Forward-looking statement

In this Annual Report we have disclosed forward-looking information to enable investors to comprehend our prospects and take informed investment decisions. This report and other statements - written and oral - that we periodically make contain forward-looking statements that set out anticipated results based on the management's plans and assumptions. We have tried wherever possible to identify such statements by using words such as 'anticipates', 'estimates', 'expects', 'projects', 'intends', 'plans', 'believes', and words of similar substance in connection with any discussion of future performance.

We cannot guarantee that these forward-looking statements will be realised, although we believe we have been prudent in assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialise, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Readers should bear this in mind.

We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

FY 2016-17 marked a watershed in India's sugar industry.

The country's sugar sector revived; Uttar Pradesh sugar mills performed better than sugar companies in other states; well-managed sugar companies like Dhampur Sugar outperformed much of the sector.

It would be simplistic to believe that Dhampur Sugar Mills outperformed by simply riding an increase in sugar realisations.

The reality is that Dhampur Sugar had patiently invested in business-strengthening during the sectoral slowdown.

The Company's strategy was vindicated during the sectoral rebound. Revenues increased 16%; profit after tax strengthened 815%.

Validating what the Company has always believed: that prudence combined with patience inevitably translates into superior profitability.

Dhampur Sugar Mills is one of India's most respected sugar companies, which has endured and grown over decades.

It is known for increasing cane crushing capacity judiciously, making proactive investments in downstream by-product processing while balancing sugar and non-sugar capacities.

With the objective to enhance business sustainability.

Our vision

Innovate and Optimise for the benefit of all Stakeholders.

Our mission

Making a positive contribution to the Environment we operate in.

Professionalism

- Integrity: trusted partnership
- Commitment: be Responsive
- Accountability: take ownership

Respect

- Diversity & Inclusiveness: provide equal opportunity
- Value time: punctuality in all areas
- Humanity: be sensitive and generate energy

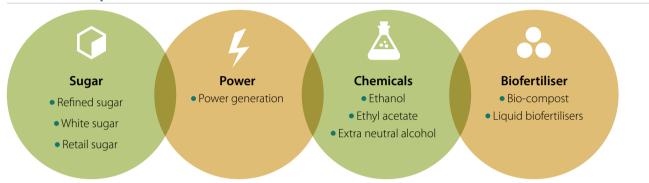

Act responsibly

- Business Ethics: apply ethical principles
- Corporate Citizenship: fulfil social, economic & legal Responsibilities
- Corporate Governance: drive fairness, accountability, responsibility and transparency

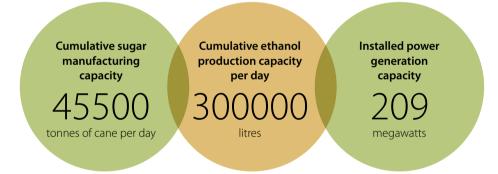

Passion to excel

- **Determination:** lead change and walk the extra mile
- Value Adding Team Work: build strength through a shared vision
- **Learning & Innovation:** Innovate through learning

Our business portfolio

Our capacities

Our background

Dhampur Sugar Mills Limited is one of the oldest organised sugar businesses in India. The Company was founded in 1933 by Lala Ram Narain with a cane crushing capacity of 300 tonnes per day. Over the decades, the Company has emerged as a leading Indian sugar manufacturing company comprising one of the country's largest power generation and ethanol manufacturing capacities. The Company is engaged in the manufacture and

marketing of sugar, co-generated power and chemicals. The Company's five manufacturing facilities are located in Uttar Pradesh.

Our listing

The Company's shares are listed and actively traded on the Bombay Stock Exchange and the National Stock Exchange. The market capitalisation of the Company was ₹1440.94 crore as on 31 March 2017.

Our focus includes

- Maintaining core competence in sugar manufacture and the manufacture of allied products.
- Recruiting and retaining skilled and experienced human capital
- Building our business around sound governance
- Building the community in the areas of our presence.

Our manufacturing facilities

Cane crushing capacity
15,000 metric tonnes per day

Power generation 65 megawatts

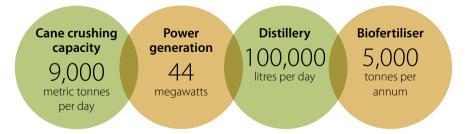

Distillery
200,000
litres per day

Biofertiliser 15,000 tonnes per annum

Our capability

- This unit's co-generation capacity of 65 megawatts is one of the largest single-unit co-generation capacities in India.
- The unit is considered among the India's most efficient co-generation systems; the unit
 was the first in India to be invested with a 105 kilogram per square centimetres boiler
 and turbine, enhancing operating efficiency.

Asmoli, Sambhal District, Uttar Pradesh

Our capability

- The unit employs the DRP (Defco Remelt Phosphotation) process with ion exchange to produce refined sugar.
- The other distillery products comprise ethanol, extra neutral alcohol and rectified spirit. Biogas produced is consumed in-house
- The unit manufactures high grade quick lime in a bagasse-fired lime kiln.

Our capacity addition

Business segment	2008	2011	2012	2013	2014	2015	2016
Sugar (tonnes of cane per day)	39,500	39,500	39,500	44,500	45,500	45,500	45,500
Power (megawatts)	145	150	150	169	209	209	209
Distillery (litres per day)	270,000	270,000	270,000	300,000	300,000	300,000	300,000

Mansurpur, Muzaffarnagar District, Uttar Pradesh

Cane crushing capacity 8,000 metric tonnes per day Power generation 33 megawatts

Our capability

- Investment in the Defco Remelt Phosphotation process at the Company's back-end refinery to manufacture refined sugar (subsequently marketed in 50 kilogram, 1 kilogram and 5 kilogram packaging (brand DHAMpure).
- Unit is located in a cane-rich belt; proximate to a national highway between Meerut and Muzaffarnagar

Rajpura, Sambhal District, Uttar Pradesh

Cane crushing capacity	Power generation	Liquid biofertiliser
8,500 metric tonnes per day	48 megawatts	1,000 litres per day

Our capability

- A fully-automated unit; reports one of the lowest steam consumption rates in India
- The unit is engaged in an extensive cane development programme

Meerganj, Bareilly District, Uttar Pradesh

Cane crushing capacity		Power generation
5,000		19
metric tonnes per day	X	megawatts

Our capability

- The Company engages in the manufacture of quality crystal white sugar
- It accesses cane from more than 45,000 farmers
- It provides farmers with subsidised liquid biofertilisers, pesticides and organic manure

Our milestones

1987

Leased a sick unit at Mansurpur (1,800 tonnes of cane crushed per day)

1995

Increased capacity of the Dhampur unit to 9,000 tonnes of cane crushed per day

Laid the foundation of Dhampur Sugar Mills Limited with an initial capacity of 300 tonnes of cane crushed per day

1997

Installed a new sugar unit at Asmoli with a crushing capacity of 2,500 tonnes of cane per day

Increased crushing capacity of the Dhampur unit to 5,000 tonnes of cane

crushed per day

1999

Enhanced crushing capacity of the Asmoli unit to 5,000 tonnes of cane per day

Established a chemical unit at Dhampur to process molasses into alcohol and other chemicals (7,600 tonnes per annum)

199

Improved capacity of the chemical plant at Dhampur to 16,500 tonnes per annum

Commissioned a distillery at the Asmoli unit with a capacity of 100,000 litres per day through a joint venture

1996

Increased crushing capacity at the Dhampur unit to 10,000 tonnes of cane per day

700

Enhanced power generation capacity at the Dhampur unit, the Asmoli unit and Mansurpur unit to 65 megawatts, 40 megawatts and 28 megawatts, respectively

Established the greenfield Rajpura unit with a crushing capacity of 7,500 tonnes of cane per day

6 | Dhampur Sugar Mills Limited

 Merged Mansurpur Sugar Mills Limited with Dhampur Sugar Mills Limited

- Enhanced power generation capacity at the Mansurpur unit to 33 megawatts
- Converted the Asmoli distillery into a whollyowned subsidiary

- Started manufacturing and marketing liquors like whiskey, rum, vodka and gin under the brand names of State House and PM to AM
- Installed a 4-megawatt bio genset at Asmoli

Expanded crushing capacity at the Dhampur unit to 15,000 tonnes of cane per day, at Asmoli to 9,000 tonnes of cane per day and at Mansurpur to 8,000 tonnes of cane per day

- Enhanced distillery capacity to 300,000 litres per day
- Commissioned a 35.5-megawatt power plant in the Rajpura unit

- JK Sugar Mills Limited merged with Dhampur Sugar Mills following an order of the Hon'ble Allahabad High Court
- Entered the IMFL segment

- Start commissioning of Spent wash fired boiler of 75 MT and 35 MT at Dhampur and Asmoli Distillery under zero liquid discharge project
- Formed new whollyowned subsidiary EHAAT Limited - rural business trading platform
- Acquired 51% stake in DETS Limited engineering excellence in sugar industry equipment

Merged the Asmoli distillery with Dhampur Sugar Mills an order from the Hon'ble Allahabad High Court

- Increased ethanol capacity at Dhampur unit from 100,000 litres per day to 200,000 litres per day
- Established a slop boiler for enabling distillery operations during the rainy season

FY 2016-17 was marked by ups and downs for Indian sugar companies.

Maharashtra, Karnataka and Tamil Nadu reported lower cane yields and sugar output. Uttar Pradesh reported increased yields, recovery and sugar output.

The overall result was that after six years of sugar surplus, India reported a sharp decline in sugar output; after years of sluggish and declining sugar prices, realisations reported an attractive recovery.

Though this improvement did not raise the performance of all sugar companies, some like Dhampur Sugar Mills profited on account of patient investment.

Patience

Dhampur Sugar Mills reported a consolidated average recovery of 10.94% in the year 2016-17.

The Company reported a 16.5% increase in sugar production.

Operational de-bottlenecking increased throughput; stronger control enhanced efficiencies, moderating losses of sugar, bagasse and molasses.

Prudence

The sum of Dhampur Sugar's operational improvements translated into superior financials.

The Company reported a sharp divergence in profitable growth.

Revenues increased 16% to ₹2608.16 crore. Profit after tax strengthened 815% to ₹236.70 crore

The Company's non-sugar business accounted for 29% of revenues, which indicated prudent de-risking.

The Company moderated longterm debt by 3.22% in FY 2016-17, and it is expected to moderate long term debt by more than 20% in FY 2017-18.

Profitability

From the desk of the **Managing Directors**

We are pleased to present the performance of our Company for FY 2016-17.

Dhampur Sugar Mills reported the best year since its incorporation – revenues increased 16% to ₹2608.16 crore while profit after tax strengthened 815% to ₹236.70 crore. The Company finished the year under review with a cash profit of ₹211.83 crore, long-term debt repayment of ₹224 crore and a higher interest cover.

At the outset, permit us to state that the performance of our Company during FY 2016-17 presents enduring possibilities. It would be simplistic to treat the performance as something that we achieved in one year with implications limited to the year under review.

Such an assumption would be a mistake for some reasons. One, we believe that the performance of the sector in FY 2016-17 is the

result of a structural shift within India's sugar industry. This then is not just the result of a cyclical uptrend that may be followed by a predictable cyclical downtrend. While we believe that industrial cyclicality will indeed be a recurring feature, there are some ways in which the nature of cyclicality within India's sugar industry has possibly changed in an irreversible way.

Stability

For one, we at Dhampur Sugar believe that the nature of cyclicality within India's sugar industry will no longer be like the previous cyclicality recorded within the sector. Over the last decade, for instance, we have seen a distinctive form of cyclicality: year after year of extended sluggishness, high raw material costs and decline in sugar realisations to a level where the viability of normal conversion was threatened.

We can optimistically state with some confidence that perhaps that kind of cyclicality – extensive and intensive – is probably something that may not occur again. We believe that this viability-hampering cyclicality was the result of a man-made crisis: the action of political parties in cane-rich states to fix arbitrarily high cane prices. If there was a fallout of the extended sectoral decline this was it: a number of mills failed to remunerate farmers on time; a number of sugar mills lost money and were unable to reinvest in capacity addition.

Government's pragmatism

We believe that this politically-inspired intervention in cane pricing might have lived out its utility. There are four reasons for this.

Firstly, the Indian Government is probusiness from a holistic perspective, convinced that enhanced mill viability will inevitably translate into higher farmer prosperity in a market-linked environment.

Secondly, the Indian Government has recognised that cane pricing and mill viability play a string role in the country's agricultural prosperity; the greater the

win-win proposition – as opposed to a long-standing perspective of win-lose – the better for the farmer, the miller, the consumer and the country.

Thirdly, the Indian Government has demonstrated its sector-strengthening commitment through timely interventions; this Government is business-like, moves with speed and is able to see every issue presented from a holistic perspective.

Fourthly, we have a rare alignment in sectoral policy following the election of a new Government in Uttar Pradesh, which is of the same political affiliation as the Central Government. Thereby, we see a pass-through in sectoral direction and encouragement; for once, the dynamism of the Indian Government is being mirrored in the State Government's body language; for once, the two Governments are not arbitrating on separate issues of cane pricing and sugar realisations; they are on the same policy page.

With this in view, I believe that the Indian sugar sector is at the cusp of a new era.

Performance

FY 2016-17 was a year marked by diverse realities. On the one hand, the cane crop was affected on account of climatic reasons in Maharashtra and Karnataka. While it is reasonable to believe that all the Indian states would largely mirror an underlying trend, the season under review was different. Uttar Pradesh performed exceedingly better for climatic and cane management reasons. Most mills in Uttar Pradesh reported higher sugar production not

only because of an increase in planting but an increase in recoveries, which enhanced output on the one hand and moderated costs on the other. When decline in national sugar output increased sugar realisations, mills in Uttar Pradesh benefited handsomely on account of higher revenues (from output and increased marketplace realisations) and lower costs. This explains why Dhampur Sugar reported its best year in FY 2016-17, the benefits of which are likely to spill into the first half of FY 2017-18.

From what we have explained, it would appear that the improvement in our performance was largely on account of reasons external to the Company. This would not be a fair reading of the reality; Dhampur Sugar was able to capitalise effectively on the sectoral rebound because of its patient cane management that had proactively commenced during the gloomy days of the sectoral slowdown in anticipation of better days ahead.

During the course of the last three years, the Company identified certain factors clearly: for example, more profits could be generated in our command areas than within our manufacturing facilities. The reasons for this observation were the introduction of a new earlymaturing cane variety. The Company was faced with a choice of whether to focus on in-plant activities or invest in business development through the propagation of this new variety? The challenges were considerable; a number of farmers refused to entertain the prospect of shifting from one cane variety to an untested version.

Our performance ambition

- Proactive responsiveness to changes in sugar price, demand, exports and domestic supply
- De-leveraging the Balance Sheet through debt prepayment and repayment
- Increasing utilisation of Dhampur Sugar's various capacities, strengthening profitability
- Initiating process improvements that makes it possible to enhance recovery and moderate costs
- Aiming at increasing coverage of early maturing cane varieties, enhancing yield and recovery

The Dhampur Sugar team worked extensively in educating farmers on the benefits of this new variety, demonstration in the Company's proprietary farms and showcasing the higher returns that they could potentially generate from their farm investments.

We are pleased to state the benefits of this perseverance. Dhampur Sugar crushed 12% more cane than in the previous year; the Company generated an average consolidated recovery of 10.94% when compared with the previous year; the Company generated a 16.5% increase in sugar output in FY 2016-17 over the previous year; average sugar realisation climbed from ₹26.67 per kg in the previous year to ₹35.90 per kg in FY 2016-17.

Outlook

The one question that most shareholders and analysts have been asking us is our prospective capital allocation strategy, now that the Company reported a cash profit of ₹221.83 crore in FY 2016-17.

At Dhampur Sugar, we believe that an opportunity to right-size our Balance Sheet after only one year during a sectoral up-cycle is a rare phenomenon. The Company does not intend to wait; our strategy is to reduce our long-term

debt through accelerated repayments that make it possible to de-leverage our Balance Sheet. We believe that this would initialise a virtuous cycle; lower debt on the books could translate into a superior credit rating, which, in turn, should make it possible to renegotiate short-term debt at lower costs, strengthening our margins and surplus.

We must also take this opportunity to assure our shareholders that the priority of the day is not to rush headlong into a greenfield expansion. The management of our company would rather widen and deepen its cane management, consume its operating leverage, de-bottleneck existing capacities and enhance capacity utilisation.

We must take this opportunity to draw attention to an area that will warrant greater management attention. In terms of environment, health and safety, we have always been proactive. All mandatory requirements of the Government have always been stringently implemented across all our business segments and locations. The Company intends to strengthen this commitment; it has placed orders for new boilers to combust effluents, which are likely to be installed in the Q2 of 2017-18. We believe that with this competitive edge, our business will not only gravitate to the largest, quickest

and thriftiest but also to the safest and most responsible.

As an extension of this aspect of environmental responsibility, we believe that the Indian Government will revise ethanol prices upwards to enhance remuneration in the manufacture of these products, making onward blending with automotive fuel easier. Due to the proactive policies of the Government, we believe that India is well on track to achieve its desired ethanol blending target in the next few years.

On the overall, we believe that the sugar industry is headed for better days. Even as the business may retain its cyclicality, the impact will be less severe and shorter, making it possible for the sector to report larger surpluses, validating its position as the cornerstone of India's agricultural prosperity.

Gaurav Goel and **Gautam Goel,** *Managing Directors,*Dhampur Sugar Mills Limited

Dhampur Sugar. Breaking stereotypes...

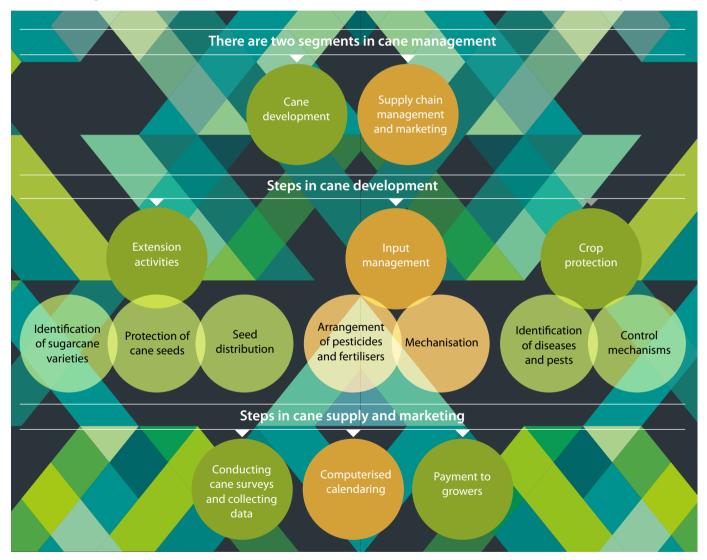

Dhampur Sugar's cane management story

The conventional understanding is that cane management is a routine activity within sugar companies, the responsibility of cane growers and marked by negligible room for sugar manufacturers to

transform long-standing planting realities.

Dhampur Sugar took a contrarian perspective a number of years ago, convinced that an active cane

engagement could transform transactions into relationships, strengthen resource availability, enhance farmer incomes, strengthen corporate profitability and revitalise India's rural economy.

37.54 Cane crushed, FY 2011-12 (lac tonnes) 54.19 Cane crushed, FY 2016-17 (lac tonnes) 1.5 Number of farmers engaged, FY 2011-12 (in Lacs) **Soil testing:** The growing agricultural challenge in India is to protect soil fertility and prevent terrain fatigue. Dhampur Sugar Mills Limited has responded to this reality through Integrated Nutrient Management. The Company's unique approach comprises the deployment of eco-friendly materials and processes, including the use of by products (press mud and boiler ash) generated from the manufacture of sugar, protecting soil quality and crop health.

Farmer management: Another challenge for most sugar manufacturing companies is the need to address farmers within a large command area, making it possible to procure cane systematically. Too large a quantity at the factory gates, which could moderate sucrose content, is not welcome; neither is inadequate line-up at the factory gate as it could affect factory utilisation. Dhampur Sugar Mills Limited enjoys the advantage of compacted command areas; the Company's command areas are located within a diameter of about 25-30 kilometres around each of its sugar factories. Over the years, the Company has differentiated its cane management approach through the creation of a dedicated cane management team comprising cane managers responsible for enhancing farmer throughput.

Over the years, the cane management team has played an impactful role, strengthening the Company through the following initiatives:

- A daily staff meeting on farm realities and proposed counter-initiatives
- Fortnightly engagements between officers and farmers to enhance familiarity with ground conditions.

• Training programs for farmers around modern agricultural practices (use of fertilisers and irrigation methods) through engaging audio-visual formats.

Supply chain management: The challenge in aggregating cane output from thousands of farmers at a particular factory within the space of a few months maximises the importance of supply chain management – neither too much should be available for crushing and neither too little at any given time. At Dhampur Sugar, we conduct extensive farm surveys that indicate the coverage of cane across every farm, the time of planting and the estimated time of harvest. This insight prepares the foundation of an extensive calendar indicating the quantity of cane to be delivered from a particular, farm keeping in mind the distance from the nearest Dhampur Sugar factory. Over the years, the efficiency of this supply chain has translated into a growing proportion of cane being crushed within 24 hours of harvest, enhancing recovery.

Model plots: In the area of cane management where it is critical to convince farmers about the selection of productive cane varieties and superior agricultural practices, seeing is believing. Over the years, Dhampur Sugar has commissioned model demonstration plots associated with each of its five sugar factories. Each year, the Company develops more than 1000 model plots to showcase efficient cane cultivation methods. Besides, the Company's research and development team having best and experienced person works closely with farmers in enhancing cultivation confidence. In addition to can planting advice, the team encourages

farmers to grow inter-crops (cane is grown at a distance of 4 to 6 feet in single or multiple rows to enhance revenues.

Result

The effectiveness of the Company's cane management practices is evident in the numbers – increased cane crushing (implying a growing access to cane), enhanced yields and increased recoveries. In turn, this extensive improvement in cane management has strengthened operational efficiency, increasing margins beyond what would normally have been warranted by increased sugar realisations.

How Dhampur Sugar helped transform Bhushankar's destiny

Bhushankar is a cane grower with a farm near Dhampur Sugar's Rajpura sugar unit. He grew cane on a small area of his farm. He was unsure about the sectoral cyclicality. Dhampur Sugar's cane management team enhanced his confidence. The team invited him to the Company's model demonstration plot to educate him about the latest cane planting techniques. With this help, Bhushankar increased his cane plantation area to 10 hectares; he introduced inter-cropping. As a result, his cane yield of about 50 tonnes per hectare increased to 100 tonnes per hectare in FY 2016-17, transforming his farm's viability - and his destiny.

How Dhampur Sugar transformed realities

The strengths that we bring to our business

Brand of a pioneer

Dhampur Sugar is one of the leading sugar manufacturers in Uttar Pradesh with a heritage of more than eight decades. The Company's pioneering brand is one of the first to embrace forward-looking practices. The Company was among the first to commission a sugar refinery to launch sulphur-less sugar in consumer packs; it was among the first to commission state-of-theart bagasse dryers and multi-fuel high pressure boilers (105 kilograms per square centimetres and 170 tonnes/ hour capacities); it was among the first in India's sugar sector to engage in the downstream processing of by-products (bagasse leading to co-generation and molasses processing leading to ethanol production), strengthening its de-risking (now a sectoral norm).

Location

Each of Dhampur Sugar's sugar manufacturing units are located in the cane-rich belt of Western Uttar Pradesh characterised by rich topography, adequate sunshine and abundant rainfall - just the ingredients required for robust cane production. The Company's command areas are located around its sugar factories, moderating logistic costs. The farmers in the Company's command areas are progressive and open to farm mechanisation and modernisation. Some of the recoveries reported by the Company's factories have been among the highest recoveries reported across sugar mills in Uttar Pradesh.

Scale of integration

Dhampur Sugar is virtually three companies in one. The Company extended from the manufacture of sugar to ethanol manufacture as early as 1991; the Company utilised bagasse to co-generate power as early as 1997. The Company thus diversified its revenues, avoiding a singular dependence on sugar by investing scale in each of these business segments. The Company's cogeneration capacity of 209 megawatts is one of the largest in India's sugar industry; the Company's ethanol capacity of 300000 kilolitre per day is also one of the largest in India's sugar sector.

Extent of integration

Dhampur Sugar's strength is derived from the extent of integration: the capacities of its downstream by-product processing units have been adequately balanced with its core cane crushing capacity. The result is that the Company is not overinvested in any of its core or downstream capacities; the Company generates a high overall throughput of sugar, ethanol and power from a stick of cane. This balancing also ensures that the Company does not need to procure molasses from the open market to feed its ethanol capacity, nor does it need to market surplus molasses in the open market in the absence of adequate ethanol manufacturing capacity, resulting in a superior return on assets invested in the business.

Annuity revenues

In a cyclical business, Dhampur Sugar invested in co-generation reinforced by a power purchase agreement with the Uttar Pradesh Government. The Government's power sales have been secured by a longterm purchase agreement that provides for predictable and pre-agreed tariffs from the Government. This agreement has enhanced the Company's revenue predictability and visibility in a sector that is largely driven by variables and cyclicality. The proportion of revenues derived from co-generation was 13.40% during the year under review; the quantum of revenues derived from this business increased from ₹333.88 crore in 2011-12 to ₹447.20 crore in FY 2016-17.

Farmer relationships

The core of Dhampur Sugar's competence has been derived from the strength of its farmer relationships (more than 19,000 farmers). The Company is recognised as progressive, inspiring farmers to collaborate in enhancing cane output, graduating towards superior cane varieties and embracing better agricultural practices. The Company is recognised as credible with a timely payments record, resulting in comfortable farmer liquidity. This result is reflected in higher cane crushing in the last decade, creating a robust foundation for not only enhanced sugar manufacture but also in the generation of a larger throughput to feed its downstream businesses

Balance Sheet

Dhampur Sugar possesses one of the most credible Balance Sheets in Indian sugar industry. The Company possessed a gearing (factoring long-term debt) of 618.20 as on 31 March 2017 (declining from 728.04 as on 31 March 2016). The Company possessed a net worth of ₹939.78 crore at the close of the last financial year. The Company's EBIDTA margin was among the highest in India's sugar sector. The Company's average cost of debt (long-term and short-term combined) declined correspondingly, interest cover strengthened from ₹158.65 to ₹167.20 during the year as against the earlier under review. We believe that this Balance Sheet and ongoing sectoral profitability also provide the company with the opportunity to de-leverage, strengthening business sustainability.

How our strengths have translated into enhanced shareholder value

Revenues

₹ crore, 2012-13:

1540.26 ₹ crore, 2016-17:

2608.16

CAGR %,

four years 12.21

The company and the players in the nation who grew their revenues in the last four years at a rate higher than India's sugar sector (as measured by the quantum of sugar produced).

Profit after tax

₹ crore, 2012-13:

22.71

₹ crore, 2016-17:

236.70

CAGR %, four years 43.24

The company grew its profit after tax through one of the most challenging periods in India's sugar sector in the last seven years.

Gross block

₹ crore, 2012-13:

1642.74

₹ crore, 2016-17:

2295.84

four years 6.92

The company invested selectively in its assets through the course of the last sectoral slowdown, reflected in capacity de-bottlenecking and focused investments generating returns higher than the overall corporate profitability average.

Market capitalisation

₹ crore, 2012-13:

245.45

₹ crore, 2016-17:

1440.94

four years 42.46

The Company's business credibility, strategy and sectoral outperformance were rewarded by the secondary capital markets in India through increased market capitalisation. This appreciation compared favourably with the 57% appreciation in the Bombay Stock Exchange (Sensex) during this period.

How efficient cane management benefited **Dhampur Sugar**

- Increased yield and recovery, enhancing output and margins a double-impact.
- Environment benefits from Integrated Nutrient Management, enhancing farm productivity
- Superior cane quality derived from farmer education

Dhampur Sugar is among the largest Indian sugar manufacturing companies by volume, possessing a cane crushing capacity of 45,500 tonnes.

The Company has progressively enhanced its manufacturing scale through acquisitions or the greenfield commissioning of sugar manufacturing facilities coupled with periodic capacity expansions in each. The result is that the Company's largest plant possesses cane a crushing capacity of 150000 tonnes of cane per day while its smallest factory possesses a capacity of 50000 tonnes per day, enjoying attractive economies of scale translating into superior operating efficiencies.

The Company has reinforced its manufacturing capability through proactive investments in cutting-edge technologies. This has translated into enhanced operating efficiency and environment compliance.

The Company also established itself as a forward-looking manufacturer through the production of refined sugar that is packaged and branded (brand Dhampure), strengthening corporate recall. The Company possesses refined sugar capacity of 1,700 tonnes per day.

The Company's principal strengths in the sugar business are derived from the location of sugar factories in cane-rich western Uttar Pradesh, a region marked by a rich culture of cane cultivation on the one hand and progressive agricultural practices among cane growers on the other. Besides, the command areas where the Company works are within a radius of 30 kilometres of its sugar units, moderating logistic costs and enhancing recovery on account of a lower transportation time to reach harvested cane to the factory. The strength of the Company and farmer relationships have been reflected in mutual trust, generating a growing availability of cane,

serving as a robust foundation of its multi-business sustainability.

Highlights, 2016-17

- The quantum of cane crushed increased by 12.16% from 48.31 lac tonnes in FY 2015-16 to 54.19 lac tonnes in FY 2016-17. The Company's sugar sales increased by 30% from ₹1814.65 lac in FY 2015-16 to ₹2362.23 lac in FY 2016-17.
- The Company succeeded in enhancing coverage of the early maturing cane variety across its command areas during the year under review.
- The extensive use by farmers of the early maturing cane variety and favourable weather conditions helped increase sugar recoveries from 10.53% in FY 2015-16 to 10.94% in FY 2016-17 - the increased recovery generated an incremental 2222 tonnes of sugar.

Outlook

The Company expects to enhance area under cane cultivation during the year under review, maintaining the increase in sugar output and broad-basing its resource foundation for the sustainable growth of its downstream sectors.

The Company intends to increase operational (cane crushing) days in FY 2017-18, enhancing capacity utilisation and related efficiencies.

Dhampur Sugar commenced cogeneration two decades ago with the singular objective to enhance the monetisation of the bagasse generated from sugar manufacture.

The advantages of the business are considerable: superior monetisation of captively-generated resource, eco-friendly alternative to fossil fuel-derived power, corresponding tax and depreciation advantages as well as the pre-sold nature of the product (marketed to the state electricity board against a pre-determined tariff with a provision for periodic tariff increases).

Dhampur Sugar exported 61% of the power generated to the state electricity grid while 39% was used for captive consumption.

The Company's co-generation business was raised to 209 megawatt by the close of FY 2016-17. The Company's co-

generation capacity is one of the largest within the Indian sugar sector.

Highlights, 2016-17

- Revenues generated from cogeneration stood at ₹447.20 crore, contributing 13% to the Company's overall revenues as against ₹478.88 crore contributing 15% of the company's overall revenues.
- Power generation and supply was lower due to maintenance in our plants; the reduction in power supply was compensated to some extent by increased power tariff of ₹0.04 per unit.
- The Company exported 61% of the power generated.

Outlook

The Company will endeavour to sweat its assets at their optimal level during the coming financial year.

0.78

Dhampur Sugar ventured into the downstream processing of molasses through its distillery segment with an installed capacity of 300000 litres per day.

In addition to producing ethanol, the distillery also manufactures rectified spirit, ENA, special denatured spirit and ethyl acetate.

The Government's emphasis and support provided to the ethanol blending program strengthened optimism related to the appetite for increased volumes of oil marketing companies in the country and prospective utilisation of the Company's capacity.

Highlights, 2016-17

• The Company bid for fewer ethanol supply contracts due to a reduction by the Government in the selling price for ethanol. This reduction was compensated by increased chemical production to the extent of approximately 10%.

- Even as the product mix changed, the division continued to remain profitable.
- Distillery revenues were ₹405.25 crore in FY 2016-17, contributing 12% to the Company's overall revenues.
- Average realisation per litre based on the evolved product mix was ₹41.06 compared to ₹41.64 in the previous year.

Outlook for 2017-18:

- Focus on maximising production having better margin
- Meet ethanol demand as per stipulated time-lines
- Focus on maximising production of ethanol, thereby enhancing per unit margin

Management discussion and analysis

Global economic overview

The pace of global economic activity was mixed in 2016 as a number of crosswinds affected re-acceleration. The year was marked by the United Kingdom's decision to exit the European Union and the election of Donald Trump as the American President. Within advanced economies, comprising the US, Europe and Japan, a protracted monetary policy support and return to fiscal neutrality

underpinned a generally-accelerating output. In countries outside the advanced economies, the sources of slower growth comprised commodity price declines, overhangs from erstwhile credit growth and political turmoil.

Global growth was 3.1% in 2016, the forecast revised downwards by 10 bps for 2017 compared to the April 2016 projections. Long-term prospects of emerging market economies improved

following a decline in interest rates in advanced economies and firming commodity prices.

Asia and India demonstrated robust growth. The currencies of advanced commodity exporters have also strengthened, reflecting the firming of commodity prices; however, several emerging market currencies depreciated substantially.

Economic growth

	2016	2017	2018 (E)
Global economy	3.1%	3.4%	3.6%
Advanced economies	1.6%	1.9%	2.0%
Emerging market and developing economies	4.1%	4.5%	4.8%

Source: IMF

Outlook

The global economy entered its sixth year of stagnation with growth estimates for 2017 continuing to trend the historical path. A projected stabilisation in energy and commodity prices may strengthen the case for resource-rich economies in 2017.

World growth is expected to rise from 3.1% in 2016 to 3.5% in 2017 and 3.6% in 2018, driven by stronger economic activity, expectations of robust global demand, reduced deflationary pressures and optimistic financial markets. (Source: IMF).

Indian economic overview

The Indian economy slowed in 2016-17 to 7.1% from 7.9% in FY 2015-16, largely owing to the currency demonetisation in the third quarter of the financial year under review. However, the general undercurrent continued to be optimistic; India's consumer confidence index stood at 136 in Q4 2016, the highest in the world

India retained its position as the fastest growing major economy in the world catalysed by strong consumption growth and enhanced government spending.

Inflation declined on account t of a decline in food inflation. This facilitated a 50 basis points rate cut by the RBI in 2016-17. A declining vulnerability on the external and fiscal front and fiscal consolidation by the government enhanced investor confidence that translated into record net foreign exchange inflows.

The year under review was also marked by the government's demonetisation initiative and the preparatory work related to the introduction of the goods and services Tax (GST). While the first initiative focused on eliminating the parallel economy, the second is expected to transform the country's taxation structure.

India optimism story

Even as foreign direct investment into India steadily increased from approximately USD 24 billion in calendar year 2012 to approximately USD 46.4 billion in calendar year 2016, it accounted for only approximately 2% of India's GDP in 2015. The relaxation of foreign investment caps cover insurance firms (from 26% to 49%), military contractors (from 49% to 100%), and real estate companies (regardless of size), making India a preferred investment destination.

India's inflation declined to 5%–6% since 2014, softening interest rates and strengthening consumer sentiment. India's youth literacy levels have increased from 81.1% in 2006 to 89.7% in 2015.

The gross enrolment ratio for tertiary education increased from 11.5% in 2006 to 23.9% in 2013. (Source: UNESCO)

Outlook

India's growth is projected to be among the fastest growing global economies between 2016 and 2020; the country is projected to emerge as the third largest economy in the world by 2030, its GDP approximately trebling to USD7 trillion by 2030. Normal monsoons, reduced commodity prices, governmental policies and moderating inflation are expected to accelerate India's economic growth over the medium-term. The Asian Development Bank expects the Indian economy to grow at an accelerated 7.4% in 2017-18 and 7.6% in 2018-19, retaining its position as the world's fastest-growing major economy. (Source: IMF, World Bank, RBI, IBEF)

	2013	2014	2015	2016	2017 (E)
GDP (USD trillion)	1.92	2.04	2.11	2.26	2.30
Real GDP growth (%)	6.6	7.2	7.6	7.6	7.2
Inflation (%)	10.9	6.4	5.9	5.0	4.9
Exchange rate against the dollar	58.6	61.0	64.1	67.2	64.6

(Source: Euromonitor; IMF)

Global sugar industry

After three years of decline, sugar production finally grew during the 2016-17 extracting season*. According to Statista, global production in 2016-17 reached 170.9 million metric tonnes, an increase of 5.1 million metric tonnes from

2015-16. Improved output in Thailand, China and Brazil brightened prospects for the vertical. However, the production deficit is still expected to be a sizeable 5-6 million metric tonnes. Also, expectations of a marginal surplus in 2017-18 reduced prices slightly.

India's growth drivers

Millennial population: India's consumption story is expected to be shaped by its 440 million millennials and 390 million Gen Z (born after 2000). The sheer size of India's youth could make way for sustained growth in purchasing power.

Demographic dividend: India's workforce is estimated at the second largest in the world comprising 860 million 15–64 year-olds accounting for approximately 66% of the total population. India is expected to overtake China to have the world's largest workforce by 2026, potentially driving a larger consumption of paper. (Source: Oxford Economics)

Growing middle-class: The Indian middle-class population is estimated to have doubled from 300 million in 2004 to 600 million in 2012. Half the nation's population of 1.3 billion is estimated in the middle-class range, the biggest driver of economic growth.

Per capita incomes: As per the second advance estimates of National Income, the per capita net national income during 2016-17 is estimated to be around ₹103,818 compared to ₹94,178 in 2015-16. This indicates an increase of 10.2%, strengthening consumer spending.

Brazil: As per UNICA, cane crushing in Brazil ended on 31March 2017, the total cane crushed amounting to 607.14 million tons, down 1.71% compared to the previous year. The total number of mills operating at the end of March 2017 was 83 compared to 137 in the previous year. Despite a decline in the cane crushed, sugar production for 2016-17 marketing year (April – March) was 35.63 million tonnes, about 14.11% higher than the previous marketing year largely due to a 1.94% improvement in raw material quality and a keener sugar emphasis over ethanol. According to CONAB, Brazil is expected to produce 35.5 million tonnes of sugar in 2017-18 marketing year.

China: China is pegged to increase its sugar output by 13.79% to 9.9 million tonnes during the current sugar season. Its yearly sugar consumption is expected to stay at ~15 million tonnes and thus the sector's viability will depend largely on imports.

Thailand: Thailand, the second-largest exporter of sugar in the world, faced a decline in sugar output due to El Nino-led droughts wreaking havoc throughout the country. Consequently, the output is estimated to decrease by 3.1% to ~9.4

million tonnes.

Extracting seasons of sugar 2016-17 for the four biggest producers:

- Brazil: April 2016-March 2017
- India, China, Thailand: October 2016-September 2017

(Source: Reuters, CCM Market Intelligence, CNC Chemicals)

Global sugar industry price trends

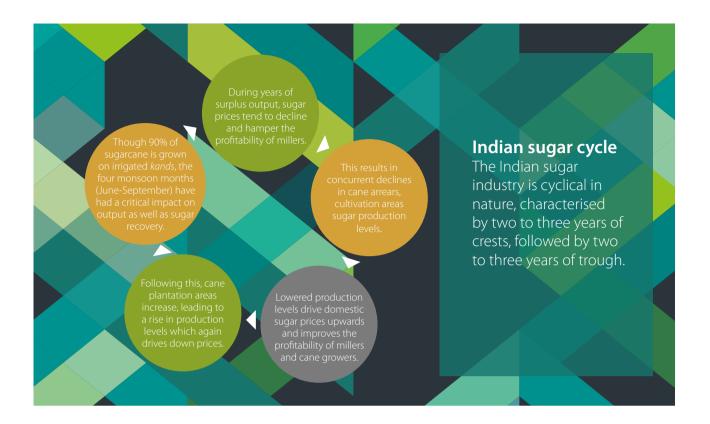

Unfavourable weather eroded sugar output across major geographies causing a sizeable deficit in 2015-16. Finally, sugar prices rebounded during January 2016 after a period of over seven years. After a marginal decline in February, the price uptick continued during the months of May (USD 480 per metric tonne), June (USD 530 metric tonne) and July (USD 540 per metric tonne). It dipped marginally again in August, before peaking at USD 595 per metric tonne in October 2016 a four-year high. While prices have come under significant pressure thereafter, they still remain strong. This has been because of the fact that the global deficit for 2016-17 was not as significant as anticipated earlier. Global Prices are expected to stay under pressure during 2017-18. (Source: USDA)

Indian sugar industry

The past few years have seen ups-and-downs in the sugar industry in India. In 2013-14, sugar production reached a high of 28.3 million tonnes. The production fell to 25.1 million tonnes in 2015-16 and is expected to hit a seven year low at 20.3 million tonnes in 2016-17, mainly due to two consecutive droughts. The government allowed a small quantity of imports at zero percent duty to meet possible marginal shortfall in supply. Production is expected to be enough to meet a domestic demand as well as leave a healthy balance for the next season.

During the 2016-17 sugar season, sugar production declined in Karnataka and Maharashtra but reached a record in Uttar Pradesh by the third week of April 2017 to 85.27 lac tonnes, breaking its previous highest record of 84.75 lac tonnes in 2016-17. There was also an increase in the cane-to-sugar recovery from 9.4% in 2006-07 to an estimated 10.6% in 2016-17. This contrarian performance in Uttar Pradesh was largely on account of a widening use of Co0238, a high-yielding cane variety. Even as this may be early to predict, ISMA has indicated that for the upcoming season (beginning October 2017), an increase in cane planting and adequate water availability could normalise cane production in Maharashtra and Karnataka, strengthening India's sugar output.

The UP sugar industry, with its 116 mills, is the backbone of the state's economy and supports 40 lac farmers and 2 lac labourers. Following the Uttar Pradesh election, the Chief Minister is expected to take active steps to enhance stability in the state's sugar industry, promising big investments. The new government also stressed that its commitment would be to double farm incomes and facilitate the opening of new mills through the following initiatives:

- Develop a just and a practical cane pricing policy that will ensure that the industry would be able to make timely cane payments and farmers get fair and remunerative cane payment on time.
- The above policy will also ensure that mills get bank loans easily.
- An end to the reservation policy of molasses stipulates that 25% of molasses be reserved for the country's liquor industry to benefit farmers as the industry would be in a better position to make cane payments on time.
- · Action will be taken to ensure the timely payment of power dues from the **UPPCL**
- The Chief Minister advised each of the 116 mills in the State to adopt a village each year to be developed as a model village.

Indian sugar industry price trends

Sugar realisations have been trending upwards since August 2015 after reaching a low of ₹23,000 per metric tonne in July 2015. The Central Government's directives on mandatory exports in September 2015 and cane production subsidies in December 2015 bolstered the sector's ability to earn overseas revenues. Drought-like conditions in key geographies during SY2016 led prices to rise to ~₹36,000 per metric tonne in August 2016. In October 2016, prices rose to ₹36,200 per metric tonne, the highest in the past five years. Prices dipped slightly in the wake of the demonetisation in November 2016 to ₹35,500 per metric tonne. According to ICRA, although sugar prices are expected to remain steady in the near future, from a long-term perspective they would depend on the domestic sugar balance, international crude prices and governmental policies.

Demand drivers

Chocolates: India is emerging as the world's fastest growing chocolate market valued at ₹58 billion a couple of years ago and predicted to reach ₹122 billion by 2019.

Soft drinks: Indians consume about 5.9 billion litres of soft drinks per annum; the per capita consumption is about 1/20th of that of the US and 1/10th of that of Kuwait.

Confectionaries: Festivals, young consumers and urbanisation are driving the Indian confectionery market growth (expected to touch USD 2.2 billion by 2018).

(Source: Livemint, fnbnews, bharatbook)

Major factors affecting sugar realisations in India

Factor	Result	Impact on prices
Lowered acreage	Drop in cane cultivation areas in major sugar producing states due to droughts cause farmers to shift to other crops	Increase
Payment arrears	Pending payments result in farmers diverting to other crops resulting in reduced cane availability for the next crushing season.	Increase
Monsoon dependence	Any significant changes in production estimates resulting from poor monsoons can decrease inventory levels.	Increase
Increased consumption	Any increase in consumption levels leads to an overt dependence on sugar stocks.	Increase
Governmental policies	Governmental interventions to curb inflation usually stabilise sugar prices.	Decrease

(Source: ICRA, NBHC)

Governmental initiatives

Following the deregulation of the Indian sugar industry, the Fair and Remunerative Price (FRP) remains the only regulation which ensures that a farmer's income stays protected. 2014 onwards, the Central Government has undertaken a lot of policy interventions to strengthen the sugar industry, which was in a state of turmoil. Some of these include:

- Announcement of a soft loan with one year probation on loan payments. The mills took the loans but the payments went directly to the farmers. This provided them relief and infused much-needed liquidity into the sugar industry.
- To improve transparency and hasten information sharing, the Directorate of Sugar, operating under the aegis of the Department of Food and Public Distribution, has developed a webbased platform for online submission of information and inputs by mills on a monthly basis. This has brought in the much-needed transparency in the data management system of the sugar industry and has also provided an online window to the Central Government to keep a tab on stock utilisation levels of levy sugar for PDS and cane price arrears of sugar mills on fortnightly basis, among others.

The Central Government's ethanol blending programme has also been extremely helpful in reducing pollution levels, conserve foreign exchange and increase value addition. The blending targets have been increased from 5% to 10% under the Ethanol Blending Programme. Moreover, the procurement process of ethanol has also been streamlined and simplified. Suppliers supplying to OMCs had their exercise duties waived off for the 2015-16 fiscal.

Ethanol

India imports almost 70% of its annual crude petroleum requirement (approximately 110 million tonnes). India is using ethanol as a fuel additive to counter vehicular pollution and complete fuel combustion. India's ethanol demand is set to rise due to the government's mandatory blending directive. Ethanol production was around 1.12 billion litres in the sugarcane season 2015-16, about 65% higher than the 2014-15 season. Despite this growth, India faced an ethanol deficit of approximately 900 million litres at the end of 2016.

The sugarcane season 2016-17 could see a decline in ethanol production:

- Ethanol will attract an exercise duty of 12.5% which will have to be borne by the sugar mills, causing mills to divert molasses to the alcohol industry
- Oil marketing companies' procurement prices continue to be fixed while spirit manufacturers offer a free market price based on demand significantly higher than supply.

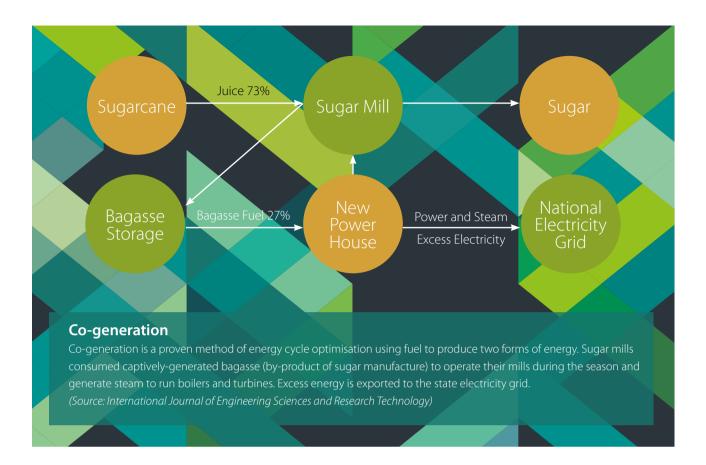

As a result of these factors, OMCs could fall short of procuring adequate ethanol for blending. For 2016-17, about 4 billion litres of ethanol is needed across three major industries (chemicals, alcohol and fuel). A 10% blending requirement would result in a requirement of 1.3 to 1.4 billion litres of ethanol a year, which is all the ethanol India can provide.

The implementation of GST and the ongoing work in making transportation between states easier for ethanol could enhance sectoral optimism.

(Source: Money Control, GEP, Ethanol India)

The FRP is the minimum price that sugarcane farmers are legally guaranteed. For 2017-18, sugarcane FRP of ₹255 per quintal has been approved, which is 10.6% higher than the price of ₹230 in 2016-17. A higher rate has been fixed for 2017-18, taking into account a rise in the cost of production and millers' capacity to pay this rate in view of better sugar prices.

(Source: Business Standard, Ministry of Consumer Affairs, Food & Public Distribution, Hindu Business Line)

A depletion of the finite energy resources and increasing pressure to reduce carbon emissions enhanced the identification of new and/or renewable energy sources. The last decade witnessed a momentum in sugar cogeneration translating into the following benefits: savings in energy cost through CHP plants, additional revenue stream through sale of excess power to the state electricity grid and revenue through sale of carbon credits.

Discussion on financial performance

Accounting policy

Dhampur Sugar Mills follows the accrual basis of accounting. Its accounts were prepared on the basis of accounting standards as per Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2015.

Particulars	2016-17	2015-16	% Growth
	(₹ crore)	(₹ crore)	(rounded)
Income from Operations	2740.22	2,349.73	16.62%
PBT	315.99	31.39	906.66%
PAT	236.70	25.88	814.61%
EPS (in ₹)	36.42	4.13	781.84%

Profit & Loss statement

- The Company's operating revenue increased from ₹2325.04 crore in 2015-16 to ₹2715.73 crore in 2016-17. This was mainly due to a marked increase in production and profits of all the business segments. This also led to an increase in the cash profit from ₹86.53 crore in 2015-16 to ₹370.26 crore in 2016-17.
- Total revenues from the sugar division stood at ₹2362.23 crore, power generation segment revenues were ₹447.20 crore and distillery generated ₹405.25 crore.
- Operating expenses for 2016-17 stood at ₹2070.70 crore as against

₹2022.75 crore in 2015-16, the 2.37% increase mainly due to increased sugar production

- The cost of the Company's employee benefits increased from ₹84.38 in 2015-16 to ₹128.91 crore in 2016-17, leading to an increase in operating expenses.
- The Company's depreciation stood at ₹54.27 crore in 2016-17 against ₹55.14 crore 2015-16.

Capital employed

The total employed capital increased by 32.23% in 2016-17. The return on capital employed increased by about 154 bps in 2016-17.

EBITDA

EBITDA rose from ₹245.18 crore in 2015-16 to ₹537.46 crore in 2016-17. This was due to better realisations from the sugar segment.

Balance sheet

- Net worth: The Company's net worth was ₹939.78 crore as on 31st March 2017, which is an increase of 32.23% compared to ₹710.69 crore as on 31st March 2016. The increase was due to a rise in reserves and surplus.
- Share capital: The share capital decreased marginally to ₹66.45 crore as on 31st March 2017 as compared to ₹75.30 crore as on 31st March 2016 due to a redemption of preference shares during the year under review. Equity capital of the Company increased by ₹6.17 crore in year under review.
- Reserves and surplus: The reserves and surplus increased to ₹873.33 crore as on 31st March 2017 from ₹635.39 crore as on 31st March 2016.
- Borrowings: The Company's borrowings comprise long-term borrowings (current and non-current) and short-term borrowings. As on 31st March 2017, they stood at ₹1920.55 crore against ₹1656.51 crore as on 31st March 2016.

Working capital management

• Current assets: Current assets as on 31st March 2017 stood at ₹1867.70 crore against ₹1615.49 crore as on 31st March 2016, a increase of 15.61%. Current Ratio was 1.00 as on 31st March 2017 against 0.84 as on 31st March 2016 owing to a increase in current assets over current liabilities.

- Inventories: Inventories (finished and semi-finished goods along with raw materials) for 2016-17 increased by 17.48% from ₹1261.30 crore as on 31st March 2016 to ₹1481.72 crore as on 31st March 2017.
- Short-term loans and advances:
 Short-term loans and advances decreased

Short-term loans and advances decreased in 2016-17 and stood at ₹20.70 crore compared to ₹36.92 crore in 2015-16.

• Current liabilities: Current liabilities decreased 2.58% from ₹1916.66 crore as on 31st March 2016 to ₹1867.26 crore as on 31st March 2017, mainly due to a decrease in trade payables. Trade payables decreased from ₹471.43 crore in 2015-16 to ₹308.61 crore in 2016-17, a decline of 34.54% whereas the other current liabilities decreased by 50.71%. Short-term borrowings increased from ₹928.47 crore in 2015-16 to ₹1274.16 crore in 2016-17, a rise of 37.23%.

Cash and bank balances

Cash and bank balances increased by 7.64% from ₹25.80 crore as on 31st March 2016 to ₹27.77crore as on 31st March 2017.

Internal control systems and their adequacy

The Company has a robust internal control system in place to review performance, track operations and gauge liquidity. The system also ensures that all transactions are duly reported and all assets are properly safeguarded. Timely review of operations and the recommendations of the auditors allow the Company to make corrections whenever and wherever necessary.

Human resources

The Company has a streamlined human resource department in order to create an enriching and satisfying environment for the employees. This department, in close association with the senior management, recruits employees, is responsible for their remuneration, rewards and recognition. It is this department's responsibility to identify talent and arrest employee attrition and thus protect Dhampur's human capital. During the year under review, there were no material changes in the human resource policies of the Company; as on 31st March 2017, the total strength of the Company stood at 2934.

Corporate Social Responsibility

Corporate Social Responsibility (CSR) is of utmost importance for corporations today. Sustainability is not only of importance for any business but also for people and the planet. At Dhampur, we are extremely focused on CSR activities and believe in giving back what we get from our community. One of our primary focus areas is the environment. Businesses, regardless of their size tend to have a large carbon footprint. At Dhampur, we find ways to minimise wastage of resources such as water and power and reduce our effluents. We also focus on imparting quality education to the underprivileged. We developed schools around some of our facilities for the education of rural children. We conduct extra-curricular activities to ensure the all-round development of these children. Besides environment and education, Dhampur also focuses on healthcare. We organise healthcare camps that provide free health check-ups in nearby villages.

Risk management

Locational risk

In the sugar business, recovery rates are directly proportional to the distance between mills from sugarcane fields.

Mitigation

- Dhampur has established excellent road connectivity to ensure quick delivery
- Dhampur's command areas extend around a 30-kilometre radius of our mills.

Working capital risk

In the sugar business, labour is capitalintensive and can impact organisational liquidity.

Mitigation

- Dhampur's efforts to liquidate inventory levels at the end of each season ensure that dues are repaid in a timely manner.
- Dhampur manufactures and sells additional products such as power, ethanol and chemicals. This ensures steady cash flows and allows it to counter the full cyclical impact of the industry.

Raw material risk

A potential decline in cane production can diminish profitability.

Mitigation

- All of Dhampur's facilities are located in the cane-rich belt of Uttar Pradesh.
- Dhampur procures sugarcane from

more than 190,000 farmers.

- Dhampur takes active steps in training farmers and also provides them with high-yielding seeds and other basic amenities.
- Dhampur also deploys dedicated teams in its command areas which specifically look after the growth and development of sugarcane.

Industry risk

An economic slowdown could adversely affect revenues.

Mitigation

- The Company has an established presence not only in sugar but also the co-generation, alcohol and biofertiliser segments.
- Dhampur also sells packaged sugar, strengthening margins.
- Non-sugar revenues stood at 29.43% of the total revenues in FY 2016-17 (41% in FY 2015-16), indicating only a moderating dependability on sugar.
- The low per capita sugar consumption in India provides ample room for Dhampur to grow.

Resource risk

An inability to procure enough cane could dent Dhampur's profitability.

Mitigation

- Dhampur procures sugarcane from more than 200,000 farmers.
- Dhampur enjoys enduring

relationships with the farmers

- Dhampur's dedicated teams help farmers free their land faster post the sugar season and move on to their next crops
- Dhampur has also implemented farmer support programmes and supplied seeds and other agricultural implements

Regulatory risk

Unfavourable governmental policies could impact Dhampur's prospects.

Mitigation

- The policy interventions undertaken by the Central Government, such as the announcement of a soft loan with one year probation on loan payments bodes well for the segment.
- The Central Government announced an incentive programme for marketing and promotional services for raw sugar production, targeted towards the export market. All the incentives that mills receive from this would be utilised to make payments to farmers.
- The Central Government's ethanol blending programme has also been extremely helpful in reducing pollution levels, conserve foreign exchange and increase value addition. The blending targets have been increased from 5% to 10% under the Ethanol Blending Programme. Moreover, the procurement process of ethanol has been streamlined and simplified.

Board Report

To,

The Members,

Dhampur Sugar Mills Limited

The directors have pleasure in presenting their Annual Report of the company together with the Audited accounts for the period ended on 31st March, 2017.

SECRETARIAL AUDIT REPORT

FOR THE YEAR ENDED 31ST MARCH, 2017

[Pursuant to section 204(1) of the Companies Act, 2013 and Rule no. 9 of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014]

To,

The Members.

Dhampur Sugar Mills Limited

Distt. Bijnor, Dhampur – 246761 Uttar Pradesh

We have conducted the Secretarial Audit of the compliance of applicable statutory provisions and the adherence to good corporate practice by DHAMPUR SUGAR MILLS LIMITED (CIN: L15249UP1933PLC000511) (hereinafter called the company). Secretarial Audit was conducted in a manner that provided us a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing our opinion thereon.

Based on our verification of the Company's books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, we hereby report that in our opinion, the Company has, during the year ended on 31st March, 2017, complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

We have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the year ended on 31st March, 2017 according to the provisions of:

l.

- The Companies Act, 2013 (the Act) and the rules made thereunder.
- The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the rules made thereunder.
- The Depositories Act, 1996 and the Regulations and bye-laws framed thereunder.
- Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings.
- The following Regulations and Guidelines prescribed under the

Securities and Exchange Board of India Act, 1992 ('SEBI Act'):-

- The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, as amended from time to time;
- b. The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015;
- The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009;
- d. The Securities and Exchange Board of India (Employee Stock Option Scheme and Employee Stock Purchase Scheme) Guidelines, 1999 and The Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, 2014 notified on 28th October, 2014 (Not applicable to the company during the audit period);
- e. The Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008 (Not applicable to the company during the audit period);
- f. The Securities and Exchange Board of India (Registrar to an Issue and Share Transfer Agents) Regulations, 1993, regarding the Companies Act and dealing with client.
- The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2009 (Not applicable to the company during the audit period); and
- h. The Securities and Exchange Board of India (Buyback of Securities) Regulations, 1998 (Not applicable to the company during the audit period).
- The Securities and Exchange Board of India (Listing Obligation and Disclosure Requirements) Regulations, 2015; as amended from time to time.

II.

- Sugar Cess Act, 1982
- Levy Sugar Price Equalisation Fund Act, 1976

- Food Safety and Standards Act, 2006
- Essential Commodities Act, 1955
- Sugar Development Fund Act, 1982
- Export (Quality Control and Inspection) Act, 1963
- Agricultural and Processed Food Products Export Act, 1986
- Indian Boilers Act, 1923

During the year under review, the Company has made all compliances under Sector specific laws mentioned above.

III.

- The Air (Prevention & Control of Pollution) Act, 1981 [Read with the Air (Prevention & Control of Pollution) Rules, 1982]
- The Environment (Protection) Act, 1986 [Read with the Environment (Protection) Rules, 1986]
- The Water (Prevention & Control of Pollution) Act, 1974 [Read with the Water (Prevention & Control of Pollution) Rules, 1975
- The Hazardous Waste (Management, Handling And Transboundry Movement) Rules, 2008
- The Factories Act, 1948
- The Industrial Disputes Act, 1947
- The Payment of Wages Act, 1936
- The Minimum Wages Act, 1948
- The Employees' Provident Fund and Miscellaneous Provisions Act, 1952
- The Payment of Bonus Act, 1965
- The Payment of Gratuity Act, 1972
- The Contract Labour (Regulation and Abolition) Act, 1970
- The Maternity Benefit Act, 1961
- The Child Labour(Prohibition and Regulation) Act, 1986
- The Industrial Employment (Standing Orders) Act, 1946
- The Employees' Compensation Act, 1923 (earlier known as Workmen's Compensation Act, 1923
- The Apprentices Act, 1961
- The Employment Exchange (Compulsory Notification of Vacancies) Act, 1956

During the year under review the Company has filed periodical return and has not received any show cause notice and has generally complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above.

We have relied on the representation made by the Company and its officers on systems and mechanism formed by the Company for compliance under other Act, Laws and Regulations to the Company.

We have also examined compliance with the applicable clauses of the following:-

- a. Secretarial Standards issued by The Institute of Company Secretaries of India and notified by Central Government.
- b. The Listing Agreements entered into by the Company with Stock Exchanges.

During the year under review the Company has complied with the provisions of the Act, Rules, Regulations, etc. mentioned above.

We further report that:

The Board of Directors of the Company is duly constituted with proper balance of Executive Directors, Non-Executive Directors and Independent Directors. The changes in the composition of the Board of Directors that took place during the year under review were carried out in compliance with the provisions of the Act.

Adequate notice is given to all directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent at least seven days in advance, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting.

Majority decision is carried through while there has been no member dissenting from the decisions arrived.

There are adequate systems and processes in the company commensurate with the size and operations of the company to monitor and ensure compliance with applicable laws, rules, regulations and guidelines.

We further report that the company has passed special resolution at its Extra-ordinary General Meeting held on 23rd May 2016, under Section 180(1)(a) authorizing the Board of Directors to provide securities and / or to deal with the properties of the Company.

We further report that the company has approved issue of securities aggregating upto ₹2,00,00,00,000 (Rupees Two Hundred Crore Only), in one or more tranches, by way of Qualified Institutional Placement in order to raise capital by passing special resolution at its Extra-ordinary General Meeting held on 23rd May 2016. However, during the year, the Company has allotted 6172655 equity shares to Qualified Institutional Buyers of ₹10 each at a premium of ₹88.68 per share.

ANNUAL REPORT ON CSR INITIATIVES

 Brief outline of the company's CSR policy, including overview of projects or programs proposed to be undertaken and a reference to the web-link to the CSR policy and projects or programs.

The CSR policy was approved by the Board of Directors at its meeting held on 21st May, 2014 and has been uploaded on the Company's website under the link http://dhampur.com/Policies.aspx

The Company had proposed to undertake activities relating to promoting education, sports, good agricultural practices, skill development, women empowerment etc.

The Company through its various programmes will be investing the resources for undertaking the following activities:

- 1. Eradication of hunger, poverty and malnutrition.
- 2. Promotion of preventive health care and sanitation.
- 3. Promotion of education.
- 4. Promotion of gender equality.
- 5. Reducing social and economic inequality.
- 6. Ensuring environmental sustainability.
- 7. Protection of Flora and Fauna.
- 8. Protection of National Heritage, art and culture.
- Measures for the benefit of armed forces veterans, war widows and their dependents.
- 10. Promoting sports.
- Contribution to the Prime Minister's National Relief Fund or any other fund set up by the Central Government for socio-economic development and relief and welfare

- of the Scheduled Castes, the Scheduled Tribes, other backward classes, minorities and women.
- 12. Contributions or funds provided to technology incubators located within academic institutions which are approved by the Central Government.
- 13. Rural development projects.
- 2. The composition of CSR Committee is as under:

Shri V.K Goel, Chairman

Shri Gaurav Goel, Member

Shri Ashwani K Gupta, Member

- 3. Average Net Profit of the company for last 3 financial years. ₹(30.36) Cr.
- **4.** Prescribed CSR Expenditure (2% of the amount as in item 3 above) NIL.
- 5. Details of CSR spent during the financial year 2016-17:
 - (a) Total amount to be spent for the financial year; NIL
 - (b) Amount unspent, if any; Nil
 - (c) Manner in which the amount spent during the financial year: N. A.

- 6. In case the Company has failed to spend the two per cent of the average net profit of the last three financial years or any part thereof, the company shall provide the reasons for not spending the amount in its Board report. N.A
- 7. Pursuant to the Companies (Corporate Social Responsibility Policy) Rules, 2014, we hereby confirm that the CSR Committe has implemented and monitored the CSR initiatives of Dhampur Sugar Mills Limited in line with CSR objectives and policy of the Company.

On behalf of the CSR Committee

Chairman of CSR Committee

Managing Director

THE DETAILS OF CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION, FOREIGN EXCHANGE EARNINGS AND OUTGO ARE AS FOLLOWS:

A) Conservation of energy:

- (i) the steps taken or impact on conservation of energy;
 The Company is continuously working on conservation of energy through innovative measures. The Company is in process of installation of additional spent wash fired boiler at two of its unit at Dhampur and Asmoli. The boiler will use spent wash as fuel (apart from bagasse) which will result in less bagasse consumption in the boiler leading to additional bagasse saving for the same steam generation.
- (ii) the steps taken by the company for utilising alternate sources of energy;

 The Company is producing renewable energy not only for its captive consumption, but is also exporting power to state.
- (iii) the capital investment on energy conservation equipment's; Nil

AUDIT COMMITTEE:

The powers, role and terms of reference of the Audit Committee cover the areas as contemplated under Regulation 18 of SEBI (Listing Obligations and Disclosure Requirements) Regulation 2015 and Section 177 of the Companies Act, 2013 and such other functions as may be specifically delegated by the Board from time to time. The powers include investigating any activity within its terms of reference; seeking information from any employee; obtaining outside legal or other professional advice; and securing attendance of outsiders with relevant expertise, if considered necessary. The role includes oversight of Company's financial reporting process and disclosure of financial information to ensure that the financial statement is correct, sufficient and credible; recommending the appointment, re-appointment, if required, replacement or removal of statutory auditors, fixation of audit fees and approval of payment for any other services, as permitted; reviewing the adequacy of internal audit function; discussing with internal auditors any significant findings and follow-up thereon; reviewing with the management annual and guarterly financial statements before submission to the Board for approval; approval or any subsequent modification of any transactions of the Company with related parties; review and monitor the auditors independence and performance and effectiveness of audit process; scrutiny of inter corporate loans and investments, if any; evaluation of internal financial controls and risk management system; and reviewing the functioning of the Whistle blower mechanism.

The constitution of the Audit Committee also meets with the requirements under Section 177 of the Companies Act, 2013. The members of the Audit Committee comprise three Independent Non-Executive Directors and the Managing Director.

Details of the composition of the Audit Committee and the attendance at the meetings held are as follows:

SI.	Name of Directors	Meetings
No.		attended
1	Shri M. P. Mehrotra, Chairman	3
2	Shri Gaurav Goel	4
3	Shri A. K. Gupta	4
4	Shri Priya Brat	4

The Company Secretary also acts as the Secretary to the Committee.

During the period from 1st April, 2016 to 31st March, 2017, four committee meetings were held on:

- 1) 10th May, 2016
- 2) 5th August, 2016
- 3) 09th November,2016
- 4) 10th February, 2017

The Committee, inter-alia, reviewed the financial statements including Auditors' Reports for the year ended 31st March, 2017 and

recommended its adoption, records of related party transactions, reports related to compliance of laws and risk management.

NOMINATION AND REMUNERATION COMMITTEE

The powers, role and terms of reference of the Nomination and Remuneration Committee covers the areas as contemplated under Regulation 19 of the Securities and Exchange Board of India (Listing obligation and Disclosure requirements) Regulation 2015 and Section 178 of the Companies Act, 2013, besides other terms as may be referred by the Board of Directors. The role includes formulation of criteria for determining qualifications, positive attributes and independence of a director and recommending to the Board a policy, relating to the remuneration of the directors, key managerial personnel and other employees; formulation of criteria for evaluation of Independent Directors and the Board; devising a policy on Board diversity; and identification of persons who are qualified to become directors and who may be appointed in senior management in accordance with the criteria laid down, and recommend to the Board their appointment and removal.

Remuneration Policy

The objective and broad framework of the Remuneration Policy is to consider and determine the remuneration, based on the fundamental principles of performance, potential and growth. The Remuneration Policy reflects on certain guiding principles of the Company such as aligning remuneration with the longer term interests of the Company and its shareholders, promoting a culture of meritocracy and creating a linkage to corporate and individual performance, and emphasising on line expertise and market competitiveness so as to attract the best talent. It also ensures the effective recognition of performance and encourages a focus on achieving superior operational results. The Nomination and Remuneration Committee recommends the remuneration of Directors and Key Managerial Personnel, which is approved by the Board of Directors, subject to the approval of shareholders, where necessary. The level and composition of remuneration shall be reasonable and sufficient to attract, retain and motivate the directors, key managerial personnel and other employees of the quality required to run the Company successfully. The relationship of remuneration to performance is clearly framed in order to meet appropriate performance benchmarks. The remuneration to directors, key managerial personnel and senior management personnel should also involve a balance between fixed and incentive pay reflecting short and long term performance objectives appropriate to the working of the Company.

Details of the composition of Nomination and Remuneration Committee and the attendance at the meetings held is as follows:

SI.	Name of Directors	Meetings
No.		attended
1	Shri M. P. Mehrotra, Chairman	0
2	Shri Harish Saluja	1
3	Shri A. K. Gupta	1
4	Shri Priya Brat	1

The Company Secretary also acts as the Secretary to the Committee. During the period from 1st April, 2016 to 31st March, 2017, one committee meeting was held on:

Remuneration to Non-Executive Directors

10th February, 2017

The Non-Executive Directors are paid remuneration by way of Sitting Fees. The Non-Executive Directors are paid sitting fees for each Meeting of the Board or Committee of Directors attended by them. The Non-Executive Director/Independent Directors do not have any material pecuniary relationship or transactions with the Company.

Remuneration to Executive Directors

The appointment and remuneration of Executive Directors including Chairman, Vice Chairman, Managing Director and Whole-time Director is governed by the recommendation of the Remuneration & Nomination Committee, Resolutions passed by the Board of Directors and Shareholders of the Company. The remuneration package of Chairman and Managing Director and Whole-time Director comprises of salary, perquisites and allowances, and contributions to Provident and other Retirement Benefit Funds as approved by the shareholders at the General Meetings. Annual increments are linked to performance and are decided by the Remuneration and Nomination Committee and recommended to the Board for approval thereof.

Presently, the Company does not have a stock options scheme for its Directors.

Performance Evaluation:

Pursuant to the provisions of the Companies Act, 2013 and applicable provisions of the Listing Regulations, the Board has carried out the performance evaluation of its own performance and of the Board Committees, viz. Audit Committee, Nomination and Remuneration Committee, CSR Committee and Stakeholders' Relationship Committee as well as evaluation of performance of Directors individually. A structured guestionnaire was prepared after taking into consideration inputs received from the Directors, covering various aspects of the Board's functioning such as adequacy of the composition of the Board and its Committees, Board culture, execution and performance of specific duties, obligations, corporate governance practices and stakeholders' interests, etc. A separate exercise was carried out to evaluate the performance of individual Directors including the Chairman of the Board, who were evaluated on parameters such as level of engagement and contribution, independence of judgement, meeting risk management and

competition challenges, compliance and due diligence, financial control, safeguarding the interest of the Company and its minority shareholders etc.

The performance evaluation of the Independent Directors was carried out by the entire Board. The performance evaluation of the Chairman and the Non-Independent Directors was carried out by the Independent Directors. The Nomination and Remuneration Committee also carried out evaluation of every director's performance. The Directors expressed satisfaction with the evaluation process.

Policy on Board diversity

The Board of Directors shall have the optimum combination of Directors from different areas / fields like production, Management, Quality Assurance, Finance, Sales and Marketing, Supply chain, Research and Development, Human Resources etc. or as may be considered appropriate.

STAKEHOLDER'S RELATIONSHIP COMMITTEE

The Stakeholder's Relationship Committee comprises Shri A. K. Gupta, Chairman; Shri Priya Brat; and Shri Harish Saluja.

The Committee, inter-alia, reviews issue of duplicate share certificates and oversees and reviews all matters connected with the Company's transfers of securities. It looks into redressal of shareholder's/investors' complaints related to transfer of shares, non-receipt of balance sheet, non-receipt of declared dividends, among others.

It oversees the performance of the Company's Registrar and Transfer Agent, and recommends measures for overall improvement in the quality of investor services. Besides, it monitors implementation and compliance of the Company's Code of Conduct for Prohibition of Insider Trading in pursuance of SEBI (Prohibition of Insider Trading) Regulations, 2015. The Board has delegated the power of approving transfer of securities to Shri Gaurav Goel, the Company's Managing Director.

Besides the committee has such terms of reference, role, responsibility and powers as specified in Section 178 of the Companies Act, 2013 and as specified in the Securities and Exchange Board of India (Listing Obligation and Disclosure requirements) Regulation, 2015, as amended from time to time.

During the period from 1st April, 2016 to 31st March, 2017, four Committee meetings were held on:

- 1) 10th May, 2016
- 2) 5th August, 2016
- 3) 09th November, 2016
- 4) 10th February, 2017

The attendance at the meetings are as follows:

SI. No.	Name of Directors	Meetings attended
1	Shri A. K. Gupta, Chairman	4
2	Shri Priya Brat	4
3	Shri Harish Saluja	4

The Company Secretary also acts as the Secretary to the Committee.

The Company has made separate e- mail id i.e. investordesk@ dhampur.com for the purpose of investors which is also given at the website of the Company.

CORPORATE SOCIAL RESPONSIBILITY

As per the requirement of Companies Act, 2013, The Committee named as Corporate Social Responsibility Committee (CSR Committee) was constituted on 21st May, 2014 which comprises of three directors Shri. VK Goel, Chairman, Shri. Gaurav Goel, Managing Director and Shri. Ashwani K Gupta, Independent Director.

The committee's responsibility is to assist the Board in discharging its social responsibilities by way of formulating and monitoring implementation of the framework of Corporate Social Responsibility policy as specified in Schedule VI of the Companies Act, 2013.

The Company formulated CSR policy, which is uploaded on the website of the Company (web link http://dhampur.com/Policies. aspx)

The CSR committee met once during the year on 5th August, 2016.

INDEPENDENT DIRECTORS MEETING

During the year under review, The Independent Directors met on 10th February, 2017, interalia, to:

- Review the performance of non-independent directors and the Board as a whole:
- Review the performance of the Chairman of the Company, taking into account the views of executive directors and nonexecutive directors;
- Assess the quality, quantity and timeliness of flow of information between the Company management and the Board that is necessary for the Board to effectively and reasonably perform its duties.

DISCLOSURES AND AFFIRMATION

I. Compliance with Mandatory Requirements:

The Company is in compliance with all requirements under SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

II. Related Party Transactions

All transactions entered into with related parties during the financial year were in the ordinary course of business and on arm's length basis and do not attract the provisions of Section 188 of the Companies Act, 2013. There were no materially significant related party transactions during the year.

Related Party transactions have been disclosed in the notes

to accounts forming part of financial statements. A statement in summary form of transactions with related parties in the ordinary course of business and on arm's length basis is placed before the Audit Committee periodically for its review.

Pursuant to the requirement of Regulation 23 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The Related Party Transactions Policy as approved by the Board is uploaded on the Company's website at http://www.dhampur.com

None of the transactions of the Company with related parties was in conflict with the interest of the Company.

Financial Statements

Independent Auditors' Report

To
The Members of
Dhampur Sugar Mills Ltd.

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Dhampur Sugar Mills Limited (hereinafter referred to as 'the Holding Company'), its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group"), comprising the consolidated Balance Sheet as at March 31, 2017, the consolidated Statement of Profit and Loss and consolidated Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements")

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (particularly Accounting Standard 21 - Consolidated Financial Statements). The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

While conducting the audit, we have taken into account the

provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under.

We conducted our audit in accordance with the Standards on Auditing specified under sub section 10 of Section 143 of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Holding Company has an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matter paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of a subsidiaries, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Group as at 31st March, 2017 and its Profit and its Cash flows for the year ended on that date.

Other Matter

We did not audit the financial statements / financial information of two subsidiaries, whose financial statements reflect total assets of ₹29.86 crores as at March 31, 2017, total revenues of ₹90.90 crores, total loss after tax of ₹5.85 crores and net cash inflows amount to ₹2.74 crores for the year then ended, as considered in the consolidated financial statements. This financial statements / financial information have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of the subsidiaries and our report in terms of sub-sections (3) and (11) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries, is based solely on the reports of the other auditors.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of this matter with respect to our reliance on the work done and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

- As required by Section 143(3) of the Act, based on our audit and on the consideration of report of the other auditors on separate financial statements and the other financial information of a subsidiaries, as noted in the 'Other Matter' paragraph, we report that
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
 - (b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors.
 - (c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss, and the Consolidated Cash Flow Statement dealt with by this Report are in with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.
 - (d) In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
 - (e) On the basis of the relevant assertion contained in the audit reports on standalone financial statements of each subsidiary company which are incorporated in India none of the Directors of any such company is disqualified as on

- 31st March, 2017 from being appointed as a director in terms of Section 164 (2) of the Act.
- (f) With respect to the adequacy of the internal financial controls over financial reporting of the Group and the operating effectiveness of such Controls, refer to our separate report in Annexure – 'A'
- (g) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of a subsidiary, as noted in the 'Other Matter' paragraph:
 - The consolidated financial statements disclosed the impact of pending litigations on its financial position in its financial statements.
 - The Holding Company and subsidiary companies do not have any long-term contracts including derivative contracts for which there are any material foreseeable losses.
 - iii. As explained, there has been no amount required to be transferred to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies.
- (h) the Company has provided requisite disclosures in Note 29 to these (standalone) financial statements, as to holdings of Specified Bank Notes on November 8, 2016 and December 30, 2016 as well as dealings in Specified Bank Notes during the period from November 8, 2016 to December 30, 2016. Based on the audit procedures performed and relying on the management representation regarding the holding and nature of cash transactions, including Specified Bank Notes, we report that these disclosures are in accordance with the books of accounts maintained by the company and produced to us by the Management.

Membership No. 073794

Place: New Delhi Date: 25th May, 2017

Annexure - 'A' to the Independent Auditor's Report

(The Annexure – 'A' referred to in our Independent Auditors' Report to the members of the Company on the consolidated financial statements for the year ended 31st March, 2017)

Report on the Internal Financial Control under clause (i) of subsection 3 of section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial control over financial reporting of Dhampur Sugar Mills Limited ("the Holding Company") as of 31 March, 2017 in conjunction with our audit of the consolidated financial statements of the company for the year ended on that date.

We have not audited the internal financial control over financial reporting of Subsidiary Company, which is a company not incorporated in India, as of 31st March, 2017.

Management's Responsibility for internal Financial Controls

The Holding Company's management is responsible for establishing and maintaining internal financial controls based on the internal controls over financial reporting criteria established by the Company considering the essential components of internal controls stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's polices, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records and the timely preparation of reliable financial information , as required under the Companies Act, 2013 ("the Act").

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial control over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Control Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit

to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence, we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial control system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statement for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that , in reasonable detail, accurately and fairly reflect the transactions and disposition of the assets of the company; (2) provide reasonable assurance that transaction are recorded as necessary to permit preparation of financial statement in accordance with generally accepted accounting principles, and that receipt and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use ,or disposition of the company's assets that could have a material effect on the financial statement.

Inherent Limitations of Internal Financial Controls over Financial

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial controls over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company has, in all material respects, an adequate internal financial control system over financial reporting and such internal financial control over financial reporting were operating effectively as at 31st March 2017, based on the internal controls over financial reporting criteria established by the Company considering the essential components of internal controls stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by ICAI.

1) Corporate Information:

Dhampur Sugar Mills Limited ('the Company') having CIN No. L15249UP1933PLC000511 is a public company domiciled in India and incorporated under the provisions of the Companies Act, 1913 and has its registered office at Bijnor, Uttar Pradesh, India.

Its shares are listed on two stock exchanges in India namely, National Stock Exchange of India and Bombay Stock Exchange of India.

The company is engaged mainly in the manufacturing and selling of sugar, chemicals, ethanol and co-generation of power.

2) Significant Accounting Policies:

i. Basis of Preparation of Financial statement

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Policies in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("The 2013 Act"). The Financial Statements have been prepared on Accrual Basis on the Historical cost convention except for certain tangible fixed assets which are carried on revalued amounts.

All assets and liabilities have been classified as current and non-current as per Company's normal Operating Cycle and other criteria set out in Schedule III to the Companies Act, 2013. The company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

ii. Principles of Consolidation

The consolidated financial statements relate to Dhampur Sugar Mills Limited ("The Company") and of the Financial Statements of its Subsidiaries (Collectively referred to as the "Group"). The consolidated financial statements have been prepared on the following basis:

- a) The consolidated financial statements of the Company and its subsidiary companies used in the consolidation are drawn up to the same reporting date as that of the Company i.e. 31st March, 2017.
- b) The consolidated financial statement of the Company and its subsidiary companies have been consolidated on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after eliminating the intragroup balances and intragroup transactions resulting in unrealized profits or losses.
- c) The operating activities of Dhampur International Pte. Ltd. is being treated as integral foreign operations and accordingly the financial statements are translated as if the transactions of the foreign operation have been those of the Company itself.
- d) As far as possible, the consolidated financial statements have been prepared using uniform accounting policies, like transaction and events in similar circumstances and are presented to the extent possible, in the same manner as the Company's separate financial statements.
- e) The excess of cost to the Company of its investments in the subsidiary company is recognized in the financial statement as goodwill and the excess of company's portion of equity of the subsidiary over the cost of the investments therein is treated as capital reserve.
- f) Minority interest in the net assets of consolidated subsidiary consists of the amount of equity attributable to the minority shareholders at the dates on which investments are made by the Company in the subsidiary company and further movements in their share in the equity, subsequent to the dates of investments as stated above If, the amount of losses applicable to the minority on consolidation exceeds the minority interest in the equity of the subsidiary, the excess, and any further losses applicable to the minority, are adjusted against the majority interest except to the extent that minority has a binding obligation to, and is able to, make good the losses. if the subsidiary subsequently reports profits, all such profits are allocated to the majority interest until the minority's share of losses previously absorbed by the majority has been recovered.

g) The list of subsidiary companies which are included in the consolidation and the groups' holding therein are as under:

SI.	Name of	Country of	Ownership in % either directly or through subsidia		
No.	the Company	Incorporation	2016-2017	2015-2016	
1.	Dhampur International Pte. Ltd.	Singapore	100.00	100.00	
2.	DETS Limited	India	51.00	0.00	
3.	EHAAT Limited	India	100.00	0.00	

iii. Use of Estimates

The preparation of financial statements in conformity with Indian GAAP requires management of the company to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year.

The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognized in the periods in which the results are known / materialize.

iv. Fixed Assets and work-in-progress

- a) Tangible fixed assets are stated at cost, net of recoverable taxes and includes amount added on revaluation, less accumulated depreciation, and impairment loss, if any. All costs, including financing costs attributable to construction or acquisition of fixed assets till commencement of commercial production, and adjustments arising from exchange rate variations attributable to the fixed assets are capitalized.
 - Expenditure during construction period: Directly attributable expenditure (Including finance cost related to borrowed funds for construction or acquisition of fixed assets) incurred on projects under implementation and capital assets under installation are treated as pre-operative expenses pending allocation to assets and are shown under "Capital work-in-progress". Capital Work-in-progress is stated at the amount expended up to the date of Balance Sheet for the cost of fixed assets that are not ready for their intended use.
 - Assets identified and technically evaluated as obsolete are retired from active use and held for disposal are stated at the lower of their net book value and estimated realizable value.
- b) Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

v. Depreciation and Amortization

- a) The classification of plant and machinery into continuous and non-continuous process is done as per technical certification and depreciation thereon is provided accordingly.
- b) Depreciation on tangible fixed assets is provided for on Straight Line Method over the useful life of assets specified in the Schedule –II of Companies Act, 2013.
- c) Intangible assets are amortized on a straight line basis over the estimated useful economic life of the assets. The Company uses a rebuttable presumption that the useful life of intangible assets is ten years from the date when the assets is available for use.

vi. Foreign Exchange Transactions

Transactions denominated in foreign currencies are recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate on the date of the transaction.

Monetary items denominated in foreign currencies at the year-end are restated at year-end rates. In case of items which are covered by forward exchange contracts, the premium or discount arising out at the inception of such contracts is amortized as income or expense over the life of the contract. Further exchange difference on such contracts i.e. difference between the exchange rate at the exchange reporting/settlement date and the exchange rate on the date of inception of contract/the last reporting date,

is recognized as income/ expense for the year except that the exchange differences, including premium or discount on forward exchange contracts, arising in respect of long term borrowings or liabilities relating to the acquisition of the depreciable capital assets which are adjusted to the cost of fixed assets.

Non-monetary foreign currency items are carried at cost.

Any income or expense on account of exchange difference either on settlement or on translation is recognized in the Profit and Loss account except in case of long term liabilities, where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying cost of such assets.

vii. Inventories

Raw material, process chemicals, stores, spares and packing material are carried at weighted average cost.

Finished goods, Goods in Process and Traded goods except by-products are carried at lower of cost and net realizable value. Cost of trading goods is determined using FIFO basis. Cost of finished goods and Goods in Process comprises of raw material cost (net of realizable value of By-products), variable and fixed production overhead, which are allocated to work in progress and finished goods on full absorption cost basis.

Stock of finished farm products, molasses and bagasse are carried at estimated Net Realizable Value.

Standing cane and other crops are carried at cost.

Loose tools and instruments are carried at depreciated value.

By-products are carried at net realizable value.

viii. Excise duty

Excise duty in respect of finished goods held in stock at the end of the period except in respect of those products which are being used for captive consumption, is provided for and is included in the value of closing stock.

ix. Employees Benefits

Defined contribution plan:

The eligible employees of the Company are entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly/annual contribution at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The contributions, as specified under the law, are made to the provident fund and pension fund set up as irrevocable trust by the Company or to respective Regional Provident Fund Commissioners and the Central Provident Fund under the State Pension Scheme. The Company generally liable for monthly/annual contributions and any shortfall in the fund assets based on the government specified minimum rates of return or pension and recognises such contributions and shortfall, if any, as an expense in the year incurred.

Defined benefit plan:

Company's liabilities toward defined benefit plans are determined using the projected unit credit method which considers each period of service as giving rise to additional unit of benefit entitlement and measure each unit separately to build up the final obligation. Actuarial gain and losses are recognized immediately in the profit and loss account as income or expenses. Obligation measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to market yields at the balance sheet date or government bonds where the currency and terms of the Government are consistent with the currency and estimated of the defined benefit obligation.

Short term benefits are recognized as expense at the undiscounted amount in the Statement of the profit and loss account for the year in which the related service is rendered.

Compensation to employees who have opted for retirement under the "Voluntary Retirement scheme" is charged to the profit and loss account in the year of retirement.

x. Leases

- a) Leases rentals in respect of operating leases, if any, are expensed with reference to lease term, except for rentals pertaining to the period up to the date of commissioning of the assets which are capitalized.
- b) Income in respect of assets given on operating lease, if any, is recognized on accrual basis with reference to lease terms.

xi. Investments

Investments are either classified current or long-term based on Management's intention at the time of acquisition:-

Current investments are carried at lower of cost and net realizable value.

Long term investment is stated at cost. Provision for diminution in the value of long term investment is made only if such a decline is other than temporary.

Cost includes acquisition price and directly attributable acquisition charges such as brokerage, fee and duties.

xii. Revenue Recognition

Revenue is recognized only when it can be reliably measured and is reasonable to expect ultimate collection. Revenue from sale of goods is recognized on transfer of significant risk and reward of ownership to the customer. Revenue includes excise duty and excludes sales tax/VAT, trade discount and rebates. Interest income is recognized when no significant uncertainty as to measurability or collectability exists.

Insurance claim are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

Export benefits are accounted for in the year of exports based on eligibility and when there is no significant uncertainty in receiving the same.

xiii. Borrowing Costs

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets till commencement of commercial production and or put to use. All other borrowing costs are expensed in the period they occur.

xiv. Provision for Current and Deferred Tax

Provision for current tax is made after taking into consideration benefits under the provision of Income Tax Act, 1961. Deferred tax resulting from timing differences between taxable income and accounting income is accounted for using the tax rates and Laws that are enacted or substantively enacted on the balance sheet date. The deferred tax assets is recognized and carried forward only if there is virtual certainty that the assets will be realized in future.

MAT credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. In the year in which Minimum Alternate Tax (MAT) credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in the Guidance Notes issued by the Institute of Chartered Accountants of India, the said asset is created by the way of a credit to the Statement of Profit and Loss and shown as MAT credit entitlement. The company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the company will pay normal Income Tax during the specified period.

xv. Impairment of Assets

The Carrying amount of assets are reviewed at each balance sheet date, if there is any indication of impairment based on internal/external factor. An asset is impaired when the carrying amount of the assets exceeds the recoverable amount. Impairment is charged to the profit and loss account in the year in which an asset is identified as impaired. Impairment losses recognized in prior accounting period are reversed if there is any change in the estimate of the recoverable amount.

xvi. Government Grants

Government grants are recognized where there is reasonable assurance that the condition attach to them will be complied and the grants will be received. Government grants are accounted for as under:

Government grants of the nature of promoters' contribution are credited to the capital reserve and treated as a part of the Shareholders' Fund.

Government grants related to specific depreciable fixed assets are adjusted with the value of assets. Government grants related to the specific non-depreciable fixed assets are credited to capital reserve.

Government grants that are receivable as compensation for expenses or losses incurred or for the purpose of giving immediate financial support are either deducted from the expenditure in case these relate to specific expenditure and in other cases, are treated as other income. These grants, if available, to the industry in general are treated as ordinary items and if available only to the company are treated as an extraordinary item and disclosed accordingly.

xvii. Provisions, Contingent Liabilities and Assets

Provisions are recognized in respect of obligation where, based on the evidence available, their existence at the balance sheet date is considered probable.

Contingent liabilities are shown by way of notes to the account in respect of obligations where, based on the evidence available their existence at the balance sheet date is considered not probable.

Contingent assets are not recognized in the financial statements.

xviii.Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cheques on hand, balance with banks on current accounts and short term, highly liquid investments with an original maturity of three months or less and which carry insignificant risk of changes in value.

xix. Cash Flow Statement

Cash flows are stated using the indirect method, whereby profit/loss before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of incomes and expenses associated with investing or financing flows. The cash flows from operating, investing and financing activities of the Company are segregated.

xx. Earning Per Share

Basic earnings per share are computed by dividing the net profit/(loss) after tax (Including the post-tax effect of extra ordinary items, if any), attributable to the equity shareholders, by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share are computed by dividing the net profit/(loss) after tax (Including the post-tax effect of extra ordinary items, if any), attributable to the equity shareholder, by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares which could be issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are determined as at the end of each period presented.

xxi. Segment Reporting

Segments are identified based on dominant source and nature of risks and returns and the internal organizational and management structure. The accounting policies adopted for segment reporting are in the line with the accounting policies adopted for preparing and presenting the Financial Statements of the Company as a whole. In addition, the following specific accounting policies have been followed for segment reporting:

Segment revenue includes sales and other income directly identifiable with/allocable to the segment including inter segment transfers. Inter segment transfers are accounted for, based on the estimated market price in case of marketable product and cost plus markup basis in case of non-marketable product.

xxii. Equity Issue Expenses

Expenses incurred on issue of equity shares are charged in securities premium reserve account in the year in which it is incurred.

2A) Change in Accounting Policy:

During the year, the Company has changed its accounting policy for charging depreciation on Plants and Buildings having been put to used upto 31st March, 1989 and other fixed assets having been put to use upto 31st March, 2014 from Written Down Value to Straight Line Method. Consequent to this change charge of depreciation for the year is lower by ₹0.47 Crore.

Less: Interest subsidy claimed under UPSIPP 2013	(4.36	(5.58)	
Total	167.20	158.65	

- 25 The accounts have been prepared without accounting for any incentive entitlements under U.P. Sugar Incentive Promotion Policy, 2004 as the scheme has been subsequently withdrawn by the State Government. The Company has filed writ petition before Hon'ble Allahabad High Court (Lucknow Bench) for enforcement of the scheme and settlement of incentive claims. As per the erstwhile incentive policy, the company is eligible for capital subsidy of ₹89.89 crores i.e. @10% of the investments made (already vetted ₹50.80 crores) and revenue subsidy for reimbursement of taxes and other charges aggregating to ₹60.50 crores upto the prescibed period of ten years for incentive.
- During the year, the company earned net gain of ₹19.63 crores (net of expenses of ₹2.06 crores) on sale of 144582 numbers of Renewal Energy Certificates (RECs). These RECs were generated due to environmental concerns and allotted to the company as per Regulation on REC, notified by Central Electricity Regulatory Commission. The earning of these RECs are not an off shoot of business but an off shoot of environmental concerns and hence, the net gain from such sale has been held to be a capital receipt and not an income forming part of the operations of the company by the courts. The courts have further held that the net earning on the sale of these RECs does not fall within the definition of income under the Income Tax Act, 1961 and hence could not be taxed under the normal provisions of taxation as well as under the provisions of section 115JB of the Act. In view of these legal pronouncements, the net earnings on such sale amounting to ₹19.63 crores, credited to the profit and loss statement as other Income, has been concurrently added to the "Capital Reserve" by reduction from "Net Profit carried to the Surplus/Deficit" treating it as a capital receipt.
- 27 In the opinion of the Board, current assets and loans and advances have realisable value in the ordinary course of business at least equal to the value at which they are stated in the balance sheet. The Board is also of opinion that the diminution in the value of investments in Dhampur International Pte Ltd., wholly owned subsidiary, is on account of accoumulated losses, in temporary in nature.

28 - Expenditure on Corporate Social Responibilities (CSR) Activities:

The various heads under which the CSR expenditure was incurred during the year is detailed as follows:

(₹ in crores)

S. No.	Relevant clause of Schedule VII to the Companies Act, 2013	Description of CSR Activities	2016-2017	2015-2016
a)	Clause (ii)	Promoting education, including special education and employment enhancing vocational training and livlihood enhancement projects	0.00	0.36
b)	Clause (vii)	Promoting rural sports, nationally recognised sports, paralympic sports and Olympic sports	0.00	0.03
Tota	I		0.00	0.39

29 During the period from 8th November, 2016 to 30th December, 2016, the Company transacted in Specified Bank Notes (SBN) or other denomination notes as defined in the MCA notification G.S.R. 308(E) dated 30th March, 2017. The details of the same is as below in absolute rupees (₹)

Particulars	Specified Bank	Other denomination	Total

(51% of equity share holding)				

38 CONTINGENT LIABILITIES AND COMMITMENTS: NOT PROVIDED FOR IN RESPECT OF:

I Contingent Liabilities (₹ in crores)

Pai	ticul	ars	As at 31st March, 2017	As at 31st March, 2016
i)	Dei	mands being disputed by the Company:		
	a)	Excise duty and Service Tax demands	42.89	44.51
	b)	Trade Tax and Entry Tax demands	44.82	49.34
	c)	Other demands	11.57	8.08
	d)	Estimated amount of interest on above	111.63	112.87
ii)	Cla	ims against the company not acknowledged as debts :		
	a)	Statutory liability being disputed by authorities	7.05	0.36
	b)	Income Tax demand on processing of TDS Returns	0.06	0.25
	c)	Other Liabilities	4.68	26.17
	d)	In respect of some pending cases of employees under labour laws	Amount not ascertainable	Amount not ascertainable

The Company has initiated steps for revising the TDS forms to remove various defects due to which demands were raised by authorities and is confident that the demand will be substantially reduced after these rectification.

The decision taken by the government of Uttar Pradesh to waive liability on interest payable by the sugar industry on delayed payment of cane price for the sugar seasons 2012-13, 2013-14 and 2014-15 is remanded back for reconsideration by honourable Allahabad High Court. The Govt. of U.P. has preferred an appeal against the direction of High Court before Supreme Court. The sugar industry and the company believes that UP Government will not reverse its decision for waiver of interest and will also waive interest for sugar season 2015-16

The amount shown above represents the best possible estimates arrived on the basis of available information. The uncertainties and timing of the cash flows are dependent on the outcome of the different legal process which have been invoked by the company or the claimants as the case may be, therefore it cannot be estimated accurately. The Company does not expect any reimbursement in respect of above contingent liabilities.

In the opinion of the management, no provision is considered necessary for the disputes mentioned above on the grounds that there are fair chances of sucessfull outcome.

II Commitments

- A Estimated amount of contracts remaining to be executed on capital account and not provided for ₹54.31 Crores (P.Y. ₹12.78 Crores).
- B Corporate guarantee given by the Company ₹75 Crore (P.Y ₹325 Crore)
- 39 Previous year figures in bracket have been regrouped/restated wherever considered necessary.
