**NOTES TO FINANCIAL STATEMENTS
FOR THE YEAR ENDED MARCH 31, 2013**

1. CORPORATE INFORMATION

Orient Refractories Limited ('the Company'), incorporated on November 26, 2010 is engaged in manufacturing, production and distribution of Refractories, Monolithics and Ceramic Paper and have manufacturing facilities in Bhiwadi (Rajasthan).

2. BASIS OF PREPARATION

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006, (as amended) and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

2.1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) USE OF ESTIMATES

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

(b) TANGIBLE FIXED ASSETS

Fixed assets, are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

(c) DEPRECIATION ON TANGIBLE FIXED ASSETS

Depreciation on leasehold land is provided over the period of lease i.e.99 years and depreciation on leasehold improvements which includes temporary structures is provided over unexpired period of lease or estimated useful life whichever is lower. Depreciation on additions to existing leasehold fixed assets is provided over the unexpired period of lease or estimated useful life, whichever is lower.

Depreciation on all other fixed assets is provided on straight line method as per rates computed based on estimated useful lives, which are equal to the corresponding rates prescribed in Schedule XIV to the Companies Act, 1956 except for vehicles given to employees under vehicle scheme on which depreciation is charged on straight line basis over the period of scheme.

Assets costing below ₹ 5,000 are depreciated at the rate of 100%.

(d) INTANGIBLE ASSETS

Software

Software are amortized on a straight line basis over the estimated useful economic life. The Company uses a rebuttable presumption that the useful life of software will not exceed five years from the date when the assets is available for use.

(e) BORROWING COSTS

Borrowing costs include interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

(f) IMPAIRMENT OF TANGIBLE AND INTANGIBLE ASSETS

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

(g) LEASES

Where the Company is the lessee.

Leases where the lesser effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

(h) INVENTORIES

Inventories are valued as follows

RAW MATERIALS AND COMPONENTS	Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on a weighted average basis.
WORK-IN-PROGRESS AND FINISHED GOODS	Lower of cost and net realizable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost of finished goods includes excise duty. Cost is determined on a weighted average basis.
TRADED GOODS	Lower of cost and net realizable value. Cost includes cost of purchases and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on a first in first out (FIFO) basis

Net realizable value is estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

(i) INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than a year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current investments are carried at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

**(j) REVENUE RECOGNITION**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized

(i) SALE OF GOODS

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. In case of export sales, event of transferring the significant risks and rewards of ownership of goods is decided based on Inco-terms 2010. The Company collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(ii) INTEREST

Revenue is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

(iii) INCOME FROM SERVICES

Revenue from services is accounted for in accordance with the terms of contracts, as and when these services are rendered. The Company collects service tax on behalf of the government and, therefore, it is not an economic benefit flowing to the Company. Hence, it is excluded from revenue.

(iv) EXPORT BENEFITS

Export benefits under duty exemption pass book schemes (DEPB) and duty drawback are accrued when no significant uncertainties as to the amount of consideration that would be derived and as to its ultimate collection exist.

(v) ROYALTY

Revenue is recognized on an accrual basis in accordance with the terms of the relevant agreement

(vi) DIVIDEND

Dividend is recognized when the shareholder's right to receive payment is established.

(k) FOREIGN CURRENCY TRANSLATION**(i) INITIAL RECOGNITION**

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) CONVERSION

Foreign currency monetary items are reported using the exchange rate prevailing at the reporting date. Non-monetary items which are measured in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

(iii) EXCHANGE DIFFERENCES

Exchange differences arising on the settlement of monetary items or on reporting monetary items of the Company at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

(l) RETIREMENT AND OTHER EMPLOYEE BENEFITS

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. Gratuity liability is defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year.

Long term compensated absences are provided for based on actuarial valuation. The actuarial valuation is done as per projected unit credit method made at the end of the financial year.

Actuarial gains/losses are immediately taken to statement of profit and loss and are not deferred.

Payments made under the voluntary retirement scheme are charged to profit and loss account in the year of occurrence.

**(m) SEGMENT REPORTING POLICIES****- IDENTIFICATION OF SEGMENTS**

The Company's operating businesses are organized and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the geographical location of the customers.

- SEGMENT ACCOUNTING POLICIES

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

(n) INCOME TAXES

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

(o) EARNINGS PER SHARE

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

(p) PROVISIONS

A provision is recognized when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

(q) CONTINGENT LIABILITIES

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

(r) CASH AND CASH EQUIVALENTS

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.
