Commenting on the performance Mr. Anuj Talwar, Jt. Managing Director, Talbros Automotive Components Limited said:

“The first six months of FY20 have been extremely challenging for the Indian automotive industry. The only silver lining in such difficult times were the strong retail sales witnessed during October due to the festive season. Further, announcements made by the Honourable Finance Minister are expected to aid in revival of demand. On the back of reduction in interest rates, good monsoons & anticipated pre-buying before BS VI implementation, industry hopes for a better performance in the times to come.

The slowdown in the industry has had an adverse impact on all the auto component manufacturers which is reflected in our performance of H1 FY20.

Talbros Automotive Components being a well diversified Auto components manufacturer with a healthy mix of Export and Domestic sales and a hedged product portfolio remains confident to stir through these difficult times. Our focus is to provide products of the future. The various new regulations that are proposed to be imposed open a plethora of opportunities for us and we are well equipped to grab the same.”
