MANAGEMENT DISCUSSION AND ANALYSIS

INDIAN ECONOMY

India's economic growth is amongst the highest in the world, helped by a reorientation of government spending toward needed public infrastructure. The International Monetary Fund (IMF) has projected India's growth for this year (2016-17) at 7.5 per cent, largely driven by private consumption even as weak exports and sluggish credit growth weigh on the economy. According to IMF India's growth momentum is expected to be underpinned by private consumption, which has benefited from lower energy prices and higher real incomes.

As per Asian Development Bank (ADB) - A revival of private investment and rural consumption is critical for India if growth is to remain strong in 2016-17 and the following year. It also said that while, public investment and urban consumption were the major drivers for growth last fiscal, a revival of private investment and rural consumption is critical if growth is to remain strong in 2016-17 and 2017-18, given the likely sluggish recovery in the advanced economies and the anemic outlook for global trade.

As per ADB India's economic growth is expected to decline to 7.4 per cent in the 2016-17 fiscal due to weak global demand and falling exports. India's urban consumption may be boosted due to impending salary hike for government employees, however, revival of rural consumption hinges on the quality of the monsoon because a major part of the rural economy continues to depend heavily on agriculture.

As per ADB Outlook 2016 report "GDP (gross domestic product) growth in India is expected to dip marginally this year as expansion in public investment weakens underfiscal constraints, private corporations continue to deleverage, and external demand remains anaemic. Moreover, the weak balance sheets of public sector banks will hamper lending and growth prospects."

1. INDUSTRY STRUCTURE AND DEVELOPMENTS

The Indian tourism and hospitality industry has emerged as one of the key drivers of growth among the services sector in India. India is a large market for travel and tourism. It offers a diverse portfolio of niche tourism products - cruises, adventure, medical, wellness, sports, MICE, eco-tourism, film, rural and religious tourism. India has been recognised as a destination for spiritual tourism for domestic and international tourists.

Total contribution by travel and tourism sector to India's GDP is expected to increase from US\$ 136.3 billion in 2015 to US\$ 275.2 billion in 2025. Travel and tourism is the third largest foreign exchange earner for India.

The launch of several branding and marketing initiatives by the Government of India such as Incredible India! and Athiti Devo Bhava have provided a focused impetus to growth. The Indian government has also released a fresh category of visa - the medical visa or M visa, to encourage medical tourism in the country.

The Government has also been making serious efforts to boost investments in tourism sector. In the hotel and tourism sector, 100 per cent FDI is allowed through the automatic route. A five-year tax holiday has been offered for 2, 3 and 4 star category hotels located around UNESCO World Heritage sites (except Delhi and Mumbai). The investment in tourism sector is expected to be US\$ 12.4 billion in the 12th Five Year Plan; of these, private investments are likely to total US\$ 9.2 billion. The Ministry of Tourism plans to help the industry meet the increasing demand of skilled and trained manpower by providing hospitality education to students as well as certifying and upgrading skills of existing service providers.

India has moved up 13 positions to 52nd rank from 65th in Tourism & Travel competitive index.

Market Size

- The number of Foreign Tourist Arrivals (FTAs) has grown steadily in the last three years reaching around 7.103 million during January–November 2015 (4.5 per cent growth).
- The number of FTAs in November 2015 was 815,000, registering an increase of 6.5 per cent over November 2014.
- Foreign Exchange Earnings (FEEs) from tourism during January–November 2015 were Rs 1,12,958 crore (US\$ 16.94 billion), registering a growth of 1 per cent over same period last year.
- The number of tourists arriving on e-Tourist Visa during the month of October 2015 reached a total of 56,477 registering a growth of 1987.9 per cent or 21 times as compared to 2,705 tourists in October 2014.
- Online hotel bookings in India are expected to double by 2016 due to the increasing penetration of the internet and smart phones.

With the rise in the number of global tourists and realising India's potential, many companies have invested in the tourism and hospitality sector.

Government initiatives:

- The Union Cabinet has approved the signing of Memorandum of Understanding between the Ministry of Tourism of India and the Ministry of Trade Industry and Tourism of Colombia in order to boost cooperation in the field of tourism between the two countries.
- The Central Government has given its approval for signing of a Memorandum of Understanding (MoU) between India and Cambodia for cooperation in the field of tourism with a view to promote bilateral tourism between the two countries.

- Ministry of Tourism has sanctioned Rs 844.96 crore (US\$ 142 million) to States and Union Territories for developing tourism destinations and circuits during FY 2014-15, which includes projects relating to Product/Infrastructure Development for Destinations and Circuits (PIDDC), Human Resource Development (HRD), Fairs and Festivals & Rural Tourism.
- The Heritage City Development and Augmentation Yojana (HRIDAY) action plans for eight missions cities including Varanasi, Mathura, Ajmer, Dwaraka, Badami, Vellankini, Warangal and Amaravati have been approved by HRIDAY National Empowered Committee for a total cost of Rs 431 crore (US\$ 64.7 million).
- Government of India plans to cover 150 countries under e-visa scheme by the end of the year besides opening an airport in the NCR region in order to ease the pressure on Delhi airport.
- Under 'Project Mausam' the Government of India has proposed to establish cross cultural linkages and to revive historic maritime cultural and economic ties with 39 Indian Ocean countries.

Hotels are an important component of the tourism sector. They contribute in the overall tourism experience through the standards of facilities and services offered by them. The constant transformation has made the Indian hotel industry more functional and practical and has gained a level of acceptance world over. The standards of facilities and services offered have evolved over the last decade towards the extensive use of technology, environment friendly services, pricing, market segmentation, regional preferences, etc. The Indian hotel industry has seen a significant growth in room inventory across categories from upscale luxury to limited services and boutique & budget hotels. The occupancy has seen continued gains both from the domestic and the international traveler in both the business and leisure segment. However, because of increase in inventory as well as current economic position, there is pressure on room rates. With the continued growth in India's GDP, improvement in the per capita income and increased inspirational spending, the Indian hospitality sector is expected to grow much faster than most countries around the world.

2. OPPORTUNITIES, THREATS, RISKS AND CONCERNS

India's size and massive natural, geographic, cultural and artistic diversity offers enormous opportunities for the travel and tourism industry. The promotion and aggressive marketing measures undertaken by the government is expected to aid influx of tourists. The industry would also benefit from introduction of new forms of tourism and development of niche segments.

Medical tourism in India has gained considerable popularity in recent years. India has a major cost advantage in this field compared with other countries. In addition to cost advantages, Indian healthcare industry offers state-of-the-art equipment, technological advancement, qualified and experienced medical personnel and a blend of modern and traditional medicines. Thus, medical tourism has immense potential in India.

Opportunities also exist in ecotourism, adventure tourism, and cruise tourism. Eco-tourism is increasing in popularity, evident in the development of eco-friendly hotels and tour packages. With increasing environment awareness and consciousness among tourists and given efforts undertaken by the government and private players, the ecotourism segment is expected to record handsome growth in the coming years.

India holds immense potential in adventure and cruise tourism. India's greatest adventure tourism assets are Himalayas and its mighty rivers. The peak period for adventure tourism is the "lean period" of cultural tourism. Development of adventure tourism can make India a round-the-year tourist destination. The cruise industry is one of the most promising industries in India. However, strong efforts need to be made to develop this industry. Other forms of tourism such as agri tourism, pilgrimage tourism, heritage tourism, and MICE tourism also hold enormous potential.

Hotels form one of the most important support service that affect the arrival of tourist to a country. With the rapid growth in domestic tourism and India becoming a preferred travel destination for international tourists.

Political turbulence in the area reduces tourist traffic and thus the business of the hotels. Lack of training manpower is also a threat for the hotel industry. High tax structure in the industry makes the industry worse off than its international equivalent. In India the expenditure tax, luxury tax and sales tax inflate the hotel bill by over 30%. Effective tax in the South East Asian countries works out to only 4-5%.

Growth in hotel supply in recent times has outstripped demand in a number of Indian cities. Escalating land prices, increasing energy costs, depleting water levels and a scarcity of trained manpower are challenges that will need to be addressed and overcome.

The Government at the centre has to focus on infrastructure development with which the travel and tourism industry is expected to receive a major boost. Your Company's property with world class services and strong brand identity is ideally poised to take advantage of these opportunities.

Various domestic and international brands have made significant inroads into this space and more are expected to follow as the potential for this segment of hotels becomes more obvious.

ASIAN HOTELS (WEST) LIMITED

Annexure B to the Independent Auditor's Report to the Members of Asian Hotels (West) Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act") as referred to in paragraph 2(f) of 'Report on Other Legal and Regulatory Requirements' section

We have audited the internal financial controls over financial reporting of Asian Hotels (West) Limited ("the Company") as of March 31, 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit.

We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the standalone financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2016, based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".

k. Fixed assets and depreciation

i. **Fixed assets**

Fixed assets are stated at cost of acquisition or construction or at revalued amounts, net of impairment loss if any, less depreciation/ amortization. Cost represents the direct expenses incurred on acquisition /construction of the assets and the relative share of indirect expenses relating to construction allocated in proportion to the direct costs involved.

ii. **Change in accounting policy**

The Company has adopted component accounting as required under Schedule II to the Companies Act, 2013 from 1 April 2015. The Company was previously not identifying components of fixed asset separately for depreciation purposes; rather, a single useful life/ depreciation rate was used to depreciate each item of tangible fixed assets.

Due to application of Schedule II to the Companies Act, 2013, the Company has changed the manner of depreciation for its tangible fixed assets. Now, the Company identifies and determines cost of each component/ part of the asset separately, if the component/ part has a cost which is significant to the total cost of the asset having useful life that is materially different from that of the remaining asset. These components are depreciated over their useful lives; the remaining asset is depreciated over the life of the principal asset. The Company has used transitional provisions of Schedule II to adjust the impact of component accounting arising on its first application. If a component has zero remaining useful life on the date of component accounting becoming effective, i.e., 1 April 2015, its carrying amount, after retaining any residual value, is charged to the statement of profit and loss. The carrying amount of other components, i.e., components whose remaining useful life is not nil on 1 April 2015, is depreciated over their remaining useful lives.

Had the Company continued to use the earlier policy of depreciating tangible fixed assets, depreciation and loss for the current period would have been lower by Rs 170.13 lacs.

iii. **Depreciation**

- a. Depreciation as per straight line method is charged in the accounts.
- b. The charge is on the basis of rates as prescribed under Schedule II to the Companies Act, 2013 pro rata from the month of purchase. If the asset is purchased on or before the 15th of month, depreciation is charged from the month of purchase, otherwise depreciation is charged from the month following the month of purchase.

l. **Investments**

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments or short-term investments. All other investments are classified as long-term investments. Current investments are valued at the lower of cost and fair value. Changes in the carrying amount of current investments are recognized in the Statement of Profit and Loss. Long-term investments are valued at cost, less any provision for diminution, other than temporary, in the value of such investments; decline, if any, is charged to the Statement of Profit and Loss. Cost comprises cost of acquisition and related expenses such as brokerage and stamp duties.

m. **Inventory**

- i. Inventory is valued at cost or net realizable value, whichever is lower.
- ii. Shares held as Stock-in-trade are valued at cost or market value whichever is lower.
- iii. Net realizable value is estimated selling/ realizable value in the normal course of business less cost of completing the sale.

n. **Leases/License**

When the company is the lessee/licensee

Leases/License where the lessor/licensor effectively retains substantially all the risks and benefits of ownership of the leased/ licensed item, are classified as operating leases/license. Operating lease/license payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease/license term.

When the company is the lessor/licensor

Assets subject to operating leases/license are included in fixed assets. Lease/License income is recognized in the Statement of Profit and Loss on a straight-line basis over the lease/license term. Costs including depreciation are recognized as an expense in the Statement of Profit and Loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the Statement of Profit and Loss.

ASIAN HOTELS (WEST) LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2016

o. Impairment

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, each asset/ group of assets is identified for which there are separately identifiable cash flows (cash generating units).

p. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

q. Cash and cash equivalents

Cash and cash equivalents comprise cash at bank, cash/ cheques in hand and fixed deposits with banks with maturity period of three months or less.

r. Dividend

Dividend proposed on equity shares, if any, is accounted for pending approval at the Annual General Meeting.

s. Provisions and contingent liabilities

Provisions are recognized for present obligations of uncertain timing or amount arising as a result of a past event where a reliable estimate can be made and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events, are also disclosed as contingent liabilities unless the probability of outflow of resources embodying economic benefit is remote.

1. Defined contribution plans

a. Provident fund

2. Defined benefits plans

a. Contribution to Gratuity fund

b. Compensated absences – Earned leave

In accordance with Accounting Standard 15, actuarial valuation was done in respect of the aforesaid defined plans based on the following assumptions: -

Economic Assumptions

The discount rate and salary increases assumed are key financial assumptions and are considered together; it is the difference or 'gap' between these rates which is more important than the individual rates in isolation.

Discount Rate

The discounting rate is based on the gross redemption yield on medium to long-term risk free investments. For the current valuation a discount rate of 8 % p.a. compound, has been used.

Salary Escalation Rate

The salary escalation rate usually consists of at least three components, viz. Regular increments, price inflation and promotional increases. In addition to this any commitments by the management regarding future salary increases and the Company's philosophy towards employee remuneration are also taken into account. Again a long- term view as to the trend in salary increase rates is taken rather than be guided by the escalation rates experienced in the immediate past, if they have been influenced by unusual factors.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on whether the Holding Company has an adequate internal financial controls system over financial reporting in place and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

Annexure A to the Independent Auditor's Report to the Members of Asian Hotels (West) Limited dated May 23, 2016 on its consolidated financial statements

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act") as referred to in paragraph 2(f) of 'Report on Other Legal and Regulatory Requirements' section

In conjunction with our audit of the consolidated financial statements of Asian Hotels (West) Limited as of and for the year ended March 31, 2016, we have audited the Internal Financial Controls Over Financial Reporting of Asian Hotels (West) Limited (hereinafter referred to as the "Holding Company") and its subsidiary companies (the Holding Company and its subsidiary together referred to as "the Group"), which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the of the Holding Company and its subsidiary company, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Group's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Group's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company, its subsidiary company which are companies incorporated in India, have, maintained in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid reports under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting in so far as it relates to one subsidiary, which is companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.

k. Fixed assets and depreciation

i. Fixed assets

Fixed assets are stated at cost of acquisition or construction or at revalued amounts, net of impairment loss if any, less depreciation/ amortization. Cost represents the direct expenses incurred on acquisition /construction of the assets and the relative share of indirect expenses relating to construction allocated in proportion to the direct costs involved.

Subsidiary company considered Main Building (RCC) life 52 years based on development agreement entered with Delhi International Airport Private Limited.

ii. Change in accounting policy

The Company has adopted component accounting as required under Schedule II to the Companies Act, 2013 from 1 April 2015. The Company was previously not identifying components of fixed asset separately for depreciation purposes; rather, a single useful life/ depreciation rate was used to depreciate each item of tangible fixed assets.

Due to application of Schedule II to the Companies Act, 2013, the Company has changed the manner of depreciation for its tangible fixed assets. Now, the Company identifies and determines cost of each component/ part of the asset separately, if the component/ part has a cost which is significant to the total cost of the asset having useful life that is materially different from that of the remaining asset. These components are depreciated over their useful lives; the remaining asset is depreciated over the life of the principal asset. The Company has used transitional provisions of Schedule II to adjust the impact of component accounting arising on its first application. If a component has zero remaining useful life on the date of component accounting becoming effective, i.e., 1 April 2015, its carrying amount, after retaining any residual value, is charged to the statement of profit and loss. The carrying amount of other components, i.e., components whose remaining useful life is not nil on 1 April 2015, is depreciated over their remaining useful lives.

Had the Company continued to use the earlier policy of depreciating tangible fixed assets, depreciation and loss for the current period would have been lower by Rs. 242.73 lacs.

iii. Depreciation

- a. Depreciation as per straight line method is charged in the accounts.
- b. The charge is on the basis of useful lives as prescribed under Schedule II to the Companies Act, 2013 pro rata from the month of purchase. If the asset is purchased on or before the 15th of month, depreciation is charged from the month of purchase, otherwise depreciation is charged from the month following the month of purchase.
- c. The Company uses a rebuttable presumption that the useful life of an intangible asset will not exceed six years from the date when the asset is available for use. If the persuasive evidence exists to the affect that useful life of an intangible asset exceeds six years, the Company amortizes the intangible asset over the best estimate of its useful

ASIAN HOTELS (WEST) LIMITED

CONSOLIDATED NOTES FORMING PART OF FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2016

life. Such intangible assets are tested for impairment annually, either individually or at the cash-generating unit level.

l. Investments

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments or short-term investments. All other investments are classified as long-term investments. Current investments are valued at the lower of cost and fair value. Changes in the carrying amount of current investments are recognized in the Statement of Profit and Loss. Long-term investments are valued at cost, less any provision for diminution, other than temporary, in the value of such investments; decline, if any, is charged to the Statement of Profit and Loss. Cost comprises cost of acquisition and related expenses such as brokerage and stamp duties.

m. Inventory

- i. Inventory is valued at cost or net realizable value, whichever is lower.
- ii. Shares held as Stock-in-trade are valued at cost or market value whichever is lower.
- iii. Net realizable value is estimated selling/realizable value in the normal course of business less cost of completing the sale.

Cost is determined on weighted average basis.

n. Leases/License

When the Company is the lessee/licensee

Leases/License where the lessor/licensor effectively retains substantially all the risks and benefits of ownership of the leased/licensed item, are classified as operating leases/license. Operating lease/license payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease/license term.

When the Company is the lessor/licensor

Assets subject to operating leases/license are included in fixed assets. Lease/License income is recognized in the Statement of Profit and Loss on a straight-line basis over the lease/licensed term. Costs including depreciation are recognized as an expense in the Statement of Profit and Loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the Statement of Profit and Loss.

o. Impairment

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, each asset/group of assets is identified for which there are separately identifiable cash flows (cash generating units).

p. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

q. Cash and cash equivalents

Cash and cash equivalents comprise cash at bank, cash/cheques in hand and fixed deposits with banks with maturity period of three months or less.

r. Dividend

Dividend proposed on equity shares, if any, is accounted for pending approval at the Annual General Meeting.

s. Provisions and contingent liabilities

Provisions are recognized for present obligations of uncertain timing or amount arising as a result of a past event where a reliable estimate can be made and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events, are also disclosed as contingent liabilities unless the probability of outflow of resources embodying economic benefit is remote.

t. Borrowing costs

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are treated as direct cost

ASIAN HOTELS (WEST) LIMITED

CONSOLIDATED NOTES FORMING PART OF FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2016

33. The Group has classified the various benefits provided to employees as under:-

1. Defined contribution plans
 - a. Provident fund
2. Defined benefits plans
 - a. Contribution to Gratuity fund
 - b. Compensated absences – Earned leave

In accordance with Accounting Standard 15, actuarial valuation was done in respect of the aforesaid defined plans based on the following assumptions: -

Economic Assumptions

The discount rate and salary increases assumed are key financial assumptions and are considered together; it is the difference or 'gap' between these rates which is more important than the individual rates in isolation.

Discount Rate

The discounting rate is based on the gross redemption yield on medium to long-term risk free investments. For the current valuation a discount rate of 8 % p.a. compound, has been used.

Salary Escalation Rate

The salary escalation rate usually consists of at least three components, viz. Regular increments, price inflation and promotional increases. In addition to this any commitments by the management regarding future salary increases and the Company's philosophy towards employee remuneration are also taken into account. Again a long- term view as to the trend in salary increase rates is taken rather than be guided by the escalation rates experienced in the immediate past, if they have been influenced by unusual factors.
