Letter to Shareholders

Dear Shareholders,

It is my pleasure to report the annual results for the financial year 2013-14. Your Company has performed satisfactorily in terms of growth by capturing the opportunities and executing it. Business demand rose steadily during the year and total income for the financial year 2013-14 grew annually at 68 % on a consolidated basis to ₹ 14,840 lakhs.

123Greetings.com is the leading electronic-only cards and invitations website catering to around 95 million visitors annually. Over the last few years, 123Greetings.com was used by over 224 million visitors to send ecards, and estimates show that had these cards been sent as paper cards, they would have cost planet earth over 85,000 trees. The efforts and contributions by the internet community as a whole to replace paper products with electronic alternatives is admirable and can help reduce the adverse impact of climate change and carbon footprint on the environment. This is a matter of pride that we are making our tiny contribution towards the environment and helping people “Go Green” without taking the value of emotional connect away from exchanging greetings.

123Greetings.com launched its free mobile site m.123greetings.com last year. Users can view and send over 40,000 ecards easily through 123Greetings’ mobile website from anywhere at their convenience. This user-friendly responsive mobile website loads quickly despite high traffic. Some of its features include easy search, simplified navigation and rich user experience. This year we launched its mobile and tablet app on Android and iOS platforms. We are excited by the growth potential from Apps coupled with additional geographies that we are targeting. Our crowd-sourcing and content curation strategies have enabled us to scale our operations and serve diverse needs of our worldwide customer base. Investments in building the capability further in these areas and strengthening our infrastructure will help us execute these strategies effectively.

123Greetings strengthened its technology and content delivery capabilities to serve its mobile website and apps users enabling over 40,000 ecards, including flash ecards, to be viewable on handheld devices with ease. Further, 123Greetings ecards business increased its addressable market by growing its regional language content library with 118 new ecards across Russian, Mandarin, Spanish, German and Hindi languages for key holidays and occasions.

We have managed to carve out our niche in the ever growing E-commerce market. We have continued to increase our investments in the e-Commerce business through automation of various processes and increasing the team size. While, this has kept the margins under pressure, we are confident of reporting higher revenues and profits in future. As more and more consumers prefer online shopping owing to their busy schedules, requirements of a more robust and stringent digital infrastructure will be of a paramount importance. Our ability to scale our services, providing a larger selection of products, efficient customer service, quicker delivery schedules and better prices will help us attract larger volumes. As we continue to invest deeper into our services on a daily basis, our top-line and bottom-line will continue to grow.

There is stiff competition in the e-world, technologies keeps on getting upgraded, to maintain the leading position in e-Greetings and to survive in e-commerce business, your Company continued to make investments in technology infrastructure. We believe that a fundamental measure of our success will be the shareholder value we create over the long term. The stronger our market position, the more powerful our economic model. Stronger Market position can translate directly to higher revenue, higher profitability, greater capital velocity and correspondingly good returns on investments.

Finally, we would like to take this opportunity to thank you for your continued support. We also thank our other stakeholders, governments of various countries, vendors and employees for their continuous support. We look forward to the same in the future as we take your Company to a higher level of growth with continuous support of all stakeholders.

Management Discussion and Analysis

Forward Looking Statement

Statement in the Management Discussion and Analysis reflects current expectations of the Company and are inherently uncertain. Actual results could differ materially for a variety of reasons, including, among others, fluctuations in foreign exchange rates, changes in global economic conditions and consumer spending, world events, the rate of growth of the Internet and online commerce, the amount that the Company invests in business and the timing of those investments change in the Government regulations, tax laws and other statutes and incidental factors.

Industry Structure and Developments

Internet has today become the key ingredient of quick and rapid lifestyle. Be it for communication or explorations, connecting with people or for official purposes, 'internet' has become the central-hub for all. Resultantly, Internet growth has led to a host of new developments, such as decreased margins for companies as consumers turn more and more to internet for online buying goods at the negotiated price as agreed upon by the buyers and sellers. Internet has truly been an effective agent in changing the fundamental ways of doing business. With almost no entry or geographical barriers, the continuous influx of competition will automatically drive down the prices and gives consumers better choices in terms of quality and price. E-commerce provides multiple benefits to the consumers in form of availability of goods at lower cost, wider choice and saves time. People can buy goods with a click of mouse button without moving out of their house or office. Most experts believe that overall e-commerce business will increase exponentially in coming years.

Companies are also generating revenues by advertising on their websites. Internet Advertising Revenue Report 2013 published by Interactive Advertising Bureau (IAB) provides the following details about the online advertising Industry –

- i) Internet has continued to grow in share and significance when compared to other U.S. ad-supported media. †
- ii) Internet advertising revenue now represents 57% of all Television (Broadcast and Cable) advertising.

Discussion on Financial Performance

The following is the financial performance based on the consolidated financial results for the year ended 31st March, 2014:

- Consolidated total income for the year ended 31st March, 2014 increased to ₹ 15301.27 lakhs compared to ₹ 9123.10 lakhs in the previous year, registering growth of 68%.
- Earnings before tax, depreciation and amortization, interest for the year ended 31st March, 2014 was ₹ 274.35 lakhs as compared to ₹ 901.58 lakhs for the previous year.
- Consolidated Profit after tax is ₹ 205.83 lakhs. Earnings per share (EPS) resulted to ₹ 1.40.
- Return on Capital Employed (ROCE) was 2.98 % compared to last year's figure of 3.04 %, while Return on shareholders' funds was 2.66 % compared to last year's figure of 3.21 %.

During the F.Y. 2013-14, the total income of the Company has shown considerable improvement and accordingly the expenses on account of Product & Content Development, Sales & Marketing, General and Administrative & Employee Benefit Expenses have increased. While some of the expenses are on the higher side, these expenses were necessary keeping in view the future growth prospect in terms of revenues and profits in the subsequent quarters. Operating EBITDA is down as the Company continued to invest in building up its operations to be able to service higher volumes which is evident from the increased total income on year-to-year basis. This resulted in higher operational costs incurred on additional manpower & systems. Given the nature of online sales, the Company increased its staff and other ancillary functions. These investments are necessary to support a model where returns are higher as the business scales.

Outlook

We have a window of opportunity as larger players marshal the resources to pursue the online opportunity and

as customers, new to purchasing online, are receptive to forming new relationships. The competitive landscape has continued to evolve at a fast pace. Many large players have moved online commerce with credible offerings and have devoted substantial energy and resources to building awareness, traffic, and sales. Our goal is to move quickly to solidify and extend our current position while we begin to pursue the online commerce opportunities in other areas. We see substantial opportunity in the large markets of e-commerce. This outlook is not without risk, it requires serious investment and crisp execution against established franchise leaders.

Competition may intensify as our competitors enter into business combinations or alliances and established companies in other market segments and expand into our market segments. In addition, new and advance technologies, including search, web services, and digital, may increase our competition. The Company is significantly expanding its operations by increasing product offerings and scaling infrastructure to support our business. There are good opportunities for acceleration of our business as online shopping is increasing year by year.

Online advertising is rapidly developing in the world. Among the various online ad categories, display advertising has always been the leading segment. Sectors such as travel, Banking, Financial Services and Insurance, telecom, auto and online publishers dominated the display advertising segment. Mobile advertising is a relatively new concept and it includes banners, text, click to call, click to SMS, in-game among others. With increasing demand for smart phones and 3G networks, mobile internet data usage is expected to be the growth driver, thereby leading to growth in mobile advertising. The role of social media is also rising due to growing internet access and also on account of social media becoming a standard element of web use. The long term outlook of the Company remains positive.

Risks and Concerns

Though Business of the Company is rapidly evolving, there exist many competitors in e-commerce industries. We have to remain vigilant and maintain a sense of urgency. The challenges and hurdles we will face to make our long-term vision a reality are several; well-funded competition, considerable growth challenges and execution risk, the risks of product and geographic expansion, and the need for large continuing investments to meet an expanding market opportunity. Company's business is highly dependent on efficient technologies and sound infrastructure systems. Therefore, we are required to wisely invest in technology infrastructure so we may continue to fulfil the requirements of the end users. Further, e-commerce business also gets affected by its seasonality, which historically has resulted in higher sales during third quarter i.e. October to December. If we do not list proper products on the Company's website which meets the customer requirements than the revenue and the future growth of the Company could get affected significantly.

Company's e-greeting cards business may get affected if new and innovative cards are not available on the Company's website based on the events and festivals and which also keep attracted to the end users. To maintain and enhance the traffic on its website, Company has to thoroughly study the needs of the end users otherwise this could impact the revenue of the Company from advertisement.

The Company's revenue largely depends on US economy due to presence of large consumer base. Hence, the revenue of Company is exposed to foreign exchange fluctuations risk. We are also exposed to significant risks of rapid change in product cycles and pricing, changes in consumer demand and consumer spending patterns, changes in consumer tastes with respect to products and other factors.

We believe that managing risk is critical for the growth and sustainable business. As such, efforts are on to constantly monitor and assess the internal as well as external risk factors associated with day to day business operations and financial management of the Company and thereby effectively mitigating all possible risk associated therewith.
