of the Net Proceeds for funding capital expenditure requirements for the purchase of machineries. Accordingly, orders worth ₹ 1,142.30 Lakhs towards costs of the plant and machineries are yet to be placed. There can be no assurance that we will be able to place orders for such machineries, in a timely manner or at all. We have not entered into any definitive agreements to utilize the Net Proceeds for these objects of the Issue and have relied on the quotations received from third parties for estimation of the cost.

We have obtained quotations from vendors for the proposed capital expenditure, all the quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. For further details, please see "Objects of the Issue" on page 82 of this Red Herring Prospectus.

Pending utilization of the Net Proceeds for the purposes described above, our Company may temporarily deposit the Net Proceeds within one or more scheduled commercial banks included in the Second Schedule of RBI Act as may be approved by our Board. We will appoint a monitoring agency for monitoring the utilization of Net Proceeds in accordance with Regulation 242 of the SEBI ICDR Regulations.

40. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

For details of our dividend history, please refer to the Chapter titled "**Dividend Policy**" beginning on page 171 of this Red Herring Prospectus.

41. *We are subject to impact of foreign exchange fluctuation. Any significant movement in foreign exchange rates, could adversely impact our costs of sourcing raw materials through imports, which in turn could adversely impact our operations.*

We are subject to the impact of fluctuations in foreign exchange rates. In the past, we have imported certain raw materials from outside India and may continue to do so in the future. Consequently, any significant adverse movement in foreign exchange rates, particularly depreciation of the Indian Rupee against foreign currencies, could increase our cost of sourcing such raw materials.

There can be no assurance that we will be able to effectively manage such exposure in the future. We may not be able to pass on the increased costs arising from foreign exchange fluctuations to our customers in a timely manner or at all.

Any volatility in foreign exchange rates may adversely affect our operating margins, profitability, cash flows, and overall financial condition, which in turn could have a material adverse effect on our business operations and results of operations.

The following table provides a breakdown of materials sourced from domestic suppliers and through imports for the periods indicated:

(₹ in lakhs)

Particulars	For the period ended					
	March 31, 2026		March 31, 2025		March 31, 2024	
	Amount	As a % of Cost of Raw Material Consumed	Amount	As a % of Cost of Raw Material Consumed	Amount	As a % of Cost of Raw Material Consumed
Raw material sourced through imports	212.73	7.45	-	-	-	-
Raw material sourced from domestic supplier	2,642.32	92.55	2058.44	100.00	1,603.46	100.00
Total	2,855.05	100.00	2058.44	100.00	1,603.46	100.00

42. *Certain key performance indicators for our listed industry peer included in this Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete*

Pursuant to the requirements of the SEBI ICDR Regulations dated November 21, 2022, we have included certain key performance indicators, comprising financial and operational information, for our listed industry peer, in the “Basis for Issue Price” beginning on page 97 of this Red Herring Prospectus. While our business comprises of the rubber industry, these listed industry peers are related to the industry. Although this information is sourced from and relied upon on the audited financial statements of the relevant listed industry peers for financial year 2026 as available on the websites of the Stock Exchange, including the annual reports of the respective companies for the year ended March 31, 2026 submitted to Stock Exchange, there is no assurance that this information with respect to industry peers is either complete. There are different methodologies and formulas used to compute the various ratios.

43. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

44. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

ISSUE RELATED RISKS

- 45. Any future issuance of Equity Shares or convertible securities, including options under any stock option plan or other equity linked securities may dilute your shareholding, and significant sales of Equity Shares by our major shareholders, may adversely affect the trading price of our Equity Shares.**

Future issuances of Equity Shares by our Company after this Offer will dilute investors holdings in our Company. Further, any significant sales of Equity Shares after this Offer may adversely affect the trading price of our Equity Shares. In addition, the perception that such issuance or significant sales of Equity Shares may occur may adversely affect the trading price of our Equity Shares and impair our future ability to raise capital through offerings of Equity Shares.

- 46. We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. any shortfall or delay in raising / meeting the same could adversely affect our growth plans, operations and financial performance.**

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for working capital or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company.

- 47. We propose to utilize the Net Proceeds for purposes identified in the section titled “Objects of the Issue” in this Red Herring Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior shareholders’ approval.**

We intend to use Net Proceeds from this Initial Public Offer for the purpose mentioned in the chapter titled “Objects of the Issue” – including funding working capital requirement, purchasing additional machinery for manufacturing and loan repayment. We intend to deploy the Net Proceeds in financial year 2026-27 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has been appraised by banks. Accordingly, within the parameters as mentioned in the chapter titled Objects of the Issue of this Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Offer as prescribed in the SEBI ICDR Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations.

For further details of the proposed objects of the Offer, refer chapter titled “*Objects of the Issue*’ beginning on page 82 of this Red Herring Prospectus.

- 48. Our funding requirements and the proposed utilization of Net Proceeds have not been appraised by any independent agency, which may pose risks to the effective deployment of funds and could adversely impact our business operations and financial performance.**

We intend to use the Net Proceeds for the purposes described in “*Objects of the Issue – Utilization of Net Proceeds*” on page 82. Our funding requirements are based on management estimates and our current business plans and has not been appraised by any bank or financial institution. The deployment of the Net Proceeds will be monitored by our Board/Audit Committee and the monitoring agency appointed pursuant to the SEBI ICDR Regulations. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations and other financial and operational factors. If we are unable to deploy the proceeds of the Offer in a timely or an efficient manner, it may affect our business and results of operations.

- 49. The average cost of acquisition of Equity Shares by our Promoters is lower than the Offer price determined in consultation with Book Running Lead Manager in accordance with the SEBI ICDR Regulations.**

The average cost of acquisition of Equity Shares for our Promoters is lower than the Offer Price. The details of the average cost of acquisition of Equity Shares held by our Promoters as at the date of the Red Herring Prospectus is set out below:

50. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time*

Following the Issue, we will be subject to a daily "Circuit Breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

51. *The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the offer price and you may not be able to Sell your Equity Shares at or above the Offer Price*

The Offer Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 97 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

52. *After this Offer, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop*

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Adverse media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Offer. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Offer or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Offer.

53. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

54. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

55. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under Current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 12.5% in excess of Rs.1,25,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

56. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and the majority of our assets are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- The macroeconomic climate, including any increase in Indian interest rates or inflation;
- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- Changes in India's tax, trade, fiscal or monetary policies;
- Political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- Occurrence of natural or man-made disasters;
- Prevailing regional or global economic conditions, including in India's principal export markets;
- Other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws.

57. *Taxes and other levies imposed by the Government of India or other State Governments, as well as policies and regulations, may have a material adverse effect on our business, financial condition and results of operations*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include

- Goods and Service Tax
- Income Tax

These taxes and levies affect the cost and prices of our services. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

58. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

59. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

60. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

61. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

62. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in other parts of the world, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

63. *A third party could be prevented from acquiring control of us because of the anti-takeover provisions under Indian law*

There are provisions in Indian law that may discourage a third party from attempting to take control over us, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Under the Takeover Regulations an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. These provisions may discourage or prevent certain types of transactions involving an actual or threatened change in control of us.

64. *Our ability to raise foreign capital may be constrained by Indian law*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Regulatory restrictions may limit our financing sources for our projects under development and hence could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that an adverse effect on our ability to raise foreign capital, which in turn may affect our business, prospects, financial condition and results of operation.

65. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders.

For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

66. *Significant differences exist between Ind AS and Indian GAAP and other accounting principles, such as IFRS and US GAAP, which may be material to investors assessments of our financial condition, result of operations and cash flows*

Our financial statements included in this Red Herring Prospectus are prepared and presented in conformity with Indian GAAP and restated in accordance with the requirements the SEBI (ICDR) Regulations and the Guidance Note on “Reports in Company Prospectuses (Revised 2016)” issued by the ICAI. Ind AS differs from Indian GAAP and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. Accordingly, the degree to which the Financial Statements included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should limit their reliance on the financial disclosures presented in this Red Herring Prospectus.

67. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

A public limited company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain their existing ownership, prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by a three-fourths majority of the equity shareholders voting on such resolution.

If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Assumptions for our estimated working capital requirements

The table below sets forth the details of holding levels (in days) for the financial year ended March 31, 2026, March 31, 2025 and March 31, 2024 on the basis of restated financial statements and the projected holding levels (in days) for the Fiscal 2027 and Fiscal 2028:

Particulars	Holding levels			
	March 31, 2024 (Restated)	March 31, 2025 (Restated)	March 31, 2026 (Restated)	March 31, 2027 (Estimated)
	(in Days)	(in Days)	(in Days)	(in Days)
Inventories	23	25	51	49
Trade Receivables	49	39	33	33
Trade Payables	7	4	18	19

Justification for “Holding Period” levels

The table below sets forth the key justifications for holding levels:

Sr. No.	Particulars	Details
1.	Inventories	In Fiscal 2025, the holding period increased marginally to 25 days from 23 days in Fiscal 2024. The year witnessed higher growth in revenue (excluding EPR sales) as compared to the previous fiscal. To support higher production volumes and ensure uninterrupted dispatch schedules, the Company maintained relatively higher levels of raw materials and finished goods inventory. However, this marginal increase in holding days reflects controlled and proportionate scaling of inventory in line with business expansion. For Fiscal 2026, the inventory holding period increased to 51 days, primarily due to bulk imports of raw materials undertaken as part of a strategic procurement initiative to optimize freight and logistics costs. International sourcing involves longer lead times and requires maintenance of adequate safety stock to mitigate risks such as shipping delays, port congestion, and customs clearance timelines. Accordingly, the higher holding period reflects a planned and commercially prudent inventory build-up to ensure cost efficiency, supply chain stability, and uninterrupted operations. Additionally, there was an increase in finished goods inventory during the year to ensure readiness for dispatch against anticipated orders. At higher operating volumes, base inventory levels across raw materials and finished goods rise proportionately to cater for more geographical location reaching larger customer base. In Fiscal 2027, the holding period is expected to stabilize to 49 days, reflecting operational stabilization and anticipated efficiency gains as procurement cycles, distribution networks and production planning processes mature at the expanded scale of operations. Further, the Company’s expansion into Rajkot, along with introduction of new product lines and strengthening of dealer networks, necessitates maintaining adequate finished goods inventory at central warehouses and channel levels to ensure service reliability and timely order fulfillment.
2.	Trade Receivables	In Fiscal 2025, the holding period reduced to 39 days from 49 days in Fiscal 2024. The Company undertook expansion initiatives resulting in increased scale of operations. In response, management strengthened its receivables monitoring mechanisms by implementing structured follow-up procedures, tighter credit controls and enhanced collection processes. These measures contributed to improved realization efficiency and a reduction in the average collection period, thereby strengthening the Company’s liquidity profile. The trade receivables holding period reduce to 33 days in Fiscal 2026 and is estimated to remain at similar levels i.e. 33 days in Fiscal 2027, reflecting a structured improvement in the Company’s receivables cycle post the expansion phase. The Company has rationalized credit terms by tightening credit periods for select customers and reducing extended credit offered during earlier market development stages. Further, a higher proportion of repeat and established customers is expected, enabling better credit discipline and improved collection visibility.
3.	Trade Payable	The Company maintains a conservative stance with respect to creditor balances at the close of the financial year. It is the established practice to rationalize and to the extent practicable, minimize outstanding trade payables as at year-end. In Fiscal 2025, the holding period reduced to 4 days from 7 days in Fiscal 2024. This decline reflects advance payments made for imported raw materials. Certain imports required advance payment terms, leading to lower outstanding creditor balances at period end. This also stays in line with the company’s internal policy of minimizing the outstanding payables during the year-end. The trade payables holding period increase to 18 days in Fiscal 2026 and is estimated to stabilize at 19 days in Fiscal 2027, reflecting normalization of the Company’s payment cycle. Going forward, with procurement schedules becoming more streamlined and bulk purchasing stabilizing, the Company expects a reduction in outstanding payables. Further, a relatively higher proportion of routine domestic procurement (as against advance-based imports) and continued adherence to its policy of timely settlement of dues will support lower payable days. The slight increase in Fiscal 2027 reflects alignment with agreed credit terms at a higher scale of operations, while maintaining disciplined payment practices.

**As certified by M/s Padam Dinesh & Co, Chartered Accountants and M/s V Singhi & Associates, Chartered Accountants, the Joint Statutory Auditors, by way of their certificate dated May 25, 2026.*

Justification for increased working capital

The increase in the working capital gap is primarily attributable to the projected expansion in the scale of operations and the corresponding increase in current assets required to support the higher business volumes. The company proposes to commence operations of two new manufacturing plants in Fiscal 2027, which is expected to significantly enhance the overall production capacity and result in a substantial increase in sales and procurement activities.

In line with the anticipated growth in operations, inventory levels are projected to increase to maintain adequate stock of raw materials and finished goods required to support higher production volumes and ensure timely order fulfilment across an expanded market.

Further, trade receivables are expected to increase in proportion to the projected growth in revenue and expansion of the customer base, particularly from institutional and bulk buyers who generally operate under structured credit terms.

Additionally, short-term loans and advances are projected to increase due to operational advances such as advances to suppliers for procurement of raw materials, employee advances and other business-related advances.

While trade payables are expected to increase with higher procurement volumes, the increase is relatively moderate as the company follows a conservative policy of minimizing outstanding creditor balances and endeavours to settle supplier dues in a timely manner. Similarly, other current liabilities and short-term provisions are also expected to increase only proportionately despite business growth, as the company intends to discharge statutory liabilities and other expenses payable on a timely basis.

The Company has made substantial investments towards capacity expansion. This is evidenced by the increase in Capital Work-in-Progress (CWIP) from ₹355.59 lakhs in FY 2024–25 to ₹3,619.54 lakhs as at March 31, 2026, which represents ongoing expenditure towards the development of two new manufacturing plants, namely the Bhagwanpur facility and the Rajkot plant. Further, capital advances have slightly decreased from ₹758.41 lakhs as at March 31, 2025 to ₹709.07 lakhs as at March 31, 2026, which includes ₹625.00 lakhs towards land acquisition for future expansions and the balance amount as advances towards procurement of plant and machinery to be installed in these facilities. The additional plant and machinery installed in total will increase the production facility from current 14,100 MT to 86,800 MT.

In addition, the Company has sanctioned borrowings of ₹1,800 lakhs (₹18 crores) for the construction of the Rajkot plant, demonstrating committed funding towards capacity creation. As per the Objects of the Issue, the Company also proposes to utilise approximately ₹1,142.30 lakhs towards investment in plant and machinery, which will further augment installed capacity, and also have planned for repayment/prepayment of significant amount of borrowings, which is expected to reduce finance costs and improve cash flows.

Accordingly, the projected growth is capacity-driven and supported by quantifiable investments, including CWIP of ₹3,619.54 lakhs, capital advances of ₹709.07 lakhs, and borrowings deployed towards expansion. These investments are expected to translate into higher production capacity and increased revenue generation upon operationalization of the new facilities.

Further, the Company has maintained stable working capital cycles, with creditor days below 30 days and no significant change in inventory or receivable holding periods. Therefore, the projected growth is not based on any elongation of holding periods, but is driven by increase in capacity and operational scale.

GLOBAL ECONOMY

Macroeconomic Environment

Global growth would have been 3.1 percent in 2026 and 3.2 percent in 2027, an upward revision of 0.1 percentage point for 2026 and unchanged for 2027 compared with the forecast in the January 2026 WEO Update. Under the assumption in the reference forecast that the war turns out to be relatively short-lived, global growth is expected to slow down modestly. At 3.1 percent for 2026 and 3.2 percent for 2027, the forecasts mark a deceleration from the estimated 3.4 percent achieved in 2025. At market exchange rates, world output is projected to grow by 2.6 percent in both 2026 and 2027. The relatively modest downward revision to global growth in the reference forecast relative to the January 2026 WEO Update owes to continued tailwinds partially offsetting the negative shocks from the conflict, including lower tariffs, preexisting policy support, and carryover from stronger-than-expected outturns at the end of 2025 and the first quarter of 2026 in some cases. Compared with the preconflict WEO forecasts, growth in the near term is revised downward by 0.2 percentage point. This masks significant variation across countries, with lower-income commodity-importing economies being hit particularly hard through higher energy and food prices as well as foreign exchange depreciation. Cumulative growth over 2026–27 is revised downward by 0.5 percentage point for low-income net energy-importing economies relative to the January 2026 WEO Update, compared with a downward revision of 0.2 percentage point in energy-importing advanced economies and positive or neutral revisions for net energy-exporting economies.

Growth Projections (Real GDP Growth, % Change)

Under the reference forecast, growth in advanced economies is projected to be 1.8 percent in 2026 and 1.7 percent in 2027. The overall effect on growth in advanced economies of the conflict in the Middle East is modest, lowering growth by 0.2 percentage point in 2026 relative to the preconflict forecast, thanks to positive terms-of-trade effects in the United States and stronger growth momentum and offsetting government measures in Japan, with a large negative effect expected only in some net energy-importing economies, such as the euro area and the United Kingdom.

In emerging market and developing economies, growth is expected to fall to 3.9 percent in 2026 and recover to 4.2 percent in 2027. The conflict in the Middle East has a varied impact on growth given differential exposure—through geographic proximity, financial flows, remittances, and energy dependencies. Over all, it has a larger net impact on growth in emerging market and developing

economies compared with advanced economies, lowering growth in 2026 for the former group by 0.3 percentage point relative to the preconflict forecast.

In the Middle East and Central Asia, growth is projected to decline from 3.6 percent in 2025 to 1.9 percent in 2026 and recover to 4.6 percent in 2027 as the region experiences the most direct impact of the conflict and the expected subsequent rebound. For commodity exporters directly affected by the conflict, diminished production and exports imply a severe downward revision of GDP growth projections for 2026, depending on the degree of damage suffered in energy and transportation infrastructure as well as the dependence on the Strait of Hormuz and availability of alternative export routes. The contraction of GDP growth for 2026 is therefore more pronounced for Bahrain, Iran, Iraq, Kuwait, and Qatar and less significant for Oman, Saudi Arabia, and the United Arab Emirates. For all these economies, growth in 2027 is expected to rebound, based on the assumption that energy production and transportation are normalized over the next few months—an assumption that may need to be revised if the duration of the conflict extends and the degree of damage suffered gets reassessed. Growth in Iran in 2026 is revised downward by 7.2 percentage points, relative to January, to –6.1 percent, while that for 2027 is revised upward by 1.6 percentage points to 3.2 percent. In Saudi Arabia, the growth forecast for 2026 is revised downward by 1.4 percentage point relative to January, to 3.1 percent, and that for 2027 is revised upward by 0.9 percentage point, to 4.5 percent. For commodity importers in the Middle East and North Africa, the terms-of-trade shock from higher commodity prices contributes to a somewhat modest downward revision of growth projections in 2026 and 2027, with some differentiation as a result of varying exposures to imports of energy, energy derivatives, and food items, as well as different economic trajectories before the conflict erupted. Egypt, growth is projected to slow to 4.2 percent in 2026 and recover to 4.8 percent in 2027, a cumulative downward revision of 1.1 percentage points. For Caucasus and Central Asia countries, the growth momentum experienced over the past few years is expected to continue, with aggregate GDP growth for the group revised upward in 2026 and 2027, by a cumulative 0.3 percentage point.

Growth in sub-Saharan Africa is expected to be relatively stable at 4.3 percent in 2026 and 4.4 percent in 2027. This masks variation across countries, with some in the region—particularly oil-importing non-resource-intensive countries—adversely affected by the Middle East conflict. Key economies continue to benefit from past macroeconomic stabilization and reform efforts. In Nigeria, growth momentum is sustained at 4.1 percent in 2026, supported by improved macroeconomic stability and positive terms-of-trade effects, while higher goods and transport costs are headwinds. Growth is expected to strengthen in 2027 to 4.3 percent as these headwinds ease. In South Africa, the disruptions from the Middle East conflict are projected to slow growth slightly to 1.0 percent in 2026. The economy is expected to bounce back in 2027, growing at 1.3 percent, supported by a gradual resumption of structural-reform-driven private investment as disruptions from the conflict subside. Growth in other countries in the region as a whole is expected to decline from 5.6 percent in 2025 to 5.2 percent in both 2026 and 2027, revised downward relative to January by a cumulative 0.6 percentage point.

Inflation Forecast

Global inflation is projected to pause its decline, with headline inflation increasing from 4.1 percent in 2025 to 4.4 percent in 2026 before falling back to 3.7 percent in 2027. This is a 0.7 percentage point upward revision for 2026 from the figure in the October 2025 WEO, reflecting expected higher energy and food prices. There is divergence across countries, shaped by the stubborn dynamics in services inflation—which tends to have a larger domestic component—and the increasing share of inflation explained by country-specific factors. Gradual pass-through from higher tariffs and limited pass-through of higher energy prices along with gradually moderating services inflation amid a broadly balanced labour market mean that US core inflation is projected to return to the country’s 2 percent target during 2027. Sustained strong productivity growth slowly converging back to historical norms will provide support for supply-driven disinflation.

In the United Kingdom, inflation, which in 2025 increased partly because of one-off changes in regulated prices, is expected to pick up again temporarily toward 4 percent before returning to target by the end of 2027 as the effects of higher energy prices fade and a weakening labour market continues to exert downward pressure on wage growth.

In Japan, inflation is expected to moderate in 2026, relative to the outturn in 2025, and converge toward the country’s target by the end of 2027 as food and commodity prices ease. In the euro area, headline inflation is projected to increase temporarily to above 2 percent in 2026 and remain above target in 2027. Core

inflation is expected to increase more modestly but stay above 2 percent until 2028. Inflation in China is projected to start rising from low levels, whereas inflation in India is expected to return to near target levels after subdued food prices drove a marked decline in 2025.

World Trade Outlook and Global Imbalances

World trade volume growth is expected to decline from 5.1 percent in 2025 to 2.8 percent in 2026 and increase to 3.8 percent in 2027. These dynamics reflect front-loading early on and the impact of tariffs mitigated by adjustments in trade linkages and production chains as time goes by. Exports of both goods and services are projected to decline in percent of world GDP over the forecast horizon, with the decline in services trade being much less pronounced. This reflects the stronger underlying trend growth and greater resilience to rising risks in services trade compared with that in goods trade. Over the medium term, global imbalances are expected to decline only modestly. Expansionary fiscal packages in some economies with current account surpluses are expected to contribute to this cyclical decline. Countering this is a technology-driven business investment surge, which is expected to continue to attract capital flows to the United States even as investment in technology moderates. Stronger productivity growth in the United States could enhance US competitiveness in technology-related services and improve the country's trade balance. But positive wealth effects that boost domestic demand, together with sustained capital inflows driven by higher returns, would dominate and keep the US current account deficit wider than that observed during the decade preceding the COVID-19 pandemic. Sustained large fiscal deficits in the United States and China's continued reliance on export-led growth and limited rebalancing to domestic consumption contribute to external imbalances in these two countries.

Trade Reallocation in Response to Tariffs: Will This Time Be Different?

Global inflation has been largely steady. This stability masks some divergence, however. In the United States, above-target inflation persists, with core inflation for personal consumption expenditure maintaining a high year-over-year rate of 3.1 percent in January 2026. To date, evidence indicates that the direct incidence of tariffs has largely fallen on US importers and consumers (Amiti and others 2026; Gimbel 2026; Gopinath and Neiman 2026). In contrast, inflation fell sharply in Japan in January 2026 to below the 2 percent target for the first time since the second quarter of 2022, with the decline largely reflecting the provisional gasoline tax abolition.

Reorientation of Global Trade

Risk-off sentiment following the outbreak of the Middle East conflict has led to a moderate tightening of global financial conditions, but they remain accommodative from a historical point of view. Concerns about a resurgence of inflation have raised bond yields and driven equity prices down. Emerging markets—especially commodity importers and those with pre-existing vulnerabilities—have been affected the most. The US dollar has strengthened somewhat, reaffirming its safe haven status. Even so, market volatility has been relatively subdued. At the same time, geopolitical tensions and other factors have contributed to sharp swings in the gold price. Fiscal policy remains too loose in many of the largest advanced economies and emerging markets. The Middle East conflict is putting additional pressure on public finances, both via the direct effects of the conflict and as governments seek ways to protect the most vulnerable from the fallout in commodity markets and may be tempted to offer broad-based fiscal packages, while higher financing costs and weaker activity weigh on revenues. Countries with preexisting fuel subsidies face different fiscal dynamics than those with liberalized energy pricing, while those with links to the Middle East region through remittances confront additional pressure on household incomes and external balances. Monetary policy was becoming

more divergent as common global drivers of inflation became less prominent, until the conflict delivered a global negative supply shock.

At current prices, Nominal GDP is projected to reach Rs. 357.14 lakh crore (US\$ 3.96 trillion) in FY 2025–26, from Rs. 330.68 lakh crore (US\$ 3.98 trillion) in the previous year, registering a growth of 8.0%.

On the production side, Real Gross Value Added (GVA) is estimated at Rs. 184.50 lakh crore (US\$ 2.04 trillion), up from Rs. 171.87 lakh crore (US\$ 2.07 trillion) in FY 2024–25, indicating a growth of 7.3%, while Nominal GVA is expected to expand to Rs. 323.48 lakh crore (US\$ 3.59 trillion) from Rs. 300.22 lakh crore (US\$ 3.62 trillion), marking a growth of 7.7%. Collectively, these trends highlight India's position as one of the fastest-growing major economies, supported by broad-based expansion across sectors.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India is home to 126 unicorns, with six new startups achieving unicorn status in 2025. India's current account deficit moderated in Q2 FY 2025–26 (July–September), supported by a lower merchandise trade deficit. The deficit stood at Rs. 1.02 lakh crore (US\$ 11.7 billion), or 1.3% of GDP, compared with Rs. 1.73 lakh crore (US\$ 20.8 billion), or 2.2% of GDP, in the same quarter last year.

In the preceding quarter, the current account had recorded a relatively modest deficit of Rs. 0.20 lakh crore (US\$ 2.33 billion), equivalent to 0.2% of GDP, indicating improved external sector resilience. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 99,08,749 crore (US\$ 1.12 trillion) between April 2000–September 2025; with major share of FDI equity inflow, coming from Singapore at Rs. 13,21,127 crore (US\$ 186.82 billion) with a total share of 24.45%, followed by Mauritius at Rs. 11,22,807 crore (US\$ 183.66 billion) with 24.04%, the USA at Rs. 5,50,450 crore (US\$ 77.27 billion) with 10.11%, the Netherlands at Rs. 3,77,094 crore (US\$ 54.93 billion) with 7.19%, and Japan at Rs. 2,93,863 crore (US\$ 45.61 billion) with 5.97%.
- As of January 9, 2026, India's foreign exchange reserves stood at Rs. 61,95,896 crore (US\$ 687.19 billion).
- In November 2025, India recorded 113 Private Equity (PE)–Venture Capital (VC) deals valued at Rs. 46,500 crore (US\$ 5.6 billion), marking a 31% year-on-year increase from Rs. 35,700 crore (US\$ 4.3 billion) in November 2024. On a month-on-month basis, investment value rose by 4% compared to Rs. 44,800 crore (US\$ 5.4 billion) in October 2025. Deal activity also strengthened, with the number of transactions increasing 12% year-on-year from 101 deals in November 2024 and 4% month-on-month from 109 deals in October 2025, reflecting sustained momentum in India's PE/VC investment landscape.
- During FY 2025–26 (up to January 27, 2026), Foreign Portfolio Investor (FPI) activity in India indicated a phase of portfolio optimisation and asset reallocation amid evolving global market conditions. While foreign investors moderated direct equity exposure, debt instruments continued to attract investments of over Rs. 2,100 crore (US\$ 0.25 billion), supported by stable macroeconomic fundamentals and policy continuity. FPIs also channelled Rs. 17,025 crore (US\$ 2.0 billion) into mutual fund schemes, reflecting a preference for diversified and professionally managed market exposure. Domestic Institutional Investors (DIIs) played a stabilising role in the equity cash market during FY 2025–26 (April–December 2025), recording net purchases

of around Rs. 5.99 lakh crore (US\$ 66.55 billion). Strong and consistent buying by mutual funds, insurance companies, and pension funds helped offset periods of foreign portfolio moderation.

- India's manufacturing sector continued to expand in December, with the seasonally adjusted HSBC India Manufacturing Purchasing Managers' Index (PMI) remaining firmly in expansionary territory at 55.0, despite easing from 56.6 in November. Importantly, the index stayed above its long-run average, indicating sustained improvement in overall sector health. New orders continued to rise at a strong pace, supported by steady domestic demand, while output growth, although moderating, reflected ongoing capacity utilisation.
- India's consumer price inflation remained subdued and well-anchored in December 2025, reflecting a stable price environment across the economy. Headline inflation, based on the All-India Consumer Price Index (CPI), stood at 1.33% year-on-year, indicating continued moderation in price pressures. The marginal month-on-month uptick of 62 basis points from November 2025 reflects normal seasonal movements, while overall inflation remained comfortably low, underscoring effective supply management and macroeconomic stability.
- India's GST collections continued to demonstrate underlying revenue resilience, supported by steady economic activity and compliance levels. Total Net GST revenue in December 2025 stood at Rs. 1.45 lakh crore (US\$ 16.17 billion), reflecting normal month-on-month variation. On a cumulative basis, net yearly GST collections in December 2025 reached Rs. 14.25 lakh crore (US\$ 163.59 billion), registering a year-on-year growth of 6.8%, underscoring sustained consumption momentum and the strengthening tax base.
- Passengers carried by domestic airlines during January-November 2025 were 1526.35 lakhs as against 1464.02 lakhs during the corresponding period of the previous year, thereby registering an annual growth of 4.26% and a monthly growth of 6.92%.
- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.
- India secured 38th position out of 139 economies in the Global Innovation Index 2025. India rose from 81st position in 2015 to 38th position in 2024. India ranks in 3rd position in the global number of scientific publications.
- India's industrial activity witnessed a strong rebound in November 2025, with the Index of Industrial Production (IIP) growing by 6.7%, a sharp improvement from 0.4% in October 2025, indicating accelerating industrial momentum. The manufacturing sector led this expansion with a robust 8.0% growth, supported by positive performance across 20 out of 23 industry groups at the NIC two-digit level, reflecting a broad-based recovery. Key growth drivers included basic metals (10.2%), pharmaceuticals and medicinal products (10.5%), and motor vehicles and trailers (11.9%), highlighting strength in core, healthcare, and mobility-related industries. Overall, the IIP index rose to 158.0, up from 148.1 in November 2024, underscoring sustained expansion in India's industrial base.
- The government has set a calibrated wheat procurement target of 30 million tonnes for the 2025–26 rabi marketing season, ensuring efficient stock management and smooth market operations. This comes even as wheat production is projected at a record 115 million tonnes in 2024–25, reflecting strong output prospects. To support farmers, the MSP for wheat has been fixed at Rs. 2,425 per quintal, with procurement to be undertaken by FCI and state agencies to meet food security and welfare requirements.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Under the Startup India initiative, the Government continues to strengthen the start-up ecosystem through targeted funding, seed support, and credit guarantees. As of October 2025, women-led start-ups received investments and financial support of over Rs. 3,157 crore (US\$ 0.38 billion) through the Fund of Funds for Startups, Startup India Seed Fund Scheme, and Credit Guarantee Scheme, reinforcing inclusive entrepreneurship and early-stage innovation across sectors.
- The Ministry of Labour & Employment signed an MoU with Zomato on October 14, 2025, to enhance employment opportunities through the National Career Service (NCS) portal. Under the agreement, Zomato will list around 2.5 lakh job

opportunities annually, supporting the growth of the gig economy and promoting formal, technology-enabled livelihoods across India.

- The Production Linked Incentive (PLI) programme has significantly strengthened India's manufacturing base and export capabilities across priority sectors. As of September 2025, realised investments under PLI schemes stood at Rs. 2,00,000 crore (US\$ 24.2 billion) across 14 sectors, leading to incremental production and sales exceeding Rs. 18,70,000 crore (US\$ 226.5 billion) and generating over 12.6 lakh jobs (direct and indirect).
- In August 2025, Prime Minister Mr. Narendra Modi launched two major agriculture schemes worth Rs. 35,440 crore (US\$ 4 billion), the PM Dhan-Dhaanya Krishi Yojana and the Mission for Aatmanirbharta in Pulses, aimed at boosting self-reliance, productivity, and farmers' income. He also inaugurated and laid foundation stones for projects worth over Rs. 6,200 crore (US\$ 709 million) across agriculture, animal husbandry, fisheries, and food processing sectors.
- On July 5, 2025, the Union Cabinet approved the Rs. 1,00,000 crore (US\$ 11.72 billion) Research, Development and Innovation (RDI) Scheme, launching long-term, low- or zero-interest funding via a special purpose fund under the ANRF to jump-start India's R&D ecosystem and support deep-tech and startup innovation.

Road ahead for the Indian Economy

India's economic outlook remains robust, supported by strong macroeconomic fundamentals, resilient domestic demand, and sustained investment momentum. With Real GDP growth estimated at 7.4% in FY 2025–26, India continues to rank among the fastest-growing major economies globally, underpinned by broad-based expansion across manufacturing, services, and infrastructure.

A stable external position, reflected in foreign exchange reserves of Rs. 61.96 lakh crore (US\$ 687.19 billion), along with steady foreign capital inflows through FDI, PE–VC investments, and debt instruments, reinforces confidence in India's long-term growth trajectory.

Domestic demand remains a key anchor, supported by subdued inflation, rising air passenger traffic, resilient GST collections, and strong DII participation in capital markets. Manufacturing activity continues to expand, with PMI remaining firmly in expansionary territory and IIP growth accelerating, while the government's focus on renewable energy, innovation, and food security further strengthens structural growth drivers. Collectively, these trends position India favourably to sustain economic momentum, deepen capital formation, and enhance its role as a global growth engine in the years ahead.

Increasing Focus on Sustainability to boost Product Adoption in Automotive & Aircraft Tires

The automotive & aircraft tires stand out as the fastest-growing segment. This segment is projected to register a CAGR of 12.5% during the forecast period, driven by the global automotive industry's increasing focus on sustainability, cost efficiency, and regulatory compliance. Reclaimed rubber is widely used in tire production due to its ability to lower manufacturing costs, improve processability, and meet environmental mandates related to the use of recycled materials. As electric vehicles and sustainable transportation trends gain momentum, tire manufacturers are under pressure to integrate more eco-friendly materials, further boosting demand for reclaimed rubber.

The re-treading segment also holds a significant share in the market, as it provides a cost-effective and resource-efficient solution for extending the lifespan of tires. Reclaimed rubber plays a crucial role in the retreading process, which is especially important in commercial vehicle fleets, aviation, and public transportation systems seeking to reduce operational costs without compromising safety or performance. In the belts & hoses segment, reclaimed rubber is increasingly being utilized in the production of industrial belts, automotive hoses, and tubing. This is largely due to its resilience and flexibility, which are necessary for handling high-stress environments in manufacturing and mechanical systems. Cost savings and recyclability further contribute to its appeal in this application.

The footwear segment benefits from reclaimed rubber's flexibility, abrasion resistance, and low cost, making it suitable for producing soles and casual footwear. Brands focused on sustainable fashion and reducing their environmental footprint are incorporating reclaimed rubber as a marketing and functional advantage.

The moulded rubber goods and other segments include items such as mats, gaskets, vibration dampeners, and seals. These applications value the material's customizability and mechanical performance. Although these segments grow at a slower pace compared to tires, they provide steady demand, especially in the construction and consumer goods industries.

Market Share in Reclaimed Rubber

In 2024, the reclaimed rubber business saw major strategic moves as companies attempted to secure their product bases and increase their global presence. Of particular interest, some of the major players entered into mergers and acquisitions to enhance their capabilities and industry coverage. Macro-Economic in Reclaimed Rubber Industry

The market for reclaimed rubber is a part of the sustainable materials and circular economy segment, which is closely associated with industry such as automotive, construction, footwear, and industrial production. Being a segment of the global rubber and recycling industry, it is affected by macroeconomic variables including inflation, supply chain, availability of raw materials, and sustainability regulatory policies.

At the macroeconomic level, worldwide economic growth, industrial growth, and growing environmental issues propel the industry. The initiative towards net-zero carbon emissions and strict government policies encouraging recycled content have strongly pushed the use of reclaimed rubber, specifically in the developed economies of the USA, EU, and Japan. Developing economies such as China and India are also seeing higher demand owing to fast industrialization and higher vehicle manufacturing.

Supply chain disruptions, changing crude oil prices, and geo-political conflicts affect the costs of reclaimed rubber, since virgin rubber and synthetics alternatives rely on these factors. Also driving industry development is investment in recycling technology and environmental manufacturing methods. With businesses continually looking to minimize costs and live sustainably, the industry is primed for sustained growth, as firms focus on technology advancement, reduced waste, and improved product performance to keep them competitive.

Growth Opportunities and Strategic Recommendations

Investment in High-Tech Recycling Technologies

Innovative devulcanization processes and high-efficiency processing need to be prioritized by stakeholders to improve product quality and consistency. Industry leaders such as Michelin (Lehigh Technologies) and Scandinavian Enviro Systems have already made a benchmark with the inclusion of micronized rubber powder (MRP) technology in production. Automation and artificial intelligence-based sorting systems can further optimize material recovery and cost efficiency.

Expansion into High-Growth Regions

The Asia-Pacific industry, specifically China and India, offers high-growth prospects as a result of fast industrialization, increased automobile manufacturing, and government-driven sustainability policies. Businesses need to invest in local production units and strategic alliances with local rubber recyclers to improve supply chain strength and lower logistics expenses. The European industry too is promising due to the aggressive EU directives for circular economy measures.

Improving OEM Alliances for Sustainable Tire Production

Leading tiremakers are turning progressively towards sustainable source material, boosting demand for first-class reclaimed rubber. Players ought to emphasize extended supply deals with automotive and tire OEMs, as well as invest in specially designed product solutions meeting durability and performance needs. Collaboration-based R&D partnership with tire companies can lead to greater innovation as well as protect competitiveness.

Government Regulations and Environmental Framework

The industry is regulated under a combination of environmental, import/export, and quality control frameworks:

- Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (as amended): Under this, the import of used rubber tyres and rubber scrap for recycling or reclaiming is strictly regulated by the Ministry of Environment, Forest and Climate Change (MoEF&CC).
- Consent to Establish/Operate must be obtained from the respective State Pollution Control Boards (SPCBs) along with Hazardous Waste Authorization for reclaim rubber operations.
- Extended Producer Responsibility (EPR) norms under the E-Waste and Waste Tyre Management Framework (2022–25) also directly impact rubber reclaimers who process tyre scrap.
- Rubber Board of India, established under the Rubber Act, 1947, plays a regulatory and developmental role in the sector, offering licensing, technical support, and export guidance.
- Bureau of Indian Standards (BIS) mandates adherence to quality norms such as IS 6306 and IS 7490 for reclaimed rubber products.

Raw Material Supply and Import Dependencies

The primary feedstock for reclaim rubber is waste rubber, primarily used tyres, tubes, and tread rubber, sourced both domestically and via imports. The MoEF&CC, in its expert committee meetings (June 2024), approved the import of over 9,000 MT of tyre scrap by Indian processors. These imports are crucial due to domestic collection inefficiencies and seasonal constraints.

Approved scrap categories include:

- Used rubber tyres (shredded, cut, baled)
- Butyl tubes and rubber components
- Buffing dust and tread rubber

Indian EPR Scheme Moves Forward

1. Ministry of Environment, Forest & Climate Change (MoEF&CC)

- Import of rubber scrap is regulated under the Hazardous & Other Wastes (Management & Transboundary Movement) Rules (amended 2022), part of the Environment (Protection) Act 1986. Importers and recyclers must obtain EPR registration, NOC/CTO, and comply with monthly/quarterly reporting and recycling targets (starting 35% in FY 2022–23, moving to 100% by FY 2024–25)

2. Extended Producer Responsibility (EPR)

- Waste tyre recycling (including reclaimed/crumb rubber) is covered under the EPR framework. Producers/importers must register, report, and ensure recycling of waste tyres—targets ramp from 35% to 100% within two years.

BUSINESS EXPANSION STRATEGIES

Strategic Expansion into Pyrolysis Oil and By-Product Recovery

As part of our business diversification strategy, we aim to expand our operations into the pyrolysis oil and by-product recovery segment through the development of a pyrolysis processing facility at Rajkot, Gujarat. This vertical extends our operations beyond reclaim rubber manufacturing into waste-to-energy conversion, utilising end-of-life tyres and rubber waste as feedstock. For this purpose, we have acquired land having an area of 27,283.62 square meters situated at RK International Park, Village Gundala, Rajkot, Gujarat. The development of the unit is substantially completed, including the construction of the necessary structures and the installation of pyrolysis reactors.

The pyrolysis process enables the recovery of pyrolysis oil as the principal product, with carbon char and steel scrap generated as by-products from a single raw material stream. enables the recovery of multiple outputs from a single raw material stream, including pyrolysis oil, recovered carbon char, and steel scrap. This structure provides diversified revenue streams while optimising resource utilisation. The proposed facility is planned to be designed and developed with reactors, condensation units, and pollution control systems in compliance with applicable environmental laws and regulatory requirements. The process design will incorporate comprehensive safety measures, including temperature control mechanisms, pressure monitoring systems, and emergency shutdown arrangements, to ensure safe and efficient operations.

These vertical leverages overlapping raw material sourcing networks and complements our existing operations by enabling value extraction from similar waste streams. The outputs cater to industrial users such as brick kilns, boiler operators, power generation units, and other fuel-consuming industries. The integration of this segment supports revenue diversification and aligns our operations with circular economy principles.

Enhancement of Manufacturing Capacity through installation of additional machinery

As on the date of this Red Herring Prospectus, we operate one manufacturing facility located at Roorkee, Haridwar District, Uttarakhand. In order to support future growth, we have developed an additional manufacturing unit at Bhagwanpur, Haridwar District (Unit III), which is equipped with the required civil structures. However, this unit is not yet operational. Upon completion and commissioning, this unit is expected to enhance our installed capacity for reclaimed rubber and support higher production volumes while maintaining process efficiency and quality consistency.

In addition, we have commenced the development of a manufacturing facility at Village Gundala, Rajkot, Gujarat (Unit II), which will be used for the production of pyrolysis oil. This facility represents our strategic expansion into waste-to-energy processing and is expected to complement our existing operations.

Further, one of the objects of the Issue is to fund the capital expenditure requirements for the purchase of additional machinery for both Unit III at Haridwar and Unit II. The development of additional infrastructure is expected to improve operational scalability, optimise plant layout and material flow, and reduce operational concentration risk. These initiatives are aimed at supporting long-term growth while maintaining efficiency, reliability, and product quality.

Product Diversification through Development of Specialised Reclaim Rubber Grades

Our product portfolio comprises multiple grades of reclaim rubber differentiated by physical and performance parameters such as elasticity, ash content, softness, and processing behaviour. As part of our strategy, we are focusing on developing specialised reclaim rubber grades tailored for specific industrial applications.

These include reclaim rubber suitable for footwear manufacturing, oil-resistant reclaim rubber for automotive components, and thermo-mechanical reclaim rubber designed for applications involving elevated temperature conditions. Product development is supported by in-process quality checks and batch-wise testing to ensure consistency with customer specifications.

By offering customised grades, we aim to deepen customer engagement, improve application compatibility, and enhance value realisation per unit. This approach supports long-term customer relationships and allows us to address application-specific requirements across diverse end-use industries.

Regional Market Penetration across Western and Central India

While our existing sales are primarily concentrated in North India, we are expanding our market reach into Western and Central India, including regions with established rubber, tyre retreading, footwear, and automotive component manufacturing ecosystems. These regions represent significant consumption centres for reclaim rubber and related products.

Our market penetration strategy includes strengthening distributor and agent networks, improving logistics coverage, and reducing delivery lead times through regional coordination. Engagement with regional customers is supported through direct outreach, participation in industry exhibitions, and structured B2B interactions.

Geographic diversification of sales reduces dependence on a single market and contributes to improved order stability. It also enables us to align production planning with broader regional demand trends.

Strengthening ESG and EPR Positioning

We operate within the formal recycling framework and are registered under the Extended Producer Responsibility (EPR) regime. Our operations contribute to waste reduction, landfill diversion, and substitution of virgin rubber, supporting sustainability objectives across customer supply chains.

We track and document environmental impact parameters such as waste processed, material recovery, and recycling outcomes. EPR credits generated from our recycling operations are monetised or supplied to customers to support their statutory compliance requirements.

As ESG-linked procurement standards gain importance, our compliance-oriented operations, traceability practices, and regulatory adherence enhance our positioning as a responsible supplier to environmentally conscious customers.

SWOT ANALYSIS

MANUFACTURING PROCESS

Reclaimed Rubber

1. Collection and Sorting

Used tyres and other raw materials are procured from authorised scrap dealers, transport operators, automobile workshops, and disposal centres. Upon receipt at the manufacturing facility, the tyres are inspected and sorted based on factors such as size, construction, rubber composition, and physical condition. This step ensures consistency in raw material quality and helps improve efficiency and output quality in subsequent stages.

2. Cutting and Shredding

The sorted tyres are mechanically cut into smaller sections using tyre cutting machines and shredders. During this stage, steel bead wires embedded in the tyres are separated. Reducing the tyre size improves handling, lowers processing effort, and prepares the material for further size reduction and cleaning.

3. Crumbing and Separation

The cut tyre pieces are further crushed and ground into crumb rubber of controlled particle size. During this process, steel wires are removed using magnetic separators, and textile fibres are extracted through air separation systems. This stage ensures that the rubber material is substantially free from metal and fabric contaminants.

4. Devulcanization

The crumb rubber is blended with softening oils, processing aids, and chemicals and then subjected to controlled heat, pressure, and mechanical shearing. This devulcanization process partially breaks the sulphur cross-link bonds formed during the original vulcanization of rubber. As a result, the rubber regains flexibility and plasticity, enabling it to be reprocessed and reused as reclaimed rubber.

5. Straining

The devulcanized rubber is passed through fine strainers to remove any remaining impurities such as metal traces, fibre particles, or unmixed material. This step improves uniformity and enhances the overall quality of the reclaimed rubber.

6. Refining

The strained rubber is further refined using specialised equipment to improve its texture, consistency, and homogeneity. Refining ensures that the reclaimed rubber meets required physical and performance specifications for use in downstream manufacturing applications.

7. Forming, Packing, and Storage

The refined reclaimed rubber is formed into sheets, slabs, or blocks of standard sizes. The finished products are cooled, packed, and stored under suitable conditions before being dispatched to end-use manufacturers. The reclaimed rubber is used in the manufacture of tyres, automotive components, conveyor belts, footwear, and other rubber-based products.

The Industrial Dispute (Central) Rules, 1957 inter-alia specify procedural guidelines for lock-outs, closures, layoffs and retrenchment.

The IDR Act has been liberalized under the New Industrial Policy dated July 24, 1991 and all industrial undertakings are exempt from licensing except for certain industries, including, among others, all types of electronic aerospace, defence equipment, ships and other vessels drawn by power. The IDR Act is administered by the Ministry of Industries and Commerce through the Department for Promotion of Industry and Internal Trade (“**DPIIT**”). The main objectives of the IDR Act is to empower the Government to take necessary steps for the development of industries; to regulate the pattern and direction of industrial development; and to control the activities, performance and results of industrial undertakings in the public interest. The DPIIT is responsible for formulation and implementation of promotional and developmental measures for growth of the industrial sector.

Act lays down penalties for various offences, including but not limited to, use or sale of non-standard weight or measure, contravention of prescribed standards, counterfeiting of seals and tampering with license.

B. Labour related laws

The Industrial Relations Code, 2020

The Industrial Relations Code, 2020, streamlines Indian labour law by consolidating three key statutes to enhance the ease of doing business. It significantly increases operational flexibility for companies by raising the employee threshold from 100 to 300 for requiring prior government permission for layoffs, retrenchment, and closure, and for mandating formal standing orders. While providing this flexibility, the Code also introduces several worker-centric provisions, including an expanded definition of 'worker,' the formal recognition of fixed-term employment with pro-rata benefits, and the establishment of a 'Reskilling Fund' for retrenched employees. Furthermore, it establishes a clear framework for recognizing a sole negotiating union to streamline collective bargaining and imposes stricter conditions, such as a mandatory notice period, for strikes and lock-outs, aiming to balance employer flexibility with industrial harmony.

Code on Wages, 2019

The Code on Wages, 2019, is a comprehensive legislation that consolidates and simplifies four central labour laws: the Payment of Wages Act, 1936; the Minimum Wages Act, 1948; the Payment of Bonus Act, 1965; and the Equal Remuneration Act, 1976. Its primary objective is to create a uniform and streamlined framework for wage-related regulations across all sectors of employment. A key feature of the Code is the universalization of minimum wage and timely wage payment provisions, making them applicable to all employees, including those in the unorganized sector, thereby removing previous wage ceilings and employment-specific limitations. The Code introduces the concept of a national "floor wage" to be determined by the Central Government, which will serve as a baseline that state-level minimum wages cannot fall below. Furthermore, it prohibits gender discrimination in matters of wages and recruitment for the same or similar nature of work, codifies the rules for annual bonus payments, and specifies clear timelines for wage payments and permissible deductions. The enforcement mechanism is also revamped, introducing the role of an "Inspector-cum-Facilitator" to advise employers and employees, alongside traditional inspection functions, aiming for a more transparent and less adversarial compliance system.

Code on Social Security, 2020

The Code on Social Security, 2020, is a comprehensive legislation designed to consolidate and amend nine central labour enactments related to social security, including those governing provident funds, employee insurance, maternity benefits, and gratuity. Its most significant objective is to universalize social security benefits by extending coverage to the vast unorganized sector, as well as to gig and platform workers, who were previously largely outside the traditional safety net. The Code establishes a framework for this expansion through the mandatory registration of all workers on a national portal and the creation of a dedicated Social Security Fund to finance schemes for them. While streamlining the administration of existing statutory schemes like the EPF and ESI, the Code's core purpose is to create a single, unified structure to provide a social security umbrella for the entire Indian workforce, adapting to the changing nature of work in the modern economy.

Occupational Safety, Health and Working Conditions (OSH) Code, 2020

The Occupational Safety, Health and Working Conditions (OSH) Code, 2020, is a comprehensive legislation that consolidates and replaces 13 central labour laws, including The Factories Act, 1948; The Mines Act, 1952; The Dock Workers (Safety, Health and Welfare) Act, 1986; The Building and Other Construction Workers Act, 1996; The Plantations Labour Act, 1951; The Contract Labour Act, 1970; The Inter-State Migrant Workmen Act, 1979; The Working Journalist and other Newspaper Employees Act, 1955; The Working Journalist (Fixation of Rates of Wages) Act, 1958; The Motor Transport Workers Act, 1961; The Sales Promotion Employees Act, 1976; The Beedi and Cigar Workers Act, 1966; and The Cine-Workers and Cinema Theatre Workers Act, 1981. Its primary objective is to create a single, uniform regulatory framework for a wide range of establishments. The Code simplifies compliance for employers by introducing a single registration and license system and clearly defines the duties of both employers and employees regarding workplace safety.

Furthermore, it establishes advisory boards, introduces specific welfare provisions for contract and migrant workers, and permits women to work at night with their consent and adequate safety. By shifting the enforcement mechanism towards an "Inspector-cum-Facilitator" model, the Code aims to foster a more proactive and advisory approach to ensuring safe and humane working conditions.

C. Environmental Laws

The Environment Protection Act 1986 (the “Environment Protection Act”) and Environment Protection Rules, 1986 (the “Environment Protection Rules”)

The Environment Protection Act was enacted to provide a framework for co-ordination of the activities of various central and state authorities established under previous laws. The Environment Protection Act authorises the central government to protect and improve environment quality, control and reduce pollution. The Environment Protection Act specifies that no person carrying on any industry, operation or process shall discharge or emit or permit to be discharged or emitted any environment pollutants in excess of such standards as prescribed. The contravention or failure to comply with the provisions of the Environment Protection Act may attract penalties in the form of imprisonment or fine. Further, the Environment Protection Rules specifies, amongst others, the standards for emission or discharge of environmental pollutants, and restrictions on the handling of hazardous substances in different areas.

The Water (Prevention and Control of Pollution) Act, 1974 (the “Water Act”) and Air (Prevention and Control of Pollution) Act, 1981 (“Air Act”)

The Water Act prohibits the use of any stream or well for the disposal of polluting matter, in violation of the standards set out by the concerned PCB. The Water Act also provides that the consent of the concerned PCB must be obtained prior to opening of any new outlets or discharges, which are likely to discharge sewage or effluent. The Air Act requires that any industry or institution emitting smoke or gases must apply in a prescribed form and obtain consent from the state PCB prior to commencing any activity. The state PCB is required to grant, or refuse, consent within four months of receipt of the application. The consent may contain conditions relating to specifications of pollution control equipment to be installed.

Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (“Hazardous Waste Rules”)

The Hazardous Waste Rules define the term ‘hazardous waste’ to include any waste which by reason of physical, chemical, biological, reactive, toxic, flammable, explosive or corrosive characteristics cause danger or is likely to cause danger to health or environment, whether alone or in contact with other wastes or substances including waste specified in the schedules to the Hazardous Waste Rules. In terms of the Hazardous Waste Rules, occupiers, being persons who have control over the affairs of a factory or premises or any person in possession of hazardous or other waste, have been, inter alia, made responsible for safe and environmentally sound management of hazardous and other wastes generated in their establishments and are required to obtain license/ authorization from the respective State PCB for handling, generation, collection, storage, packaging, transportation, usage, treatment, processing, recycling, recovery, pre-processing, co-processing, utilization, selling, transferring or disposing hazardous or other waste.

D. Intellectual Property Laws

The Trademarks Act, 1999 (“Trademarks Act”)

Under the Trademarks Act, a trademark is a mark capable of being represented graphically and which is capable of distinguishing the goods or services of one person from those of others used in relation to goods and services to indicate a connection in the course of trade between the goods and some person having the right as proprietor to use the mark. Section 18 of the Trademarks Act requires that any person claiming to be the proprietor of a trademark used or proposed to be used by him, must apply for registration in writing to the registrar of trademarks. The right to use the mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is 10 (ten) years, which may be renewed for similar periods on payment of a prescribed renewal.

The Patents Act 1970 (“Patents Act”)

The Patents Act governs the patent regime in India. A patent under the Patents Act is an intellectual property right relating to inventions and grant of exclusive right, for limited period, provided by the Government to the patentee, in exchange of full disclosure of his invention, for excluding others from making, using, selling and importing the patented product or process or produce that product. Being a signatory to the Agreement on Trade Related Aspects of Intellectual Property Rights, India is required to recognize product patents as well as process patents. In addition to the broad requirement that an invention must satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria.

The Copyright Act, 1957

The Copyright Act, 1957, along with the Copyright Rules, 2013 (“Copyright Laws”) governs copyright protection in India. Even while copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration under the Copyright Laws acts as prima-facie evidence of the particulars entered therein and helps expedite infringement proceedings and reduce delay caused due to evidentiary considerations. The Copyright Laws prescribe a fine, imprisonment or both for violations, with enhanced penalty on second or subsequent convictions.

E. Foreign Investment Regulations

Further, the Reserve Bank of India has enacted the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 on October 17, 2019 which regulates mode of payment and remittance of sale proceeds, among others. The FDI Policy and the FEMA Rules prescribe inter alia the method of calculation of total foreign investment (i.e. direct foreign investment and indirect foreign investment) in an Indian company.

Foreign Trade (Development and Regulation) Act, 1992 (“FTDRA”), the Foreign Trade (Regulation) Rules, 1993 (“FTRR”) and the Foreign Trade Policy 2023 (“Foreign Trade Policy”)

The FTDRA provides for the development and regulation of foreign trade by facilitating imports into, and augmenting exports from, India. The FTDRA empowers the Central Government to formulate and amend the foreign trade policy. The FTDRA prohibits any person from making an import or export except under an Importer-exporter Code Number (“IEC”) granted by the director general or any other authorized person in accordance with the specified procedure. The IEC may be suspended or cancelled if the person who has been granted such IEC contravenes, amongst others, any of the provisions of the FTDRA, or any rules or orders made thereunder, or the foreign policy or any other law pertaining to central excise or customs or foreign exchange. The FTDRA also prescribes the imposition of penalties on any person violating its provisions. The FTRR prescribes the procedure to make an application for grant of a license to import or export goods in accordance with the foreign trade policy, the conditions of such license, and the grounds for refusal of a license. The FTDRA empowers the Central Government to, from time to time, formulate and announce the foreign trade policy. The Foreign Trade Policy came into effect in 2017 and requires all importers and exporters to obtain an IEC. Further, pursuant to the policy, the Director General of Foreign Trade may impose prohibitions or restrictions on the import or export of certain goods, for reasons including the protection of public morals, protection of human, animal or plant life or health, and the conservation of national resources. The Foreign Trade Policy also prescribes restrictions on imports or exports in relation to specific countries, organisations, groups, individuals or products. The Foreign Trade Policy also provides for various schemes, including the export promotions capital goods scheme and duty exemption/remission schemes. India’s current Foreign Trade Policy (2015-20)

With effect from April 1, 2023, the Central Government notified the Foreign Trade Policy, 2023 (“FTP 2023”), which replaces the earlier policy framework. The FTP 2023 is a long-term policy framework without a fixed end date and is intended to facilitate ease of doing business, reduce transaction costs, encourage automation and digitisation of trade processes, and promote India’s integration into global value chains. The FTP 2023 continues the requirement for importers and exporters to obtain an IEC and empowers the DGFT to impose prohibitions or restrictions on the import or export of specified goods or services, including for reasons relating to public morals, protection of human, animal or plant life or health, national security and conservation of natural resources. The FTP 2023 also provides for restrictions on trade with specified countries, organisations, entities or individuals. Further, the FTP 2023 seeks to shift India’s trade ecosystem from an incentive-based regime to a facilitation-based regime and places emphasis on export promotion through process re-engineering, digitisation, recognition of exporters through status-holder schemes, promotion of exports from MSMEs and labour-intensive sectors, and alignment with India’s overall economic and industrial policy objectives.

Incorporated in 2006, our Company is engaged in the manufacturing of reclaimed rubber, which is recycled rubber derived from used rubber materials such as old tyres, rubber tubes, tread peelings, and industrial scrap, including Ethylene Propylene Diene Monomer (EPDM), a synthetic rubber known for its excellent resistance to heat. Reclaimed rubber serves as a cost-effective and environmental friendly alternative to natural and synthetic rubber and is widely used in the manufacture of various rubber-based products.

We offer reclaimed rubber in three main categories: (i) Natural Rubber Reclaim, produced from rubber tyre casings and tube commonly used in footwear soles, floor mats, tyre base layers, and moulded rubber products, (ii) Synthetic Rubber Reclaim, which includes EPDM and Butyl Reclaim Rubber suitable for applications requiring resistance to oil, heat, and weather, such as automotive seals, hoses, gaskets, and construction profiles and (iii) Crumb rubber made from recycle tyres and used in road construction, sport surfaces and construction materials like roofing sheets. Products are supplied in different grades depending on customer requirements.

Further, we are registered with the Central Pollution Control Board (CPCB) as a Waste Tyre Recycler and hold CPCB Producer Registration under the Extended Producer Responsibility (EPR) framework, which allows us to generate EPR credits by recycling waste tyres. These credits are sold to tyre manufacturers, importers, and brand owners to meet their statutory EPR obligations.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued the UPI Circulars in relation to streamlining the process of public Offer of, inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public Issue closure to listing from six Working Days to up to three Working Days. The SEBI in its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, has reduced the time period for listing of equity shares pursuant to a public Offer from six Working Days to three Working Days. The timeline was applicable on a voluntary basis for public offers opening on or after September 01, 2023 and has been made applicable on a mandatory basis for public offers opening on or after December 1, 2023. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, an Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continued for a period of three months or floating of five main board public issues, whichever is later. SEBI pursuant to its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI pursuant to its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by Individual Investor through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Under the current FDI Policy, 100% foreign direct investment is permitted in the manufacturing sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investor"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.
