HOW WE ENHANCED VALUE IN THE LAST FEW YEARS

Definition

Sales growth.

Why we measure

This measure reflects the result of our ability to understand market trends and service customers with corresponding products, superior technologies and competent supply chain management.

Performance

Our aggregate sales increased in FY 17, which compared favourably with the growth of the country's liquor sector.

Value impact

Creates a robust growth engine on which to build profits.

Definition

Earning before the deduction of fixed expenses (interest, depreciation, extraordinary items and tax).

Why we measure

It is an index that showcases the company's ability to optimize operating costs despite inflationary pressures.

Performance

The company's EBIDTA grew every single year in the last year. The company reported a 10.53 per cent increase in its EBIDTA in FY 17 – an outcome of painstaking efforts of its team in improving operational efficiency.

Value impact

Adequate surplus available to grow the Company.

Definition

Profit earned during the year after deducting all expenses and provisions.

Why we measure

It highlights the strength of the business model in generating value for its shareholders.

Performance

The company's net profit grew every single year in the last year. The company reported a 21.6 per cent increase in its net profit in FY17 – reflecting the robustness and resilience of the business model in growing shareholder value despite external vagaries.

Value impact

Adequate cash pool available for reinvestment, accelerating the growth engine

Definition

EBIDTA margin is a profitability ratio used to measure a company's pricing strategy and operating efficiency. Higher the operating margin, the better for the company.

Why we measure

The EBIDTA margin gives an idea of how much a company earns (before accounting for interest and taxes) on each rupee of sale.

Performance

The company reported a 97 bps increase in EBIDTA margin in FY 17 while enriching its product basket with superior products and improved operating efficiency.

Value impact

Demonstrates adequate buffer in the business, which, when multiplied by scale, enhances supluses

ROCE (%)**Definition**

It is a financial ratio that measures a company's profitability and the efficiency with which its capital is employed in the business.

Why we measure

ROCE is a useful metric for comparing profitability across companies based on the amount of capital they use - especially in capital-intensive sectors.

Performance

A showcase of prudently investing every rupee in profitable spaces that generate higher returns for shareholders.

Value impact

Enhanced ROCE can potentially drive valuations and perception (on listing)

Debt-equity ratio (x)**Definition**

This is derived through the ratio of debt to net worth (less revaluation reserves).

Why we measure

A measure of a company's financial health, indicating the ability of the company to remunerate shareholders over debt providers.

Performance

The company's gearing moderated from 1.26 in FY14 to 0.16 in FY17. We recommend that this ratio be read in conjunction with net debt/operating profit (declining, indicating a growing ability to service debt).

Value impact

Enhanced shareholder value by keeping the equity side constant; enhanced flexibility in progressively moderating debt cost

Finance cost (₹ lakhs)**Definition**

Derived through calculating average cost of the consolidated debt.

Why we measure

This indicates our ability in convincing bankers and other debt providers of the robustness of our business model.

Performance

The company's interest outflow has progressively declined from a ₹7.02 cr (3.3% of sales) in FY14 to ₹4.04 cr (1.36% of sales) in FY17. We recommend that this be read in conjunction with our rising interest cover (rising, indicating higher liquidity).

Value impact

Enhanced cash flows; strengthened credit rating for successive declines in debt cost

Interest cover (x)**Definition**

This is derived through the division of EBIDTA by interest outflow.

Why we measure

Interest cover indicates the company's comfort in servicing interest, the highest the better.

Performance

The company strengthened its interest cover from 3.33 in FY14 to 10.58 in FY17.

Value impact

Enhanced cash flows

Letter to Shareholders

"We have brought a new passion – speed, scale and sophistication – to our multi-decade sectoral presence."

TUSHAR BHANDARI, DIRECTOR, EXPLAINS THAT OUR EXCITING TRANSFORMATION IS UNDERWAY AT ASSOCIATED ALCOHOLS & BREWERIES LIMITED

India is the second most populous country at a significant transformation in incomes, mindsets and lifestyles.

It is our experience that countries at inflection points present the biggest sectoral opportunities.

In India, lifestyle transformation is possibly emerging as one of the biggest opportunities; the spirits industry is at the apex of this lifestyle-derived transformation.

India represents one of the most compelling large spirit markets in the world for some good reasons.

India's per capita alcohol consumption is a fraction of the global average. India's per capita income has continuously risen through the last few years of the economic slowdown. It grew significantly in the three years leading

to 2016-17 on the hand coupled with a gradual replacement of social taboos related to the consumption of spirits.

The consumption of alcohol has increased among India's youth. There is a growing incidence of family consumption and it is now considered socially acceptable for women to drink, something that would have been inconceivable as recent as even a couple of decades ago. This is reflected in the numbers: per capita alcohol consumption in India has increased from 1.6 liters in 2003-2005 to 4.3 liters today.

The result is that the Indian alcohol industry, under-performing global consumption across the decades, has begun outperforming the global spirits consumption growth especially in the premium categories.

AT ASSOCIATED ALCOHOLS, WE CAN CONTINUE TO PLAY THE GAME THE WAY IT WAS PLAYED OR WE CAN TRANSFORM WITH SPEED TO CAPITALISE.

OUR OPTIMISM

Some of the largest multinational brands in the country have already responded to the projected growth in size and sophistication of consumption: the largest player has consolidated, the largest players have stated their intention to vacate the mid-end and low-end spaces; they intend to premiumise their offerings instead.

The result of these three opportunities – consolidation, market expansion and the vacation of specific market spaces by some of the largest players – is creating an unprecedented sectoral opportunity.

At Associated Alcohols, we can continue to play the game the way it was played or we can transform with speed to capitalise.

I am pleased to state that we have selected the latter.

We believe that as the industry space becomes increasingly challenging, attrition will transpire. This will create an unprecedented opportunity. We already enjoy some enduring advantages: access to superior technology reflected in an unmatched ENA integrity, a locational advantage that makes it possible for us to deliver with speed and economy anywhere in the country, and the ability to access diverse raw materials cheaper and quicker.

We intend to double our ENA capacity in the coming years. The expansion will not be cosmetically linear; a mere 50 per cent investment in assets will double manufacturing capacity, strengthening our capital cost efficiency and validating the conviction that the larger we get, the more competitive we will become.

We also intend to create truly Indian brands, we intend to premiumise our offerings, we intend to provide a bouquet across the prominent liquor categories and we intend to increase our brand spend. We believe that this combination should evolve the personality of our company, translating into quicker growth than ever.

SECTORAL CHALLENGES AND COUNTER-STRATEGY

It would be naïve to assume that the mere vacation of specific market spaces will result in market share accretion for the existing players.

The reality is that the Indian liquor industry is one of the most challenging in the country for a number of reasons. Consumer preferences change every few hundred kms; what works in one market may not work in another. In this business, throwing money at a problem and expecting that brands would start generating revenues is more likely to create a hole in the Balance Sheet faster than enhance

market share. Building markets for specific brands is more grassroots-driven, requiring a patient working with trade channels to build a promotional momentum.

At Associated Alcohols, we are addressing the need to transform from a regional to a national player through a prudent strategy. The extensive challenges notwithstanding, there is a solution leading to sustainable growth. We believe that this solution lies in the ability to think long-term and plan for slow sustainable growth. I cannot over-emphasise this point; India's liquor industry is marked by a number of brands that intended to grow fast, faltered along the way and eventually return to the starting point considerably poorer and having expended precious years.

We are convinced that sustainable growth in the brand-driven end of India's liquor industry needs to begin with a secure Balance Sheet. We believe that companies that are considerably under-borrowed stand a better chance of succeeding; even when they falter in specific markets or product categories, the very fact that they would not have a large interest obligation would make it possible to live and fight another day.

At Associated Alcohols, we are attractively placed. Our debt-equity ratio (based on long-term debt) was 0.16 as on 31 March 2017. We spread our risks across two businesses – conversion arrangement for a large client that enhanced our revenue predictability and generated a sizable cash flow on the one hand coupled with a growing basket of proprietary brands on the other. Whereas most people would have considered it fit to launch one brand across a number of markets, we believe that one brand for one market would be a slower but surer way of growing in a sustainable manner. Besides, we would rather launch one brand per product category than be tempted into adding a number of products in the hope that a larger basket would translate into larger market share accretion.

The result of this ultra-cautious approach is that perhaps Associated Alcohols would generate modest, but sustainable growth, over aggressive, but completely erratic and even volatile earnings.

DREAM

At Associated Alcohols, our dream is to create truly Indian brands for a truly Indian audience. All that I can assure is that we will take our time to get there, will draw from the lessons that the marketplace has taught us over the last decade – and in doing so, enhance value in a sustainable way for all those associated with our company.

Sincerely

Tushar Bhandari
Director

OUR FIVE-PRONGED STRATEGY

Double ENA capacity. Accelerate launch of proprietary brands. Extend from the regional to a pan-Indian entity. Increase pipeline of ENA supply to existing clients. Become completely self-sufficient in power availability.

Our *DNA*

Ethical compliance

IN A BUSINESS MARKED BY A HIGH EXCISE TAX INCIDENCE, THE TEMPTATION WAS TO SELL IN CASH AND OFF THE BOOKS.

At Associated Alcohols, this is one temptation that we resisted. Even as our industry was largely unorganised, we conducted our business in an organized manner. More than just this basic difference, we went one step ahead. We selected to be completely ethical; we make and receive payments through appropriate banking channels; every initiative was documented; every compliance followed to its logical conclusion.

When we embarked on this journey, the sceptics were many. We would slow the business down, they warned. We would be incompatible with the trade flow, indicated many.

At Associated Alcohols, we resolved to conduct the business the right way. The result was that we attracted marquee and international clients; they said our value system matched theirs.

The result was that we not only engaged these brands as clients; we retained them. We didn't just transact sizable business with them; we grew that business as well.

Ethics endured.

Our *DNA*

Resource flexibility

IN A BUSINESS WHERE THE PRINCIPAL RAW MATERIAL ACCOUNTS FOR 70 PER CENT OF THE RESOURCE COSTS AND 40 PER CENT OF REVENUES, ANY ADVERSE MOVEMENT CAN ALTER OPERATING VIABILITY.

During the year under review, the company was faced with precisely such a challenge. Average grain costs increased from ₹13900 per tonne to ₹15500 per tonne. Based on the company's appetite, this sharp movement (without a corresponding room to pass this increase on to customers) would have notionally affected the company's bottom line.

This contrarian performance was derived from the company's foresight in having invested in multi-feedstock flexibility to accommodate swings in agricultural production. During 2016-17, the company moved with proactive readiness from its usual feedstock to alternative varieties without increasing costs and without comprising efficiency.

The result is that even though the year under review was a challenging one for a number of liquor manufacturers, it was a record year at Associated Alcohols.

Foresight helped.

Our *DNA*

Working capital efficiency

IN A BUSINESS WITH AN EXTENDED WORKING CAPITAL CYCLE COMPRISING THE PURCHASE OF GRAIN, PROCESSING OF RAW MATERIALS, MARKETING TO CUSTOMERS AND RECOVERING PROCEEDS, SUCCESS IS DERIVED FROM THE ABILITY TO EFFICIENTLY MANAGE WORKING CAPITAL.

In our business of manufacture and marketing of extra neutral alcohol (B2B) coupled with the launch of proprietary liquor brands (B2C), working capital accounted for 44% per cent of the total employed capital.

Over the last few years, the company resolved to moderate the intensity of working capital impact. Instead of the conventional approach of working closely with bankers and customers, the company did something lateral: it engaged closely with quality professionals instead. The objective: simply manufacture a superior ENA quality.

When the word began to go around that the company's ENA integrity was matchless, customers increased. The company strengthened terms of trade; the proportion of cash-and-carry increased.

Quality prevailed.

Our *DNA*

Measured growth

IN A BUSINESS WITH AN UNPRECEDENTED MARKET OPPORTUNITY, THE OBVIOUS RESPONSE WOULD BE TO GROW AS FAST AS POSSIBLE.

At Associated Alcohols, we intend to make haste ...slowly. Even as we are generally focused on completing everything we embark upon as fast as possible, when it comes to strategic direction, we believe that steadiness works best.

We believe that one can work only as fast as one's Balance Sheet (read debt-equity ratio) permits. This indicates that the company will never exceed its desired risk appetite; it will grow as much through net worth (accruals and related streams) as possible; it will assume modest debt at low cost; it will maintain a high interest cover even during the most challenging sectoral trough; it will possess adequate cash resources for at least five years to invest in brand building.

Besides, the company will horizontally extend product diversification but moderate vertical penetration in each, moderating its risk spread. This will also provide the company a room to explore product categories and only gradually build scale in each. The company will match receivables with liabilities.

The result of this approach is already evident; the company progressively strengthened gearing up from 1.26 in the last four years, building its net worth from ₹ 57.12 cr to ₹ 98.28 cr during the period.

Caution protected.

ENA MANUFACTURE

Our competitive advantage

ENGAGED IN DOUBLING
INSTALLED CAPACITY TO 7 CR
LITRES A YEAR IN THE COMING
YEARS

INCREASED PRODUCTION AFTER
HAVING ALREADY MARKETED THE
OUTPUT BASED ON EXISTING
ALLIANCE

PROPOSED PAYBACK OF LESS
THAN THREE YEARS

Associated Alcohols' grain-based distillery (installed capacity of more than 3 cr litres a year) is the largest in the country. The company is among India's largest grain-based distilleries. Even as the company's distillery reconciled a combination of molasses-based and grain-based processes, the company gradually evolved towards the latter on account of superior raw material sustainability, specific client needs and competitive grain-based manufacture.

OUR COMPETITIVE EDGE

The competitiveness of grain-based distillery was showcased through the following realities.

Enhanced quality: The grain-based process provides a robust foundation to make downstream products of superior quality

Increased flexibility: The grain-based process makes it possible to consume diverse feed (jowar, bajra, rich, maize and what), which generates a higher yield on account of superior starch content

Cleaner process: The plant can be run across all seasons; it generates zero discharge and is hence environmentally cleaner

Wealth from waste: The residue derived from the manufacturing process can be monetised and marketed as a byproduct

Productive: In general, a tonne of grain-based raw material generates about 400 litres of alcohol; a tonne of molasses generates 200 to 250 litres of alcohol

Resource-efficient: The grain-based process consumes a lower quantity of water, power and steam on account of a higher recycling potential

THE COMPANY'S EDGE

The company invested extensively in grain-based distillery operations, strengthening its competitive edge.

- The grain-based distillery process stabilized product quality and helped the company service the growing needs of its largest multi-national customer for nearly two decades, the company evolving into a major-source supplier based on its quality edge
- The company proactively invested in research-led efficiency, working with enzymes and cutting-edge global developments
- The company extended from atmospheric distillation to a multi-pressure ENA plant in 2013, which moderated manufacturing cycle time, energy and steam consumption
- The company exceeded nameplate throughput assurance by 7 per cent; capacity utilisation achieved 100 percent in the last three years; prudent equipment modification eliminated the use of jet cooker, moderating steam consumption

RESULT

The company has emerged as one of the most competitive grain-based ENA manufacturers in India today. The company is also one of the most attractively-located in terms of grain sourcing and end product supply; 90 per cent of the raw material consumed is sourced from the state; 60 per cent of the end product is marketed within the state; the Company is increasing its presence out of the state on a national level.

EXPANSION

The company is increasing its distillery capacity from 3 cr litres per annum to 7 cr litres per annum in the coming years. The company will consume 10 acres for this ₹ 80 cr expansion out of its available land parcel of 125 acres. The project is expected to be fully on stream starting 2020-21.

The capacity expansion will make it possible to double our ENA capacity with a 50 per cent increase in asset investment, strengthening our overall competitiveness.

The company intends to consume 60 per cent of the expanded ENA production in the manufacture of country liquor (captive value-addition), 20 per cent of the output in the manufacture of IMFL and the rest in merchant sales to a large customer. In view of this proposed material allocation, the incremental production is virtually pre-sold.

Following the expansion, the company expects to emerge as one of the largest ENA manufacturers in India with one of the lowest manufacturing costs, an effective volume-value play that will accelerate the company's competitiveness and profitability.

IN A NUTSHELL

- ESTABLISHED COMPETITIVENESS
- DOUBLING CAPACITY AT A NEGLIGIBLE CAPITAL COST PER LITRE
- INCREMENTAL OUTPUT VIRTUALLY PRE-SOLD
- PROMISES TO BE A CORPORATE GAME-CHANGER

OUR FORESEEABLE AGENDA

2016

Launch brands. Extend beyond Madhya Pradesh. Enhance production efficiency. Implement SAP. Integrate SOPs.

2017

Consolidate presence in new States. Increase branded liquor revenues. Enhance process efficiency. Grow business with less cash.

2018

Implement ENA expansion. Widen national presence. Accelerate branded product launch. Financially close expansion.

2019

Commission expansion of doubled ENA capacity.

2020-21

The first full year of the commissioning of the company's manufacturing facility

How we have transformed our personality over the last few years

- FROM A REGIONAL TO A NATIONAL PLAYER
- FROM MID-PRICING TO PREMIUMISATION
- FROM A CONVERTOR INTO A BRAND CREATOR
- FROM A PRODUCT INSOURCING COMPANY TO AN INSOURCING CUM OUTSOURCING COMPANY
- FROM DISTILLERIES AT DIFFERENT LOCATIONS TO AN INTEGRATED DISTILLERY LOCATION
- FROM A COMPLETE INDIA REVENUE FOCUS TO A COMPANY FOCUSING ON INDIA CUM EXPORTS
- FROM A BACK-END VENDOR OF A LARGE BRAND TO VENDOR CUM MARKET-FRONTING BRAND
- FROM RESOURCE OUTSOURCING TO COMPLETE INSOURCING

Transformation

From a regional to a national player

In 2016-17, the company was present in three states (Delhi, Madhya Pradesh and Rajasthan). In 2017-18, the company intends to be present in five additional states (Pondicherry, Kerala, Goa, Maharashtra and Chattisgarh).

The company derived only 7 per cent of its revenues from non-Madhya Pradesh states in 2015-16; this increased to 10 per cent in 2016-17 on larger revenues; this is likely to increase to 15 per cent in 2017-18 and even larger by 2020 with the objective to consume all ENA within (maximizing value-addition).

THE COMPANY EXPECTS THAT THE LAUNCH OF THE COMPETITIVELY-PRICED CENTRAL PROVINCE WHISKEY AND TITANIUM TRIPLE DISTILLED VODKA WILL PROGRESSIVELY CARVE OUT MARKET SHARE AND ENHANCED REALIZATIONS.

Transformation

From low-pricing to premiumisation

In 2016-17, 20 per cent of the company's revenues were derived from IMFL; only 3 per cent of IMFL revenues were premium. By 2020, the company expects to increase the proportion of IMFL revenues to 50 per cent; 50 per cent of the company's IMFL revenues are expected to be derived from premium varieties.

Going ahead, the company expects that the launch of the competitively-priced Central Province Whiskey and Titanium Triple Distilled Vodka will progressively carve out market share and enhanced realizations.

Transformation

From a convertor into a brand creator

The company is transforming from an efficient convertor for large and prominent global brands to a brand creator in its own right. The proportion of revenues from proprietary brands is expected to increase from 8 per cent in 2016-17 to 20 per cent by 2020.

The company expects to leverage a longstanding culture of high manufacturing competence benchmarked with global standards, established relationships with distributors and store owners, widening bouquet of brewery and liquor products (rum whiskey, gin and vodka) that enhances store visibility, and a strategy of extending progressively to non-Madhya Pradesh revenues.

Transformation

From vendor to vendor cum brand-driven company

The company intends to graduate from responsible vendorship to a combination of vendorship and brand-driven revenues. Concurrent with this transformation, the proportion of revenues derived from brands is likely to increase.

We believe that this progressive transition will de-risk the company at one and enhance competitiveness at the other. For one, ongoing vendorship will enhance revenues, margins and profit visibility in addition to exposing the company to world-class manufacturing standards; a gradual slant in branding will enhance value-addition while exposing the company to a desired risk appetite.

Transformation

From resource outsourcing to complete insourcing

In 2016-17, the company derived 60 per cent of its electricity needs from within through an investment in a high pressure turbine and generating power from exhaust (cogeneration). The remaining power needs were derived from a combination of solar energy and the state electricity grid.

The company intends to be more than self-sufficient for its electricity needs following its next expansion. This will moderate the cost of electricity on the hand and make it possible to manufacture cattle feed that consumes a large electricity quantum.

Transformation

From an ENA competence to a doubled ENA capacity

The company's production of about 3 cr litres of ENA per annum is one of the largest in the country. In the space of 3 years from end 2016-17, the company intends to double its ENA capacity.

This increased capacity will provide the company with a larger foundation to service the growing needs of its prominent customers who need resource security; besides, this broad-based capacity will provide the company the opportunity to manufacture of number of branded products. The doubled capacity will translate into attractive economies that reinforce the company's position as one of the most competitive ENA manufacturers in India.

Our business model

How we have selected to do business

THE CONTEXT

Transforming social mores

The social response to drinking has transformed dramatically in the last three decades than in the previous few centuries combined. It is more acceptable to drink today; it is more acceptable for family members to drink together; it is more acceptable for women to drink; there is a growing movement around responsible drinking.

Under-consumed

India is at the intersection of change in the area of liquor consumption. Even as the country is vastly under-consumed as far as liquor consumption is concerned, prevailing growth rate is higher than the rest of the world, indicating positive traction towards the global average. This makes the country's liquor consuming market one of the most attractive in the world.

Demographic dividend

The force of driving change in India is its youth – the young earners. They are open to experimentation. A large population of the country is under the age of 35, the largest such cluster in the world. Besides, India is likely to retain its position as the world's largest pool of young earners across the decades, catalyzing its consumption-driven economy.

High-mortality business

The Indian liquor sector is a high-mortality business. Even as India may appear as one homogenous market, the reality is that India is an aggregation of a number of markets marked by diverse consumption preferences. The result is that in this business the usual strategy of large scale and mass marketing needs to be replaced with niche marketing around customized preferences.

Environmentally-sensitive

The Indian liquor manufacturing sector is marked by growing regulatory compliance. This makes it necessary to invest in cutting-edge technologies that eliminate effluents discharge and enhance business responsibility.

HOW WE RESPONDED

Strategic

Focus

The AABL management has selected to grow in contiguous spaces. Even as it will invest in proprietary branded products, it will do so while strengthening backward integration that continues to predictably provide volume-based revenues and margins to sustain a value-led play – while ensuring that the Balance Sheet remains largely under-borrowed.

Impeccable vendorship

The AABL management focused on strengthening its vendorship through adequate capacity, globally-benchmarked manufacturing facilities, credible practices and superior product quality. The company has been a multi-decade single-source vendor to one of the largest branded liquor multinationals operating in India, validating its credentials.

Multi-level integration

The AABL management selected to enhance competitiveness through the manufacture of ENA and downstream products as well as power cogeneration (60 per cent self-sufficiency to rise to 100 per cent following ENA capacity expansion). The company's portfolio also comprises a range of products – ENA, IMIL and IMFL – representing

a progression in value-addition and product diversity

Multi-feed security

The AABL management selected to invest in equipment that would accommodate multi-grain feedstock as opposed to relying on molasses. This decision widened the company's flexibility in being able to draw on diverse grain sources and moderate the impact of unforeseen cost increases by shifting from one grain source to another, particularly relevant in a business marked by a high raw material cost

Low carbon footprint

The company invested proactively to eliminate effluents discharge, winning the support of large marquee multinational customers at one end (in exchange for assured supply capability) and the support of its other stakeholders (bankers and neighbouring community), emerging as a model in a challenging business

Logistically-attractive Madhya Pradesh location

The company selected to locate its state-of-art-distillery complex about 50 kms from Indore. The state is equidistant from the largest ENA and liquor consuming markets of the country, strengthening logistical competitiveness.

Knowledge-led yield improvement

The company has progressively invested in its team to enhance ENA process efficiency to among the highest standards in the country in addition deriving more from less and enhancing product purity. This commitment made it possible for the company to be respected as a thought-leader in the country's distiller sector.

Footprint

The company has selected to grow its branded liquor footprint state-by-state as opposed to carpet bombing its presence.

OUR STRENGTHS

Our rich experience of four decades in the business. Our reputation of being an ethical company. Our rich pool of knowledge capital. Our enduring relationships with large distributors and retailers. Our impeccable environment compliance record. Our reputation as credible paymasters. Our high ENA quality, making us a trusted single-source vendor. Our enduring relationship with large marquee and demanding customers

INFRASTRUCTURE

Land bank

The company selected to invest in a large land bank (350 acres), representing a high operating leverage and economies of scale following the decision to expand out of the same location. The ₹ 80 cr ENA expansion (10 acres) is likely to be implemented at a considerably lower cost and time than if the location had been different and the project greenfield

Global technologies

The company selected to invest in cutting-edge manufacturing technologies with the dual objective of enhancing operating competitiveness (reflected in superior input-out ratios and declining manufacturing costs) and aligning environment compliance in line with established global benchmarks.

Network

Our branded products are available in MP, Delhi and Karnataka through a strong network of distributors and dealers catering to the growing needs of nearly retailers. The Company's sales and marketing team engage frequently with the retail trade to enhance product visibility, availability and offtake.

Human capital

Our team comprises about 300 experienced shopfloor workers, technologists and management professionals; over 70% of our employees have been with Company for ten years or more.

PRODUCT

Category range

The Company's offerings span the range of the alcohol-beverage spirits marked by multiple offerings in various categories catering to different price points. The Company has a balanced portfolio across the categories of whisky, rum, gin and vodka, among others.

Proactive process and product research

The company has invested extensively in product and process research. The result is that even as some manufacturing technologies were drawn from dedicated external specialists, the company worked on those to enhance efficiencies, making it possible for the plants to generate more than nameplate throughput (capacity utilization about 100 per cent, 2016-17, for instance).

Building block

The company selected to increase investments in grain-based ENA (over the molasses equivalent), deriving a superior product in line with the material requirements of marquee branded liquor customers, lower effluents discharge and lower material consumption (among other benefits).

OUTCOMES

Dispersed revenues streams

The company derived the largest proportion of revenues from IMIL sale (55%) even as we expect the proportion of revenues from ENA will increase (from 25% to 40%) as could the proportion of revenues from IMFL (from 8% to 20%).

Attractive debt-equity ratio

The company's gearing moderated from 2014 to 2017 even as interest cover strengthened from 3.33 to 10.58, a validation of its commitment to grow securely and sustainably.

How we market our products

STRENGTHS

The company is attractively and equidistantly located in India; the company can market products to all parts of the country with logistical economies; four large contiguous states have enhanced transportation efficiency.

The company is one of the few liquor companies to have evolved from the regional to the national across the last decade in a complex sector where each state is marked by regulatory challenges

The company is not just a responsible manufacturer marked by extensive regulatory and ethical compliances; the company is also an effective marketing company – a unique combination

The company has been a vendor to Diageo from the late Nineties, including consistent Smirnoff vendorship from 2002 onwards

Due to this longstanding association, we enjoy the reputation for marketing products in line with global benchmarks

The enduring Diageo vendorship has helped validate the company's spirit quality; the triple-distilled Smirnoff quality is a benchmark; the company is the single-source supplier (achievement) of this prestigious brand to Diageo for more than a decade.

THE COMPANY IS NOT JUST A RESPONSIBLE MANUFACTURER MARKED BY EXTENSIVE REGULATORY AND ETHICAL COMPLIANCES; THE COMPANY IS ALSO AN EFFECTIVE MARKETING COMPANY – A UNIQUE COMBINATION

RISK MANAGEMENT AND ADEQUACY OF INTERNAL FINANCIAL CONTROLS

The Company's system of financial and compliance controls with reference to the financial statements and risk management is embedded in the business process by which the Company pursues its objectives.

Management is responsible for establishing and maintaining adequate disclosure controls and procedures and adequate internal controls over financial reporting with respect to financial statements besides its effectiveness in the context of applicable regulations. However, the Company as evident from the nature of its business has deposited cash amounting to ₹1360.21 Lakhs, mainly consisting of cash sales collections and other receipts, in its bank accounts during 9th November 2016 to 30th December 2016. During the course of enquiry of such deposits by Income-tax authorities, the company was unable to furnish confirmations to the satisfaction of the Income-tax authorities for a sum of ₹100 Lakhs. Therefore, in the month of March 2017, in order to avoid harsher tax consequences and unwarranted future litigation, the company has declared a sum of ₹100 Lakhs, received in part payment of 'Other Receivables' and deposited in bank account, as undisclosed income under the Pradhan Mantri Garib Kalyan Yojana, 2016 (PMGKY 2016) and paid applicable tax thereon.

The Internal Auditor, the Audit Committee as well as the Board of Directors conduct from time to time an evaluation of the adequacy and effectiveness of the system of internal controls for financial reporting with respect to financial statements.

Management Discussion & Analysis

GLOBAL ECONOMY

World growth is expected to rise from 3.1 % in 2016 to 3.5% in 2017 and 3.6 % in 2018. Stronger activity, expectations of more robust global demand, reduced deflationary pressures, and optimistic financial markets are all upside developments. But structural impediments to a stronger recovery and a challenging balance of risks remains tilted to the downside, especially over the medium term.

REVIEW OF THE INDIAN ECONOMY

World Bank estimated India's GDP growth at 7% for FY2016-17, post demonetization.

During FY2016-17, the Government embarked on decisive initiatives in digitisation, GST and FDI to ensure that all major service and industry sectors returned to status quo by Q4 end. Consequently, the Asian Development Bank expects the Indian economy to grow at an accelerated 7.4% in FY2017-18 and 7.6% in FY2018-19, retaining its position as the world's fastest-growing major economy.

GLOBAL BEVERAGE MARKET

The global beverage market looks good with opportunities for alcoholic and non-alcoholic beverages. The global beverage industry is expected to reach an estimated US\$1.9 trillion by 2021 and is forecast to grow at a CAGR of 3.0% from 2016 to 2021. Within global beverage industry, beer is expected to remain the largest segment by value. Acceptance of alcohol consumption by consumers, population base of the younger generation, and increasing per capita income are the major driving forces that spur growth for this segment over the forecast period.

GLOBAL ALCOHOLIC BEVERAGE MARKET

Technavio's market research analysts have estimated the global alcoholic drinks market to grow steadily at a CAGR of above 2% by 2020. The growing demand for premium alcoholic beverages is considered to be one of the primary drivers for this market. Due to the increase in disposable

income of customers, alcohol use is being considered to be more of a status symbol and the association of premium labels with quality as well as taste has led to premium brands being high on demand compared to economical drinks.

Beer dominated the alcoholic drinks market and accounted for approximately 75% of the market share in the same year. Factors such as improvement in the quality, improvised marketing and advertising activities will drive this market segment's growth during the forecast period. Westernisation, increase in the young population, and the demand for craft beer are also expected to drive the growth of this segment in the next four years.

Efforts by alcoholic beverage manufacturers for strengthening distribution channels and extension of purchase channels such as online stores, and convenience stores is also contributing substantially to the growth of the global alcoholic beverages market.

However, a high degree of competition among major players to obtain the maximum market share is one of the major impediments to the growth of this market. This also restricts the entry of new players and their chances of sustenance if any in the highly competitive alcoholic beverages market. Other than this, increasing prices of raw materials, availability of non-alcoholic beverages, and stringent licensing requirements for the manufacture of alcoholic beverages are other factors restraining the growth of this market.

ALCOHOL BEVERAGE MARKET IN INDIA

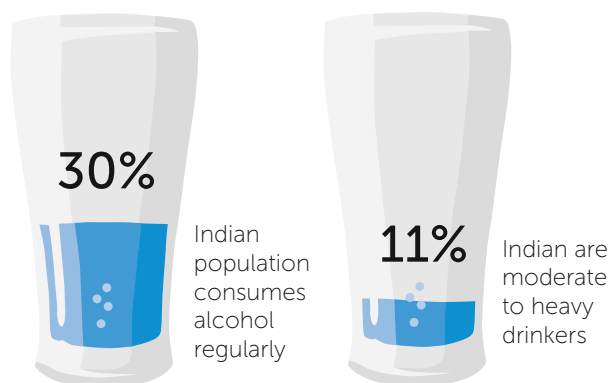

India is the biggest manufacturer of alcoholic beverages in the world. Alcoholic beverages market matured in India over the years but still it is highly confined to limited varieties. There are around 10 million retail outlets and around 500,000 bars and pubs in the country. In past 5 years the alcoholic beverages market witnessed a growth of 18.22% from 2010 to 2017.

India is the third largest liquor market in the world, with an overall retail market size of US\$35 billion per annum.

A global study by Paris-based Organisation for Economic Cooperation and Development (OECD) has found that alcohol consumption in India has risen by 55% over a period of 20 years, from 1992 to 2012.

With the minimum drinking age varying from 18 to 25 across states, India had approximately 485 million people of legal drinking age in 2013. This is more than the population of the United States and Mexico combined. Another 150 million are predicted to join this group by 2018.

According to a WHO report, nearly 30% of the Indian population consumes alcohol. The alcohol industry leaders have recognised that women and the young population are the key market segments and hence their marketing campaigns are specially focused on this segment. To attract this segment companies are launching new product categories such as flavored drinks and pre-mixed cocktails. Alcohol is becoming easily accessible thanks to availability of beer and wine at certain shopping malls and supermarkets.

Indians spend on booze (Amount in Rs.)

INDIAN MADE FOREIGN LIQUOR

The Indian Made Foreign Liquor (IMFL) is the largest segment in the Indian alcoholic beverage industry. This market has been further bifurcated into Whisky, Rum, Brandy, Vodka and Gin. This industry has grown at an overall steady pace triggered by increasing population and disposable income, and also the fact that it is increasingly gaining social acceptance.

The Indian Made Foreign Liquor (IMFL) segment was estimated to reach a market valuation in excess of ₹1,400 billion by FY2016-2017 end. This segment is estimated to be valued at more than ₹3,000 billion by 2026, expanding at a

CAGR of 5.2% over the forecast period

Indians have preference for brown spirits in the IMFL segment (which is 95% by volume) over white spirits (which is 5% by volume). Brown spirits are categorised as whisky, rum, brandy and white spirits include gin, vodka, white rum. Whisky is the most popular drink, accounting for 57% of the IMFL Market.

Whisky consumption is reportedly expected to grow 8-8.5 %annually. The overall IMFL market is increasing at the rate of 9-10% annually. In India's 310 million cases strong spirits market, whisky sales overwhelmingly dominate with 175-million cases, accounting for 57% of the market. While

the whisky market reported 6.7% growth in the last five years. Rum the second largest spirits category with 23 million in sales volume reported only a 1.3% growth in the same period.

IMFL dominates the Indian Liquor Market with a lion's share; this segment is continuously witnessing growth as large consumers are following the premium and better-quality liquor. With the rise in their propensity to spend and increased hygiene risk in the consumption of country liquor other segments such as IMFL and Beer set to gain. The market has undergone several positive changes in the past 5 years and has strongly positioned itself relative to other segments with several economies of scale.

One notable factor in the IMFL segment is the tremendous growth in the vodka market. It is the fastest growing among all types of liquors.

Although it accounts for only about 4 %of the IMFL market, its consumption has been growing at the rate of about 44% over the past few years. The growth drivers for white spirits include increasing consumption of white spirits among women and popularity of white spirits over brown spirits amongst the younger drinking population.

Moreover, the per capita consumption of IMFL in India is 0.82 litres per annum which is very low as compared to the global average of 4.63 litres per annum, but the demand is growing since alcohol consumption is now socially accepted in India and also because of increase in disposable income of the citizens.

INDIAN MADE INDIAN LIQUOR

It is produced in local licensed distilleries and is made of cheap raw material, primarily rectified spirits of grains or molasses. As the production cost for country liquor is low, the excise duties are also lower than they are for other liquor. The idea behind country liquor was to provide cheap alcohol and thus check the illicit trade of alcohol. However, illicit production of country liquor is still fairly common in India. Some alcoholic drinks that are low in alcohol content are also made in homes in some tribal areas.

Indian Made Indian Liquor (IMIL) is an attractive consumer play into India's large and growing bottom of pyramid consumers. Already at a substantial ~230 million cases (US\$4.6billion in 2014), it is expected to reach 352million cases (US\$8.4billion) in next five years driven by positive demographics, improving consumer loyalty with branding and upward shift from illicit liquor with conducive regulations . IMIL has long been the liquor of choice for the price sensitive, lower income group (~40% of India's population

excluding below poverty line). It is being further driven by positive demographics – a young and growing population as well as upward shift from illicit liquor and toddy with increasing affluence.

At the same time, IMIL is losing its hold in the total alcoholic beverages market in India. The segment is continuously witnessing a decline as number of consumers have started switching to premium and better-quality liquor in the IMFL segment with the rise in their propensity to spend and increased hygiene risk in the consumption of country liquor. Country Liquor is estimated to lose its market share in the long run to other segments.

REGULATORY SCENARIO IN INDIAN MARKET

The alcohol industry in India is highly regulated under the legislative power of individual states. Additionally, national laws and regulatory bodies, such as Food Safety and Standards Authority of India (FSSAI), also significantly impact the alcobev industry. A spate of recent regulations has further tightened the regulatory controls on the industry. Some of the recent developments include:

Prohibition of Liquor:

In April 2016, Bihar became the fourth state in India to implement a total liquor ban. This move is estimated to impact the IMFL industry, hotels and the Bihar state government by approximately ₹4000 crores, in the form of the taxes and duties earned from liquor sales. Also on the flip side, banning alcohols encourages bootleggers and increases the sales of poor quality counterfeit products, posing serious health risks to consumers.

Goods and Service Tax (GST):

The GST, projected to be 'the single most important tax reform after 1947', is a single, comprehensive tax that will subsume all the indirect taxes on consumption like excise duty, service tax, VAT etc

However, tax on alcoholic beverages has been carved out as an exception to the definition of GST in the present laws. Non-inclusion of alcobev industry under the GST ambit seems to be the least priority of the government and will impact and hurt the industry sentiments as it will break the chain of seamless credit.

GROWTH DRIVERS

Urbanisation: More and more people are migrating towards bigger cities, where they are exposed to a wider variety of alcoholic products, including IMFL. Between 2001 and 2011

census, India's urbanisation went up from 27.8% to 31.1%.

Favourable demographics: India is a young country, with more than 60 percent of Indians falling in the 15-45 years age group and 45% below 25 years of age. The latest census 2011 data released shows that around 41% of India's are below the age of 20 years. This is the cohort the industry targets as potential customers. About 485 million Indians are currently of drinking age and another 150 million will be added to this group in the next five years.

Changing social norms: Over the years, there has been a change in attitudes, making consumption of alcohol more socially acceptable. This acceptability extends to drinking in family environments, at social events, and by females/youngsters. The increase in consumption of vodka by young people and women is just verifying the change in the mindset (June 4, 2016). The contribution of the nightlife industry also known as PBCLs (Pubs, Bar Cafes, and Lounges) to the nation's GDP and employment has largely gone unrecognised. Currently the licensed bar premises are contributing over ₹11,500 crores to the Indian economy and growing at an astonishing CAGR of 20% making it the fastest growing Industry in the country, outperforming the Indian IT Industry and beating GDP growth rates 3x by employing over 20 lac people.

Consumer spending: Even assuming conservative GDP increases of 6% to 7% a year, consumption expenditures are expected to rise by a factor of three to reach US\$4 trillion by 2025. India's nominal year-over-year expenditure growth of 12% is more than double the anticipated global rate of 5% and will make India the third-largest consumer market by 2025. Rising affluence is the biggest driver of increasing consumption.

Changing lifestyle: The pattern of urbanisation is changing with the growing affluence of the people. The share of elite and affluent households will increase from 8% to 16% of the total, while the share of strugglers will drop from 31% to 18% by 2025. With the rising affluence, the lifestyle also changes.

STRENGTHS

Increased alcohol accessibility and availability: There has been an increase in the variety of alcohol brands and types and all of them are easily available in Government-licensed outlets, Government shops (monopolies), private licensed retail chains (permitted since the past couple of years), restaurants, and bars.

Product Portfolio & Diversity with strong supply chain network: The Company product portfolio extends across

all segments and caters to diverse consumer choice & preferences and the company enjoys long term business relations with leading raw material supplier, ensuring uninterrupted production and supplies.

Rural electrification: Hon'ble Finance Minister, Mr. Arun Jaitley in the Union Budget said that the Government is set to achieve 100% rural electrification by May 1, 2018. Therefore, there are many programmes in implementation due to which the shopkeepers can hold more stocks and the taste is also better. This has resulted in increase of IMIL consumption.

Other factors that have been conducive to the industry include relaxed overseas trade rules, the availability of alternative and innovative means of targeted marketing and promotion. The influence of these factors is visible in the increase in alcohol consumption.

CHALLENGES

Demonetisation: It has taken a hit on the sales with some companies going into deceleration in terms of growth while in the previous year in the same period the growth was 11%.

No shops within 500 meters: Supreme Court ordered all the shops to close down which are within 500 meters of national and state highways. Even after West Bengal Government changing the classification of the highways to artificial maze built to bypass the distance, 30% of the premium hotels are to be affected as per Crisil report. Mint reported that 8-10% declines in sales could be seen as its effect in the first quarter and after that it will normalise.

Counterfeiting: FICCI in a report in 2014 attributed the loss in alcohol industry due to counterfeiting at ₹6309 crore.

THREATS

Banning in state: Bihar has already banned the consumption of liquor in addition to Gujarat, Manipur, Nagaland and some other places. An approximate ₹4,000 crore of losses is estimated, to be faced by Bihar Government.

Increase in taxes: not only banning in states but respective State Governments are increasing duties on liquor to act as a deterrent.

GST IMPACT: Implementation of GST will have a credit loss of VAT input in the form of GST as the final product & industry is outside the purview of GST. The impacted quantum will be an approximate average of 2% of the turnover of the company. However, the players having strong fundamentals and backward integration will only outperform.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The company has engaged the services of independent professional to carry out the internal audit and ensure that recording and reporting are adequate and proper, the internal controls existing in the system and further that sufficient measures are taken to improve, update and strengthen the internal control system.

In addition to statutory audit, the financial controls are also reviewed by the Internal auditors, who report their findings to the Board and the Audit Committee.

The committee ensures the progress of the internal audit initiatives, significant and major audit observations and further planning and implementation of follow up action required.

INFORMATION & TECHNOLOGY

In line with overall growth objectives and strengthening of infrastructure base, the company continues to invest in IT (Information Technology) viz SAP Enterprising Resource Planning System and with the implementation of these software's the company has improved its operational

efficiencies through various functional integration.

HUMAN RESOURCES AND INDUSTRIAL RELATIONS

The company constantly facilitates and encourages its employees at all levels to enhance their knowledge and skills and also firmly believes that Human Resource Development (HRD) strategies and practices will continue to provide a sustained competitive advantage. The management of your company deeply appreciate the spirit and commitment of its dedicated team of 270 Employees as on 31.03.2017

CAUTIONARY STATEMENT

Estimates and expectations stated in this Management Discussion and Analysis Report may be "forward-looking statements" within the meaning of applicable securities, laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to your company's operations include economic conditions affecting demand / supply and price conditions in the domestic and international markets, changes in the governments regulations, tax laws and other statutes and incidental factors.

ANNEXURE "B" TO THE AUDITOR'S REPORT

The Annexure referred to in paragraph 2(f) under "Report on other Legal and Regulatory Requirements" of our Independent Auditor's Report of even date on the financial statements to the members of Associated Alcohols & Breweries Limited for the year ended 31st March 2017.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Associated Alcohols & Breweries Limited ("the Company") as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and Standards on Auditing, and deemed to be prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated

effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that :

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial

reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
