After conducting an internal review, we have identified that the primary reasons for these delays are related to reconciliation and operational issues. Although, none of above delays require any require regularisation/ compounding/ adjudication, however, Delays in the submission of these returns may result in financial penalties and potential legal consequences, which may affect our operations. Furthermore, delayed Provident Fund and ESI returns can adversely affect our relationship with regulatory authorities, potentially leading to increased scrutiny and further financial repercussions. To address this issue, we have implemented corrective measures to mitigate future delays. These measures include - Enhancing our reconciliation process to minimize discrepancies, implementing improved cash flow forecasting and management practices, strengthening communication and coordination within our team to expedite return filing.

However, there can be no assurance that such delays may not arise in future. This may lead to financial penalties from respective government authorities which may have a material adverse impact on our financial condition and cash flows.

The Company has not experienced any conflict of interest between the lessor of the immovable properties which are significant for us, with our Company, its directors, shareholders, promoter, promoter group, key managerial personnel. Any potential future conflict of interest, if any may adversely impact the operations of our Company. For further details, please refer to section titled “Our Business” on page 120 of this Prospectus.

4. Our revenues have been significantly dependent on few customers and our inability to maintain such business may have an adverse effect on our results of operations.

For the period ended March 31, 2024, March 31, 2025 and March 31, 2026, our revenue from operations from our top 10 customers contributed to 31.56%, 24.85% and 25.01% respectively of our revenues from operations as per our Restated Financial Statements.

Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

(Amount in Lakhs)

4.	Top 10	1369.72	25.01	1163.83	24.85	1269.30	31.56

*% represents percentage of contribution in the revenue from operations

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources.

Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers’ supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, the sales volume may vary due to our customers’ attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition. In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

5. *There has been increase in our inventory in past years and our inability to accurately forecast demand for our products, and accordingly manage our inventory, may have an adverse effect on our business, cash flows, financial condition and results of operations.*

During the financial year ended March 31, 2024, March 31, 2025 and March 31 2026, there has been an increase in our Inventory. Our Inventory has increased from Rs. 250.07 lakhs as on March 31, 2024 to Rs. 450.60 Lakhs as on March 31, 2025 and from Rs. 450.60 Lakhs as on March 31, 2025 to Rs. 536.95 lakhs as on March 31, 2026 which is on account of non-utilisation of entire raw material in our production during the respective period. Similarly, our Inventory days has been increased from March 31, 2024 to March 31, 2026.

Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, cash flows, financial condition and results of operations. Any error in forecasting could result in surplus stock which would have an adverse effect on our working capital requirement. As of March 31, 2026, our inventory of raw materials, and other items amounted to Rs. 536.95 lakhs. Our level of inventory increases the risk of loss and storage costs to us as well as increasing the need for working capital to operate our business. Further, as our customers are not obliged to purchase our products or provide us with a binding long-term commitment, there can be no assurance that customer demand will match our production levels. On the other hand, in the event that the demand we have forecasted is lower than the actual demand of our products, and we are unable to ramp up production to match such demand, we may be unable to supply the requisite quantity of products to our customers in a timely manner. Any increase in our turn-around time could affect our production schedules and disrupt our supply, which could have an adverse effect on our business, cash flows, financial condition and results of operations.

6. *We have experienced negative cash flows and any negative cash flows in the future could adversely affect our financial conditions and results of operations.*

The detailed break up of cash flows as restated is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

Any adverse outcome of the pending trademark opposition proceedings may adversely affect our business, brand recognition, reputation and results of operations.*

Our Company has applied for registration of the trademark "AMERICAN BAKERS" under Application No. 6737628 in Class 30. The said application has been opposed and the opponent has sought refusal of our trademark application under, inter alia, Sections 9, 11 and 18 of the Trade Marks Act, 1999. The Opponent has, alleged that our trademark is visually, structurally and phonetically similar to its trademarks and that the use and registration of our trademark is likely to cause confusion amongst consumers and members of the trade. The Opponent has also alleged that our trademark application was filed on a "proposed to be used" basis and has challenged the bona fide adoption of our trademark.

Our Company, through its attorneys, has filed a detailed counter statement and supporting documents contesting the allegations made by the Opponent and has submitted that our trademark is visually, structurally and phonetically distinct from the Opponent's trademarks and is eligible for registration under the provisions of the Trade Marks Act, 1999. Due to the geographical concentration of our manufacturing operations in Uttar Pradesh, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations. In addition, we generate major domestic sales through our customers situated in Uttar Pradesh. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations. Further, as we enter into new markets and geographical areas, we are likely to compete with other players, who might have an established presence, and are more familiar with business practices and have stronger relationships with local customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

Our company deals in two category of products, one is bread and other consist of other bakery items. The company’s revenue from “bread” for last three financial year ended on March 31, 2026, 2025 and 2024 was 99.91%, 99.63% and 89.46% respectively. Total	5,477.63	100	4,683.07	100	4,021.53	100

Although the company have been able to maintain the quality and taste and not encountered any such situations we cannot guarantee that we will not face in future. Our Company has made application dated December 03, 2024, for its logo ‘’ under classes 30 under the Trade Mark Act, 1999 which is pending as on date of this Prospectus. There can be no assurance that we will be able to successfully obtain registration against the application for the logo of the Company, which may affect our ability to use such trade marks in the future. If we are unable to renew or register our trademarks for various reasons including our inability to remove objections to any trademark application, or if any of our unregistered trademark are registered in favour of or used by a third party in India or abroad, we may not be able to claim registered ownership of such trademark and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill in India and abroad. Apart from this, any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future.

Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. 11. The Company’s business involves the processing and sale of breads, buns and other bakery items. Any contamination or adulteration of these products could lead to product liability claims, regulatory actions, or reputational damage.

The Company’s business involves the processing and sale of of breads, buns and other bakery items. Any contamination, adulteration, or failure to maintain required safety and quality standards in these products could lead to product liability claims, regulatory actions, recalls, or legal proceedings. We are subject to various contamination related risks which typically affect the Bread and bakery industry, including risks posed by the following:

- low shelf life of certain of our products;
- ineffective storage of finished goods as well as raw materials;
- product labelling errors;
- low or non-maintenance of food safety standards;
- contamination of our products during processing and packing;

From the procurement of raw materials to the manufacturing and delivery of the finished goods, there is a chance that our products will become contaminated or deteriorate. Purchasing, storing, and shipping the raw materials all have a high risk of contamination and quality degradation. Such contamination and deterioration risks also apply to the packaging, storage, and delivery of our products to customers, as well as the stocking and storage of our products by our super stockists, distributors, and retailers until they are consumed by customers. We may also be subject to liabilities arising out of such violations under the provisions of the Food Safety and Standards

Act, 2006 ("FSS Act") along with relevant rules and regulations. Though, we have not been subject to such incidents in the past, however, we may be subject to such an event in the future, which may have a material adverse effect on our reputation, business and financial condition. Such events could result in financial losses, reputational damage, loss of consumer confidence, and adverse impact on business operations and profitability. While the Company has implemented stringent quality control and food safety measures, there can be no assurance that contamination or adulteration incidents will not occur in the future. Any such occurrence could have a material adverse effect on the Company's business, financial condition, results of operations, and cash flows. As one date of Prospectus, the Company has not experienced any incidents of contamination or adulteration of its products.

- 12. *Our business operations require maintaining substantial inventory levels, which exposes us to significant financial losses due to the perishable nature of our products and raw materials, and accordingly any mismanagement of our inventory, may have an adverse effect on our business, cash flows, financial condition and results of operations.***

During the financial year ended March 31, 2024, March 31, 2025 and March 31 2026, there has been an increase in our Inventory. Our Inventory has increased from Rs. 250.07 lakhs as on March 31, 2024 to Rs. 450.60 Lakhs as on March 31, 2025 and from Rs. 450.60 Lakhs as on March 31, 2025 to Rs. 536.95 lakhs as on March 31, 2026 which is on account of non-utilisation of entire raw material in our production during the respective period. Similarly, our Inventory days has been increased from March 31, 2024 to March 31, 2026.

A substantial portion of our inventory comprises perishable raw materials and finished bakery products with extremely short shelf lives, any drop in market demand, inaccurate sales forecasting, or distribution delays can lead to immediate spoilage, rendering the inventory unsellable. Higher inventory levels lock up significant cash flows that could otherwise be deployed for strategic growth, debt reduction, or daily operational needs. If we are unable to convert this inventory into revenue rapidly, our liquidity position, working capital cycles, and overall financial health may be adversely affected.

We cannot assure you that our inventory management systems, including our First Expired, First Out ("FEFO") protocols, will be completely effective in eliminating spoilage or overstocking. If our inventory management strategies fail to align precisely with shifting consumer preferences and market demand patterns, our Cost of Materials Consumed will increase, which would materially and adversely affect our operating margins, net profitability, and cash flows.

- 13. *There have been certain insufficient/failed payments by our Company resulting in pending litigation proceedings against us which, if decided adversely, could severely impact our financial position and business operations.***

Our Company has, from time to time, made insufficient payments toward our suppliers which are on account of temporary timing mismatches between receipts and payment obligations and certain inadvertent administrative lapses. These payment shortfalls involve trade suppliers. Consequent to these persistent delays, some of the parties have initiated lawsuits, and summary legal actions against us before various judicial forums.

As of the date of this Prospectus, there are 5 outstanding material litigations pending against us involving an aggregate financial exposure of Rs. 34.52 Lakhs. We cannot assure you that we will be successful in defending these actions, or that additional litigations will not be initiated against us for past or future payment shortfalls. Any adverse outcome in these proceedings, or future payment defaults, may trigger severe operational disruptions, materially affecting our business, financial condition, and results of operations.

- 14. *Changes in Statutory Auditors:***

Our Company has experienced changes in its statutory auditors in the past. Although each change was carried out in full compliance with applicable laws and regulations, including the requirements under the Companies Act and the relevant accounting standards, such changes may still give rise to concerns regarding the continuity and consistency of the audit process. The Company's auditors have always followed the prescribed regulatory framework and only after fulfilling these requirements have they finalized the accounts. While the Company will make every effort to avoid frequent changes in auditors, it cannot assure that such changes will not occur again in the future. Even though we have ensured that all erstwhile statutory auditors were appropriately qualified and that

their replacement did not materially impact our financial statements, any transition from one auditor to another – especially when it takes place close to the fiscal year-end – may introduce certain risks. These risks include potential variations in auditing approaches, interpretations, or professional judgments between the outgoing and incoming auditors. Additionally, there may be challenges in reconciling or reviewing the audit work already completed by the former auditors, which could affect the overall audit process. While past transitions have not resulted in material issues, there is no guarantee that future changes will not influence investor perception, introduce uncertainties regarding the consistency of the audit review, or affect how our financial health is interpreted. Investors should therefore be aware that any change in statutory auditors, even when conducted fully in accordance with regulatory requirements, may lead to concerns about the audit process and could impact confidence in our financial reporting.

15. *We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Further, our Company has obtained a certificate dated July 17, 2026 from a Chartered Engineer that the Company has filed application for obtaining the Fire No Objection Certificate ("**Fire NOC**") is not applicable on the Company, however, the Company has voluntarily applied for registration of Fire NOC and also, our Company has applied for registration of Trademark, which are pending before the respective competent authorities. Although we have already submitted the requisite applications and have not received any notice, show cause notice, penalty, closure direction or any other adverse communication from the concerned authorities in relation to such pending approvals, however, there can be no assurance that the said approvals will be granted within the anticipated timelines or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition. The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. For further details regarding pending approvals, please refer to section titled "**Government and Other Approvals**" and "**Material Contracts and Documents for Inspection**" beginning on page 230 and page 339 of the Prospectus.

16. *Volatility in the supply and pricing of our raw materials, or failure by suppliers to meet their obligations, may have an adverse effect on our business, cash flows, financial condition and results of operations.*

The principal raw materials used in our manufacturing process include are wheat flour, Maida, etc. Our cost of materials consumed for the financial year ended on March 31, 2026 was Rs. 4043.15 lakhs, which represented 73.81% of our revenue from operations. The amount spent for the procurement of raw materials from our top ten suppliers, as a percentage of our total purchases, was 36.07 % for the financial year ended on March 31, 2026.

Further, our top 10 suppliers for the financial year ended on March 31, 2026, March 31, 2025 and March 31, 2024 constitute 36.07%, 36.78% and 39.90% respectively of total purchase of our Company during the respective period.

Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices. We do not have long term agreements with any of our raw material suppliers and we acquire such raw materials pursuant to our purchase orders from suppliers. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and

labour costs, labour unrest, natural disasters, competition, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers may in turn delay our process of manufacturing and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations.

17. *Certain audit reports and financial statements issued by our erstwhile statutory auditor in the past did not contain the Unique Document Identification Number (UDIN) as prescribed under the guidelines of Institute of Chartered Accountants of India (“ICAI”).*

The Audit reports and Financial Statements issued and signed by our erstwhile statutory auditor of the Company for the financial year ended on March 31, 2019, 2020, 2021, 2022, 2023 does not contain the UDIN as required under the guidelines issued by ICAI. The omission to mention UDIN in the aforesaid audit reports was procedural in nature and was attributable to the erstwhile statutory auditor and may expose the concerned statutory auditor with appropriate actions, if any, under the applicable provisions of laws.

The Company believes that aforesaid omission does not affect the accuracy of the underlying financial statements, books of account or other financial records of the Company. Further, the Restated Financial Information included in this Prospectus has been prepared and certified in accordance with the applicable provisions of the Companies Act, 2013, the SEBI ICDR Regulations and other applicable laws. The Restated financial information included in this Prospectus has also been subjected to independent examination and reporting by the Peer Reviewed Statutory Auditor appointed for the purpose of the Issue.

While no regulatory proceedings or actions have been initiated against the Company in relation to the aforesaid matter, however, there can be no assurance that any regulatory authority may not seek further clarifications, require additional compliances or take a different view in respect of such past non-compliance. Any adverse observations, regulatory actions or compliance requirements arising in connection with the aforesaid matter may adversely affect the reputation of the Company regarding our compliance framework, which could have an adverse effect on our business, financial condition, results of operations and future prospects.

18. *Our inability to anticipate, respond to and meet the tastes, preferences or consistent quality requirements of our consumers or our inability to accurately predict and successfully adapt to changes in market demand or consumer preference could reduce demand for our products, affect our brand loyalty and impact our sales.*

Our operational outcomes and expansion strategies are heavily reliant on the Indian market's demand for our breads and other bakery goods details of which are mentioned in chapter “**Our Business**” beginning on page no 120 of this Prospectus. Consumer-related factors including demographics, regional preferences, food consumption patterns, and consumer confidence levels, as well as macroeconomic factors like the state of the economy, are the main drivers of demand for our products. It has been observed that there has been a recent trend toward healthier food choices. Customers now favor low calorie items as they become more conscious of the need to eat a healthy diet and the numerous health issues linked to these foods.

19. *Any Failure to maintain consistent product quality standards in our raw materials and finished products may lead to negative publicity which may adversely affect our reputation, customer relationships, and business and results of operations.*

The success of our business is heavily dependent on our ability to procure high-quality raw materials. In the case of Bread and other bakery items, several parameters are considered for assessing quality, such as color, shape, weight etc. We procure our raw material from local vendors. The quality of raw materials directly impacts the quality of our finished products. Any lapse in quality control during procurement or processing may compromise the final product quality, which could result in customer dissatisfaction, increased product returns, or claims for compensation. Such instances may lead to loss of customer confidence and trust, thereby adversely

affecting our brand image, reputation, and long-term customer relationships. Further, any significant or repeated quality issues may expose us to negative publicity. This may also result in financial implications, including increased costs due to replacement, discounts, or credit notes issued to customers, thereby impacting our profitability and overall business operations. Although no quality claims have been made in the past, however, we do not guarantee that we won't be facing any such complaints or litigations in future but in case liabilities arise this could have material adverse impact on the financials, Business and operations.

20. Our business is dependent on our Manufacturing Facility. Any shutdown of operations of our Manufacturing Facility may have an adverse effect on our business and results of operations.

We have a Manufacturing Facility situated at Khasra- 378, Village Dinanath Pur Puthi, Post Dasna, Ghaziabad-201015. Our Manufacturing Facility is supported by infrastructure for storage of raw materials and finished goods, together with quality control equipment and processing team. This Manufacturing Facility is subject to the normal risks of industrial production, including natural disasters, directives from government agencies and power interruptions. For further details, please see *"Our Business"* on page 120. We cannot assure you that we will not go through closure or shutdown of Manufacturing Facility in the future.

Any extended power supply interruption will result in reduced production at the affected facility. We majorly depend on public/ state power supply utilities for the supply of power to our Manufacturing Facility. For further details, please see *"Our Business"* on page 120. Although we have a backup DG Set to supply intermittent electric supply, however, any shortage or interruption in the supply of electricity may adversely affect our operations and increase our production costs. This could lead to delays in delivery of our products or non-delivery, resulting in loss of revenue and damage to our reputation or customer relationships. Our Manufacturing Facility uses complex equipment and machinery, and the breakdown or failure of equipment or machinery may result in us having to make repairs or procure replacements which may require considerable time and expense and as a result, our results of operations and financial condition could be adversely affected. However, there have been no instances in the past arising from production or shutdown of manufacturing facilities which would adversely affect our business results of operations and financial condition but we cannot assure that such instances will not happen in the future.

21. Delays in Filing with Registrar of Companies, non-filing, or partial compliance with the requirements of certain statutory authorities and applicable regulatory provisions. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

In the past, there have been some instances of delays/ non-filing/ non-compliance with certain statutory authorities with certain provision of statutory regulations applicable to us. While the Company is actively undertaking corrective measures to address these issues and enhance internal compliance protocols, there remains a risk that regulatory authorities may, in the future, impose penalties, fines, or initiate other actions due to these past non-compliances. Such regulatory actions could adversely affect the financial position, operations, or reputation of the Company.

The Company continues to review and regularize its filings and records to ensure ongoing compliance with applicable laws and regulations. However, the possibility of oversight or regulatory scrutiny cannot be entirely ruled out.

Also, some of documents filed with registrar of companies was not properly signed, typographical error and no proper letterhead was used by the Company in terms of provisions of Companies Act, 2013.

Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Although no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company, Promoters and directors, in which event the financials of our Company, Promoters and our Directors may be affected. Further we cannot assure that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. While no legal proceedings or regulatory action has been initiated against our Company in relation to above mentioned non-compliance or instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Prospectus, however, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

22. *The Company does not have complete information regarding the MSME registration status of all its suppliers. Consequently, any liability towards interest, if applicable, under the Micro, Small and Medium Enterprises Development Act, 2006, cannot presently be ascertained, which may adversely affect our financial condition and results of operations.*

The Company does not have complete information as to which of its suppliers are registered as Micro or Small Enterprises under the provisions of the Micro, Small and Medium Enterprises Development Act, 2006 ("MSMED Act"). Consequently, the Company is presently unable to ascertain the liability, if any, towards interest that may be payable under the provisions of the MSMED Act in respect of delayed payments to such suppliers.

Although the Company has not received any claim or demand in respect of such interest in the past 3 financial years and, accordingly, no provision has been made in the books of account, there can be no assurance that such claims or demands will not be raised by any existing or future supplier claiming the benefits available under the MSMED Act. In the event any such liability arises, the Company may be required to recognize additional expenses and make payments towards interest, which could adversely affect its profitability, cash flows, financial condition and results of operations.

23. *Our inability to accurately forecast demand for our products, and accordingly manage our inventory, may have an adverse effect on our business, cash flows, financial condition and results of operations.*

Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, cash flows, financial condition and results of operations. We do not have firm commitment long term supply agreements with our customers and instead rely on short term purchase orders to govern the volume and other terms of the sales of products.

Accordingly, we plan our production volumes based on our forecast of the demand for our products. Any error in forecasting could result in surplus stock which would have an adverse effect on our profitability. We maintain a high level of inventory of raw materials and other items. As of March 31, 2026, our inventory of raw materials, and other items amounted to Rs. 536.95 lakhs. Our high level of inventory increases the risk of loss and storage costs to us as well as increasing the need for working capital to operate our business. Further, as our customers are not obliged to purchase our products or provide us with a binding long-term commitment, there can be no assurance that customer demand will match our production levels. On the other hand, in the event that the demand we have forecasted is lower than the actual demand of our products, and we are unable to ramp up production to match such demand, we may be unable to supply the requisite quantity of products to our customers in a timely manner. Any increase in our turn-around time could affect our production schedules and disrupt our supply, which could have an adverse effect on our business, cash flows, financial condition and results of operations.

24. *We are exposed to consumer complaints and potential litigation due to the nature of our products. Any consumer complaints and potential litigation due to the nature of our products may adversely affect our brand, reputation in the market and any penalty or action taken by any regulatory authorities in this respect could impact the financial position of the Company to that extent.*

Since we are in consumer-oriented products, we are exposed to consumer complaints and potential litigations. Claims and complaints in the normal course of business can arise out of deficiency in product or damaged products or any side effects they might encounter after its use. Even though we do not directly sell to end consumer, but any product sold by the distributor, wholesaler or retailer which are expired or contaminated for reasons not under our control will make us a party to such consumer complaints. These complaints, if not resolved to the satisfaction of the consumer, can result in potential litigations which if proven against company can result in fine and penalties. Further, this can tarnish the image of the company as well as of the products which might result into a decrease in sale of specific and other products also in our portfolio.

Moreover, any false rumors or allegations by any person regarding our product or its intended use can result into negative publicity and loss of confidence of consumers which in turn will result into loss of market share, brand value, negative financial impact. Further in addressing the claims and litigations resources such as time, effort and money will be utilized which will affect the financial resources as well as the reputation of the company. Although no claims have made in the past, however, we do not guarantee that we won't be facing any such complaints or litigations in future but in case liabilities arise this could have material adverse impact on the financials, Business and operations.

25. *In the event of any accident at our Manufacturing Facility, our Company may be held liable for damages and penalties which may impact the financials of our Company.*

Some of portion of our business involves mixing of raw material and finished product is being prepared under hot oven where raw material is stored to be prepared which maintain at a high temperature, any mishandling of our equipment and machineries by our employees/ labour could also lead to serious and sometimes fatal accidents. These accidents can cause personal injury and loss of life, severe damage to and destruction of property and equipment, and may result in the suspension of operations and the imposition of civil and criminal liabilities.

For more details, see the section titled “Our Business” on page 120.

Although, there has been no material incident in the past three financial years requiring the Company to claim insurance from the insurance company. However, we cannot ensure that such accidents will happen in future which may have adverse impact our financial position, our reputation with suppliers, customers, regulators, employees and the public, which could in turn affect our financial condition and business performance.

26. *Our Company does not have any formal contracts with suppliers and disruption in the supply of raw materials may adversely affect our results of operations.*

We are, to a major extent, dependent on external suppliers for our raw materials requirements and we do not have any formal supply agreements or commitments in relation to the same or for any other raw materials used in our manufacturing process. There can be no assurance that there will not be a significant disruption in the supply of raw materials from current sources or, in the event of a disruption, that we would be able to locate alternative suppliers of materials of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, responsiveness and service, financial stability and labour and other ethical practices. Consequently, we may also be exposed to price fluctuations in raw materials, and these fluctuations may adversely affect our ability to obtain orders and/or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition. In case of non-availability of raw materials on favourable terms, we may have to procure the same at the terms and conditions prevalent at that point. This may result in reducing our revenues by a considerable amount due to shortage of raw material or due to inability to procure the same. Further, unfavourable terms of raw materials may also force us to reduce the scale of our operations resulting in a down-sizing of our overall business. Any delay, interruption or increased cost in the supply arising from a lack of formal contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

27. *We sell our Bread and other bakery products through various dealers and any inability to expand or effectively manage our growing distribution and sales network may have an adverse effect on our business, results of operations and financial condition.*

We have a sales and distribution network that consists of various retail dealers. Our bakery products are sold to retail end-consumers through dealers, who resell our products at their multi-branded outlets. For further details, see the section titled “*Our Business*” on page 120. We continuously seek to increase the penetration of our products by appointing new dealers targeted at different markets and geographies. We cannot assure you that we will be able to successfully identify and appoint new dealers or effectively manage our existing distribution network. If the terms offered to such dealers by our competitors are more favourable than those offered by us, dealer may decline to distribute our products. Accordingly, we may not be able to appoint replacement dealers in a timely manner, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition. Further, our competitors may have exclusive arrangements with other dealers which may restrict them from stocking and selling our products through them, thereby limiting our ability to expand our network. Accordingly, we may not be able to effectively implement them across our distribution network. We may also face disruptions in the delivery of our products for various reasons beyond our control, including poor handling by dealers of our products, transportation bottlenecks, natural disasters, logistics and labour issues, which could lead to delayed or lost deliveries. If our dealer fails to distribute our products in a timely manner, our business and results of operations may be adversely affected.

28. *The bakery product industry is competitive and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The bakery product industries in India are competitive and fragmented. We face competition in our bakery product business from other organised and unorganised brands. Our organised competitors may incur lesser operating expenses, given the size and scale of their operations and have a deeper retail reach in the territories that they operate in, than us. Some of our competitors may be larger than us or develop alliances to compete against us, have more financial and other resources and have products with greater brand recognition than ours. Our competitors in certain regions may also have better access to raw materials required in our operations and may procure them at lower costs than us, and consequently be able to sell their products at lower prices. As a result, we cannot assure you that we will be able to compete successfully in the future against our existing or

potential competitors or that our business and results of operations will not be adversely affected by increased competition.

29. *Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*

As of March 31, 2026, we operate one manufacturing facility in Khasra- 378, Village Dinanath Pur Puthi, Post Dasna, Ghaziabad-201015 with an aggregate installed production capacity of 9,472 TPA.

Following is the detail of our Capacity in the last three years and period ended March 31, 2026:

Particulars	For the period ending on March 31, 2026	For the period ending on March 31, 2025	For the period ending on March 31, 2024
Installed Capacity (in tons)	9,472	9,472	9,472
Actual Production (in tons)	8,651	7,994	7,446
Capacity Utilisation (in %)	91.33%	84.39%	78.61%

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by, our customers and efficient supporting machineries and equipments. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

Further, we intend to use a part of the Net Proceeds towards expansion of our existing manufacturing facility at Khasra- 378, Village Dinanath Pur Puthi, Post Dasna, Ghaziabad-201015. Adequate utilization of our expanded capacities is subject to various factors beyond our control and in case of oversupply in the industry or lack of demand, we may not be able to utilise our expanded capacities efficiently. The success of any capacity expansion and expected return on investment on capital invested is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise and utilize the expanded capacities as anticipated. For further information, see *“Our Business - Capacity and Capacity Utilization”* on page 120 of this Prospectus. These rates are not indicative of future capacity utilization rates, which is dependent on various factors, including demand for our products, availability of raw materials, our ability to manage our inventory and improve operational efficiency. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could materially and adversely impact our business, growth prospects and future financial performance.

30. *Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.*

Our Company’s business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand/ potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand/ potential orders, it could cause either a shortage of products or an accumulation of excess inventory.

During the financial year ended on March 31, 2026, 2025 and 2024, our inventories were Rs. 536.95 Lakhs, Rs. 450.60 Lakhs, Rs. 250.07 Lakhs accounted for 31.91%, 34.46% and 24.05% respectively of the total current assets. Further, during the financial year ended March 31, 2026, 2025 and 2024 our trade receivables were Rs. 937.85 Lakhs, Rs. 790.23 Lakhs and Rs. 724.70 Lakhs respectively which accounted for 55.73%, 60.44% and 69.69% respectively of the total current assets. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit

worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-off which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations.

For further details, please refer to chapter titled “*Restated Financial Statements*” beginning on page no 176 of this Prospectus.

31. *Our business is dependent upon accurate demand forecasting and efficient distribution of our bakery products, which are perishable in nature and have limited shelf life. Any mismatch between production and market demand may result in inventory losses, product returns and adversely affect our business, financial condition and results of operations.*

Our Company is engaged in the business of manufacturing and sale of varieties of bread like Milk Bread, White Bread, Multigrain Bread, Brown Bread under Bread category and other Bakery products like Kulcha; Pav; Burger Bun, Pizza Base etc. Such bakery products are perishable in nature and generally have a limited shelf life. As a result, our business requires efficient production planning, inventory management and distribution to ensure timely delivery of products to our customers.

Any mismatch between production volumes and market demand may result in excess inventory, product returns, spoilage, wastage and write-offs. Further, any disruption in transportation, distribution channels, supply chain operations or delays in delivery may affect the quality and freshness of our products and may lead to customer dissatisfaction, cancellation of orders and loss of business opportunities. We may also incur additional costs in relation to replacement, disposal and logistics of unsold or returned products. In the event we are unable to accurately forecast demand, effectively manage inventory levels or maintain an efficient distribution network, our business operations, profitability, cash flows, financial condition and results of operations could be materially and adversely affected. Accordingly, any inability to effectively forecast demand, manage inventory levels or maintain an efficient distribution network could materially and adversely affect our business, financial condition, cash flows and results of operations.

There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected. Our operations may be subject to incidents of theft or damage to inventory, prior to or during stocking and display. Although, we have set up various security measures and follow stringent operational processes such as stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition. Although, there has been no such instances in the past 3 financial years but we cannot guarantee that they will not occur in the future.

Though, our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our input materials or finished goods may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure input materials on time. Although, there has been no such instances in the past however, any such disruptions could materially and adversely affect our business, financial condition and results of operations.

There can be no assurance that the proposed capacity additions and expansions will be completed as planned or on schedule, and if they are not completed in a timely manner, or at all, our budgeted costs may be insufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

- 37. *Our Company may not be successful in penetrating new geographical markets and expanding in any new geographical regions may lead to additional risks associated with establishing and conducting operations which may adversely affect our business operations and financial results.***

staffing and managing such operations and the lack of reputation in such regions. In addition, the risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. We evaluate the financial condition of our customers and usually bill and collect on relatively short cycles. There is no guarantee that we will accurately assess the creditworthiness of our customers. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of amount also depends on our ability to complete our contractual commitments and subsequently bill for and collect our payments for the sales. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our customer balances, and if this occurs, our results of operations and cash flows could be adversely affected. GLOBAL PROSPECTS AND POLICIES

The year 2025 has been fluid and volatile, with much of the dynamics driven by a reordering of policy priorities in the United States and the adaptation of policies in the other economies to new realities. Trade news has dominated the headlines, and, along with them, perceived prospects for the global economy have fluctuated. As observed in the April 2025 World Economic Outlook (WEO), a series of new tariff measures by the United States lifted tariff rates to levels not seen in a century. Countermeasures by US trading partners were limited, barely moving the effective tariff rate on US exports. A flurry of announcements followed, including trade deals between the United States and several of its trading partners and a reset to higher tariff rates for countries without a trade deal (see the WTO-IMF Tariff Tracker for a summary). As a whole, the announcements brought down the US effective tariff rates from their April highs, gravitating toward a range between 10 percent and 20 percent for most countries (Figure 1.1). Nonetheless, tariffs are very far from falling back to their 2024 levels. Trade policy uncertainty remains elevated in the absence of clear, transparent, and durable agreements among trading partners – and with attention starting to shift from the eventual level of tariffs to their impact on prices, investment, and consumption (Figure 1.2).

There have also been changes in other policy domains. On the international side, sizable cuts in development aid and more restrictive stances on immigration have been introduced. Official development assistance dropped by 9 percent in 2024 and, based on announced cuts by major donors, a drop of similar magnitude is expected in 2025 (OECD 2025). Low-income developing countries face the largest impact, although with different effects among members of this group. Meanwhile, net migration into several advanced economies that have been traditional recipients of migrant inflows has declined sharply. On the domestic side, in major economies – most notably, the United States – a shift toward a more stimulative fiscal stance, including from changes in defense spending in some cases, has also raised concerns about the lack of adjustment toward more sustainable public finances and has broad cross-border spillovers. Meanwhile, progress on long-overdue growth-enhancing structural reforms continues to be stalled.

As the new landscape takes shape, the world is adapting. The evolution of WEO projections painted a picture of a significant, though not massive, impact of shifting policies on the economic outlook. The tariff shock in April and the associated uncertainty with which it unfolded prompted a downward revision of the global growth projection for 2025, by 0.5 percentage point to 2.8 percent, in the April 2025 WEO. In the July 2025 WEO Update, it was mainly the lowering of tariff rates and the implications thereof for uncertainty and financial conditions that drove a modest 0.2 percentage point upward revision of the 2025 global growth projection to 3.0 percent. Global inflation projections were revised little in April and July, but revisions in different directions across countries offset each other. Specifically, inflation forecasts were revised upward in the United States but downward in many other jurisdictions, consistent with the expectation that the shifting international trade landscape would imply a supply shock in the tariffing country and a demand shock in the tariffed countries.

Note: The uncertainty measures are news- and media-outlet-based indices that quantify media attention to global news related to overall uncertainty (WUI), economic policy uncertainty (EPU), and trade policy uncertainty (TPU).

To date, more protectionist trade measures have had a limited impact on economic activity and prices. Growth held up in the first half of the year, with yearover-year quarterly

annualized growth rates persisting at about 3½ percent. Inflation has shown more mixed signals. Globally, sequential headline and core inflation edged up. Relative to WEO projections, inflation readings surprised on the upside in Mexico and the United Kingdom. By contrast, inflation in India, Malaysia, the Philippines, and Thailand surprised on the downside. In China, inflation developments were broadly in line with expectations, with consumer price inflation remaining at very low levels and producer price inflation continuing to be negative. In the United States, headline inflation held steady, driven by moderating price increases in core services and with disinflationary dynamics in goods prices receding.

Recent Developments: Resilience Giving Way to Warning Signs

The global economy has shown resilience to the trade policy shocks, including because these shocks materialized on a smaller scale than expected at their onset, but the drag from shifting policies is becoming visible in more recent data. There have been several common drivers of growth patterns across countries but also some important idiosyncratic factors.

The last round of tariffs came in as the US economy started to show signs of a material slowdown. GDP grew at an annualized 3.8 percent in the second quarter of 2025, but mainly because imports and inventories fully reversed the outturn observed in the first quarter, which had seen a contraction of –0.6 percent. Investment slowed, with a reduction in spending on commercial and residential construction and broader weakness masked by a surge in spending on equipment and intellectual property, including those related to AI. The jobs reports since July were much weaker than expected, with significant decline in the number of jobs added. The unemployment rate edged up to 4.3 percent in August. Signs of slowing activity and a weakening labor market appeared in the context of ongoing shifts in labor supply. Net international migration flows plunged in the first half of 2025 and, if the current trends continue, it could imply about 1.0–1.6 million fewer immigrants than in 2024 and 2.5 million fewer than in 2023 (Duzhak and NewSchmidt 2025).

Other major economies are showing signs of waning of the front-loading that drove stronger-than-expected outcomes in the first quarter of 2025. Growth in China in the second quarter slowed to 4.2 percent from 6.1 percent in the first quarter (based on staff seasonally adjusted estimates), with the contribution of net exports receding. This

partly offset the acceleration in domestic demand, possibly driven by policy stimulus. High-frequency indicators point to a deceleration in economic activity in July and August. In the euro area, GDP growth slowed to 0.5 percent, from 2.3 percent in the first quarter.

Declines in growth rates

were recorded in Germany and Italy, as well as in Ireland, which had disproportionately contributed to euro area growth in the first quarter, with export performance driven by pharmaceutical sector transactions, partly as a result of front-loading. In Japan, the economy grew at an annualized rate of 2.2 percent in the second quarter, accelerating from 0.3 percent in the first quarter. In addition to solid capital spending, this was propelled by strong exports, especially of cars. However, new export orders fell in July, for the first time since December, and export values dropped, led by sectors most affected by tariffs.

The composition of contributions to GDP growth in major economies indicates few signs of underlying strength in demand. It clearly illustrates the distortions in trade flows in the past few quarters (Figure 1.3). Importantly, consumption

growth has been subdued in all key jurisdictions. And investment has weakened, notwithstanding bursts of activity before the tariff news in April. This is broadly in line with depressed consumer and business confidence (Figure 1.4).

Beyond China, emerging market and developing economies more broadly showed strength, sometimes because of particular domestic reasons, but recent signals point to a fragile outlook there as well. Growth for the group of emerging market economies excluding China was stronger than expected in the first half of 2025, thanks in part to record agricultural output in Brazil, robust service sector expansion in India, and resilient domestic demand in Türkiye. The stronger-than-expected economic performance adds to a more general trend of resilience in emerging markets, which originates in improvements in domestic institutions and favorable external conditions (see Chapter 2). However, external conditions are becoming more challenging, and in some cases, domestic momentum is slowing. For instance, in Brazil, signs of moderation are appearing amid tight monetary and fiscal policies. Higher

tariffs imposed by the United States are curtailing external demand, with profound implications for several large export-oriented economies, while heightened trade policy uncertainty is dampening firms' appetite for investment. At the same time, constrained fiscal space is reducing governments' ability to stimulate domestic demand where needed. Among the group of low-income countries, some of the world's poorest economies continue to see feeble growth – about 2 percentage points lower than other peers in this group – adversely affected by a dearth of external financing flows and cuts to international aid. Other fragile countries, caught up in internal or regional conflicts, are falling even more behind (Chabert and Powell 2025).

INDIAN ECONOMIC OUTLOOK

India's economic journey over the past few years has been marked by remarkable growth and a steady rise in its position on the global stage. After overtaking the United Kingdom (UK) to become the fifth largest economy in Q1 FY23, India has continued this upward trajectory to surpass Japan in June 2025 to become the fourth largest economy in the world. With a nominal Gross Domestic Product (GDP) of Rs. 3,31,03,000 crore (US\$ 3.78 trillion), India's growth reflects a combination of strong domestic demand and policy reforms positioning the country as a key destination for global capital.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

MARKET OVERVIEW

India's Real Gross Domestic Product (GDP) or GDP at Constant Prices stood at Rs. 47.89 lakh crore (US\$ 544.20 billion) in Q1 of FY26, up from Rs. 44.42 lakh crore (US\$ 504.77 billion) in Q1 FY25, registering a growth rate of 7.8%. Nominal GDP or GDP at Current Prices for the same period was estimated at Rs. 86.05 lakh crore (US\$ 977.84 billion), compared to Rs. 79.08 lakh crore (US\$ 898.64 billion) in the corresponding quarter of the previous year, showing a growth rate of 8.8%.

As on October 14, 2025, India is home to 123 unicorns, with six new startups achieving unicorn status in 2025.

India's current account recorded a deficit of Rs. 21,288 crore (US\$ 2.37 billion) in Q1 FY26 (April-June), compared to Rs. 76,282 crore (US\$ 8.6 billion) in the same period of FY25, according to the Reserve Bank of India (RBI). The improvement reflects a narrower merchandise trade gap and steady growth in service exports. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 97,22,411 crore (US\$ 1.09 trillion) between April 2000-June 2025; with major share coming from Singapore at Rs. 12,57,392 crore (US\$ 142.88 billion) with a total share of 24%, followed by Mauritius at Rs. 11,10,692 crore (US\$ 126.22 billion) with 21%, the USA at Rs. 5,41,654 crore (US\$ 61.56 billion) with 10%, the Netherlands at Rs. 3,68,694 crore (US\$ 41.90 billion) with 7%, and Japan at Rs. 2,88,090 crore (US\$ 32.74 billion) with 6%.
- As on October 3, 2025, India's foreign exchange reserves stood at Rs. 62,14,364 crore (US\$ 701.24 billion).
- India registered 301 Private Equity (PE) deals worth Rs. 49,745 crore (US\$ 5.7 billion) in Q3 2025, recording a 7% rise over the previous quarter. India-focused PE-VC funds raised Rs. 21,576 crore (US\$ 2.47 billion) across 22 funds, a 148% YoY increase, driven by strong inflows into the IT & ITeS sector (US\$ 2.4 billion). Mumbai led in investment value, while Bangalore topped in deal volume, reaffirming their positions as India's leading investment hubs.
- Foreign Institutional Investors (FIIs) have been net sellers in the Indian equity market since July, withdrawing over Rs. 1 lakh crore (US\$ 11.36 billion) between July 1, 2025, and September 8, 2025, including Rs. 7,800 crore (US\$ 886.4 million) in September, while in August 2025, Domestic Institutional Investors (DIIs) recorded their 25th straight month of net inflows, investing Rs. 94,829 crore (US\$ 10.8 billion), the highest in 10 months. In the first five months of FY26, DIIs invested Rs. 3.24 lakh crore (US\$ 37.6 billion), already 53% of the total investment made in FY25.
- India's manufacturing sector strengthened further in August 2025, supported by firm demand that drove higher factory orders and production. Firms increased input purchases and hiring, backed by improved business confidence. Input inventories continued to rise and finished goods stocks expanded for the first time in nine months. The HSBC India Manufacturing Purchasing Managers' Index (PMI) rose from 59.1 in July to 59.3 in August, marking the strongest improvement in operating conditions in over 17 years, with moderate cost pressures and a sharper rise in selling prices.
- India's Consumer Price Index (CPI)-based inflation eased to an over eight-year low of 1.54% in September 2025, down from 2.05% in August 2025, driven by lower food and fuel prices, according to data from the Ministry of Statistics and Program Implementation (MOSPI).
- India's GST collections reached an all-time high of Rs. 2.37 lakh crore (US\$ 26.93 billion) in April 2025, rising 12.6% YoY. The growth was supported by strong domestic demand and higher imports, with domestic revenues up 10.7% and import revenues up 20.8%.
- Indian airlines carried over 1.36 crore passengers (13.6 million) in June 2025, marking an increase from the same period last year, as per official data.
- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- In May 2025, the overall Index of Industrial Production (IIP) stood at 156.6 (base 2011-12 = 100), reflecting a YoY growth of 1.2%. The mining, manufacturing and electricity sectors stood at 136.6, 154.3 and 216 respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- India's wheat procurement for FY26 has reached 29.7 million tonnes as of May 22, 2025, the highest in four years and up 13.5% YoY. Strong production of 115.43 million tonnes, favourable weather, and bonuses above the Minimum Support Price (MSP) in key states have driven this growth. The Food Corporation of India expects procurement to hit 32.5 million tonnes by season end, raising stocks to 44 million tonnes, well above the 18.4 million tonnes needed for the Public Distribution System.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below::

- The Ministry of Labour & Employment signed an MoU with Zomato on October 14, 2025, to enhance employment opportunities through the National Career Service (NCS) portal. Under the agreement, Zomato will list around 2.5 lakh job opportunities annually, supporting the growth of the gig economy and promoting formal, technology-enabled livelihoods across India.
- In August 2025, Prime Minister Mr. Narendra Modi launched two major agriculture schemes worth Rs. 35,440 crore (US\$ 4 billion) - the PM Dhan-Dhaanya Krishi Yojana and the Mission for Aatmanirbharta in Pulses aimed at boosting self-reliance, productivity, and farmers' income. He also inaugurated and laid foundation stones for projects worth over Rs. 6,200 crore (US\$ 709 million) across agriculture, animal husbandry, fisheries, and food processing sectors.
- On July 5, 2025, the Union Cabinet approved the Rs. 1,00,000 crore (US\$ 11.72 billion) Research, Development and Innovation (RDI) Scheme, launching long-term, low- or zero-interest funding via a special purpose fund under the ANRF to jump-start India's R&D ecosystem and support deep-tech and startup innovation.

The Cabinet Committee on Economic Affairs also approved 12 new projects worth Rs. 28,602 crore (US\$ 325.02 million) under the National Industrial Corridor Development Programme (NICDP), spanning 10 states, to strengthen India's manufacturing base and attract investments.
- On March 27, 2025, the Reserve Bank of India proposed doubling the investment cap for individual foreign investors in listed firms from 5% to 10%, with a combined foreign individual limit increasing to 24%, to counter Foreign Portfolio Investment (FPI) outflows.
- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- The National e-Governance Division (NeGD) and the Indian Ports Association (IPA) signed an MoU on December 24, 2024, to drive digital transformation in India's maritime sector. The partnership focuses on system integration, software development, and use of emerging technologies to enhance efficiency and modernise port operations.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.

- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

ROAD AHEAD

India's economy grew by 6.5% in FY25. With a 7.4% growth rate in Q4 FY25, the RBI has revised India's GDP growth forecast for FY26 upwards to 6.8% from earlier estimate of 6.5%. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. In 2024, India rose to 15th place globally in FDI rankings and retained its position as South Asia's top recipient.

In H1 FY25, India's growth-focused approach was underscored by the government's capital expenditure outlay of Rs. 15,02,000 crore (US\$ 176 billion), reinforcing its commitment to infrastructure-led development. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10% to Rs. 11,21,000 crore (US\$ 131 billion) over Rs. 10,18,000 crore (US\$ 119 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total goods and service exports surged by 76% over the past decade, touching Rs. 70,36,425 crore (US\$ 825 billion) in FY25, driven by strong performance in engineering goods, electronics, and pharmaceuticals. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

FMCG INDUSTRY IN INDIA

Introduction

The FMCG sector in India has expanded steadily, supported by consumer-driven growth and higher product prices, particularly for essential goods. It provides employment to around three million people, accounting for approximately 5% of total factory employment in the country. As India's fourth-largest sector, FMCG plays a vital role in the economy, with household and personal care products alone contributing 50% of total FMCG sales.

The industry is projected to maintain healthy momentum, supported by rising disposable incomes, a young consumer base, increasing brand awareness, and favourable government initiatives and policies. Household FMCG spending rose 8% to Rs. 17,792 crore (US\$ 2.07 billion) by April 2025 and is expected to rise further by year-end, driven by staples as well as non-staples. More importantly, India's vast middle-class population, which is larger than the total population of the USA, and its median age of just 27 are shaping consumption trends. Rising aspirations, greater financial inclusion, and social safety nets are further fuelling demand.

The sector continues to demonstrate resilience, with companies focusing on efficient manufacturing, supply chain management, consumer insights, and digital-first communication strategies to withstand disruptions and create long-term value. According to NielsenIQ, India's FMCG market grew 13.9% in value and 6% in volume in Q1 FY26, led by rural demand, smaller pack sizes, and e-commerce growth. Key companies also posted steady performance in the same quarter. Dabur expected single-digit revenue growth, Nykaa's beauty segment registered mid-20% GMV growth, Tata Group's Trent expanded 20%, and Kalyan Jewellers rose 31%, supported by improving urban sentiment and easing inflation.

As per NielsenIQ, India's FMCG sector posted steady momentum in the Q2 FY26 with value growth of 12.9% and a 5.4% rise in volumes, supported by stronger rural demand with 7.7% volume expansion. Diwali boosted FMCG sales, with essentials, dairy, oils, and snacks seeing strong demand and e-commerce orders rising over 85% in the first week festive season sale.

India's direct selling industry is also expanding, with sales of Rs. 22,142 crore (US\$ 2.58 billion) in FY24, reflecting 4.4% YoY growth. Over the last five years, the sector has clocked a 7.15% CAGR, with the number of active direct sellers reaching 88 lakh. Female participation has also risen from 37% in FY23 to 44% in FY24, highlighting the growing inclusivity of this channel.

Looking ahead, India's FMCG sector is expected to record a slight revenue increase of 100 to 200 basis points, bringing growth to 6 to 8% in FY26, supported by stable rural demand and a revival in urban markets. The urban segment currently contributes about 62% of total revenue, but rural India has emerged as a stronger growth driver in recent years. Semi-urban and rural regions now account for 50% of total rural spending on FMCG, with rising incomes and evolving consumer preferences narrowing the urban-rural gap.

Market Size

The Indian FMCG market generated revenue of Rs. 20,73,300 crore (US\$ 245.39 billion) in 2024 and is expected to grow at a CAGR of 27.9% through 2021–27, reaching nearly US\$ 615.87 billion. In 2024, the urban segment contributed 62% while rural India accounted for more than 38% of annual FMCG sales, highlighting the importance of both markets in driving growth.

Household spending patterns vary across cities. West Delhi records the highest FMCG spend at Rs. 39,325 (US\$ 456) per year, more than double the national average. South Delhi leads in purchase volumes at around 240 kg annually, Bengaluru spends the most per kg at Rs. 211 (US\$ 2.44), and Mumbai tops in shopping frequency with 233 trips per year. In 2025, rural India overtook cities in affordable premium FMCG consumption, accounting for 51% of volume share and 42% of super-premium sales, with average rural premium spend rising at an 11% CAGR over five years. This created a Rs. 98,000 crore (US\$ 11.38 billion) market.

Leading FMCG players are leveraging rural India's potential. Dabur derives 45–50% of its revenue from rural markets, reaching over 1,31,000 villages and 1.42 million outlets. Hindustan Unilever generates 35–40% of its revenue from rural areas, supported by its Shikhar app, which has 1.4 million retailers on board and a 70% monthly active user rate.

Emerging categories are also boosting the FMCG landscape. India's pet economy is projected to grow from Rs. 89,743.5 crore (US\$ 10.5 billion) in FY24 to Rs. 1,38,461.4 crore (US\$ 16.2 billion) by FY32 at a CAGR of 5.65%. The healthy snack market, led by makhana, is expected to reach Rs. 20,000 crore (US\$ 2.32 billion) by 2030, driven by premiumisation, quick commerce, and demand for natural, functional products. The dairy industry is projected to expand by 13–14% in FY25, backed by strong demand and increased milk supply. Meanwhile, the alcoholic beverage (alcobev) industry is set to grow 8–10% in FY26, reaching Rs. 5,30,000 crore (US\$ 61.97 billion). India's Rs. 46,571 crore (US\$ 5.29 billion) snack market is seeing startup challenges to legacy brands and is set to reach Rs. 1,01,811 crore (US\$ 11.57 billion) by 2033, with namkeen adding Rs. 39,591 crore (US\$ 4.5 billion) by 2029.

Quick commerce has become a defining growth engine. It now accounts for 70–75% of total e-grocery orders, compared to 35% in 2022, and is expanding at a CAGR of 70–80%. Operating across 80 cities, India is the first market globally to scale quick commerce, which has delivered FMCG companies a 50–100% sales increase in FY25.

Government initiatives and policies continue to support growth. The Union Government approved a Production Linked Incentive (PLI) scheme for the food processing sector with a budget outlay of Rs. 10,900 crore (US\$ 1.46 billion). Till June 2025, the scheme had approved 278 units of 170 applicants, attracted Rs. 9,032 crore (US\$ 1.04 billion) in investments, created 3.4 lakh jobs, and added 35 lakh MT of annual capacity. The Ministry of Food Processing Industries (MoFPI) has also sanctioned over 1.44 lakh projects through its flagship schemes to boost rural economies, strengthen supply chains, and promote Indian food brands globally.

Digital transformation is reshaping consumption. India's internet users are projected to cross 900 million by 2025, with rural India accounting for 55% of them. In 2024, Indians collectively spent 1.1 lakh crore hours on smartphones, averaging five hours daily per person. E-commerce accounted for 17% of FMCG consumption among affluent buyers in 2024, with average spends of Rs. 5,620. India's e-commerce industry, valued at Rs. 10,82,875 crore (US\$ 125 billion) in FY24, is expected to grow to Rs. 29,88,735 crore (US\$ 345 billion) by FY30 at a 15% CAGR. The online grocery segment alone is projected to expand from US\$ 4.54 billion in 2022 to US\$ 76.76 billion by 2032, growing at a CAGR of 32.7%. Digital payments, which reached US\$ 300 billion in 2021, are projected to touch US\$ 1 trillion by 2026.

The D2C market crossed Rs. 6,96,400 crore (US\$ 80 billion) in 2024 and is expected to exceed Rs. 8,70,500 crore (US\$ 100 billion) in 2025. FMCG new product launches rose 1.8 times in the year ending May 2025, though only 4% reached 1% market penetration due to intense competition from regional and D2C brands. Legacy companies are adapting: Hindustan Unilever acquired Minimalist for Rs. 3,000 crore (US\$ 348.5 million), Marico bought Beardo, Plix, Just Herbs, and True Elements, ITC acquired Yoga Bar, and Emami gained full ownership of The Man Company.

Around two-thirds of acquisitions by FMCG firms from FY21 to FY25 have been in the direct-to-consumer (D2C) space, per Crisil Ratings.

India's FMCG sector continues to be the largest advertiser in the country, with a nearly one-third share of the total ad market, spending Rs. 31,000 crore (US\$ 3.75 billion) in 2023. With rising incomes, shifting consumer preferences, growing digital penetration, and robust policy support, the sector is well positioned to remain one of the strongest drivers of India's consumption-led growth story.

- The PLI Scheme for Food Processing Industries (PLISFPI), with a budget of Rs. 10,900 crore (US\$ 1.3 billion) for 2021-27, has approved 278 units of 170 applicants, creating 3.4 lakh jobs, adding 35 lakh MT annual capacity, and disbursing Rs. 1,727 crore (US\$ 200.6 million) in incentives till June 2025.

- GST is expected to transform logistics in the FMCG sector into a modern and efficient model as all major corporations are remodelling their operations into larger logistics and warehousing.

Road Ahead

Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. On the other hand, with the share of the unorganised market in the FMCG sector falling, the organised sector growth is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail. Another major factor propelling the demand for food services in India is the growing youth population, primarily in urban regions. India has a large base of young consumers who form most of the workforce, and due to time constraints, barely get time for cooking. Online portals are expected to play a key role for companies trying to enter the hinterlands. The Internet has contributed in a big way, facilitating a cheaper and more convenient mode to increase a company's reach. The number of internet users in India is likely to reach 1 billion by 2025. It is estimated that 40% of all FMCG consumption in India will be made online by 2030. E-commerce share of total FMCG sales is expected to increase by 11% by 2030. It is estimated that India will gain US\$ 15 billion a year by implementing GST. GST and demonetisation are expected to drive demand, both in the rural and urban areas and economic growth in a structured manner in the long term and improved the performance of companies within the sector.

This growth is fueled by rapid urban developments, rising disposable incomes, evolving consumption patterns, and the widespread adoption of convenient ready-to-eat options among time-constrained consumers. The expanding organized retail landscape, coupled with increasing health awareness and demand for premium artisanal offerings, continues to reshape traditional bakery consumption, while government initiatives promoting millet-based and nutritionally enriched products are accelerating product diversification across urban and semi-urban markets, thereby expanding the Indian bakery market.

Key Takeaways and Insights:

By Product Type: Bread dominates the market with a share of 36% in 2025, driven by institutional demand, fortified variants gaining traction in schools and hospitals, and consistent household consumption patterns across income segments.

By Distribution Channel: Supermarkets and hypermarkets lead the market with a share of 35% in 2025, attributed to one-stop shopping convenience, competitive pricing, extensive product variety, and strategic placement in high-footfall urban locations.

By Region: North India represents the largest segment with a market share of 30% in 2025, supported by dense urban populations in Delhi NCR, higher per capita consumption of western bakery formats, and concentration of manufacturing facilities.

Key Players: The Indian bakery market exhibits moderate competitive intensity, with established domestic players and multinational corporations competing across value and premium segments through continuous innovation, distribution excellence, and strategic partnerships. Some of the key market players include Anmol Industries Limited, Bonn Group, Britannia Industries Limited, ITC Limited, Mondelez International, M/s Bectors Food Specialities Ltd, Parle Products Pvt. Ltd., Ravi Foods Pvt Ltd, and Surya Food & Agro Limited.

The market is experiencing significant changes as health-oriented consumers are increasingly looking for functional ingredients, clean-label products, and substitutes for conventional refined flour options. Urban modifications continue to drive demand for convenience-oriented bakery items, while the proliferation of quick-commerce platforms and modern retail formats is enhancing product accessibility beyond metropolitan centers. Government support through cold chain infrastructure development and food processing schemes is enabling manufacturers to maintain freshness and extend reach into tier-two and tier-three cities. For instance, CK's Bakery under CavinKare Group inaugurated a flagship outlet in Bengaluru in April 2025, marking its expansion beyond Tamil Nadu with plans to open 25 additional stores supported by quick-commerce partnerships. Additionally, the growing penetration of artisanal bakeries and premium café formats is elevating consumer expectations around taste, texture, and ingredient transparency.

Market Outlook 2026-2034:

The Indian bakery market demonstrates robust expansion potential driven by structural consumption shifts, retail modernization, and product innovation that aligns with evolving lifestyle patterns and nutritional preferences across demographic segments. Organized retail expansion into smaller cities creates distribution infrastructure that supports branded bakery product adoption, while rising per capita incomes enable trading up from unpackaged local bakery items to branded, hygienically packaged alternatives. The market generated a revenue of USD 15.05 Billion in 2025 and is projected to reach a revenue of USD 32.05 Billion by 2034, growing at a compound annual growth rate of 8.76% from 2026-2034. Bread dominates with a market share of 36% of the total Indian bakery market in 2025.

Bread's commanding market position reflects its transformation from occasional Western-influenced consumption to daily staple status across Indian households, driven by convenience advantages that align with accelerated morning routines and nuclear family structures where traditional breakfast preparation becomes time-prohibitive. The segment benefits from universal acceptability across age groups and regional preferences, serving multiple consumption occasions from breakfast sandwiches to evening snacks. Product diversification within bread categories addresses varied consumer needs, with white bread appealing to children, brown bread attracting health-conscious adults, and specialty variants like multigrain and oats bread capturing premium segments.

The bread segment's growth trajectory is supported by cold chain infrastructure development that enables extended shelf life and wider distribution reach, allowing manufacturers to penetrate semi-urban and rural markets where modern retail presence is expanding. Packaging innovations incorporating resealable closures and portion control features enhance product convenience while reducing waste, addressing practical household concerns. Regional flavor adaptations, such as spiced bread variants in southern markets and sweet bread formulations in eastern regions, demonstrate how manufacturers localize products to capture diverse taste preferences while maintaining the fundamental bread format.

Supermarkets and hypermarkets dominate distribution by offering comprehensive bakery product assortments under controlled environmental conditions that maintain product freshness and quality, addressing consumer concerns about hygiene and shelf life that limit purchases from traditional unorganized retail. These modern retail formats provide visual merchandising advantages through dedicated bakery sections that stimulate impulse purchases and cross-category shopping, while promotional activities and combo offers drive volume uptake. The air-conditioned shopping environment and organized product displays create purchasing experiences that align with aspirational consumption behaviors among upwardly mobile middle-class consumers.

The channel's leadership position is reinforced by in-store bakery counters that offer freshly baked products alongside packaged items, creating differentiation through warm bread availability and customization options for cakes and pastries. Strategic store locations in residential catchment areas ensure convenient access, while extended operating hours accommodate diverse shopping schedules for working professionals and dual-income households.

Private label bakery offerings enable retailers to capture value-conscious consumers while maintaining margin advantages, though branded products continue dominating through established consumer trust and consistent quality perceptions.

North India's market leadership stems from concentrated urban population centers in the National Capital Region, Punjab, and Uttar Pradesh where bakery consumption patterns are deeply entrenched through historical exposure to Western food influences and wheat-based dietary traditions that facilitate bread adoption. The region benefits from extensive distribution networks developed by major manufacturers who established production facilities to serve these high-density markets, creating competitive advantages through logistics efficiency and supply chain proximity. Higher per capita incomes in metropolitan areas support premium product uptake and frequent purchase behavior across bakery categories.

Cultural factors including breakfast westernization among professional classes and acceptance of convenience foods align with bakery product propositions, while the region's position as a commercial hub attracts working population segments whose time-constrained lifestyles favor ready-to-eat bakery items. Modern retail penetration reaches saturation levels in major cities, providing multiple touchpoints for consumer engagement and product trial, while tier-two cities demonstrate accelerating adoption as organized retail expands and income levels rise, suggesting sustained growth momentum for the regional market.

Market Dynamics:

Growth Drivers:

Why is the Indian Bakery Market Growing?

Rapid Urban Developments and Evolving Lifestyle Patterns

India's accelerating urban modifications is fundamentally reshaping dietary habits and consumption patterns, with urban populations projected to reach substantial levels by 2030 as migration from rural areas continues unabated. This demographic shift is creating concentrated demand for convenient, ready-to-consume food options that fit seamlessly into fast-paced urban lifestyles characterized by long commutes, dual-income households, and limited time for traditional meal preparation. Bakery products have emerged as ideal solutions, offering portable breakfast options, quick snacks, and meal components that require no preparation while providing essential nutrients and energy. The proliferation of nuclear families in urban centers has reduced reliance on traditional joint family cooking arrangements, making packaged bakery items increasingly essential for daily consumption rather than occasional treats. Metropolitan areas are developing sophisticated food cultures that embrace western eating patterns, with bread, cakes, and pastries becoming normalized components of daily diets across age groups, while the expansion of quick-service restaurants and café chains is further normalizing bakery consumption through increased visibility and accessibility in high-traffic locations. IMARC Group predicts that the India quick service restaurants market is projected to attain USD 16.3 Billion by 2033.

Expansion of Modern Retail Infrastructure and Distribution Networks

The rapid proliferation of organized retail formats is revolutionizing bakery product distribution by providing temperature-controlled storage, attractive product displays, and strategic placement that enhances visibility and drives impulse purchases among consumers. Modern retail infrastructure development is extending beyond metropolitan centers into tier-two and tier-three cities, bringing branded bakery products to previously underserved markets through a combination of large-format stores and neighborhood convenience outlets that cater to diverse shopping preferences. This retail expansion is supported by sophisticated logistics networks that maintain product freshness during transit, enabled by substantial investments in cold chain capabilities under government schemes like the PM Kisan SAMPADA Yojana which has approved 399 cold chain projects since inception. Quick-commerce platforms are complementing physical retail by enabling delivery of fresh bakery products within 10-30 minutes of ordering, removing traditional barriers of limited shelf life and storage constraints that previously restricted consumption occasions. The emergence of 60 new shopping malls accounting for a total

of 23.25 million sq. ft. in seven Indian cities between 2023 and 2025, demonstrates the infrastructure investments supporting market growth across multiple distribution channels.

Government Support for Nutritional Enhancement and Food Processing

Government initiatives promoting millet-based products and nutritional fortification are creating substantial opportunities for bakery manufacturers to develop innovative formulations that align with public health objectives while meeting consumer demand for healthier alternatives. In 2024, the Secretary of Food Processing Industries, promised that the government will tackle the issues faced by the bakery and confectionery sector, such as simplifying regulatory frameworks. An official statement indicated that during an interactive session with industry leaders, key focus areas were identified, such as regulatory simplification, sustainability, and innovation. This regulatory support is complemented by millet promotion campaigns that have normalized the use of ancient grains in bakery formats, encouraging manufacturers to invest in research and development for creating products that combine traditional ingredients with modern taste preferences, thereby expanding addressable markets while contributing to national nutritional goals.

Market Restraints:

What Challenges the Indian Bakery Market is Facing?

Health Concerns Regarding Refined Flour, Sugar Content, and Preservatives

Growing nutritional awareness among educated consumer segments raises concerns about bakery products' refined carbohydrate content, added sugars, and chemical preservatives, potentially limiting consumption frequency among health-conscious buyers who perceive traditional baked goods as detrimental to wellness objectives. Medical community messaging around diabetes prevention, obesity management, and clean eating philosophies positions conventional bakery items as discretionary indulgences rather than daily staples, creating perception challenges that manufacturers must address through reformulation and transparent communication.

Price Sensitivity in Mass Market Segments Limiting Premium Product Adoption

Significant portions of the consumer base remain highly price-conscious, particularly in semi-urban and rural areas where disposable incomes constrain spending on processed foods, creating tension between margin improvement through premiumization and volume growth through affordability. Economic volatility affecting commodity prices for wheat, sugar, and edible oils creates input cost pressures that manufacturers struggle to pass through to price-sensitive consumers, compressing margins and limiting investment capacity for product innovation and brand building activities.

Competition from Traditional Snacking Alternatives and Regional Specialties

Deep-rooted preferences for traditional Indian snacks, homemade preparations, and regional specialties create formidable competition for bakery products, particularly in tier-two and tier-three markets where conventional food habits remain strong and cultural affinity for indigenous items limits bakery adoption. Local sweet shops and traditional snack vendors offering fresh, customized products at competitive price points capture consumption occasions that might otherwise shift to packaged bakery alternatives, while street food culture provides affordable convenient options that compete directly with biscuits and cakes.

Competitive Landscape:

The Indian bakery market demonstrates fragmented competitive dynamics where multinational corporations with extensive distribution networks and brand portfolios compete alongside established domestic players leveraging regional strengths and cost advantages, while artisanal bakeries carve specialized premium segments through product differentiation and experiential retail formats. Market leaders maintain dominance through economies of scale in manufacturing, procurement efficiency for raw materials, and marketing investments that sustain brand

visibility across mass media and retail environments. Mid-tier regional players compete effectively in specific geographic markets by understanding local taste preferences and maintaining agile responses to emerging consumer trends, though they face challenges in achieving national distribution reach and competing on marketing expenditure with larger corporations. The competitive landscape reflects ongoing tension between volume-driven strategies targeting mass markets through affordability and margin-focused approaches pursuing premiumization through product innovation, health positioning, and artisanal craftsmanship that commands higher price realizations. Some of the key market players include:

Recent Developments:

- In December 2025, Sunfeast Mom's Magic has introduced its latest Ghee Roasted Nuts cookies, inspired by beloved cooking experiences linked to ghee-roasted components. The item centers on the scent and taste of nuts fried in ghee, a method prevalent in numerous Indian homes. The brand claims the cookies are crafted from cashews and almonds, intending to replicate a flavor associated with homemade cooking.
- In October 2025, After its £22 million purchase of the South Asian sweets maker and retailer in March 2025, Cake Box has launched the next phase for Ambala. This involves a brand update and the introduction of a contemporary, fully integrated e-commerce platform, as Cake Box aims to broaden the brand's attraction beyond its main South Asian clientele while staying loyal to its cultural heritage and principles.
- In June 2025, The Karnataka Milk Federation (KMF), through its Nandini brand, launched 18 new items in three categories - slice cake, bar cake, and muffins - to commemorate World Milk Day festivities.

PRODUCTION PROCESS:

The Brief of our manufacturing process are as follows:

1. Sifting of flours: The first step in making of Bread, Kulcha, Bun, Pizza base is sifting. Sifting is a process whereby the flour is put into a container or vibratory sifter where it performs sorting by removing unusual lumps or clumps in flour to ensure they are evenly distributed and makes the flour lighter.

2. Mixing of ingredients: The flour is collected in bowl and weighed after its sifting. All ingredient are then added in bowl in a standard proportion which includes flour, sugar, salt, oil and fats, yeast and fermenting agents etc. After addition of all ingredients bowl is moved to spiral mixer where water is added in different quantities. Mixing time depends on quality of flour. In general mixing time vary from 6 - 12 minutes.

The important point is that both *Under Mixing* and *Over Mixing* can have direct impact on dough consistency. Dough quality can be checked by stretching the dough.

3. Dividing (Portioning): This step involves dividing of dough in regard to the product to be manufactured like bread, kulcha, pizza base, bun etc for example a dough of 250 gm shall be portioned for the bread of 200gm. Further, the portion size depends on the size of moulds.

4. Folding and Moulding: Herein firstly folding is carried out which involves gently stretching and folding of dough over itself multiple times. This helps the dough to build its strength and hold the air and making it lighter and fluffier. Further, it also helps in making the dough non sticky.

Once the folding is completed, the moulding is carried out. Moulding is basically making the dough into requisite shape like square, round, or other shapes keeping in mind the desired product.

5. Proofing (Fermentation): One of the most important steps in bread making which triggers the yeast in the dough. During this step, the yeast releases the carbon dioxide which allows the dough to expand or rise. During this step the most important thing is that the dough should not be over proofed or under proofed as they won't rise to their desired level while baking. To carry out proofing we have proofing chamber with heating device, into which the dough is kept for around 75 minutes at a temperature of 36° Celsius to 38° Celsius.

6. Baking: After the proofing is over, the fermented dough is kept in the oven for achieving the final product. To initiate the baking first it is required to pre heat the oven at a temperature of 220 for approximate 18-20 minutes. Thereafter, the dough is either kept on baking tray or directly on mould for around 25 minutes at a temperature of

220° for bread and 15-18 minutes for other bakery products at a temperature of 180° where the dough turns into golden crispy crust. Once the dough is baked turning into golden, crispy crust, they are taken out through trolleys from oven.

7. Depanning: It is the procedure that involves removing baked goods from their baking containers in order to move them for packing and cooling. From our perspective, the bread is removed from the moulds, and other baked goods are removed from the tray.

8. Cooling Down: Once the breads are taken out of their moulds or tray, they cooled down for around 3-4 hours, before they can be sliced or packed. The breads and other baked products are transferred to cooling trolleys and tunnels whereby the temperature has to be 10-15 degrees Celsius.

9. Packaging: Once the breads are cooled down, the bread is sliced through bread slicer. By cutting the brick of bread into small equal sizes, the bread turns into ready to eat product which is then packed into food grade plastic bags made of Polypropylene and Low-Density Polyethylene.

The above-mentioned manufacturing process pertains to making of Bread. The same manufacturing process is followed in making of other bakery items like Bun, Kulcha, Pizza base. The only change is the temperature, fermentation time and time required by the oven to bake the product.

Also, dough is kept in moulds for bread and other bakery products are kept in tray.

Quality assurance and certifications:-

We believe in adhering to the highest standards of quality for our products, processes and raw material. We exercise stringent prevention-based quality control checks consisting of incoming, process and outgoing quality controls. Since we are engaged in manufacturing food items, we ensure that quality is maintained at all levels from sourcing of raw materials to final packing of products. While packing we use Polypropylene (PP) and Low-Density Polyethylene (LDP). Also, our company is ISO (ISO 22000:2018) certified and has Hazard Analysis & Critical Control Points that ensure quality of our bakery products.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020, decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between

the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Individual investors bidding under the Non-Institutional Portion bidding for more than Rs. 200,000 and up to Rs. 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, subsyndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“UPI Streamlining Circular”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the Lead Manager, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.
