Management Analysis & Discussion Report:

A. Industry Structure & Developments:

The company specializes in making precision components forming the main active elements of Electrical Switchgear, which actually makes / breaks Currents at all Voltage levels in AC & DC systems. The core strength being in house processing right from Silver refining to producing all the contact materials and Semis of Precious Metal and Copper Alloy Contact Material and finally making fully finished world class electrical contact parts. This can only be attributable to the highly skilled & experienced manpower, state of the art Manufacturing facilities employed, complimented by engineering skills . These have added to the productivity and thus a competitive edge in the global market.

B. Opportunities and Threats:

Recognition as a strategic long term partner by all leading MNCs and Switchgear majors within and outside the country, has ensured a sustained growth for the company. Marketing efforts like participation in International Trade Fairs have improved visibility of MODISON, in the overseas market.

With the change in Government Policy on Power Sector investments, increase in volumes is eminent. However, these gestures by the Government have simultaneously attracted competition from overseas manufacturers, especially from China, where subsidies granted by their Governments for exports may affect company's profitability.

C. Productwise Performance and Financial Performance:

The company is manufacturing Electrical Contacts for Low, Medium & High Voltage Switchgear.

During the F.Y. 2011-12 Revenue of the Company rose to **Rs. 16323.19 Lakh** as compared to Rs.12721.96 Lakh, achieved during the previous F.Y. of 2010-11. However Profit Before Tax reduced to **Rs. 2366.81 Lakh** in the Year under report from Rs. 2369.06 Lakh achieved during the previous F.Y.

Export sales during the current F.Y. amounted to **Rs. 2641.02 Lakh** as against Rs. 1902.26 Lakh achieved in the previous F.Y.

D. Future Outlook:

In spite of the thrust on Power Sector, one can expect hurdles in implementation owing to the political scenario in the country. The focus on non-conventional Energy initiative also is a long drawn process while being an expensive one. Therefore, one cannot expect any major breakthrough immediately and the Company is expecting only a nominal but steady growth in the times to come.

Risks & Concerns:

E. New small scale Medium Voltage Switchgear assembling factories are mushrooming within the country, who import switchgear sub-assemblies from China, Korea etc. These Companies eat into considerable volumes of the overall Switchgear demand. Electricity Boards for example are bulk consumers of such Switchgear, where low price alone succeeds. Our Electrical Contact materials are not required by these Companies as the complete sub-assemblies are imported.

Internal Control System & their Adequacy:

The company has in place an adequate system of internal controls commensurate with the size of the company and the nature of its business to ensure efficacy of operations and compliance with applicable legislation. There exists an adequate management reporting system comprising of managerial reporting and analysis on various performance indicators, for corrective directions as and when necessary. The Audit Committee also looks into internal control system of the company.
