# **EXCELLING IN EXECUTION**

**ANNUAL REPORT** 

2016-17

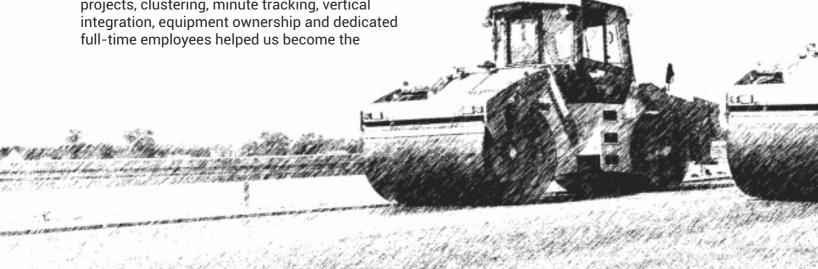

# **Excelling In Execution**

It is an undeniable fact that India needs to build a whole lot of infrastructure given its growing ambitions. Having said that if you look at the past records we have been phenomenally slow. But in the last three years the present government has made its intent clear and launched a slew of projects. So today there is no dearth of new opportunities coming in. As great as that is the only thing to watch out for now is how the execution of these projects pans out. We say this because in the past execution always left us disappointed. Delays are the reality of this industry whether it's in India or Globally. This is where Dilip Buildcon (DBL) begs to differ.

While the industry on average suffers from delayed execution due to various reasons, DBL has completed more than 95% of its projects before time. This has also led us to win early completion bonuses of about Rs. 3,169 Mn in the last 5 years. We take immense pride in our in-house execution capabilities, which are stuff of legend in the industry. Our unique model of operation which is based on careful selection of projects, clustering, minute tracking, vertical integration, equipment ownership and dedicated full-time employees helped us become the

fastest growing infrastructure company in India. This model has also catapulted us to new heights and today we are the largest player in the road construction industry. But the reason why we are so proud of the way we do things is because irrespective of the mode on which the project is awarded the fact remains that it will need to be executed on time, within cost and of the best quality. This is where DBL has built a reputation for itself which is second to none in this country.

Our execution capabilities are miles ahead of our competition. Everything that we have done has singularly revolved on the idea that execution needs to happen on or before time. All the strategies, practices, policies that we adopt or have adopted over the years has one central theme – "Focus on Execution". We stake our reputation on our execution strength. Needless to say, with our strong current order book along with the fact that there is a very strong pipeline that the government is envisaging sky is the limit for us.

For India and the world, infrastructure creation is the key to sustainable socio-economic progress. For over three decades, we have contributed significantly to India's infrastructure, emerging as the leading industry player and the largest private sector road construction company in India.

#### Forward-looking statements:

In this annual report, we have disclosed certain forward-looking information to enable investors to comprehend our prospects and take informed investment decisions. This report and other statements written and oral - that we periodically make certain forward-looking statements that set out anticipated results based on the management's plans and assumptions. We have tried wherever possible to identify such statements by using words such as 'anticipates', 'estimates', 'expects', 'projects', 'intends', 'plans', 'believes', and words of similar substance in connection with any discussion of future performance. We cannot guarantee that these forward-looking statements will be realised, although we believe we have been prudent in our assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialise, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Readers should bear this in mind. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

# Chairman's Message

# Building a strong corporate foundation through timely project delivery

#### Dear Shareholders,

The management at Dilip Buildcon Limited is pleased to present the first financial report of your Company following its initial public offering in August 2016. At the outset, let me tell you that we are immensely humbled and grateful to each and every one of you who has shown utmost trust and confidence in our management. our business model, and our strategy in the first year of our listing. In a very challenging global environment, the IPO was oversubscribed by 22 times, which is one of the major talking points as it happened almost after a decade in this sector. Your company raised Rs. 4,300 million by way of primary issuance of shares and Rs. 2,239.77 million by way of offer for sale (OFS) by Selling Shareholders aggregating to Rs. 6,539.77 million.

The numbers we reported during the year under review are a testament of our

competitive advantage and long-term sustainability. I am pleased to state that this performance translated into a handsome 59.70%\* appreciation in our stock post listing on the National Stock Exchange and Bombay Stock Exchange, enhancing value for our stakeholders.

We like to see ourselves as an execution driven company on one hand and an opportunity responsive company on the other, playing our active role in India's growth story. All the strategies, practices, policies that the company adopts or has adopted over the years have one central theme -"Focus on Execution." We believe that this dedicated pursuit has made it possible for us to minimize our downside during sector troughs and maximize our progress during sectoral rebounds.

What started as a dream in a small town in Central India has now become India's largest

"In the infrastructure sector, DBL is known for its timely and efficient project execution skills. Our operational achievements during the year once again validate as to why we are the preferred partner"

road EPC company spanning across 16 states. We are currently building over 8,604.61 lane kms, essentially participating in the country's growth story and building its backbone. Being a civil

<sup>\*</sup> as on 31st March 2017

engineer the only focus I had while starting this company was to focus on delivering the best-quality output. Today, India as a country has grown far beyond my imagination back then, and we have been an active contributor of the country's growth story. We believe that it is still very early for India, as there is still an immense scope for India's infrastructure development. Presently, we are evaluating our options across various sectors in the infrastructure space like roads & highways, irrigation, urban development, and mining to broaden our scope.

I continue to be a big believer in the India's transformation phase and as we keep growing. The scope for infrastructure is only going to grow in the near future, and that's where I see us playing a more prominent role.

India's power needs are going to be immense in the future and lot of the natural resources in India are still not utilized commercially. We saw this as an opportunity and forayed into the mining segment this year. This was possible due to our focus on execution, tracking and monitoring and exceptional project management skills. We entered into mining segment last year and we had an order book of Rs. 1,045 Mn. However, this year we expanded our presence in this sector and our mining order book has grown to Rs. 26.117.19 Mn.

In the last decade, our revenues have grown by 103.29 % CAGR. The only external equity we took to grow to this stage was Rs 750 Mn from Banayan Tree

before going public in 2016. It shows our efficiency in utilizing our resources, especially our capital.

# 103.29%<sup>\*</sup>

10 years Revenue CAGR

Your company recently concluded discussions on the strategy for the company. The highlights of the plan include:

- 1. Focus on execution of projects in hand, while selectively participating in new bids of large size
- 2. Gearing up to tap emerging opportunities in the whole infrastructure space, so as to be seen as a full-service infrastructure company
- 3. Growing revenues consistently as planned
- Steady reduction in net working capital and debt levels
- 5. Monetization of existing road projects as planned

We continually strive to enhance value for investors. The trust that our clients place in us is at the heart of this. We have an approach of providing regular and stable pay-outs to investors; And of prudent evaluation of capital allocation decisions, in context of long term stakeholder value. Consistent with this approach, we have recommended maiden dividend @ 10% i.e. Rs. 1.00 per equity share of Rs. 10/-each for the financial year ended March 31, 2017. The value that a company creates for its stakeholders is not just

financial but also social, environmental, intellectual and human. For example, by investing in employee skilling and development, organizing safety awareness camps, providing education. Our work in school education, community care and ecology enhances social and natural capital. Our agenda is not just building infrastructure, rather contributing in nation building. Social value is also created when companies engage with its communities and work on some of society's most pressing issues. It creates environmental value by being more ecologically sustainable.

# "We enhanced value for the company and shareholders in 2016-17"

Let me end with thanking all the shareholders for their support and encouragement during the year, for the trust and faith that you repose in us.

Very Sincerely,

**Dilip Suryavanshi** Chairman and MD

# CEO's Message

# Execution is our core competence

# Dear Shareholders,

2016-17 was a year of contrasts. On one hand, we had the global economy, mired in uncertainty and volatility. On the other. India delivered a standout performance as the fastest growing large economy, reinforced with policy support. The Indian economy has been steadily moving towards greater structural strength and fiscal efficiency. The Government maintained momentum by unveiling multiple new initiatives like 'Startup India', 'Stand up India' and 'Digital India' in addition to its focus on 'Make in India' and ease of doing Business. These initiatives are expected to come together and provide stimulus to the Indian economy, and accelerate growth.

The present Central Government has been focusing on the Roads & Highways sector since it got elected. It announced a slew of policy measures in the past two years to revive stranded projects, initiated huge number of new projects and also taken proactive measures to bring in fresh investments into the sector.

The target for national highways construction has been set at 25,000 Km during 2017-18 compared to 15,000 Km that were bid out during 2016-17. The long-term outlook for the infrastructure sector appears positive on the back of major investment expected from both, the Government and the Private sector. Our long and impressive track record, diversified project mix and strong order book indicate well for the Company. There will always be new challenges and new hurdles, but we are geared to capitalize on the opportunity that each such situation will usher in.

During 2016-17, revenues increased by 24.58% from Rs. 41,011 Mn in 2015-16 to Rs. 51.091 Mn. This resulted in a

# "Executing 10% of India's daily execution target of 25kms per day"

23.15% growth in EBIDTA from Rs. 8,150 Mn to Rs. 10,037 Mn. Profit after tax increased by 63.76% from Rs. 2,205 Mn in 2015-16 to Rs. 3,611 Mn in 2016-17. Debt equity ratio as at March 31, 2017 on a standalone basis stood at 1.31.

Order inflows, which is the backbone of your company's dominance in the business, clocked in at Rs. 1,13,034.07 Mn, which represents an increase of 53.43% over the corresponding inflows of the previous year. The unexecuted order book stood at Rs. 1,75,682.65 Mn. This robust Order Book position provides your Company with multi-year forward visibility on Revenues and Margins.

Your Company is widening its

All figures as per standalone numbers

geographic footprint, by actively foraying into different states adopting a cluster approach to bid for projects. We achieve higher efficiency and profitability through project clustering. National footprint also allows us to tide over any seasonally weak quarter.

# ₹51,091 Mn

**Total Revenue** 

# ₹3,611 Mn

**Net Profit** 

Our strategy is not focused solely on order book addition, but also on adding quality projects with potentially higher margins. By diversifying our skill set and order book across different business and geographical regions, we are able to pursue a broader range of project tenders and therefore maximize our business volume and contract profit margins. Our creditable achievement during the year under review was that we did not just report the highest-ever revenues based on orders generated in the past, but we secured new orders worth Rs. 1,13,034.07 Mn, strengthening our order book from Rs. 107,787 Mn to Rs. 175,683 Mn, 62.99% higher than the corresponding order book on March 31st, 2016.

We entered different segments where we saw future business potential, equipment was fungible, leveraging our existing strengths and where we felt it was geographically collaborated.

Our mission continues to be to

complete each project before time by optimally utilizing our technological strengths and domain expertise. The overall operational capabilities and competence in executing large scale infrastructure projects have enabled the Company to emerge as one of the largest infrastructure players.

We will continue to leverage our inherent strengths and expand our horizons to capture a larger share of the infrastructure opportunity and be seen as a preferred infrastructure partner. Our passion, professionalism and perseverance gives us an exceptional future outlook. Our objective is to drive innovation across each aspect of our business and make that an integral part of a sustainable approach.

We are hopeful that the current issues that the industry is facing, related to bank lending, land acquisition and multiple disputes will be progressively resolved, as the Government boards on its ambitious agenda of infrastructure creation. We have a promising roadmap ahead given the economic potential of India and the intent of the government, both at a vision level and seriousness of implementation from a regulatory standpoint.

I see the existing optimism in the infrastructure sector continuing in the coming years. In the Roads and Highway sector, the current fiscal year has already begun on a very encouraging note with budgetary allocation being increased to Rs. 6,40,000 Mn. Further, the government has set a target of awarding 25,000 Km for FY 2017-18. Pick-up in awarding is expected to be dominated by the EPC route followed by the HAM route, segments in which your Company is a keen participant.

Let me leave with this thought, what drives my immense positivity towards this sector is the fact that the ministry has publicly stated that they want to give out more contracts in the next two years than they have given in the past three years.

In conclusion, I would like to thank my fellow Board Members, and other stakeholders who have collectively enabled sustainable and profitable growth of the business.

Very Sincerely,

# Management Discussion & Analysis

# **Economic Review**

### Global economic overview

Global economic activity improved in the second half of CY2016, especially in advanced economies. Growth picked up in the US as firms grew more confident about future demand. The economy also recorded a lower rate of unemployment and buoyant consumer demand. In the aftermath of the Brexit vote, the Euro area growth was also resilient on the back of strong domestic demand and continued easing; the growth in the United Kingdom remained robust on the back of resilient spending. Japan's performance has also been on the upside with strong exports.

However, the global economic growth, at 3.1% on a y-o-y basis, fell short of expectations in CY2016 as deceleration in key emerging markets and developing economies (EMDEs) overshadowed the modest recovery in major developed countries. The EMDEs contribute to more than half of the global economic growth rate. Their deceleration was accompanied by a modest increase in commodity prices, subdued global trade, financial market volatility and weakening capital flows. Although China's growth turned out to be better than expected on the back of policy stimulus, it was lower than

CY2015. India fared better than the world in terms of growth, even though the demonetisation exercise temporarily threw a challenge. Brazil, on the other hand, remained mired in a deep recession. Activity remained weak in fuel and nonfuel commodity exporters more generally, while geopolitical factors held back growth in parts of the Middle East and Turkey.

#### **IMF's World Economic Outlook**

Year	Actual (%)		Projection (%)	
	2015	2016	2017	2018
<b>World Output</b>	3.4	3.1	3.5	3.6
Advanced Economies	2.1	1.7	2.0	2.0
Emerging Market and Developing Economies	4.2	4.1	4.5	4.8

With buoyant financial markets and a long-awaited cyclical recovery in manufacturing and trade under way, world growth is projected to rise from 3.1 percent in 2016 to 3.5 percent in 2017 and 3.6 percent in 2018, slightly above the October 2016 World Economic Outlook (WEO) forecast.

# **Indian Economy**

India's economic growth is gradually improving since 2014. The favourable policy as well as executive reforms by the Government to support strong and sustainable growth, prudent fiscal regime and calibrated monetary easing that reigned in inflation have helped to strengthen macroeconomic stability. The lower crude oil prices have also helped to reduce current account deficit, improve fiscal positions, and lower inflation. This, in turn, has helped boost economic activities in India. Driven by these positive developments, the country has emerged as the world's fastest growing major economy.

India's growth is forecast to increase to 7.2 percent in FY2017 and accelerate to 7.7 percent by the end of the forecast horizon—slightly below previous projections. This outlook mainly reflects a more protracted recovery in private investment than previously envisaged. Nonetheless, domestic demand is expected to remain strong, supported by ongoing policy reforms, especially the introduction of the nationwide Goods and Services Tax (GST). Significant gains by the ruling party in state elections should support the government's economic reform agenda, which aims at unlocking supply constraints, and creating a business environment that is more conducive to private investment.

The Government of India has taken significant initiatives to strengthen the economic credentials of the country and make it one of the strongest economies in the world. India is fast becoming home to start-ups focused on high growth areas such as mobility, e-commerce and other vertical specific solutions - creating new markets and driving innovation. Owing to higher infrastructure spending, increased fiscal devolution to states, and continued reforms in fiscal and monetary policy, the Indian economic outlook has strengthened. The Government of India is striving to move steadily to minimise structural and political bottlenecks, attract higher investment and improve economic performance.

#### Outlook

The growth momentum should rise, driven by the Government's policy initiatives in areas such as taxation (GST), foreign direct investment (FDI), and the ease of doing business, among others. Other major factors helping India stay as a bright spot in the global economic landscape include the lower global oil price, with positive impact on the country's import bill, a well-regulated monetary policy by the Reserve Bank to stabilise prices, and improving fiscal condition. The Government's endeavour to drive a bigger as well as a cleaner GDP is expected to augur well for the economy in the medium and long terms. The growth recovery has primarily happened due to discretionary spending, public investment and FDI reforms. The introduction of GST and higher outlays in the Budget 2017 are expected to drive growth as well.

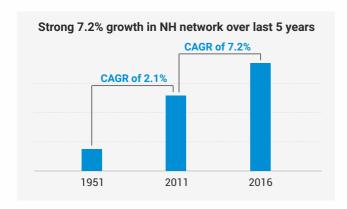

# **India's Infrastructure Opportunity**

The government's ambitious infrastructure development programmes provide significant opportunities for investors and market players to help transform the sector and partner India's socio-economic progress. The government plans to focus on Railways, Roads, Sagarmala project (for ports and coastal development), Housing for All and Inland waterways. Total outlay for infrastructure sector has been sharply increased to Rs 2,41,387 crore in the Union Budget 2017. In the road sector, Budget allocation for highways increased from Rs 57,976 crore in 2016-17 to Rs 64,900 crore in 2017-18. Total length of roads, including those under PMGSY, built from 2014-15

till the current year is about 1,40,000 kms which is significantly higher than previous three years.

As national highways constitute a significant part of the road network in India, NHAI initiated the largest and foremost infrastructure program - National Highway Development Programme (NHDP) in 1998. Widespread implementation of this program boosted 7.2% CAGR in national highways in the last five years v/s 2.1% over the last 60 years.

A total of 6,604 km out of the 15,000 km of target set for national highways in 2016-17 has been constructed by the end of February 2017, according to the Minister of State for Road, Transport & Highways, and Government of India. Increasing industrial activity, increasing number of two and four wheelers would support the growth in the road transport infrastructure projects.

The government is now addressing various bottlenecks, before awarding projects. The result is better turnaround within budget and on time.

#### **Road Sector**

India has the second largest road network across the world at 4.7 million km. This road network transports more than 60 per cent of all goods in the country and 85 per cent of India's total passenger traffic. Road transportation has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country. The Indian roads carry almost 90 per cent of the country's

passenger traffic and around 65 per cent of its freight. In India sales of automobiles and movement of freight by roads is growing at a rapid rate. The value of roads and bridges infrastructure in India is projected to grow at a Compound Annual Growth Rate (CAGR) of 17.4 per cent over FY12–17. The country's roads and bridges infrastructure, which was valued at US\$ 6.9 billion in 2009, is expected to touch US\$ 19.2 billion by 2017. Under the Pradhan Mantri Gram Sadak Yojana (PMGSY), 133-km roads per day in 2016-17 were constructed as against a 2011-14 average of 73-km per day.

In the Union Budget 2017-18, the Government of India has allotted Rs 64,000 crore to NHAI for roads and highways and Rs 27,000 crore for PMGSY. The Government of India plans to introduce a new framework on renegotiation of Public Private Partnership (PPP) contracts, which will allow renegotiations based on sector-specific issues, especially for national highways and ports, and provide greater flexibility to the parties involved. The government also plans to set up a finance corporation with an amount of Rs 1 trillion, in collaboration with Japanese investors, to fund projects in the roads segment. The government, through a series of initiatives, is working on policies to attract significant investor interest. The Indian government plans to develop a total of 66.117 km of roads under different programmes such as National Highways Development Project (NHDP), Special Accelerated Road Development Programme in North East (SARDP-NE) and Left Wing Extremism (LWE). The government has identified development of 2,000 km of coastal roads to improve the connectivity between ports and remote villages.

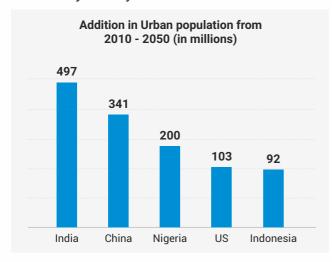

# **Irrigation Sector**

The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Total allocation for rural, agricultural and allied

sectors for FY 2017-18 has been increased by 24 per cent year-on-year to Rs 1,87,223 crore. A dedicated micro-irrigation fund will be set up by National Bank for Agriculture and Rural Development (NABARD) with a corpus of Rs 5,000 crore.

# **Urban Development Sector**

India has the second highest urban population in the world. Population of Indian cities will increase from 340 million in 2008 to 590 million by 2030. The investment required for building urban infrastructure in India, over the next 20 years, is estimated at approximately USD 1 trillion. By 2031, about 600 million Indians will reside in urban areas, an increase of over 200 million in just 20 years.

Government of India has prioritized cities as a lever for the transformation of today's India. Urban centres are and will be the engines of growth. The Government of India initiatives such as Swachh Bharat Abhiyaan, Atal Mission for Rejuvenation and Urban Transformation (AMRUT), Housing for ALL and Smart Cities Mission aim at providing a clean and sustainable environment along with a decent quality of life to its citizens

# **Mining Sector**

The importance of coal as a fuel or a power resource is undeniable. Coal is the most

abundant fossil on earth and industrial greatness on coal has been built up by many countries. India is currently the third largest producer of coal in the world. It produced around 6 million tonnes of coal a year in the beginning of the 20th century. Today, the total production stands at 724.71 million tonnes in FY2016-17, in sync with our developmental needs.

# **Company Overview**

Dilip Buildcon Limited (DBL) is the largest road construction company in India. Over the years, since its incorporation in 2006, through outstanding track performance of constructing landmark infrastructure projects in record time, DBL has moved to a different league altogether. DBL's strength lie in its ability to execute projects on time, within cost and of the highest quality. Its clientele in the road segment includes National Highway Authority of India (NHAI), state governments and private companies. The company is also an established player in irrigation, urban development and mining segments.

# Key competitive advantages

Completing projects before the stipulated deadline and within cost is core to our business. Over the past years we have been working on the same mantra of timely completion of projects. We are able to achieve that due to our integrated business model through in-house design, engineering and construction, owning all the

equipment's, in-house execution team, careful selection and geographical clustering of projects, long-established relationships with various clients and our nationwide execution capabilities.

### In-house design, engineering and construction

We have established track record in executing large infrastructure projects in sectors like roads and highways, bridges & culverts, dams, canals, tunnels, water supply projects, coal mining, among others. Our in-house design, engineering and construction team controls the entire process from conceptualization to commissioning of a given project which helps in providing customized solutions as per clients' specific requirements ensuring timely completion of projects thereby reducing reliance on third parties and lowering costs.

Each department right from Business development & tendering, Building construction, Engineering (billing and planning), Engineering (structure), Engineering (QAQC), Design & technical audit, Contracts management, Survey & design, Fuel management, System admin and monitoring/ equipment management have been given broad responsibilities with functional heads.

#### In-house execution team

One of the largest employers in the construction industry in India. 25,000+ employees, trained by the original equipment manufacturers.

# **Equipment ownership for better execution**

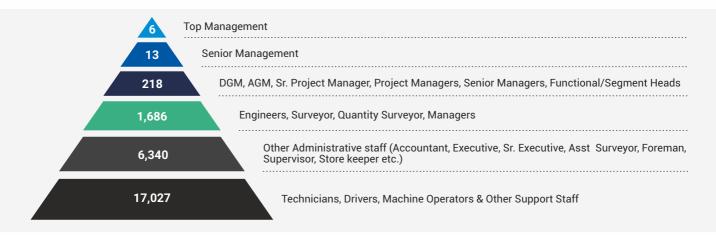

Modern equipment fleet of 8,525 vehicles and other construction equipment enables availability, quick mobilization, and control over execution. Eliminate delays and cost over-runs due to untimely break-downs or non-availability leading to higher execution efficiency. Homogenous fleet to ensure spare parts availability and significant savings in procurement and maintenance. GPS installed on all equipment's for tracking. Manned by trained full time employees for maximum efficiency. In-house repair and maintenance to ensure availability.

# Established relationship with public sector clientele and excellent pre-qualification credentials

Our focus has been on EPC projects from State and Central Government authorities.

Diversifying our client base is helping de-risk our business and lowers the receivable/payment risks. We have executed all kinds of projects being offered by the State and Central Government authorities like NHAI, MoRTH, State Government, Northern Coalfields limited and Singareni Collieries limited.

Our focus on higher margin projects have enabled in an efficient working capital management. We are focusing to reduce NWC further through halving number of project sites to 25, lowering inventory and increasing the share of mining that has fortnightly payments.

CRISIL has assigned A+/stable rating for our long term bank facilities and A1 rating for our short term bank facilities. We have developed very good working relationships with all the project sponsoring authorities in India. We have the technical and financial qualifications to bid for big ticket size projects. These qualifications are based on past experience of successful execution of projects and sound financials.

### Nationwide execution capabilities

We have executed 73 major infrastructure projects spread across 9 states in India during last five financial as on 31st March 2017. Road projects aggregating to 8,604.61 lane kms completed during last five financial year ending March 2017. As on 31st March 2017, executing 58 projects across roads (8,781.25 lane kms), irrigation, urban development, bridges and mining in 16 states.

# **Risks and challenges**

India's infrastructure sector remains the backbone of the country's socio-economic development. However, new risks and concerns have emerged in recent years. Operating in a dynamic environment, the Company has evolved a robust framework for identification, management and mitigation of potential risks. Some of these risks are discussed below:

# **Competition risk**

The Company competes with a number of Indian infrastructure operators in acquiring concessions for both new and existing road projects. After two decades of consistent competition, it has now eased out relatively in the last two years. Market players have become more cautious, leading to more rational bids. For NHAI BOT bids, FY2016-17 saw three to four bidders vying for BOT highway projects, compared to over 30 bidders in 2012. However, the hybrid annuity projects witnessed a lot more competition, given its attractive structure.

Mitigation: Considering the ever-changing market competition, the Company adapts its policies and procedures to ensure a sustained business model. We have to strive to execute maximum number of projects before their scheduled completion and within the budgeted cost. This will enable us to earn the bonus for early completion from clients. This bonus will directly add up to the income thus giving a positive impetus on the margins.

# Capital-intensive business risk

Infrastructure business is capital-intensive by nature. Availability of funds is critical for bidding of projects, particularly fund based projects such BOT-toll, hybrid annuity model.

Mitigation: We operate our working capital cycle in a highly optimized manner. We pool our asset and resources to be used on various projects within geographical proximity. Our high credit rating also helps us in getting loan facilities easily at highly competitive rates of

interest. Our debt-equity ratio on consolidated basis has gone down significantly indicating optimum utilization of internal accruals.

# Input cost risk

The availability of the right quality and quantity of resources is critical for the timely completion of infrastructure projects. Any unexpected increase in the input costs will have direct impact on margins.

Mitigation: The Company controls its projects directly with no sub-contracting of core infrastructure –construction activities, deploys and uses the equipment in optimal manner and also has its own mines and crushers to meet the requirement of stone aggregates. The other key raw materials are procured directly from leading manufacturers to ensure best prices, quality and timely supply. The contracts we enter with government client are generally have with relevant cost escalation provisions that protect our margins.

#### Labour risk

People represent the most valuable asset in the construction business. Undue attrition could lead to loss of competitive edge. Recruitment and retention of trained and talented professionals is an industry-wide problem.

Mitigation: The Company's focus is to build an organisation of highly motivated employees, having the ability to execute ambitious business goals with passion and commitment, thereby exceeding customer aspirations. The working environment of the Company is cordial and employee-friendly. The remunerations are all at par with the industry standards. Periodical training and team building activities are conducted to reduce the stress among employees. Retirement benefits, welfare schemes and social security measures are provided to all the employees.

#### Timely completion of the project

In infrastructure space especially in BOT projects, timely completion can very often be the only factor that contributes to the projects financial viability and any stress on the project timelines will severely affect the project's financial model. In addition to the land acquisition and clearance related issues plaguing the projects, the year also witnessed stressed cash flow due to the reluctance and increased diligence from the banking sector, resulting in delaying the project.

Mitigation: The Company takes a proactive stand and tends to these issues by assisting the Authority in land acquisition process and obtaining clearances.

None of the Directors, Key Managerial Personnel of the Company and their relatives, is in anyway concerned or interested financially in the Resolution set out at Item No. 4 of the Notice as an Ordinary Resolution.

The Board recommends the resolution set forth in Item No. 4 for the approval of the Members.

#### Item No. 5

This Statement is provided voluntarily, as a good corporate governance practice, though not required as per Section 102 of the  $\Delta ct$ 

No listed company or a company belonging to such class or classes as prescribed, shall appoint or re-appoint-

- (a) an individual as auditor for more than one term of five consecutive years; and
- (b) an audit firm as auditor for more than two terms of five consecutive years:

#### Provided that-

- (i) an individual auditor who has completed his term under clause (a) shall not be eligible for reappointment as auditor in the same company for five years from the completion of his term;
- (ii) an audit firm which has completed its term under clause (b), shall not be eligible for re-appointment as auditor in the same company for five years from the completion of such term.

Further, such existing companies on or before the commencement of Companies Act, 2013 (i.e. April 1, 2014) shall comply with the provisions of Companies Act, 2013 within the period of three years.

The Company falls under the class of companies as prescribed in the said rules. Accordingly, the term of the existing Joint Statutory Auditors, M/s Naresh Rajani & Co., Chartered Accountants, Bhopal (ICAI Firm Registration No. 008422C) is coming to an end in this Annual General Meeting.

The Audit Committee has recommended the appointment of M/s MSG & Associates, Chartered Accountants, Bhopal (ICAI Registration No. 010254C) as the Joint Statutory Auditors of the Company in place of M/s Naresh Rajani & Co., Chartered Accountants, Bhopal (ICAI Firm Registration No. 008422C) existing Joint Statutory Auditors of the Company, to hold an office for a term of five years from the conclusion of this Annual General Meeting till the conclusion of sixteenth Annual General Meeting of the Company to be held in the year 2022, subject to ratification of their appointment (remuneration) by the Members at every Annual General Meeting till the fifteenth Annual General Meeting, at such remuneration as shall be fixed by the Board of Directors of the Company.

Further M/s MSG & Associates, Chartered Accountants, Bhopal have confirmed the compliance of the statutory requirements under the Companies Act, 2013 and of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The Board of Directors of the Company recommends the appointment of M/s MSG & Associates, Chartered Accountants,

Bhopal (ICAI Firm Registration No. 010254C) as the Joint Statutory Auditors in place of the retiring Auditor, M/s Naresh Rajani & Co., Chartered Accountants for the approval of the members.

#### Item No. 15

Pursuant to the provisions of Section 71 of the Act which deals with the issue of debentures read with Section 42 of the Act which deals with the offer or invitation for subscription of securities of a Company on private placement, Rule 14 of the Companies (Prospectus and Allotment of Securities) Rules, 2014 and the Companies (Share Capital and Debentures) Rules, 2014, the Company intends to offer or invite subscriptions for secured / unsecured redeemable non-convertible debentures, in one or more series/tranches, of an aggregate nominal value up to Rs. 1,000.00 Crores (Rupees One Thousand Crores only), on a private placement basis.

In this regard before making an offer or invitation for subscription on a private placement basis, the Company is required to obtain approval of its members by means of a special resolution. It shall be sufficient if the Company passes a special resolution only once in a year for all the offers or invitations for such non-convertible debentures during the year.

The Board may, at an appropriate time, consider offering or inviting subscriptions for secured/unsecured redeemable non-convertible debentures, in one or more series/tranches on private placement, issuable/redeemable at par, in order to augment long-term resources for financing inter-alia the ongoing capital expenditure and for general corporate purposes. The pricing of the NCDs will depend primarily upon the then prevailing market conditions and the regulatory scenario.

Keeping in view the above, consent of the members is sought for passing the Special Resolution as set out at Item No.15 of the Notice. This enabling resolution authorises the Board of Directors of the Company to offer or invite subscription for redeemable nonconvertible debentures, as may be required by the Company, from time to time and as set out herein, for a period of 1 (one) year from the date of passing this resolution.

None of the Directors or Key Managerial Personnel of the Company and their relatives, are in any way concerned or interested financially or otherwise, in this Resolution.

The Board of Directors recommend passing of the Special Resolution as set out in Item No. 15 of this notice for the approval of members.

#### Item No. 16

Section 42 of the Companies Act, 2013, read with Rule 14 of the Companies (Prospectus and Allotment of Securities) Rules, 2014, prescribe the provisions subject to which a company is allowed to issue Securities on Private Placement basis. Every proposed offer of Securities or invitation to subscribe to Securities on Private Placement basis requires prior approval of Members of the Company by way of Special Resolution.

In view of the aforesaid provisions and in order to augment the business of the Company, it is proposed to take the approval of the Members for borrowing, from time to time, by issuance of Commercial Papers (CPs), on Private Placement basis, up to an amount not exceeding Rs. 1,000.00 Crores (Rupees One Thousand Crores only). The said limit shall be within the overall borrowing limit as may be approved by the Members under Section 180(1)(c) of the Companies Act, 2013.

The pricing of the CPs will depend primarily upon the then prevailing market conditions and the regulatory scenario. The pricing for each of the issuance would be approved by the Board of Directors.

None of the Directors or Key Managerial Personnels of the Company and their relatives, are in any way concerned or interested financially or otherwise, in this Resolution.

The Board of Directors recommend passing of the Special Resolution as set out in Item No. 16 of this notice for the approval of members.

#### Item No. 17

As per the provisions of Section 20 of the Companies Act, 2013, a document may be served on any member by sending it to him by registered post/speed post or by courier service or by electronic mode or any other mode as may be prescribed. Further, a member may request the delivery of document through any other mode by paying such fees in advance, equivalent to estimated actual expenses of delivery of the documents delivered, provided that such request along with requisite fees has been duly received by

the Company at least 10 days in advance of the dispatch of documents by the Company to the member.

Accordingly, the Board recommends the passing of the Ordinary Resolution at Item No.17 of the accompanying notice for the approval of members.

None of the Directors and the Key Managerial Personnel of the Company and their respective relatives are concerned or interested financially or otherwise in the passing of the above resolution.

#### Item No. 18

### **Business Operations**

### Overview

We are one of the leading private sector road-focused EPC contractors in India. During the last five Financial Years ended March 31, 2017 we completed the construction of 73 road projects in the states of Madhya Pradesh, Gujarat, Himachal Pradesh, Rajasthan, Andhra Pradesh, Karnataka, Telangana, Uttar Pradesh and Maharashtra in India, with an aggregate length of approximately 8,604.61 lane kms, achieving a CAGR of 34.75% of revenue growth on standalone basis for the five Financial Years ended March 31, 2017.

As the owner of one of the largest fleets of construction equipment in India, we maintained, as of March 31, 2017, a modern equipment fleet of 8,525 vehicles and other construction equipments from some of the world's leading suppliers, such as Schwing Stettar, Metso, Wirtgen and Vogele. We are one of the largest employers in the construction industry in India and employed 25,290 employees as of March 31, 2017.

Our core business is undertaking construction projects across India in the roads sector. We specialize in constructing state and national highways, city roads, culverts and bridges. As a result of the natural growth of our road construction business, as well as the recent government support to the infrastructure sector and rising opportunities in new business areas, recently we expanded into the irrigation and urban development businesses.

Our business comprises: (i) our construction business, under which we undertake roads, bridges, irrigation, urban development and mining projects on an EPC basis; and (ii) our infrastructure development business, under which we undertake building, operation and development of road projects on a BOT basis with a focus on annuity projects.

As of March 31, 2017, we had an order book of Rs. 1, 756,826.51 Lakhs, consisting of 37 third party road EPC projects, 10 of our

own road BOT/HYBRID projects on EPC basis, 2 irrigation projects, 3 urban development projects, 3 mining projects and 1 cablestayed bridge project.

### **CONSTRUCTION BUSINESS**

### Roads & Bridges:-

In our road and bridge construction business, we mainly design, construct and maintain roads, bridges and highways on an EPC basis with third party and EPC Contracts awarded to us through our subsidiary companies.

We recognized revenue of Rs. 457,143.01 Lakhs from this business for Financial Year 2017. As on March 31, 2017, we were undertaking a total of 37 road EPC Projects, 1 Bridge and 10 road infrastructure development projects in 12 states, which amounted to an aggregate length of 8,781.25 lane kms. Our order book for these projects amounted to Rs.1,458,089.52 Lakhs as of March 31, 2017, accounting for 83% of our total order book.

### Irrigation:-

We recently diversified into the irrigation business. We started to undertake irrigation projects in Financial Year 2014 to explore opportunities created by the increased focus of the Government and State Governments on agriculture. In our irrigation business, we undertake to build canals and dams. Our irrigation team undertakes primarily design and construction works for tunnels and canals for agricultural irrigation purposes. We do not need to make any further investment into our equipment bank as we are able to use our existing equipments for our irrigation projects. Undertaking irrigation projects in the areas close to our on-going projects facilitates our strategy to cluster our EPC projects. We can conveniently move and use the manpower, machines and materials in the nearby work sites and undertake these projects on a cost effective basis.

We recognized revenue of 27,827.28 Lakhs from this business for Financial Year 2017. As of March 31, 2017, we were undertaking 2 EPC irrigation projects in Madhya Pradesh. Our order book for these projects amounted to Rs.16,483.76 Lakhs as of March 31, 2017, accounting for 1% of our total order book.

### **Urban Development**

We recently diversified into the urban development business. The recent trend in the urban development sector has provided us with an opportunity to diversify our business. We believe this sector may continue to grow during the next few years and thus plan to undertake projects in our core geographic markets. We commenced urban development projects in Madhya Pradesh in Financial Year 2013 to explore the opportunities created by the increased focus of the State Government on improving the living conditions of the underprivileged. In our urban development

business, we undertake redevelopment and re-densification of government housing and build residential units under affordable housing schemes, construction of district court and other structures in group water supply schemes relating to irrigation or water supply for agricultural purposes.

We recognized revenue of 9,010.04 Lakhs from this business for Financial Year 2017. As of March 31, 2017, we were undertaking 3 EPC urban development projects in Madhya Pradesh. Our order book for these projects amounted to Rs. 21, 081.33 Lakhs as of March 31, 2017, accounting for 1.20% of our total order book.

### **Mining Project**

DBL over a period of time has developed core strengths like fleet/equipment management, bulk material handling, high volume excavation and earth work, supply chain management etc. in its infrastructure and construction business. All these expertise of DBL enjoys close synergy with the mining business. As a part of diversification strategy and to exploit the existing strengths of the organization, DBL ventured into mining business, bagged contracts of Overburden/Waste Removal from Northern Coalfield Limited (NCL) and Singareni Collieries Company Limited (SCCL). In a very short span of 12 months DBL has achieved a remarkable excavation capacity of 2.50 Lakhs BCM per day in the most cost efficient manner and established new benchmarks for the Industry.

Project Name	Volume (BCM)	Contract Value (Rs. in Lakhs)
Nigahi-1, Northern Coalfields, Dist. Singrauli, Madhya Pradesh	13 Million	10,450.00
Khairagura, Singareni Collieries Company Limited, Asifabad District, Teleangana	106.1 Million	97,355.00
Nigahi-2, Northern Coalfields, Dist. Singrauli, Madhya Pradesh	131.8 Million	167,357.78

We recognized revenue of Rs. 13,990.84 Lakhs from this business for Financial Year 2017. As of March 31, 2017, our order book of these 3 projects was Rs. 261,171.90 Lakhs, accounting for 14.87% of our total order book.

Goa Zuari Cable-stayed Bridge Project (status on 31.03.2017): This project mainly involves construction of the 640-meter long cable-stayed bridge, which will have a central span of 360 meters, and will approach across River Zuari on NH-17/NH-66 on Panjim-Mangalore section in the State of Goa. Further in the April 2016, we have also won Adjacent road connecting to Zuari Bridge namely package I & III costing to Rs. 85,770.00 Lakhs. Overall the company has won 3 projects in the state of Goa aggregating to Rs. 140,310.00 Lakhs. To ensure successful completion of this project, we have engaged international professionals from France and China to provide bridge design and construction quality examination services.

We recognized revenue of Rs. 5,493.87 Lakhs from this business for Financial Year 2017. As of March 31, 2017, our order book of these 3 projects was Rs. 134,816.22 Lakhs, accounting for 7.67% of our total order book.

### INFRASTRUCTURE DEVELOPMENT BUSINESS

In our infrastructure development business, we develop and maintain roads and highways on a BOT basis. As of March 31, 2017, we had completed 14 projects totalling 1,940.53 Lane kms in the states of Gujarat and Madhya Pradesh in India & we have 10 under construction projects comprising 1 pure toll & 9 hybrid annuity model projects totalling 2,507.47 Lane kms. in the states of Maharashtra, Uttar Pradesh, Karnataka and Madhya Pradesh in India.

In respect of our completed projects, we operate 1 BOT project purely on a toll basis where the only source of revenue is the toll we charge vehicles for using the road, 3 BOT projects on annuity basis where the only source of revenue is the fixed amount that the relevant government agency pays us for building and maintaining the roads on an annual basis, and the remaining 10 projects on annuity plus toll basis, where we are entitled to both a fixed amount to be received annually in addition to the toll that we charge, with their respective concession periods ranging from 14 to 25 years. Due to the annuity component in our operational BOT projects, income is assured to the extent of the annuities to be collected during a year under the relevant concessions, thus reducing the risk of income fluctuations resulting from traffic pattern changes.

We currently undertake BOT/Hybrid projects opportunistically, considering factors such as their proximity to clusters where we are executing other projects to maximize efficiency of execution and profitability, and the potential cash flow from such projects after they become operational. Given our strategy and focus on providing EPC services, we may also evaluate opportunities to divest, either wholly or partially, our operational BOT assets, thereby freeing up capital invested in these projects for redeployment elsewhere.

### **Our Geographical Footprint**

Starting with Madhya Pradesh, we have expanded into 16 other states, including Andhra Pradesh, Gujarat, Himachal Pradesh, Karnataka, Maharashtra, Rajasthan, Tamil Nadu, Telangana, Punjab, Jharkhand, Chhattisgarh, Haryana, Goa, West Bengal and Uttar Pradesh. Increasingly, our order book consists of orders from outside Madhya Pradesh, representing approximately 84.37% of our order book as of March 31, 2017, as compared to 60.00% as of March 31, 2016. ### ANNEXURES TO THE BOARD'S REPORT:

# ANNEXURE 1 DIVIDEND DISTRIBUTION POLICY

### INTRODUCTION

As per Regulation 43A of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements)
Regulations, 2015, prescribed Listed Companies are required to frame a Dividend Distribution Policy.

### **PURPOSE**

The purpose of this Policy is to regulate the process of dividend declaration and its pay-out by the Company which would ensure a regular dividend income for the shareholders and long term capital appreciation for all stakeholders of the Company.

### **AUTHORITY**

This Policy has been approved and adopted by the Board of Directors of Dilip Buildcon Limited ('the Company'). The Policy shall also be displayed in the annual reports and also on the website of the Company.

### FORMS OF DIVIDENDS

The Companies Act provides for two forms of Dividend:

### 1. Final Dividend

The final dividend is paid once for the financial year after the annual accounts are prepared. The Board of Directors of the Company has the power to recommend the payment of final dividend to the shareholders for their approval at the general meeting of the Company. The declaration of final dividend shall be included in the ordinary business items that are required to be transacted at the Annual General Meeting.

### 2. Interim Dividend

This form of dividend can be declared by the Board of Directors one or more times in a financial year as may be deemed fit by it. The Board of Directors shall have the absolute power to declare interim dividend during the financial year, in line with this policy. The Board should consider declaring an interim dividend after finalization of quarterly/ half yearly financial results. This would be in order to supplement the annual dividend or to reward shareholders in exceptional circumstances.

### **QUANTUM OF DIVIDEND AND DISTRIBUTION**

Dividend payout in a particular year shall be determined after considering the operating and financial performance of the Company and the cash requirement for financing the Company's future growth. In line with the past practice, the payout ratio is expected to grow in accordance with the profitable growth of the Company under normal circumstances.

### **DECLARATION OF DIVIDEND**

Dividend shall be declared or paid only out of-

- 1) Current financial year's profit:
- a) after providing for depreciation in accordance with law;
- after transferring to reserves such amount as may be prescribed or as may be otherwise considered appropriate by the Board at its discretion
- The profits for any previous financial year(s) after providing for depreciation in accordance with law and remaining undistributed; or
- 3) out of 1) & 2)both.

The circumstances under which shareholders may not expect dividend/or when the dividend could not be declared by the Company shall include, but are not limited to, the following:

- Whenever it undertakes any acquisitions or joint ventures requiring allocation of capital;
- The Board considers it appropriate to retain profit for future expansion;
- Higher working capital requirements adversely impacting free cash flow;
- To infuse funds for the growth of the company;
- Due to operation of any other law in force;
- Due to losses incurred by the Company and the Board considers it appropriate not to declare dividend for any particular year;
- Due to any restrictions and covenants contained in any agreement as may be entered with the Lenders; and
- Any other circumstances as deemed fit by the Board.

### **FACTORS AFFECTING DIVIDEND DECLARATION:**

The Dividend pay-out decision of any company, depends upon certain external and internal factors-

### **External Factors:**

- a. Legal/Statutory Provisions and Regulatory concern: The Board should keep in mind the restrictions imposed by Companies Act, any other applicable laws with regard to declaration and distribution of dividend. Further, any restrictions on payment of dividends by virtue of any regulation as may be applicable to the Company may also impact the declaration of dividend.
- b. <u>State of Economy:</u> The Board will endeavor to retain larger part of profits to build up reserves to absorb future shocks in case of uncertain or recessionary economic conditions and in situation where the policy decisions of the Government have a bearing on or affect the business of the Company.
- c. <u>Nature of Industry:</u> The nature of industry in which a company is operating, influences the dividend decision. Like the industries with stable demand throughout the year are in a position to have stable earnings and thus declare stable dividends.
- d. <u>Taxation Policy:</u> The tax policy of a country also influences the dividend policy of a company. The rate of tax directly influences the amount of profits available to the company for declaring dividends.
- e. <u>Capital Markets:</u> In case of unfavorable market conditions, Board may resort to a conservative dividend pay-out in order to conserve cash outflows and reduce the cost of raising funds through alternate resources.

### **Internal Factors:**

Apart from the various external factors, the Board shall take into account various internal factors including the financial parameters while declaring dividend, which inter alia will include -

 Magnitude and Stability of Earnings: The extent of stability and magnitude of company's earnings will directly influence the dividend declaration. Thus, the dividend is directly linked with the availability of the earnings (including accumulated earnings) with the company.

- Liquidity Position: A company's liquidity position also determines the level of dividend. If a company does not have sufficient cash resources to make dividend payment, then it may reduce the amount of dividend pay-out.
- c. Future Requirements: If a company foresees some profitable investment opportunities in near future including but not limited to Brand/ Business Acquisitions, Expansion / Modernization of existing businesses, Additional investments in subsidiaries/associates of the Company, Fresh investments into external businesses, then it may decide for lower dividend payout and vice-versa.
- d. Leverage profile and liabilities of the Company.
- e. Any other factor as deemed fit by the Board.

### **RETAINED EARNINGS**

The portion of profits not distributed among the shareholders but retained and used in business are termed as retained earnings. It is also referred to as ploughing back of profit. The Company should ensure to strike the right balance between the quantum of dividend paid and amount of profits retained in the business for various purposes. These earnings may be utilized for internal financing of its various projects and for fixed as well as working capital. Thus, the retained earnings shall be utilized for carrying out the main objectives of the company and maintaining adequate liquidity levels.

# PARAMETERS THAT SHALL BE ADOPTED WITH REGARD TO VARIOUS CLASSES OF SHARE

The Company does not have different classes of shares and follows the 'one share, one vote' principle.

### **REVIEW & AMENDMENT**

The Policy shall be reviewed as and when required to ensure that it meets the objectives of the relevant legislation and remains effective. The Board has the right to change/amend the policy as may be expedient taking into account the law for the time being in force.

# STANDALONE FINANCIAL STATEMENTS

## INDEPENDENT AUDITOR'S REPORT

To the Members of DILIP BUILDCON LIMITED

**Report on the Standalone Indian Accounting** Standards (Ind AS) Financial Statements

We have audited the accompanying standalone Ind AS
Financial Statements of Dilip Buildcon Limited (the
Company), which comprise the Balance Sheet as at 31st
March 2017, the Statement of Profit and Loss (including
Other Comprehensive Income), the Cash Flow Statement and
the Statement of Changes in Equity for the year then ended
and a summary of significant accounting policies and other
explanatory information.

## Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance (including other comprehensive income), cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

#### **Auditor's Responsibility**

3. Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit. In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the standalone Ind AS financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view, in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by Company's Directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

#### Opinion

4. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs of the Company as at 31st March 2017, and its profit (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

#### **Emphasis of Matter**

5. Without qualifying our opinion we draw attention to the following:

Note 43 to the standalone Ind AS Financial Statements in respect of application made to Settlement Commission and the liability for tax/interest thereon made in the books of accounts based on the application made with the Settlement Commission

#### Other Matter

6. The comparative financial information of the Company for the year ended March 31, 2016 and the transition date opening balance sheet as at April 1, 2015 included in these standalone Ind AS financial statements for the year ended March 31, 2016 and March 31, 2015, are based on the statutory financial statements prepared in accordance with the Companies (Accounting Standards) Rules, 2006 (as amended) audited by us, on which we expressed an unmodified opinion dated June 17, 2016 and June 5, 2015 as adjusted for the differences in accounting principles adopted by the Company on transition to the Ind AS which have been audited by us.

Our opinion on the standalone Ind AS financial statements and our report on Other Legal and Regulatory requirements below is not modified in respect of these matters.

#### **Report on Other Legal and Regulatory Requirements**

- 7. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub section (11) of section 143 of the Companies Act, 2013, and on the basis of such verification of the books and records as considered appropriate and available and according to the information and explanations given to us, we enclose in the Annexure 'A' a statement on the matters specified in paragraphs 3 and 4 of the order, to the extent applicable.
- 8. As required by Section 143(3) of the Act, we report that:
- (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- (c) The Balance Sheet, the Statement of Profit and Loss (including other comprehensive income), the Cash Flow Statement and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
- (d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Indian Accounting Standards specified under Section 133 of the Act.
- (e) On the basis of written representations received from directors as on 31st March 2017 and taken on record by the Board of Directors, we report that none of the directors is disqualified as on 31st March 2017 from being appointed as director in terms of Section 164 (2) of the Act.

- (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in Annexure 'B'
- (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
  - The Company has disclosed the impact of pending litigations on its financial position in its financial statements to the extent determinable/ascertainable.
     Refer Note 25 to the financial statements.
  - The Company does not have any long term contracts including derivative contracts for which there are any material foreseeable losses.
  - iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company during the year ended March 31, 2017.
  - iv) The Company has provided requisite disclosures in the standalone Ind AS financial statements as regards to holdings as well as dealings in Specified Bank Notes during the period from 8th November 2016 to 30th December 2016. Based on audit procedures and relying on representations provided to us by the management we report that the disclosures are in accordance with the books of account maintained by the Company and as produced to us by the Management. Refer Note 48 to the standalone Ind AS Financial Statements.

### Annexure 'A' to the Auditors' Report

Statement on the matters specified in paragraphs 3 and 4 of Companies (Auditor's Report) Order, 2016 (Referred to in paragraph 7 of our Audit Report of even date)

- a) The Company has maintained proper records showing full particulars, including quantitative details and situations of fixed assets, except for certain items of plant and machinery and vehicles for which location of said assets were under process of being compiled/updated.
  - b) According to information and explanations given to us, fixed assets of the Company are being physically verified according to a phased programme of verification so as to verify all assets within a period of three years, which in our opinion, is reasonable having regard to the size of the Company and the nature of its fixed assets. As informed, during the year no material discrepancies to the extent reconciled with the records available in this respect were noticed on such verifications.
  - c) According to the information and explanations given to us, the title deeds of immovable properties are in the name of the Company except the following, wherein the Company is in the process of updating the documents in the name of the Company.

Particulars	Gross Value (Amt. in Lakhs)	Net Value (Amt. in Lakhs)
Land	22.61	22.61

- ii) As per information and explanations given to us the inventory has been physically verified by the management at intervals as defined by the management. In our opinion, the frequency of verification needs to be further improved having regard to the size of the Company and nature of its business. As informed to us, the discrepancies noticed on verification to the extent reconciled with the records available in this respect between the physical stocks and the book records were not material and have been appropriately dealt with.
- iii) According to the information and explanations provided to us, the Company has given unsecured loan/advance to nineteen parties (subsidiaries) covered in the Register maintained under Section 189 of the Companies Act, 2013.
  - a) We have been explained that these loans were given in view of the said companies being wholly owned subsidiaries where the Company is having long term strategic interest and thus such loans are not prejudicial to the interests of the Company.
  - Interest has not been charged and stipulations for repayment of principal amount has not been made against loans outstanding at the year end from the

- subsidiaries as given in (iii) (a) above. Having regard to the above facts and explanations, it is not possible to ascertain and comment whether the receipt of principal amount and interest are regular or not.
- c) Since the repayment schedule for such loans is not stipulated, no loan is overdue for more than ninety days. Hence it is not possible to ascertain and comment whether the Company has taken reasonable steps for recovery of the Principal and the Interest.
- iv) In our opinion and according to the information and explanations provided to us, the Company has complied with the provisions of Section 185 and 186 of the Companies Act, 2013 in respect of loans given, Investments made, guarantees given.
- v) According to the information and explanations given to us, the Company has not accepted any deposits during the year from public within the meaning of the directives issued by Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and rules framed thereunder and thus the provisions of Clause 3(v) of the Order are not applicable.
- vi) The Company is required to maintain cost records as prescribed by the Central Government under section 148(1) of the Companies Act, 2013. We have broadly reviewed the cost records maintained by the Company pursuant to the rules made by the Central Government for the maintenance of the cost records under section 148(1) of the Companies Act, 2013 and are of the opinion that prima facie, the prescribed records have been maintained. We have, however, not made a detailed examination of the said records.
- vii) a) According to the information and explanations given to us, the Company is generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Employees' State Insurance, Income Tax, Sales Tax, Service Tax, Custom Duty, Excise Duty, Value Added Tax, Cess except for Provident Fund and Tax deducted at source wherein certain delays in payments were observed during the year ended 31.03.2017. There were no undisputed amounts of statutory dues including Provident Fund, Employees' State Insurance, Income Tax, Sales Tax, Service Tax, Custom Duty, Excise Duty, Value Added Tax, Cess which were due for more than six months from the date they become payable as at the year end.
  - According to the records examined by us and as per the information and explanations given to us, the particulars of statutory dues as at March 31, 2017

which have not been deposited on account of disputes and the forum where the dispute is pending is as under:

Name of the Statute	Nature of Dues	Disputed Amount	Period to which it pertains	Forum where pending
M. P. VAT ACT, 2002	VAT & Entry Tax	Rs.156.56 lakhs	F.Y 2008-09	M.P. Commercial Tax Appellate

- viii) According to information and explanations given to us, the Company has not defaulted in repayment of dues of loans taken from banks and financial institutions. The Company has not borrowed any amount from Debenture holders during the year.
- ix) According to the information and explanations given to us, the Company raised money by way of initial public offer of equity shares during the year. The Company has used the money raised by way of initial public offer of equity shares and term loans during the year for the purpose for which they were raised.
- x) According to the information and explanations given to us, no material fraud on the Company by its officers or employees, has been noticed and reported during the year, nor have we been informed of such case by the management.
- xi) According to the information and explanations given to us, and based on our examination of the records, the Company has paid / provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V of the Companies Act, 2013.

- xii) In our opinion and according to the information and explanation given to us, the Company is not a nidhi Company. Accordingly, provision of clause 3 (xii) of the Order is not applicable.
- xiii) According to the information and explanation given to us and based on our verification of the records of the Company and on the basis of review and approvals by the Board of Directors and Audit Committee, the transactions with the related parties are in compliance with Section 177 and 188 of the Act where applicable and the details have been disclosed in the financial statements as required by applicable accounting standard.
- xiv) According to the information and explanation given to us and based on our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year, therefore provisions of Clause 3(xiv) of the order is not applicable.
- According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or person connected with them. Accordingly, paragraph 3 (xv) of the Order is not applicable.
- xvi) According to the information and explanations given to us and based on our examination of the records of the Company, the Company is not required to be registered under Section 45 IA of the Reserve Bank of India Act, 1934. Accordingly provisions of Clause 3 (xvi) of the Order is not applicable to the Company.

### Annexure 'B' to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-Section 3 of Section 143 of the Companies Act, 2013

#### (Referred to in paragraph 8 (f) of our Audit Report of even date)

 We have audited the internal financial controls over financial reporting of Dilip Buildcon Limited ("the Company") as of March 31, 2017 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

#### Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the "Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India" (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the

financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

### Note 1. Company Overview and Significant Accounting Policies

#### 1.1 Company Overview

Dilip Buildcon Limited (the 'company') is domiciled in India with its registered office at Bhopal, Madhya Pradesh, India. The Company has been incorporated under the provisions of the Companies Act, 1956.

The Company's equity shares are listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE) with effect from 11 August 2016.

The company is presently in the business of development of infrastructure facilities on Engineering Procurement and Construction basis (EPC) and undertakes contract from various Government and other parties and special purpose vehicles promoted by the Company.

#### 1.2 Basis of Preparation of financial statements

The Company's financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified by Ministry of Corporate Affairs under sections 133 of the Companies Act, 2013 read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The financials for the year ended March 31, 2017 of the Company are the first financial statements prepared in compliance with Ind AS. The date of transition to Ind AS is April 1, 2015.

The financial statements for all periods upto and including the year ended March 31, 2016, were prepared in accordance with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 and other relevant provisions of the Act. The figures for the year ended March 31, 2016 and April 1, 2015 have now been restated under Ind AS for like to like comparison. Reconciliations and descriptions of the effect of the transition have been summarized in note 35.

The financial statements of the Company for the year ended 31st March 2017 were approved for issue in accordance with the resolution of the Board of Directors on 17th May 2017.

#### 1.3 Basis of accounting

The Company maintains its accounts on accrual basis following the historical cost convention, except for certain financial instruments that are measured at fair values in accordance with Ind AS. Further, the guidance notes/ announcements issued by the Institute of Chartered Accountants of India (ICAI) are also considered, wherever applicable except to the extent where compliance with other statutory promulgations override the same requiring a different treatment.

#### 1.4 Presentation of Financial Statements

The Balance Sheet, Statement of Profit and Loss and Statement of Changes in equity are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 ("the Act"). The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

#### 1.5 Use of estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

This note provides an overview of the areas that involved a higher degree of judgement or complexity and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in the relevant note.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

#### A. Judgements in applying accounting policies

The judgements, apart from those involving estimations (see note below) that the Company has made in the process of applying its accounting policies and that have a significant effect on the amounts recognised in these financial statements pertain to useful life of assets. The Company is required to determine whether its intangible assets have indefinite or finite life which is a subject matter of judgement.

#### B. Key source of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

#### a) Property, Plant and Equipment

Determination of the estimated useful lives of tangible assets and the assessment as to which components of the cost may be capitalized. Useful lives of tangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support.

### Recognition and measurement of defined benefit obligations

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined based on the prevailing market yields of Indian Government Securities as at the Balance Sheet Date for the estimated term of the obligations

#### c) Recognition of deferred tax assets

A deferred tax asset is recognised for all the deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised.

#### d) Recognition and measurement of other provision

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the figure included in other provisions.

#### e) Discounting of long-term financial instrument

All financial instruments are required to be measured at fair value on initial recognition. In case of financial instruments which are required to subsequently measured at amortised cost, interest is accrued using the effective interest method.

#### 1.6 Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakhs, unless otherwise indicated.

#### 1.7 Property, plant and equipment

Items of property, plant and equipment are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the company.

#### 1.8 Intangible Assets

Intangible assets that the Company controls and from which it expects future economic benefits are capitalised upon acquisition at cost comprising the purchase price and directly attributable costs to prepare the assets for its intended use.

Intangible assets that have finite lives are amortised over their useful lives by the straight line method.

#### 1.9 Investments in associates, joint ventures and subsidiaries

The Company has accounted for its investment in subsidiaries at cost.

The Company has elected to continue with the carrying value of its investment in subsidiaries recognised as at 1st April 2015, measured as per previous GAAP and hence the carrying value is considered to be the deemed cost of such investment.

#### 1.10 Inventories

Construction material, components, stores and spares are valued at lower of cost or net realisable value. Cost is determined on first in first out basis and comprise all cost of purchase, duties, taxes

and all other costs incurred in bringing the inventory to their present location and condition.

#### 1.11 Impairment of non-financial assets

The Company assesses at each balance sheet date whether there is any indication that an asset or cash generating unit (CGU) may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset. The recoverable amount is the higher of an asset's or CGU's net selling price or its value in use. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognised in the statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### 1.12 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### **Financial Assets**

#### **Initial Recognition**

The Company recognizes financial assets when it becomes a party to the contractual provisions of the instrument. All financial assets are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets that are not at fair value through profit or loss are added to the fair value on initial recognition.

#### Subsequent measurement

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified

dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

#### Derecognition

The company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the company neither transfers nor retain substantially all of the risks and rewards of ownership and it does not retain control of the financial asset

#### Impairment of financial asset

For impairment of financial assets, Company applies expected credit loss (ECL) model. Following financial assets and credit risk exposure are covered within the ECL model:

- Financial assets that are debt instruments, and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balance.
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18.

The company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables including receivables recognised under service concession arrangements.

The application of simplified approach does not require the company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. For recognition of impairment loss on other financial assets and risk exposure, the company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, then the impairment loss is provided based on lifetime ECL.

#### Financial liabilities

#### Initial recognition

The company initially recognises borrowings, trade payables and related financial liabilities on the date on which they are originated.

All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the company becomes a party to the contractual provisions of the instrument.

Non-derivative financial liabilities are initially recognised at fair value, net of transaction costs incurred.

#### Subsequent measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

#### Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

#### 1.13 Leases

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the group as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease.

#### 1.14 Provisions and Contingencies

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events, it is probable that there will be an outflow of resources and a reliable estimate can be made of the amount of the obligation. These are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Contingent liabilities are not provided for and are disclosed by way of notes.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost in the statement of profit and loss.

#### 1.15 Revenue recognition

Contract revenue includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably.

If the outcome of a construction contract can be estimated reliably, contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed by reference to surveys of work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

Revenue related to construction or upgrade services provided under a service concession arrangement is recognised based on the stage of completion of the work performed. Operation or service revenue is recognised in the period in which the services are provided by the company.

Interest income is recognised in the Statement of Profit and Loss using the effective interest method.

#### 1.16 Depreciation

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives using the straight-line method, and is generally recognised in the statement of profit and loss. Assets acquired under finance leases are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the company will obtain ownership by the end of the lease term. Freehold land is not depreciated.

Depreciation on additions (disposals) is provided on a pro-rata basis i.e. from (upto) the date on which asset is ready for use (disposed of).

#### 1.17 Borrowing Cost

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of an asset which necessarily take a substantial period of time to get ready for their intended use are capitalised as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which they are incurred.

#### 1.18 Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit or loss attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit or loss attributable to the equity holders of

the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period present.

#### 1.19 Cash Flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

#### 1.20 Employee Benefits

#### **Short Term Employment benefits**

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages etc. and the expected cost of ex-gratia are recognized in the period in which the employee renders the related service. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Post Employment Employee Benefits

Retirement benefits to employees comprise payments to government provident funds, gratuity fund and Employees State Insurance.

#### **Defined Contribution Plans**

The Company's contribution to defined contributions plans such as Provident Fund, Employee State Insurance are recognised in the Statement of Profit and Loss in the year when the contributions to the respective funds are due. There are no other obligations other than the contribution payable to the respective Funds.

#### **Defined Benefit Plans**

Gratuity liability is defined benefit obligation. The Company's net obligation in respect of the gratuity benefit scheme is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods;

that benefit is discounted to determine its present value. The present value of the obligation under such defined benefit plan is determined based on actuarial valuation by an independent actuary, using the projected unit credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as at the Balance Sheet date.

Remeasurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in Other Comprehensive Income. Net interest expense (income) on the net defined liability (assets) is computed by applying the discount rate, used to measure the net defined liability (asset), to the net defined liability (asset) at the start of the financial year after taking into account any changes as a result of contribution and benefit payments during the year. Net interest expense and other expenses related to defined benefit plans are recognised in Statement of Profit and Loss

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in Statement of Profit and Loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Actuarial gains/losses are recognized in the other comprehensive income.

#### 1.21 Income Taxes

#### Current Tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Minimum alternative tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay income tax higher than that computed under

MAT, during the year that MAT is permitted to be set off under the Income Tax Act, 1961 (specified year). In the year, in which the MAT credit becomes eligible to be recognized as an asset the said asset is created by way of a credit to the Statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay income tax higher than MAT during the specified year.

#### **Deferred Tax**

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized. The company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The income tax provision for the interim period is made based on the best estimate of the annual average tax rate expected to be applicable for the full financial year.

#### 1.22 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- · In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

For cash and other liquid assets, the fair value is assumed to approximate to book value, given the short term nature of these instruments. For those items with a stated maturity exceeding twelve months, fair value is calculated using a discounted cash flow methodology.

A fair value measurement of a non-financial asset considers a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the company determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the company has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### 1.23 Recent accounting developments

In March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2017, notifying amendments to Ind AS 7, 'Statement of cash flows' and Ind AS 102, 'Share-based payment.' The amendments are applicable to the Company from April 1, 2017.

#### Amendment to Ind AS 7:

The amendment to Ind AS 7 requires the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement. The effect on the financial statements is being evaluated by the Company.

#### Amendment to Ind AS 102:

The amendment to Ind AS 102 provides specific guidance to measurement of cash-settled awards, modification of cashsettled awards and awards that include a net settlement feature in respect of withholding taxes. It clarifies that the fair value of cashsettled awards is determined on a basis consistent with that used for equity settled awards. Market-based performance conditions and non-vesting conditions are reflected in the 'fair values', but non-market performance conditions and service vesting conditions are reflected in the estimate of the number of awards expected to vest. Also, the amendment clarifies that if the terms

and conditions of a cash-settled share-based payment transaction are modified with the result that it becomes an equitysettled share-based payment transaction, the transaction is accounted for as such from the date of the modification. Further, the amendment requires the award that include a net settlement feature in respect of withholding taxes to be treated as equitysettled in its entirety. The cash payment to the tax authority is treated as if it was part of an equity settlement. The effect on the financial statements is being evaluated by the Company.

The Company does not have share based payments and hence no impact on financial statements.

The Company maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available. In addition, the Company internally reviews valuations, including independent price validation for certain instruments. Further, in other instances, Company retains independent pricing vendors to assist in corroborating the valuations of certain instruments.

The fair value of the financial assets and liabilities are included at the amount at which the instrument that would be received to sell an asset or paid to transfer liability in an orderly transaction between market participants at the measurement date.

- "The following methods and assumptions were used to estimate the fair values:"
- \* The company has not disclosed the fair values of trade payables, trade receivables and cash and cash equivalents because their carrying amounts are reasonable approximation of fair value.

Fair value of security deposits have been estimated using a discounted cash flow model. The valuation requires management to make certain assumptions about interest rates, maturity period, credit risk, forecated cash flows.

Long-term fixed-rate and variable-rate receivables / borrowings are evaluated by the company based on parameters such as interest rates, individual creditworthiness of the customer and the risk characteristics of the financed project. Based on this evaluation, allowances are taken into account for the expected credit losses of these receivables. As of reporting date the carrying amounts of such receivables, net of allowances are not materially different from their calculated fair values.

Carrying value of loans from banks, other non current borrowings and other financial liabilities is estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities. The own non-performance risk as at reporting date was assessed to be insignificant.

### Note: 32. Financial risk management policy and objectives

"The key objective of the Company's capital management is to ensure that it maintains a stable capital structure with the focus on total equity to uphold investor, creditor, and customer confidence and to ensure future development of its business. The Company is focused on maintaining a strong equity base to ensure independence, security, as well as financial flexibility for potential future borrowings, if required without impacting the risk profile of the Company.

Company's principal financial liabilities, comprise borrowings from banks, trade payables and security deposits. The main purpose of these financial liabilities is to finance Company's operations (short term). Company's principal financial assets include investments, security deposit, trade and other receivables, deposits with banks and cash and cash equivalents, that derive directly from its operations.

Company is exposed to market risk, credit risk and liquidity risk.

#### i) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include borrowings, trade and other payables, security deposit, trade and other receivables, deposits with banks.

The sensitivity analysis in the following sections relate to the position as at 31 March 2017 and 31 March 2016. The sensitivity of the relevant income statement item is the effect of the assumed changes in respective market risks. The sensitivity analysis have been prepared on the basis that the amount of net debt and the ratio of fixed to floating interest rates of the debt are constant at 31 March 2017.

The analysis exclude the impact of movements in market variables on: the carrying values of gratuity, other post retirement obligations and provisions.

Company's activities exposed to interest rate risk.

### a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. At the reporting date the interest rate profile of the Company's interest bearing financial instruments are follows:

Particulars	31 March 2017	31 March 2016	1 April 2015

### Note: 35. Explanation of transition to Ind AS

### Notes to the reconciliations:

#### (a) Proposed dividend

Under Indian GAAP, dividend proposed after the date of the financial statements but prior to the approval of financial statements is considered as an adjusting event, and a provision for dividend is recognised in the financial statements of the period to which the dividend relates. Under Ind AS, dividend declaration is considered as a non-adjusting event and provision for dividend is recognised only in the period when the dividend is approved by the shareholders in annual general meeting.

#### (b) Transaction cost incurred on borrowing

Under Indian GAAP, loans and borrowings are stated at historical cost. Under Ind AS, loans and borrowings are recognised at amortised cost using effective interest rate method.

### (c) Defect liability provision

Under Indian GAAP, defect liability provision is recorded at transaction price. Under Ind AS, defect liability provision is discounted to its present value where the effect of time value of money is material. The imputed interest on the provision is subsequently recognised in statement of profit and loss.

### (d) Interest free security deposit paid

Under Indian GAAP, interest-free lease security deposits paid are reported at their transaction values. Under Ind AS, interest-free security deposits are measured at fair value on initial recognition and at amortised cost on subsequent recognition. The difference between the transaction value and fair value of the lease deposit at initial recognition is treated as prepaid rentals. This amount is recognised in statement of profit and loss on a straight line basis over the lease term.

#### (e) Expected credit loss

On transition to Ind AS, the Company has recognised provision of loss allowance on trade receivables measured

at amoutn equal to lifetime expected credit loss. Consequently, trade receivables measured at amortised cost reduced with a corresponding decrease in retained earnings on the date of transition.

#### Employee benefit expenses - actuarial gains and losses and return on plan assets

Under Indian GAAP, actuarial gains and losses and return on plan assets on post-employment defined benefit plans are recognised immediately in statement of profit and loss. Under Ind AS, remeasurements which comprise of actuarial gains and losses, return on plan assets and changes in the effect of asset ceiling, if any, with respect to post-employment defined benefit plans are recognised immediately in other comprehensive income (OCI). Further, remeasurements recognised in OCI are never reclassified to statement of profit and loss.

Actuarial gains and losses are recognised in other comprehensive income and transferred to retained earnings. Accordingly, this adjustment does not have any impact on equity.

#### (g) Deferred tax

Under Indian GAAP, deferred taxes are recognised using income statement approach i.e. reflecting the tax effects of timing differences between accounting income and taxable income for the period. Under Ind AS, deferred taxes are recognised using balance sheet approach i.e. reflecting the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes using the income tax rates enacted or substantively enacted at reporting date. Also, deferred taxes are recognised on account of the above mentioned changes explained in notes (b) to (e), wherever applicable.

# CONSOLIDATED FINANCIAL STATEMENTS

## INDEPENDENT AUDITOR'S REPORT

To the Members of DILIP BUILDCON LIMITED

### Report on the Consolidated Ind AS Financial Statements

1. We have audited the accompanying consolidated Ind AS financial statements of Dilip Buildcon Limited (hereinafter referred to as "the Holding Company" and its subsidiaries (the Holding Company and its Subsidiaries together referred to as "the Group"), comprising of the Consolidated Balance Sheet as at 31st March 2017, the Consolidated Statement of Profit and Loss including other comprehensive income, the Consolidated Cash Flow Statement, the Consolidated Statement of Changes in Equity for the year then ended and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the Consolidated Ind AS Financial Statements").

### Management's Responsibility for the Financial Statements

The Holding Company's Board of Directors is responsible for preparation of these consolidated Ind AS financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as 'the Act') that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and statement of changes in equity of the Group in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Parent, as aforesaid.

### **Auditor's Responsibility**

3. Our responsibility is to express an opinion on these consolidated Ind AS financial statements based on our audit. In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated Ind

AS financial statements are free from material misstatement

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated Ind AS financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation and fair presentation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by Holding Company's Directors, as well as evaluating the overall presentation of the consolidated Ind AS financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in paragraph 6 of the Other Matter paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

### Opinion

4. In our opinion and to the best of our information and according to the explanations given to us, and based on consideration of reports of the other auditors on separate financial statements of the subsidiaries, referred to in Other Matter paragraph, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the Consolidated state of affairs of the Group as at 31st March 2017, and their consolidated profits, consolidated total comprehensive income, their consolidated cash flows, and consolidated statement of changes in equity for the year ended on that date.

### **Emphasis of Matter**

5. We draw attention to the following: Note 42 to the Consolidated Financial Statements in respect of application made to Settlement Commission and the liability for tax/interest thereon made in the books of accounts based on the application made with the Settlement Commission. Our opinion is not qualified in respect of this matter.

### **Other Matters**

 a) We did not audit the Financial Statements / financial information of ten subsidiary companies, whose Financial Statements reflect assets of Rs.107,068.43/lakhs and revenue of Rs. 87,809.75/- and net cash

- flows amounting to Rs.3,687.00/- lakhs for the year ended on that date, as considered in the Consolidated Ind AS Financial Statements. These Financial Statements / financial information have been audited by other auditor whose report have been furnished to us by the Management and our opinion on the consolidated Ind AS financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and our report in terms of sub-section (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries, is based solely on the report of the other auditors.
- b) The Financial Statements of four Subsidiaries of the Holding Company, whose Financial Statements reflect assets of Rs 23,737.01/- Lakhs and revenue of Rs.3,058.18/- Lakhs have been audited by one of the joint auditors, M/s Mukund M. Chitale & Co. and the Financial Statements of nine Subsidiaries of the Company, whose Financial Statements reflect assets of Rs.118,599.69/- Lakhs and revenue of Rs.15,747.95/-Lakhs have been audited by the other joint auditors, M/s Naresh Rajani & Co.
- c) The comparative financial information for the year ended 31st March 2017 and the transition date opening balance sheet as at 1st April 2015 in respect of ten subsidiaries included in the consolidated Ind AS financial statements prepared in accordance with the Ind AS have been audited by other auditors and have been relied upon by us.

Our opinion on the consolidated Ind AS financial statements above, and our report on Other legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

## Annexure 'A' to the Independent Auditors' Report on the Consolidated Ind As Financial Statements

(Referred to in paragraph 7 (f) of our Audit Report of even date)

### Report on the Internal Financial Controls under Clause (i) of Sub-Section 3 of Section 143 of the Companies Act, 2013

 In conjunction with our audit of the consolidated Ind AS financial statements of the Company as of and for the year ended March 31, 2017, we have audited the internal financial controls over financial reporting of Dilip Buildcon Limited ("the Holding Company") and its subsidiary companies, which are companies incorporated in India, as of that date.

### Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company and its subsidiary companies incorporated in India are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company and its subsidiary companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India" (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on the holding Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and

evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Holding Company and subsidiary companies, which are companies incorporated in India.

#### Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls over Financial Reporting

5 Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

6 In our opinion, the Holding Company and its subsidiary companies, which are companies incorporated in India, have in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Holding Company and its subsidiary companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

### **Other Matters**

Our aforesaid report under Section 143(3)(I) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to ten subsidiary companies incorporated in India, is based on the corresponding reports of the Auditors of such companies incorporated in India.

### **Company Overview and Significant Accounting Policies**

### 1.1 Company Overview

Dilip Buildcon Limited (the 'company') is domiciled in India with its registered office at Bhopal, Madhya Pradesh, India. The Company has been incorporated under the provisions of the Companies Act, 1956.

The Company's equity shares are listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE) with effect from 11 August 2016.

The company is presently in the business of development of infrastructure facilities on Engineering Procurement and Construction basis (EPC) and undertakes contract from various Government and other parties and special purpose vehicles promoted by the Company.

#### 1.2 Basis of Preparation of financial statements

The Company's financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified by Ministry of Corporate Affairs under sections 133 of the Companies Act, 2013 read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules 2016.

The financials for the year ended March 31, 2017 of the Company are the first financial statements prepared in compliance with Ind AS. The date of transition to Ind AS is April 1, 2015.

The financial statements for all periods upto and including the year ended March 31, 2016, were prepared in accordance with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 and other relevant provisions of the Act. The figures for the year ended March 31, 2016 and April 1, 2015 have now been restated under Ind AS for like to like comparison. Reconciliations and descriptions of the effect of the transition have been summarized in note 35.

The financial statements of the Company for the year ended 31st March 2017 were approved for issue in accordance with the resolution of the Board of Directors on 17<sup>th</sup> May 2017.

### 1.3 Basis of accounting

The Company maintains its accounts on accrual basis following the historical cost convention, except for certain financial instruments that are measured at fair values in accordance with Ind AS. Further, the guidance notes/ announcements issued by the Institute of Chartered Accountants of India (ICAI) are also considered, wherever applicable except to the extent where compliance with other statutory promulgations override the same requiring a different treatment.

### **Presentation of Financial Statements**

The Balance Sheet. Statement of Profit and Loss and Statement of Changes in equity are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 ("the Act"). The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

#### 1.5 Use of estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

This note provides an overview of the areas that involved a higher degree of judgement or complexity and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in the relevant note.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

### Judgements in applying accounting policies

The judgements, apart from those involving estimations (see note below) that the Company has made in the process of applying its accounting policies and that have a significant effect on the amounts recognised in these financial statements pertain to useful life of assets. The Company is required to determine whether its intangible assets have indefinite or finite life which is a subject matter of

judgement.

### B. Key source of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

### a) Property, Plant and Equipment

Determination of the estimated useful lives of tangible assets and the assessment as to which components of the cost may be capitalised separately. Useful lives of tangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support.

## Recognition and measurement of defined benefit obligations

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined based on the prevailing market yields of Indian Government Securities as at the Balance Sheet Date for the estimated term of the obligations

- c) Recognition of deferred tax assets A deferred tax asset is recognised for all the deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised.
- d) Recognition and measurement of other provision

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the figure included in other provisions.

e) Discounting of long-term financial instrument

All financial instruments are required to be measured at fair value on initial recognition. In case of financial instruments which are required to be subsequently measured at amortised cost, interest is accrued using the effective interest method.

#### 1.6 Basis of Consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries. The assets, liabilities, income and expenses of subsidiaries are aggregated and consolidated, line by line, from the date control is acquired by any Group entity to the date it ceases. Profit or loss and each component of other comprehensive income are attributed to the Group as owners and to the non-controlling interests.

The Group presents the non-controlling interests in the Balance Sheet within equity, separately from the equity of the Group as owners. The excess of the Group's investment in a subsidiary over its share in the net worth of such subsidiary on the date control is acquired is treated as goodwill while a deficit is considered as a capital reserve in the Consolidated Financial Statements. On disposal of the subsidiary, attributable amount on goodwill is included in the determination of the profit or loss and recognised in the Statement of Profit and Loss. Impairment loss, if any, to the extent the carrying amount exceeds the recoverable amount is charged off to the Statement of Profit and Loss as it arises and is not reversed. For impairment testing, goodwill is allocated to Cash Generating Unit (CGU) or a group of CGUs to which it relates, which is not larger than an operating segment, and is monitored for internal management purposes

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented, to the extent possible, in the same manner as the Company's separate financial statements.

### 1.7 Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakhs, unless otherwise indicated.

### 1.8 Property, plant and equipment

Items of property, plant and equipment are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and nonrefundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the company.

### 1.9 Intangible Assets

### (a) Other Intangible Assets

Intangible assets that the Company controls and from which it expects future economic benefits are capitalied upon acquisition at cost comprising the purchase price and directly attributable costs to prepare the assets for its intended use.

Intangible assets that have finite lives are amortised over their useful lives by the straight line method.

### (b) Service concession arrangements (Toll Rights)

The Company recognises an intangible asset arising from a service concession arrangement to the extent the company has right to charge for the use of concession infrastructure. Intangible asset would be initially measured at cost. The fair value, at the time of initial recognition of such an intangible asset received as consideration for providing construction or upgrade services in a service concession arrangement, is regarded to be its cost. Borrowing costs directly attributable to the construction of a qualifying asset are capitalised as part of the cost. Subsequent to initial recognition the intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses.

#### Subsequent costs

Subsequent costs are capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

#### **Amortisation**

Amortisation is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortisation is recognised in statement of profit and loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

The estimated useful life of an intangible asset in a service concession arrangement is a period from when the company has right to charge the user of infrastructure for such use to the end of the concession period.

#### 1.10 Investments in associates, joint ventures and subsidiaries

The Company has accounted for its investment in subsidiaries at cost.

The Company has elected to continue with the carrying value of its investment in subsidiaries recognised as at 1st April 2015, measured as per previous GAAP and hence the carrying value is considered to be the deemed cost of such investment.

#### 1.11 Inventories

Construction material, components, stores and spares are valued at lower of cost or net realisable value. Cost is determined on first in first out basis and comprise all cost of purchase, duties, taxes and all other costs incurred in bringing the inventory to their present location and condition.

### 1.12 Impairment of non-financial assets

The Company assesses at each balance sheet date whether there is any indication that an asset or cash generating unit (CGU) may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset. The recoverable amount is the higher of an asset's or CGU's net selling price or its value in use. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax

discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognised in the statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### 1.13 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

### **Financial Assets**

### **Initial Recognition**

The Company recognizes financial assets when it becomes a party to the contractual provisions of the instrument. All financial assets are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets that are not at fair value through profit or loss are added to the fair value on initial recognition. Subsequent measurement

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

### Derecognition

The company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the company neither transfers nor retain substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

### Impairment of financial asset

For impairment of financial assets, Company applies expected credit loss (ECL) model. Following financial assets and credit risk exposure are covered within the ECL model:

- Financial assets that are debt instruments, and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balance
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18.

The company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables including receivables recognised under service concession arrangements.

The application of simplified approach does not require the company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. For recognition of impairment loss on other financial assets and risk exposure, the company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, then the impairment loss is provided based on lifetime ECL.

### Financial liabilities

### Initial recognition

The company initially recognises borrowings, trade payables and related financial liabilities on the date on which they are originated.

All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the company becomes a party to the contractual provisions of the instrument.

Non-derivative financial liabilities are initially recognised at fair value, net of transaction costs incurred.

### Subsequent measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments

### Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

#### 1.14 Leases

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the group as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease

### 1.15 Provisions and Contingencies

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events, it is probable that there will be an outflow of resources and a reliable estimate can be made of the amount of the obligation. These are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Contingent liabilities are not provided for and are disclosed by way of notes.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost in the statement of profit and loss

### 1.16 Revenue recognition

Contract revenue includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably.

If the outcome of a construction contract can be estimated reliably, contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed by reference to surveys of

work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

Revenue related to construction or upgrade services provided under a service concession arrangement is recognised based on the stage of completion of the work performed. Operation or service revenue is recognised in the period in which the services are provided by the company.

Income from toll is recognized on receipt basis.

Interest income is recognised in the Statement of Profit and Loss using the effective interest method.

Other income comprises of interest income, dividend income, foreign currency gain on financial assets and liabilities and export benefits.

#### 1.17 Depreciation

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives using the straight-line method, and is generally recognised in the statement of profit and loss. Assets acquired under finance leases are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the company will obtain ownership by the end of the lease term. Freehold land is not depreciated.

Depreciation on additions (disposals) is provided on a prorata basis i.e. from (upto) the date on which asset is ready for use (disposed of).

#### 1.18 Borrowing Cost

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of an asset which necessarily take a substantial period of time to get ready for their intended use are capitalised as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.19 Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit or loss attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit or loss attributable to the equity holders of the company by the weighted average number of equity shares considered for

deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period present

#### 1.20 Cash Flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

#### 1.21 Employee Benefits

Short Term Employment benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages etc. and the expected cost of ex-gratia are recognized in the period in which the employee renders the related service. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Post Employment Employee Benefits

Retirement benefits to employees comprise payments to government provident funds, gratuity fund and Employees State Insurance.

**Defined Contribution Plans** 

The Company's contribution to defined contributions plans such as Provident Fund, Employee State Insurance are recognised in the Statement of Profit and Loss in the year when the contributions to the respective funds are due. There are no other obligations other than the contribution payable to the respective Funds

**Defined Benefit Plans** 

Gratuity liability is defined benefit obligation. The Company's net obligation in respect of the gratuity benefit scheme is calculated by estimating the amount of future benefit that employees have earned in return for their service in the

current and prior periods; that benefit is discounted to determine its present value.

The present value of the obligation under such defined benefit plan is determined based on actuarial valuation by an independent actuary, using the projected unit credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as at the Balance Sheet date.

Remeasurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in Other Comprehensive Income. Net interest expense (income) on the net defined liability (assets) is computed by applying the discount rate, used to measure the net defined liability (asset), to the net defined liability (asset) at the start of the financial year after taking into account any changes as a result of contribution and benefit payments during the year. Net interest expense and other expenses related to defined benefit plans are recognised in Statement of Profit and Loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in Statement of Profit and Loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Actuarial gains/losses are recognized in the Other Comprehensive Income.

### 1.22 Income Taxes

### **Current Tax**

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the

liability on a net basis or simultaneously.

Minimum alternative tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay income tax higher than that computed under MAT, during the year that MAT is permitted to be set off under the Income Tax Act, 1961 (specified year). In the year, in which the MAT credit becomes eligible to be recognized as an asset the said asset is created by way of a credit to the Statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay income tax higher than MAT during the specified year.

#### **Deferred Tax**

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized. The company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The income tax provision for the interim period is made based on the best estimate of the annual average tax rate expected to be applicable for the full financial year.

#### 1.23 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either.

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

For cash and other liquid assets, the fair value is assumed to approximate to book value, given the short term nature of these instruments. For those items with a stated maturity exceeding twelve months, fair value is calculated using a discounted cash flow methodology.

A fair value measurement of a non-financial asset considers a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the company has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

### 1.24 Recent accounting developments

In March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2017, notifying amendments to Ind AS 7, 'Statement of cash flows' and Ind AS 102, 'Share-based payment.' The amendments are applicable to the Company from April 1, 2017

### Amendment to Ind AS 7:

The amendment to Ind AS 7 requires the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement. The effect on the financial statements is being evaluated by the Company.

#### Amendment to Ind AS 102:

The amendment to Ind AS 102 provides specific guidance to measurement of cash-settled awards, modification of cash-settled awards and awards that include a net settlement feature in respect of withholding taxes. It clarifies that the fair value of cash-settled awards is determined on a basis consistent with that used for equity settled awards. Market-

based performance conditions and non-vesting conditions are reflected in the 'fair values', but non-market performance conditions and service vesting conditions are reflected in the estimate of the number of awards expected to vest. Also, the amendment clarifies that if the terms and conditions of a cash-settled share-based payment transaction are modified with the result that it becomes an equity-settled share-based payment transaction, the transaction is accounted for as such from the date of the modification. Further, the amendment requires the award that include a net settlement feature in respect of withholding taxes to be treated as equity-settled in its entirety. The cash payment to the tax authority is treated as if it was part of an equity settlement. The effect on the financial statements is being evaluated by the Company.

The Company does not have share based payments and hence no impact on financial statements.

The Company maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available. In addition, the Company internally reviews valuations, including independent price validation for certain instruments. Further, in other instances, Company retains independent pricing vendors to assist in corroborating the valuations of certain instruments.

The fair value of the financial assets and liabilities are included at the amount at which the instrument that would be received to sell an asset or paid to transfer liability in an orderly transaction between market participants at the measurement date.

## The following methods and assumptions were used to estimate the

\* The company has not disclosed the fair values of trade payables, trade receivables and cash and cash equivalents, because their carrying amounts are reasonable approximation of fair value.

Fair value of security deposits have been estimated using a DCF model. The valuation requires management to make ceratin assumptions about interest rates, maturity period, credit risk, forecated cash flows.

Long-term fixed-rate and variable-rate receivables/borrowings are

evaluated by the company based on parameters such as interest rates, individual creditworthiness of the customer and the risk characteristics of the financed project. Based on this evaluation, allowances are taken into account for the expected credit losses of these receivables. As of reporting date the carrying amounts of such receivables, net of allowances are not materially different from their calculated fair values.

Carrying value of loans from banks, other non current borrowings and other financial liabilities is estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities. The own non-performance risk as at reporting date was assessed to be insignificant.

#### Fair value hierarchy

## Note 30: Financial risk management policy and objectives

The key objective of the Company's capital management is to ensure that it maintains a stable capital structure with the focus on total equity to uphold investor, creditor, and customer confidence and to ensure future development of its business. The Company is focused on maintaining a strong equity base to ensure independence, security, as well as financial flexibility for potential future borrowings, if required without impacting the risk profile of the Company.

Company's principal financial liabilities, comprise borrowings from banks, trade payables and security deposits. The main purpose of these financial liabilities is to finance Company's operations (short term). Company's principal financial assets include investments, security deposit, trade and other receivables, deposits with banks and cash and cash equivalents, that derive directly from its operations.

Company is exposed to market risk, credit risk and liquidity risk."

The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. All derivative activities for risk management purposes are carried out by specialist teams that have the appropriate skills, experience and supervision. It is the Company's policy that no trading in derivatives for speculative purposes may be undertaken. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### i) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include borrowings, trade and other payables, security deposit, trade and other receivables, deposits with banks. The sensitivity analysis in the following sections relate to the position as at 31 March 2017 and 31 March 2016. The sensitivity of the relevant income statement item is the effect of the assumed changes in respective market risks. The sensitivity analysis have been prepared on the basis that the amount of net debt and the ratio of fixed to floating interest rates of the debt are constant at 31 March 2017. The analyses exclude the impact of movements in market variables on: the carrying values of gratuity, other post retirement obligations and provisions Company's activities exposed to interest rate risk.

### Company's activities exposed to interest rate risk.

#### a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in

market interest rates. At the reporting date the interest rate profile of the Company's interest bearing financial instruments are follows:

Particulars	31 March 2017	31 March 2016	1 April 2015

# Note 35: Explanation of transition to Ind AS

These are Company's first financial statements prepared in accordance with Indian Accounting Standards (Ind AS) as notified under Companies' (Indian Accounting Standards) Rules, 2015. In preparing the financial statements for the year ended 31 March 2016 and balance sheet as at 1 April 2015 (Date of transition), the Company has adjusted amounts reported previously in financial statements prepared in accordance with Indian Generally Accepted Accounting Principles (Indian GAAP). This note explains the principal adjustments made by the Company in restating its Indian GAAP financial statements, including the balance sheet as at 1 April 2015 and the financial statements for the year ended 31 March 2016.

# **Exemptions applied**

Ind AS 101 allows first-time adopters certain exemptions from the retrospective application of certain requirements under Ind AS. The Company has elected to apply the following exemptions:

## Investment in subsidiaries to be carried at cost

The Company has elected to carry the investment in subsidiaries at cost as at the transition date.

#### **Exceptions applied** 1. Estimates

Upon an assessment of the estimates made under Indian GAAP, the Company has concluded that there was no necessity to revise such estimates under Ind AS, except where estimates were required by Ind AS and not required by Indian GAAP.

## **Explanation of transition to Ind AS**

An explanation of how the transition from Indian GAAP to Ind AS has affected the Company's financial position, financial performance and cash flow is set out in the following tables and notes that accompany the tables. The reconciliations include-

- equity reconciliation as at 1 April 2015;
- equity reconciliation as at 31 March 2016;
- profit reconciliation for the year ended 31 March 2016;

There are no material adjustments to the cash flow statements In the reconciliations mentioned above, certain reclassifications have been made from Indian GAAP financial information to align with the Ind AS presentation.

## Reconciliation of equity as previously reported under Indian GAAP to Ind AS

#### Notes to the reconciliations:

# (a) Service concession arrangement

Under Indian GAAP, the cost of an intangible asset comprises of the construction cost of the project and all other directly attributable cost incurred necessarily to complete the asset and to bring it to the condition in which management is intended to use the same.

Under Ind AS, the Company has followed accounting treatment prescribed under 'Appendix A of Ind AS 11: Service Concession Arrangement'. The company has recognised revenue equivalent to fair value of the cost of project construction with corresponding debits to financial asset at its present value of the annuities which it will receive over the period of concession arrangement and balace amount representing the right to collect toll from the users of the infrastructure as intangible asset.

# (b) Proposed dividend

Under Indian GAAP, dividend proposed after the date of the financial statements but prior to the approval of financial statements is considered as an adjusting event, and a provision for dividend is recognised in the financial statements of the period to which the dividend relates. Under Ind AS, dividend declaration is considered as a nonadjusting event and provision for dividend is recognised only in the period when the dividend is approved by the shareholders in annual general meeting.

## (c) Transaction cost incurred on borrowing

Under Indian GAAP, loans and borrowings are stated at historical cost. Under Ind AS, loans and borrowings are recognised at amortised cost using effective interest rate method.

## (d) Defect liability provision

Under Indian GAAP, defect liability provision is recorded at transaction price. Under Ind AS, defect liability provision is discounted to its present value where the effect of time value of money is material. The imputed interest on the provision is subsequently recognised in statement of profit

#### (e) Interest free security deposit paid

Under Indian GAAP, interest-free lease security deposits paid are reported at their transaction values. Under Ind AS, interest-free security deposits are measured at fair value on initial recognition and at amortised cost on subsequent recognition. The difference between the transaction value and fair value of the lease deposit at initial recognition is treated as prepaid rentals. This amount is recognised in statement of profit and loss on a straight line basis over the lease term.

## Expected credit loss

On transition to Ind AS, the Company has recognised provision of loss allowance on trade receivables measured at amoutn equal to lifetime expected credit loss. Consequently, trade receivables measured at amortised cost reduced with a corresponding decrease in retained earnings on the date of transition.

# Employee benefit expenses - actuarial gains and losses and return on plan assets

Under Indian GAAP, actuarial gains and losses and return on plan assets on post-employment defined benefit plans are recognised immediately in statement of profit and loss. Under Ind AS, remeasurements which comprise of actuarial gains and losses, return on plan assets and changes in the effect of asset ceiling, if any, with respect to postemployment defined benefit plans are recognised immediately in other comprehensive income (OCI). Further, remeasurements recognised in OCI are never reclassified to statement of profit and loss.

Actuarial gains and losses are recognised in other comprehensive income and transferred to retained earnings. Accordingly, this adjustment does not have any impact on equity.

#### (h) Deferred tax

Under Indian GAAP, deferred taxes are recognised using income statement approach i.e. reflecting the tax effects of timing differences between accounting income and taxable income for the period. Under Ind AS, deferred taxes are recognised using balance sheet approach i.e. reflecting the

tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes using the income tax rates enacted or substantively enacted at reporting date. Also, deferred taxes are recognised on account of the above mentioned changes explained in notes (b) to (e), wherever applicable.

# Note 36: Disclosure of Creditors outstanding under MSMED Act, 2006
